PACIFIC STATES WATCHMAN.

CONSOLIDATED WITH "PACIFIC WORKMAN."

A Home Journal for the Ancient Order of United Workmen.

VOL. 5.—NO. 1. SAN FRANCISCO, CALIFORNIA, JANUARY 1, 1881. { In advance, $2 a year / Single copies, 10 cents

A Family Scene in Pompeii.

Sixty-three years before Christ, a violent earthquake shook the city, ruined many of the buildings and drove almost everybody from the place. The people returned after awhile and went vigorously to work to rebuild the city. Very much had been done, temples had been finished, private residences completed, business and pleasure had resumed full activity. A crowd was assembled in the amphitheater on November 22, 79, to witness a gladatorial display, when there occurred a terrible eruption of Vesuvius. A deluge of dust is thrown over the city. The people rush hither and thither, some out of the city, some to seek shelter in the shops, under the theaters and in underground retreats. But there comes a deluge of fiery stones and ashes, which fills the streets, breaks down the roofs, enflames the houses, and when the eruption had ceased, the city was buried.

Pompeii is again being brought out to the sight of man, and about one-third is now unearthed. In these excavations, not only are the buildings exposed and the various household utensils, etc., discovered and saved, but even the bodies of the inhabitants, or, rather, the forms of their bodies. The smaller articles, which might be stolen, are placed in a museum at Naples.

A number of years ago, a Belgian artist, Coomans, visited the place, and was so struck with its beauties that he devoted himself to delineations of antique life. A copy of one of his most charming works is here given. He has examined the city and the museum at Naples, and has thus been enabled to reconstruct a scene as well as if from actual life. One or two points illustrated by this picture, may be spoken of here.

The dress of the women, as can be seen, was of a rather light description. The complete costume consisted of three parts, a simple shift, worn next the skin, a tunic, sometimes with short sleeves, which, however, generally covered only the upper part of the arm, and were not sewn together, but fastened over the shoulders by means of clasps, and a long, flowing outside garment for wear out of doors. The tunic was confined around the waist by a band, which was concealed from view by the folds of the upper part of the garment. That of the lower classes reached only to the knee, showing the ornaments on the legs; but the higher classes wore tunics reaching to the feet. Sandals were worn in the house, and bootees in the streets, both being often of bright colors and highly ornamented.

Fine, long hair was highly prized. There were various methods of dressing it. The simplest way was in smooth braids with a knot behind, but sometimes a storied edifice was used. To keep the hair in place, bands and pins were used. Often at night, or when busied with household affairs, nets, frequently of gold thread, were employed. Ornaments were worn in the hair, on the arms and neck, and even on the legs. The Pompeiian ladies seem to have been very fond of ornamentation of their persons.

A FAMILY SCENE IN ANCIENT POMPEII.

Evidently the dress of the children was very simple.

The houses were sometimes finely decorated with panellings. Carpets were not used, but we see here a tesselated pavement. The household utensils were varied in form, often of the most complex and beautiful manufacture. The engraving shows a handsome candelabra on the table and one on the floor near the fountain.

SEND YOUR BEST.—It is important to each Lodge in the State that they select their best and fittest members for representatives to the Grand Lodge. The election for representatives occurs on the first regular meeting in January. The good of the whole Order rests upon the action of your representatives in the Grand Lodge, and every member in the Lodge should turn out and do his duty in the selection of representatives in the subordinate Lodges. We speak of this more particularly because the election coming so soon after the annual meeting, is quite liable to be overlooked by many members or allowed to pass as a matter of too little importance.

THE A. O. U. W. is spreading in Oregon.

Fraternity.

We are glad to see this feeling of fraternity exemplified and brought before the members of the A. O. U. W. on all proper occasions. Some excellent remarks on this subject were given by Prof. Finch, M. W., of Mt. Hamilton Lodge, and City Supt. of Public Schools, San Jose, in response to the toast, "Our Guests," at the recent fraternal visit to Garden City. Bro. Finch spoke as follows:

Fraternity is the foundation on which our Order is built. It is the bond of common purpose which unites us together as a band of brothers. It is the blood which coursing through the whole system gives it life and strength, and continued existence. Whatever promotes this fraternal feeling promotes the good of the Order and should be encouraged by every means consistent with our integrity and honor. Our guests recognizing the power of social intercourse strengthen themselves and strengthen us by this fraternal visit. It is said that Alameda county and Oakland in particular, is the stronghold of the Order on this coast. Why? Not simply because Bro. Jordan and Bro. Pratt and a few more prominent members of the Order happen to be there, although they are doubtless entitled to much credit for this condition of affairs, but it is merely owing to the fact that the different Lodges there, by their fraternal meetings, create a bond of sympathy and develop a combined power, which could not be exerted by each one acting separately, without the moral support of the other. And the result is, that good, strong men, men of intelligence, men of influence, men of high, moral, social and business standing, are brought within the circumscribing limits of our Workingmen's companies. We are glad to meet our brothers within the sacred precincts of a Workman's Lodge. We are glad to hear from them, of the prosperity of the Order, within the limits of our own Grand Lodge, as well as in parts more remote. We are glad to show them what we have done, what we are doing, and what we hope to do. We are glad to meet them in the refreshment hall and see what they can do. [Laughter.] And may our union around this festal board be the true symbolic type of the union of Workmen in a great and noble cause. We wish our brethren a hearty godspeed, and trust that in the future as in the past, should any of their number be laid low by the hand of death, their widows and orphans may rise up to bless the survivors and Order of United Workmen.

MISSOURI is prompt and generous in her contributions to the Upchurch Fund, and other States are gradually contributing their quota.

Home Miscellany.

My Ship.

When my ship comes in, when my ship comes in,
For many long years my song has been;
And the freight of love 'twould bring to me
Was more than Eastern treasure could be.
I looked in the future with Fancy's eye,
And beheld a most noble argosy,
With gleaming sails, and colors gay,
Come grandly sailing up the bay.

I waited for the vision bright,
But it always seemed just out of sight;
And beaming above Hope's brilliart star,
To guide my ship from regions afar.
My heart was glad, though it tarried so long,
And I said to myself, "Be patient, be strong,
Sometime in the future, 'twill surely come,
And the hope of my life land safe at home."

At last, when lone'y and tired one day,
I saw my ship outside the bay.
'Twas a glorious sight to my weary eye,
For I thought it afar, when lo! it was nigh.
I thanked the Lord for his mercy and love,
Who could look down from his throne above,
And grant such a blessing to "even me,"
My beautiful ship from over the sea.

The sun shone brightly o'er waters blue,
The sky was fair, the wind gently blew;
With sails outspread and glittering spar,
My ship seemed just beyond the bar.
But while I looked with joy and pride,
The ship was tossed from side to side;
The clouds grew black, the thunder roared,
And rain in blinding torrents poured.

The loud wind blew a fearful gale,
And reft the masts of every sail;
Then with a loud and sudden shock,
The ship was dashed against a rock.
I cried aloud, "O, Father hear,
And save the ship so near and dear!"
The billows rolled o'er line and spar;
My ship went down beyond the bar.

—*Norma, in Rural Press.*

The Minister's Pie.

"Look here, Sally!"

Mrs. Deacon Farrell, brushed the flour from her hands, casting meanwhile a complacent eye over the well-filled kitchen table, with its generous array of unbaked pies and cakes, the plump turkey stuffed and trussed ready for the morrow's baking, and the big chicken-pie to which her skillful fingers had just put the finishing touches, as she repeated rather more decidedly:

"Look here, Sally! There's enough chicken left, with the giblets—that I never put in my own pie, because the deacon don't relish 'em—ter make a Thanksgiving pie for the minister's folks. 'Twon't need to be very large," she added, in reply to Sally's doubtfullook. "Only the minister and his wife,—'an you can bake it in that smallest yaller dish."

"Now I am going up stairs ter look over them rug-rags, 'an you make it and bake it right off, so't I can send it over by the deacon. He's got ter go out to the Corner this afternoon, and can take it along as well as not."

She bustled out of the door, but the next moment, seized perhaps with a sudden pang of compunction, she put her head in again, to say warningly:

"Be sure you put in a good parcel of gravy; that'll keep it from bein' dry, if *'tis* half giblets."

"Yes'm," answered Sally, briskly; and catching up the rolling-pin, she brought it down with an emphasis upon a lump of dough on the mold-board.

As the stairway-door closed behind her mistress, Sally dropped her rolling-pin, and a look of perplexity crept over her dull face, making it 10 times more stolid than usual, while she repeated, in ludicrous bewilderment:

"Giblets! What, in all creation, if anybody can tell me, does she mean by them?"

Involuntarily she took a step forward, but checked herself as quickly, while a cunning smile replaced the look of perplexity, and she muttered triumphantly:

"I guess I ain't a-goin' ter confess my ignorance ter the deacon's wife, and hear her say, as she always does, '*Two terms* to the 'cademy, Sally, and not know *that!*' No, *ma'am!* not while there's a dictionary in the house!"

So, softly creeping into the adjoining sitting-room, Sally hastily opened the big dictionary on the deacon's writing-desk, and began her search for the mysterious word.

"G-i-b—here 'tis!" and she read aloud to herself, with an air of triumph, the following definition:

" 'Those parts of a fowl that are removed before cooking,—the heart, gizzard, liver, and so forth,' " she repeated, joyfully, and she retraced her steps to the kitchen, and began, with great alacrity, to fill, according to directions, the minister's pie; keeping up, meanwhile, a running fire of comment for her own special benefit.

"*Six* gizzards! Well that *is* rather 'steep,' as Dan Watson would say. But I guess the deacon's wife knows; if she don't, tain't none o' *my* business. *Six* hearts! *Them's* small and tuck into the corners handy. *Six* livers! Seems ter me *they* don't fill up much," and she glanced, with a perplexed air, at a pile of denuded chicken bones that formed her only resource.

"Now, I wonder," with a sudden inspiration, "what that 'and so forth' meant? Here's 'hearts, gizzards and livers,' plenty of'em, but no 'and so forth,' and the pie aint more'n two-thirds full yet. It must mean," and she cast a bewildered look at the half-filled pie, "the chicken's legs. I never knew nobody ter put 'em in a pie, but that must be what it means, an' they'll just fill up."

No sooner thought than done. In went the three pairs of stout yellow legs upon which their unfortunate owners had strutted so proudly only a day before; on went the well-rolled dough, covering them from sight, and into the oven went the minister's pie, just as the mistress of the house re-entered her kitchen, and with an approving glance at the snowy pastry, remarked encouragingly:

"That pie looks real nice, Sally. I shouldn't wonder if, in time, you came to be quite a cook."

It was Thanksgiving morning, and Miss Patience Pringle stood at the minister's back door. To be sure it was rather early for callers, but Miss Patience was, as she often boasted, "one of the kind that never stood on ceremony." Indeed, she didn't consider it necessary even to knock before she opened the door, although she was thoughtful enough, in opening it, to do so softly. The minister's wife was just taking from the oven a newly-warmed chicken-pie, which she nearly dropped from her hands, so startled was she by the sharp, shrill voice that spoke so close to her ear:

"Good mornin', Mis' Graham. Hain't been ter breakfast yet, I see. We had ours half an hour ago. I know that my mother used ter say that if anybody lost an hour in the mornin', they might chase after it all day, an' not catch up with it then.

"That's a good lookin' pie,—pretty rich pastry, though, for a chicken-pie! I don't never put much shortenin' in anything of that kind; it's rich enough *inside* ter make up. But you're young, an' have got a good many things ter learn yet. I run in ter see if yer could spare me a cup of yeast, mine soured, an' the last batch o' bread I made I had ter throw to the hogs."

"Certainly," and a roguish smile flitted over the fair face of the minister's wife, at this specimen of her meddlesome neighbor's own economy. But she had learned the rare lesson of a judicious silence, and taking the cup that Miss Patience produced from beneath her shawl, she bade her visitor be seated while she left the room to get the desired article.

As her steps died away, Miss Patience noiselessly arose from her seat, and approaching the dresser on which the pie stood, peered curiously into the apertures in the crust, her sharp face expressing eager curiosity.

"I'll bet a ninepence she didn't know enough ter put crackers in. I wish't I *could* get *one* look, jest ter satisfy my own mind," she added, and determined to accomplish her object at all hazards, she ran a knife deftly around a small portion of the edge, and inserting four inquisitive fingers, lifted the brown crust, and took a glimpse of the contents.

A look of unmitigated disgust passed over her face. Dropping into a convenient chair, she actually groaned aloud:

"Well, I never! an' we payin that man five hundred dollars a year, besides a donation party at Christmas. Ough!"

Unsuspicious Mrs. Graham, as she returned with the yeast, was somewhat puzzled by the sudden frostiness of her guest, who hurried out of the house as if some dreadful contagion had haunted it; but when the minister, in carving the pie that the deacon's wife had sent, made two curious discoveries almost simultaneously, the reason for Patience's altered demeanor was made plain, and the young pair indulged in a hearty laugh that made the old parsonage ring like a peal of Thanksgiving bells.

The Tuesday following was the regular day for the weekly sewing-circle, and seldom had that interesting gathering proved so lively and animated as on this occasion.

Miss Patience was in the field bright and early, and it was evident at a glance to those who knew her best that she was well nigh bursting with some important secret that she was only waiting a fitting opportunity to divulge. That opportunity was not long in coming, for Mrs. Dea. Farrell, who was a constitutional croaker, took occasion to say, in reference to the hard times:

"The deacon has been tryin' ter collect the church tax, and he says he never found money so tight in all the years he's lived here. It's as hard ter get five dollars now as it used ter be ten."

"And no wonder," spoke up Miss Patience, with the stony severity of a sphinx. "You can't expect folks ter feel like payin' out their money when they see it fairly thrown away an' wasted."

Everybody looked curious, and some of the younger girls began to bridle defiantly. The minister's sweet young wife was evidently a favorite with them, at least.

"What do you mean by that?" asked Mrs. Deacon, pointedly. "Mis' Graham is young and inexperienced, to be sure; but, as the deacon was sayin' only yesterday, she does very well indeed, considerin'."

Miss Patience tossed her head knowingly. "I don't want ter say nothin' ter hurt her, but, livin' next door as I do, I can't always help seein' and hearin' things that other folks can't be expected ter know about, and when I see an' know things like"—

There was an ominous pause, and the deacon's wife asked, excitedly:

"Like what?"

"Chicken-pies, with the legs an' feet of the chicken baked in!"

Had a thunderbolt fallen among them, it could not have caused greater surprise to those tidy, thrifty New England housekeepers than this dreadful revelation of the incapacity of their pastor's young wife.

"Are you *sure* of it?" gasped one matron, breaking the ominous silence.

"I know it for a fact," was solemnly returned.

"Chickens' legs in a pie!"

"She's a born fool!" ejaculated the deacon's wife, indignantly, "and I'm thankful for her poor husband's sake, that I sent her over one of my pies yesterday. They had to throw hers away, of course, and it's lucky that he didn't have ter go without his Thanksgivin' breakfast on account of her ignorance an' shiftlessness."

"How did you know about the pie?" asked one of the girls.

Miss Patience bristled defiantly. "That's nobody's business but my own!" she retorted tartly. "I don't go round ter find out things, but when they're thrown right into my face, as you might say, I don't shet my eyes no more'n other folks."

Just here the door opened, and in walked the subject of their conversation, her pretty face glowing with the haste she had made, and a mischievous twinkle in her brown eyes, that nobody noticed, so occupied were they in hiding the confusion that her sudden entrance had created.

Walking up to the table where most of the ladies were sitting, she saluted them cordially; and then, holding out upon the end of one slender finger a well worn silver thimble, she said, archly:

"Where do you think I found your thimble, Miss Patience?"

So pleased was Miss Patience to regain her lost treasure, that she forgot for a moment all her assumed dignity, and exclaimed, joyfully:

"Well I declare, I *am* glad ter see that thimble once more! I told Mary Jane that I felt *sure* I had it on my finger when I run into your house Thanksgivin' mornin' arter that yeast. But when I got home, it wa'nt nowheres to be found. Now where *did* you find it?

Her shrill, high voice had attracted the attention of all in the room, and everybody looked up curiously as the minister's wife replied, with an innocent smile:

"In the chicken pie that our good friend here—and she nodded brightly to Mrs Farrell—sent me. I left the pie on the dresser when I went down cellar after your yeast, and as soon as I came back, I put it on the table, and when my husband cut it, *there* was your thimble in it. How could it have got there? It is certainly very mysterious anyway."

Silence, dead, profound, yet, oh, how terribly significant to the deacon's wife and her spinster neighbor, fell upon the group.

This was apparently unnoticed by Mrs. Graham, who, with a playful admonition to Miss Patience to take better care of her thimble in future, began an animated conversation with the ladies nearest her, that soon restored the company to their wonted ease and good-humor.

But poor Miss Patience! She never heard the last of that lost thimble. While the deacon's wife, to the day of her death, never trusted any hands but her own to make Thanksgiving pies for the minister.—*Youth's Companion.*

General Garfield at Thanksgiving Service.—The plainest church in Washington with the most unpretentious congregation, is the one where General Garfield attended Thanksgiving services, Thursday. The correspondent of the Boston *Advertiser* says: The fashionable churches were crowded, and their commodious audience rooms were tastefully decorated with grains and fruits and autumn foliage. General Garfield had been invited to attend the President's church, and his declination being known, it was supposed that he did not expect to attend anywhere, so there was only the usual audience in the little church where he and his wife are members. The church is a small one-story frame structure, only 30 ft. by 40 ft. There is scarcely a village of 300 inhabitants in the north that cannot boast a more pretentious church building. In this quiet spot and in this plain manner the President elect attended his first service in the capital. At its close the small congregation, with which he and Mrs Garfield have long worshiped, crowded around those who were now the most prominent couple in the land, and extended most hearty congratulations. The simple surroundings, the audience without official rank, the great prominence in the country of the two central figures, and their full identification with these church friends, together made a scene deeply touching to the few strangers who witnessed it. The allusions of the pastor to the great honor which had come to one of their members was in keeping with all the rest.

The recent sentence of Perry, the London underground robber, got somewhat "mixed" in its translation into the Russian papers. Instead of announcing that he had received 20 years penal servitude and 30 strokes with the cat, the provincial journals of Russia stated that he had been sentenced to "20 years' imprisonment with 30 cats?"

"I never did see such a wind and rain storm," said a man in a coffee-room. "And pray sir," inquired a would-be-wit, "since you saw the wind and storm, what might the color be?" "The wind blew, and the storm rose," was the quiet rejoinder.

Miners' Families and Mining Towns.

"Well I am going to leave you," said an old Comstocker yesterday, as he offered his hand to your correspondent.

"Where are you off to?"

"Down to Arizona."

"For good?"

"If I fall easy I'll stay where I'm put."

I was astonished. He was a man who had hung on to the Comstock through thick and thin since '61. He had for years been the proprietor of a popular saloon and of the leading faro and keno games. He had been an Alderman, and one of the leaders of the Republican Party. His horses have been the fastest, his turnouts the nattiest, and altogether he has been a "prominent citizen."

"Is the Comstock played out?" I asked the departing prominent citizen."

"Yes, for me. There is nothing in the saloon or the games now. The town is gone in."

"How do you account for it? There seems to be a pretty big population."

"Yes; but it ain't the right kind. You see that row of buildings (waving his hand to indicate one side of C street). Well, all them rooms upstairs used to be filled with boys. Now the boys all have houses back here on the hill—all got wives and children, and don't appear on the turf nights no more. That's good for them, but it's bad for me. Why, if you want to know why the town's gone in, just drop around the schools when the youngsters are being let loose. In the flush old times a young one was a phenomenon here; now there's thousands of 'em. Well, all of them cubs have got to be fed, and the fellahs that's got to feed 'em and cloth 'em ain't got any money to throw away. That's good for them, but it's bad for me. As a citizen I am glad of it, of course; but as a matter of business it's just ruin, and I am off for Arizona. It's a new country, and old times come again."

"You'll open a game?"

"Of course. That's what I'm after. I'll prospect around and find a camp that isn't too near the railroad, and open a saloon and give 'em a lay-out."

"Why do you want to get away from the railroad."

"Why? Because when a town is near a railroad it soon gets filled up with dead-brokes and stiffs. It's easy to get to and to get from. Men that travel by stage have got to have money, and they're the kind of men that make a camp hum in my line.—*Cor. Examiner.*

Children Smoking Tobacco.—The *Christian Union* points out the pernicious results of smoking by young persons. It says:

In one of the schools of Brooklyn a boy 13 years old, naturally very quick and bright, was found to be growing dull and fitful. His face was pale, and he had nervous twitchings. He was obliged to quit school. Inquiry showed that he had become a confirmed smoker of cigarettes. When asked why he did not give it up, he shed tears and said that he had often tried but could not. The growth of this habit is insiduous, and its effects ruinous. The eyes, the brain, the nervous system, the memory, the power of application, are all impaired by it. "It is nothing but a cigarette" is really "It's nothing but poison." German and French physicians have recently protested against it. And a convention of Sunday and secular teachers was recently held in England to check it. It was presided over by an eminent surgeon of a Royal Eye Infirmary, who stated that many diseases of the eye were directly caused by it. Parents, save your children from this vice if possible! Do not allow them to deceive you. In future years they will rise up and bless you for restraining them.

Benefit of Laughing.—Dr. Greene, in his "Problem of Health," says there is not the remotest corner or little inlet of the minute blood vessels of the human body that does not feel some wavelet from the convulsion occasioned by good, hearty laughter. The life principle, or the central man, is shaken to its innermost depths, sending new tides of life and strength to the surface, thus materially tending to insure good health to the persons who indulge therein. The blood moves more rapidly, and conveys a different impression to all the organs of the body, as it visits them on that particular mystic journey when the man is laughing, from what it does at other times. For this reason every good, hearty laugh in which a person indulges tends to lengthen his life, conveying as it does, new and distinct stimulus to the vital forces. Doubtless the time will come when physicians, conceding more importance than they now do to influence of the mind upon the vital forces of the body, will make their prescription more with reference to the mind, and less to drugs for the body; and will, in so doing, find the best and most effective method of producing the required effects upon the patient.

"Well, old fellow, where have you been?" "Been round to one of my creditors—old Skinflint, and —what do you think? I had all the difficulty in the world to get him to take a little money!" "Oh, that's impossible. Why?" "Because he wanted a whole lot?"

"What I wants ter know," said an Arkansas school board official, "is how a river's mouf is gwine ter be bigger dan its head."

For our Boys and Girls.

Our Puzzle Box.

Cross-word Enigma.

My first is in seven but not in two;
My second is in dollar but not in sou;
My third is in ink but not in pen;
My fourth is in now, also, in then;
My fifth is in tear, but not in sigh;
My sixth is in prove, but not in try;
My seventh is in gain, but not in lose;
My eighth is in pump, but not in hose;
My ninth is in early, also, in late:
My whole is the capital of a Western state.

CEPHA.

Blanks.

[The blanks are to be filled with the same words curtailed.]

1. Has the ——— ceased beating yet, or can you still ——— it?
2. I saw the burglar ——— Jules to a post in the coal ———.
3. Having paid our ——— to Jonesboro, we wish to know how ——— we must travel.
4. Suddenly our ——— stopped, and looking at the shore ahead of us our blood ran cold at sight of a monstrous ———.
5. Across the ——— door a ——— extends to prevent the entrance of animals.

OLD JOE.

Rhomboid.

ACROSS.—1. Reputation. 2. A bundle. 3. Dislike. 4 A business paper.

DOWN.—1. In nocturnal rambles. 2. An exclamation. 3. A winged animal. 4. Destiny. 5. A malt liquor. 6. Myself. 7. Found in Providence.

JENNIE.

Charade.

With proud affected mein,
A care for none like self,
My first trips through the streets—
A man-like dainty elf.

In Afric's desert plains,
Amid the lonely waste,
Where foot of man ne'er trod,
'Tis there my second's placed.

A tiny flower plant
Upon the tidy lawn,
My whole doth early bloom
To herald spring-time's dawn.

UNCLE CLAUDE.

Household Furniture.

1. A vehicle and to indulge.
2. A vegetable, a feminine name and a vowel.
3. To vibrate, a termination and a seat.
4. To guard, and to dress.

The Skating Party.

I shall never forget that beautiful moonlight evening when a party of young people had a wild frolic in skating on Mennebunk pond in H., a town in Vermont.

Squire Jenkins, the principal man of the little village, had three children—Ada, a lovely daughter of about 20 years, Lillian, aged 14, and Harry, a son of 12 years, who was blind. The misfortune of the child was very sad, yet, as he was of such sunny temper, and so gentle and kind, he was a universal favorite with all who became acquainted with him. He shared the sports of his playmates as far as possible, and when a skating party was formed, blind Harry went with the rest, drawn on a light sled by two of the swiftest skaters among the boys.

It is said that the blind have an acute sense of hearing and touch that others do not possess, and many facts seem to prove this theory correct.

The evening had passed very pleasantly with the skaters, until a challenge was given by a few to reach a certain point first—Harry's champions giving the lead, for on no condition would they leave him behind. Harry shared the excitement, and shouted and was eager to gain the desired point.

I forgot to tell you that the poor boy was not always blind. Two years before, scarlet fever had left him as he was now; whether it would be a permanent affliction was not fully decided, yet it was feared to be the case. Of course Harry knew every spot, and felt through the kindness of his mates, an eager interests if almost he could join in every game as of yore.

It had been much warmer for several days, yet the ice was thought to be safe and thick. The contestants had nearly reached the farthest side when Harry, by quick intuition, felt the ice crack and give beneath him, and felt a dampness strike his cheek. Instantly he gave a quick cry of alarm, and the next moment there was a crash, a scream, and Josiah Bentley, one of the boys drawing him, broke through a thin crust, going straight into an air hole and submerged his companion. The sled partially settled against the broken edges, and held, while Harry, firmly grasping his seat, bent carefully forward and plunged his hand into the icy current, catching hold of the sinking boy, who called frantically for help.

Rescue was at hand, but it was a work of great difficulty and great danger, as the thin ice would bear but little weight. One of the lads, Paul Reed, saved himself by catching hold of the sled and drawing himself out. The other "Si" Bentley, was held up by blind Harry until help arrived.

It was a narrow escape from death, yet no life was lost. They must have been drowned had it not been for Harry and his sled. When the party went quickly and soberly back to the house they had left so full of glee an hour before, and gathered around the table whereon a warm supper was provided, do you wonder that tears mingled with the smiles as they gazed upon the three boys who so nearly found a watery grave.

Humorous.

Chips.

WHY is so much bread baked? Because it is all kneaded.

"Is this the Adams House?" asked a stranger of a Bostonian. "Yes, till you get to the roof; then its eaves."

KANSAS school teacher—"Where does our wheat go to?" "Into the hopper." "What hopper?" "Grasshopper!" triumphantly shouted a scholar.

SAID a school teacher: "If I have 10 apples and give you five and your big brother five, what will be left?" "I'll be left," responded the younger brother "for he will get away with all of them."

"WHICH do you like best, your father or your mother?" inquired a visitor of little chubby-fist. "Oh, I likes ma the best. She spanks me with the soft side of her hand; pa takes a shingle."

"How do you define 'black as your hat?'" said a schoolmaster to one of his pupils. "Darkness that may be felt," replied the youthful wit.

THE average plowman isn't much of an orator, but when he takes the stump and gets yanked over into the next field, he is a very forcible speaker.

A SMALL boy in Massachusetts, who for the first time noticed a cherry tree in blossom, enthusiastically directed the attention of his mother to the "popcorn tree."

WHEN a very respectable man is discovered committing a crime, the proper thing for him to do is to ask the public to suspend public opinion until the thing is forgotten.

BOSTON recently celebrated its 250th anniversary, and it is said that some of the hotels served up for the occasion spring chickens born on the identical day the city was founded.

AN Irishman of a mechanical turn took off his gas meter to repair it himself, and put it on again upside down. At the end of the quarter it was proved that the company owed him $15.-75.

"ONE half of the world doesn't know how the other half lives!" exclaimed a gossiping woman. "Oh, well," said her neighbor, "don't worry about it, 'tisn't your fault if they don't know."

Household Hints.

SAUER KRAUT.—The best we ever ate we made ourselves for many years, and for a considerable time with our own hands, and always from Savoy cabbage. It was manufactured in this wise: In the first place let your "stand," holding from a half barrel to a barrel, be thoroughly scalded out; the cutter, the tub and the stamper also well scalded. Take off all the outer leaves of the cabbage, halve them, remove the heart and proceed with the cutting. Lay some clean leaves at the bottom of the stand, sprinkle with a handful of salt, fill in half a bushel of cut cabbage, stamp gently until the juice just makes its appearance, then add another handful of salt, and so on until the stand is full. Cover over with cabbage leaves, place on top a clean board fitting the space pretty well, and on top of that a stone weighing 12 or 15 lbs. Stand away in a cool place, and when hard freezing comes on remove to the cellar. It will be ready for use in from four to six weeks. The cabbage should be but tolerably coarse. The Savoy variety makes the best article, but is only half as productive as the Drumhead and Flat Dutch.—*Germantown Telegraph.*

FRIED APPLES.—Fried apples, when nicely prepared, make a very agreeable accompaniment to the morning meal. The following is my way of cooking them: Juicy, thin-skinned, and not very sour apples are best. Slice them, leaving the skin on, and put them to fry in some suitable dish in which you have a little melted butter. Add a very little water as often as proves necessary to keep them from scorching. Stir them quite often and when nearly done add a little salt and a spoonful of sugar, if you choose.

TAPIOCA JELLY CAKE.—Beat two eggs in a teacup and fill up with rich, sour cream; one teacup of white sugar, one cup of flour, a little soda; not quite half a teaspoonful unless the cream is very sour. Bake in four round tins, and brown as little as possible. Have a jelly prepared by soaking four tablespoonfuls of tapioca in warm water until transparent, then add more water and place your dish in boiling water on the stove and cook until a transparent jelly; flavor strongly with lemon, almond or wintergreen.

Health Column.

What is a Cold Bath?

The season of the year when very many people who have experienced pleasure and advantage from a daily cold bath have to discontinue the practice, is come. Months will elapse before the return of genial weather will allow of their indulgence in what may be termed man's natural stimulant. Among the young and robust there are a large number who are able to bathe even in the depths of winter; the advantage of so doing is, however, questionable. But let it be once well understood what a cold bath really is, and the course by which we can avoid Scylla and Charybdis will be obvious. A cold bath is not necessarily a bath in water of the temperature of the atmosphere. A bath is truly and really cold when it produces a certain physiological effect—a slight, momentary shock, followed by pleasant and lasting reaction. These effects are for the majority of people most pleasantly obtained by bathing in water about 35° to 40° below the temperature of the body—the usual temperature of unheated water in June and July. Bearing this in mind we can enjoy our physiological "cold" bath as safely and pleasantly at Christmas as at midsummer, and there is no necessity for the most timid or weakly to discontinue his morning tub because the summer weather is over. When the water sinks below a temperature of 60°, let it be heated to that point and then used, and we shall still have our "cold" bath, though of heated water. The daily stimulant effect of such a bath is so beneficial to the great majority of persons and is of such marked service in maintaining health, that it is very important to have it widely known that a cold bath may be taken all the year round, provided cold is not mistaken to mean "at the temperature of the outer air." To heat our bath during the winter months is too often thought to be unmanly, while in reality it is truly scientific, and to bathe in unheated water all the year round, whatever the temperature that water may be, is to prove one's self an ignorant slave of outward circumstances.—*Lancet.*

Holiday Dinners.

Good Health says: "Friends, those of you who expect to treat your children and relatives or neighbors to a holiday feast, let us give you a hint. Before making preparations for the occasion pause a moment to consider whether it would not be best to deviate a little from the almost universal custom of making our national holidays the occasion for animal gormandizing. Instead of loading the table with articles of food of a character certain to injure the digestive organs, and to work mischief in every part of the vital organism, would it not be better to put upon the table a variety of good, wholesome foods which might be partaken of with impunity, and which will not stimulate the palate to gluttony?

"Overeating at Thanksgiving, Christmas and New Year's dinners annually causes many cases of sickness and not a few deaths. Doctors are always busy the next day after these holidays, and may generally expect an unusual increase in business.

"Nothing could be more unreasonable than for people who understand the laws of health as relating to diet, to depart on special occasions from the course which their reason leads them to generally pursue, and by their actions, at least, declare to be good and desirable at those special times what at all other times and on all other occasions they pronounce bad and unwholesome."

This is sound advice. Why are all our holidays, days of unreasonable, unnatural feasting? Our women might make a great reform in the world in this respect.

SLEEP.—By far the best sleep is obtained at night—nature's chosen period—at a time when all is hushed and favorable to the best repose. The fowls early seek rest, as the sun sinks, and then set us the good example of early rising, with joyous song. Beside the repose and rest of the body, important and absolutely needful changes are effected in the system, while observation and experience prove that sleep obtained by day can never equal that at night. The young, in all of their vivacity and activity, need more sleep, and relatively more food than adults, and females need far more than males, especially mothers. Their labors, toils, cares, anxieties, watchings over their children, their whole round of duties necessarily tax and depress the nervous system, absolutely demanding much sleep—far more than many secure. Of these, those known as the "nervous"—with *diseased* nerves, exhausted—need the most—all they can secure. Sleep, on an empty stomach, is the best "nervine" for such.

HOW TO KILL A TAPEWORM IN AN HOUR.—Dr. Karl Bettelheim, of Vienna, narrates, in the *Deutsches Archiv*, a heroic method and nearly sure cure in the short time of three quarters of an hour to two hours. It is this: He inserts a tube in the œsophagus, to the stomach, and pours down from 200 to 400 grams of a very concentrated decoction of pomegranate root, having previously had his patient fast for 24 hours. The worm is stupefied, and passed, head and all, to a certainty; the patient has no sickness of the stomach, and no nauseous swallowing to do.—*Medical and Surgical Reporter.*

Worth Knowing.

HISTORY AND LIMITS OF THE VOICE.—Dr. Delauney, in a paper read before the French Academy of Medicine, gives some details on the history and limits of the human voice, which he obtained after much patient research. According to the doctor, the primitive inhabitants of Europe were all tenors; their descendants of the present day are baritones, and their grandsons will have semibass voices. Looking at different races, he calls attention to the fact that inferior races, such as the negroes, etc., have higher voices than white men. The voice has also a tendency to deepen with age—the tenor of 16 becoming the baritone at 25, and bass at 35. Fair complexioned people have higher voices than the dark skinned, the former being usually sopranos or tenors, the latter contraltos or basses. Tenors, says the doctor, are slenderly built and thin; basses are stoutly made and corpulent. This may be so, as a rule, but one is inclined to think there are more exceptions to it than are necessary to prove the rule. The same remark applies to the assertion that thoughtful, intelligent men have always a deep-toned voice; whereas triflers and frivolous persons have soft, weak voices. The tones of the voice are perceptibly higher, he points out, before than after a meal, which is the reason why tenors dine early, in order that the voice may not suffer. It was almost superfluous for him to remind his learned audience that singers who were prudent eschewed strong drinks and spirituous liquors, especially tenors, for the basses can eat and drink generally with impunity. The South, says the doctor, furnishes the tenors, the North the basses; in proof of which he adds that the majority of French tenors in vogue come from the south of France, while the basses belong to the northern department.—*Scientific American.*

POLISHING AND FINISHING METALS.—The following directions, which will frequently be found useful for finishing and polishing steel and iron, are given by *Forge and Lathe:* To get the beautiful finish we see on the best work, a piece of flour emery paper, well worn and a little oil upon it, will be found the best thing to use, and when this has been well worked, to get the high polish, a piece of wood flat upon the surface, with some fine crocus will bring it up to this state; and if any deep scratches be there you will at once observe them, and to remove them, in all probability it will have to be filed over again. The scratches must be removed before any attempt is made to polish. There are several ways of ornamenting the work if you do not wish it to be left straight. First, then, to cross the surface. This is done by folding a piece of emery paper tightly round a file, taking a kind of circular action, by doing which each line becomes, so to speak, connected. Another process of finishing steel is to curl all over the surface with a piece of oilstone that will cut. This is a most difficult thing to obtain, as few stones cut without leaving bright marks. Hold it firmly in the hand, moving it about in all directions like curling brass. There is no stated number or size of the curl. Another way of finishing iron and steel is with the scraper, which is used with both hands, and the work must be scraped in various directions, but with regularity.

WASHING COMMON WORKING PANTS.—The *Scientific American* gives the following as the best method for washing a pair of common working pants, that is tolerably greasy, so as not to discharge the color. It is impossible to wholly prevent the washing out of the dyes; still, if treated in the following manner, and not allowed to remain too long in the water, the effect of the washing on the dyes will be less apparent: Water 1 gallon, soap ¼ lb.; boil to dissolve; add 2 oz. borax; dilute with about 8 gallons of water; work the goods through as quickly as possible, and rinse without wringing. An aqueous solution of 1 part copperas and 7 parts logwood extract, may be used for reviving the faded color of cheap black goods.

TO MAKE CORKS AIR-TIGHT AND WATER-TIGHT.—A German chemical journal commends the use of paraffine as the best method of making porous corks gas and water tight. Allow the corks to remain for about five minutes beneath the surface of melted paraffine in a suitable vessel, the corks being held down by a perforated lid, wire screen or similar device. Corks thus prepared can be easily cut and bored, have a perfectly smooth exterior, may be introduced and removed from the neck of a flask with ease and make an absolutely perfect seal.

BORAX TO PREVENT MILDEW.—We understand that experiments lately made by Whewell, of Blackburn, on the employment of borax for preventing mildew in cotton goods, show that it cannot be employed with flour paste, as it turns the paste yellow. It can be used with advantage with farina, as it does not color the paste, and also increases its tenacity. A six per cent solution can be employed, which, at the present price of borax, namely £65 per ton, is equal to about £4 per ton.—*Textile Manufacturer.*

A DRY coating for basement walls may be made as follows: Take 50 lbs. of pitch, 30 lbs. of resin, 6 lbs. of English red and 12 lbs. of brick-dust. Boil these ingredients, mix them and stir thoroughly, then add about one-fourth the volume of oil of turpentine, or enough to make it flow easily, so that a thin coating may be laid on with a whitewash or paint brush. Walls thus coated are proof against dampness.

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

A Successful Fraternal Visit.

The brethren of Oakland and Alameda by preconcerted action, made a fraternal visit to our San Jose brothers on Wednesday evening, December 15th. Alameda was represented by members from 18 Lodges; the country Lodges had representatives from 6 and San Francisco 5. A special train was chartered from the S. P. Coast R. R., consisting of four coaches which was enlarged to eight by the generosity of the President, Mr. Davis. The train left Oakland at 6:45 P. M., with 150 jolly Workmen, stopping at intermediate stations for more, which added to the number about 25. It was a clear, cloudless night, and the moon shone out brilliantly. All were in a happy condition of mind, and each one seemed to be acquainted without the formality of an introduction. They appeared to be a great family, all trying to make the trip a pleasant one. Congratulations, pleasant hits, anecdotes, recitations and singing made the time all too short. One group under the leadership of Bro. B. S. Northey, of Brooklyn, No. 3, carried off the prize as stalwart singers. The company was well represented in M. W., P. M. W., and members of the Grand and Supreme Lodge, which to mention, would be a task of such magnitude that we ask to defer it. The train arrived at San Jose at 9 o'clock, where a large delegation from the San Jose Lodges, with a brass band, met the train at the depot and escorted them to the California Theater. The escort opened ranks at the entrance, allowing the delegation to pass through. The Lodge-room was guarded by an Outside and Inside Watchman, who admitted only those who were qualified. The Grand Officers, consisting of M. W. Fish, Supreme Foreman; W. H. Jordan, P. G. M. W.; Wm. H. Barnes, G. F.; C. H. Haile, G. Rcvr; and H. G. Pratt, G. Rdr, were invited, together with all P. M. W., to the stage, making 35 who formed the circle. The M. W. of Enterprise, introduced M. J. Levy, P. M. W. of Mt. Hamilton, who in a pleasant speech, printed elsewhere, welcomed the brethren, closing with well-timed puns on each of the San Jose Lodges, which brought the house down in hearty applause. The J. W. degree was conferred on two candidates by the officers of Enterprise Lodge in a very able manner. There were five candidates elected to receive the J. W. degree after which the M. W. degree was conferred on seven by the officers of Mt. Hamilton Lodge, with dignity and correctness. The charters of the San Jose Lodges were hanging on each side the room, while suspended in the center was an ornamental flag on which were these words:

WELCOME OAKLANDERS!
A. O. U. W.
C. H. P.

There were 13 applications made for the degrees, and immediately thereafter the Lodge was closed. The M. W. of Mt. Hamilton, then gave command to march to the banquet room; the wedding march was played by the band, and the brethern upon being ushered into the dining-hall beheld seven large tables, the entire length of the room, loaded with the delicacies of the season. About 400 Workmen sat down to enjoy the feast. After the good things had passed into the inner man, and the cigars handed round, A. T. Murgotten, P. M. W., as Master of Ceremonies, opened the intellectual feast with the toast "Our Order: The Temple of Charity, Hope and Protection, may its mantle ever continue to shield the widow and orphan, and its teachings bind us all in perfect unity of brotherly love." Wm. H. Jordan responded in a very able and eloquent speech, full of pathos—music, San Jose Glee Club and encore. Then came the second toast—"The Grand Lodge of California:" the golden diadem in the noble brotherhood of Workmen," responded to by W. H. Barnes, G. F. It was one of those splendid short addresses which Bro. Barnes knows so well how to make; and it was received with cheer upon cheer. We give the pith of his remarks in another column. After another song by the San Jose Glee Club came the toast, "Our Guests: May their enjoyment to-night be equal to our desire to please." Responded to by J. B. Finch, M. W. of Mt. Hamilton, in a fraternal speech that was well received and which we also give elsewhere. Music by the Glee Club: "Night's Farewell!" A communication from Clay W. Taylor, G. M. W., was read, regretting his inability to be present. "San Jose Lodges: May their success in the past be a slight indication of their prosperity in the future." Responded to by D. S. Hirshberg, P. M. W., in a very able manner, which was received with overwhelming applause. Music by the San Jose Glee Club. "Supreme Lodge." Responded to by M. W. Fish, Supreme Foreman, in a short, congratulatory speech which was worthy of the occasion. Three cheers were given for the Workmen of California, and at 12½ o'clock the large assemblage adjourned to the theater. An impromptu meeting was organized by electing M. J. Levy, P. M. W., to the chair. Bro. Dunton, P. M. W., was called, and made one of his humorous speeches, after which he recited a sentimental piece that was heartily applauded. Wm. H. Barnes, G. F., then entertained the audience in song and anecdote, calling for encore after encore. J. E. Wamsley, ex-Recorder of Mission Lodge, the Nasby "in that community," followed in one of his humorous speeches. Then came P. M. Fisher of the same Lodge, the orator of Mission, 53. B. S. Northey of Brooklyn, No. 3, made some strictures on immoral conduct on the part of Workmen, which seemed to be unsuited for this occasion. H. G. Pratt, G. R., made a few congratulatory remarks, followed by E. J. Webster, P. M. W. of Oak Leaf, in a short and happy speech that was well received. M. J. Levy, P. M. W., of Mt. Hamilton, then made one of his fraternal and elegant speeches which received round after round of applause. A character song by Bro. Barnes created much merriment. Taking it all in all, this was a fraternal visit which will no doubt be long remembered by the participants.

Chico Lodge, No. 58.

EDITORS WATCHMAN:—Chico Lodge, No. 58, is progressing. Our Lodge numbers 100 members. We meet every Thursday evening, and our officers are faithful; and, as a rule, the meetings are well attended. Of late, we have introduced a new feature in our meetings, viz.: An entertainment on the third meeting night of each month. Last Thursday night, the 16th, the Lodge was highly entertained by the following programme: Remarks by the Master, B. F. Clarke; instrumental music, H. Klingst; select reading, Geo. E. Peck; song, Dr. Wilson; address, H. T. Batchelder; reading, C. G. Warren; quartette, Messrs. Steuart, Peck, Wilson, Earle and Buket. This closed the evening's entertainment, which was one of the most pleasant we have spent for some time. I am happy to say that since the organization of the Lodge, October 8, 1878, there has not been a death; and, although we have a double assessment once in a while, our members do not get frightened, but pay them promptly. Now, Mr. Editor, if you ever come north, be sure to stop in Chico, and visit Chico Lodge, No. 58, and you will find a hearty welcome. Yours in C. H. P., A. J. B., Chico, December 19, 1880.

Healdsburg, No. 31.

EDITORS WATCHMAN:—The WATCHMAN has frequently urged the efficacy of literary and musical exercises under "Good of the Order," and could not be too explicit in the matter, as has been demonstrated in Healdsburg Lodge this fall. With a membership nearing 100, the summer attendance was between 20 and 30, unless there were initiations, when there were a few more. A few weeks ago your recommendation was adopted by the Lodge, and now the attendance may be said to have doubled. A sense of duty will not compel members to turn out; neither will entreaties, scoldings, or a system of fines. But they will come too quick to be entertained, and to assist in entertaining. There is a tender heart in every brother and sympathetic chords that he enjoys when made to vibrate by congenial associations. Healdsburg Lodge now numbers 102, and is in perfect harmony and growing. It embraces the best professional talent of the city. Ten new subscribers to the WATCHMAN have been secured by your agent, Bro. John Pullee, during the past week.—A BROTHER.

Vallejo, No. 75.

This Lodge will celebrate its second anniversary on the evening of January 7th. The Committee of Arrangements have extended an invitation to the Grand Lodge officers to be present. Wm. H. Barnes, G. F., and a number of the Grand officers are expected to be present. The WATCHMAN reporter proposes to see this affair through.

A New Lodge in Nevada.

Our Grand Lecturer, J. W. Kinsley, organized River Lodge, No. 6, at Gold Hill, Nevada, on December 22, 1880. The following officers were installed: J. L. Campbell, P. M. W.; J. D. Sims, M. W.; J. R. Shaw, F.; W. L. Brown, O.; F. Winzill, Rvr; F. P. Chrisman, Fin.; T. E. Picotte, Rdr; W. A. Robinson, G.; L. Vincent, I. W.; Geo. Cobb, O. W. The Lodge will meet on Tuesday evenings. From the well-known high social standing of the officers of this new Lodge (being leading citizens of Nevada), we congratulate the brethren of our mountain State, and hope we may hear of similar organizations following.

Oakland Lodge Locals.

[We shall be pleased if some of the able brethren in each Lodge in Oakland will correspond weekly with the WATCHMAN from the "Father City" of the Order in California.—EDS. WATCHMAN.]

California, No. 1.

The long expected monthly social of California No. 4, which, on account of the inclemency of the weather, was adjourned twice, was held at Hansen's Hall on Friday evening, December 18th. The hall was filled with a good audience, and a choice literary entertainment prepared for the occasion. The following programme was given: Overture by the band; recitation, Miss Maud Butler. A very clever picture of domestic life, finely rendered, which called for a hearty encore. Later in the evening, by special request, Miss Butler again appeared. Music, "instrumental," Miss Helen Webb—a fine effort. Song, Mr. Foster, in character, and encore. Scene from Julius Cæsar; Mr. Taylor as "Cassius;" Wm. H. Wood as "Brutus," in costume—a masterly effort that called for most hearty commendations. Recitation, "Widow Bedott," little Kittie Cohen, in costume, who proved to be the hit of the evening in her personification of this character, and received a hearty encore. Song, Linda Hoag, "Keep the A. O. U. W. over the Door;" for encore, "Just to Please the Boys." Song, Mr. A. J. Share, well rendered and received a hearty encore. Dagger scene from Macbeth—Macbeth, Mr. Taylor; Lady Macbeth, Miss Annie Taylor. A tragic and artistic effort that was highly commended by the audience. Owing to the adjournments had, a few of the actors failed to be present, still it was a choice literary entertainment and all were well pleased. Terpsichore took care of the company the balance of the evening, except the time spent in enjoying a fine supper, which could be had at 25 cents (a good arrangement). The brethren of California, No. 1, know how to do it, and always do well in anything they undertake. The Committee, consisting of Bros. G. Hadsell, M. W., J. M. Cohen, J. A. Lawlor, E. W. Berry and G. Carroll, surmounted every obstacle, and made their social a grand success. To Bros. Hadsell and Cohen for courtesies shown the WATCHMAN, we and for the brethren, return them our sincere thanks.

Keystone, No. 64.

A fair delegation of No. 64 "excursioned" to San Jose on the late fraternal visit and report a good time generally. Chairman Dodge, of the special committee on reduction of Lodge expenses, reported Tuesday evening, December 21st, in favor of changing the salaries of Recorder and Financier from $8 to $4 a month each; Outside Watchman, from $4 to $2. An amendment to the by-laws was offered accordingly. The proposal to reduce the monthly dues to 50 cents as soon as practicable, as well as some other important recommendations, were laid over one week for further consideration. Ways and means for making the future meetings of Keystone Lodge more than ordinarily interesting and attractive, are under consideration by some of its earnest and active members. The next term, it is predicted, will be an unusually prosperous one. The installation of officers occurs Tuesday evening, Jan. 4th. All Workmen are invited.

Oak Leaf, No. 35.

A very interesting meeting was held on December 13th. This is the second largest Lodge in the State, and is largely made up from the young, active business men of the community. There is always something of interest in the way of discussion, reading, essays, music, etc., at their meetings. After the usual routine of business, the question of reducing the amount of sick benefits to $5 per week was considered; after which after an elaborate and and dignified discussion sick benefits were discontinued by a vote of 47 to 7. Out of 188 Lodges in this jurisdiction, there are 9 who pay "sick benefits" at the present time.

San Francisco Lodge Locals.

Bernal, No. 19.

Bernal, No. 19, will celebrate their third anniversary on 21st inst. at King's Hall, Mission street, by a musical and literary entertainment, to end with a social dance. The Committee of Arrangements are all veterans, and we may expect a fine time, and we hope to be there.

Magnolia, No. 41.

December 20th was an important meeting to this flourishing Lodge. The J. W. degree was conferred on one and M. W. degree on four. This will give them three representatives to the Grand Lodge. There was a large attendance, and their cozy hall in Shiels' building presented quite an animated appearance. They were honored with several visitors, one being Bro. Blum, from Peoria, Illinois. The officers take a commendable pride in the work, and on this evening certainly earned the hearty congratulations from all present.

Memorial, No. 174.

This young Lodge has advanced beyond the expectation of its most sanguine friends. The Lodge meetings are always well attended, and there seems to be a unanimity of feeling and determination among the members to make this one of the leading Lodges of the city. The officers are well up in the work, dispatch their business correctly and with celerity, and make their Lodge-room attractive to the members and visitors. Their membership is now 64, and have husbanded their resources so that they were able to pay one assessment from the general fund this month, leaving a good surplus in their treasury. On the 27th December the M. W. degree was conferred on two in a very creditable manner; after which the election of officers took place, and what is known as the "rotation plan" was adopted, and harmony and the kindest feeling prevailed. From the known character of the brethren of this Lodge, we hereby enter this prophecy: that Memorial, 174, will ere long, be one of the leading Lodges of this city.

Triumph, No. 180.

Triumph, No. 180, was instituted August, 21, 1880, with 37 charter members. A gallant band of men determined to join our Order, and with much opposition succeeded in forming a Lodge of Workmen, and very appropriately called it Triumph. From their first meeting, almost every night, they have conferred the degrees on one or more, closing their last meeting by giving the M. W. degree to one. Their Lodge meetings are well attended and the officers work like veterans. In attending their meetings it seems like a gathering of a large family. As a matter of fact it is, as one circumstance illustrates: Bro. Alex. Buswell is Trustee (aged 48 years), while his son, Bro. F. W. Buswell, is Recorder. They have now 63 members, and we may expect a large accession in this term. One worthy thing that stands to the credit of this Lodge is their donation to the Upchurch fund. They have, as a Lodge, according to their membership, given more than any other Lodge in this jurisdiction.

Valley, No. 30.

The steady growth of our Order and particularly of this Lodge, is almost without precedence in the history of fraternal organizations. The broad-brained, whole-souled brothers who watch and work for this Lodge warrants us in saying that the long-talked of 1,000 will be realized. There are now 645 members, with a determination expressed among many members that in the coming term there will be a very large accession in membership. In view of that fact, the salary of the Financier was increased to $40 per month, and the Recorder to $20 per month.

Grand Recorder's Financial Statement for November.

We condense from Grand Recorder Pratt's Financial Statement for November the following leading figures:

DISBURSEMENTS.

Balance in hands of G. Rvr., Nov. 1, 1880, Benef. Fund	$ 121.00

Resolutions of Respect.

HALL OF BROOKLYN LODGE, No. 3, A. O. U. W., East Oakland, Cal., Dec. 16, 1880.

[IN MEMORIAM.]

WHEREAS, Our Heavenly Father, in His wisdom, has seen fit to remove to His eternal home our beloved brother, HAROLD G. OLIVER, and believing that it is proper and right that an expression of our sorrow should be made known, be it, therefore,

Resolved, That in the death of our brother, Harold G. Oliver, who was a charter member of this Lodge, the Order has lost one who, by his earnest, upright and consistent Christian conduct, won the affection of all with whom he came in contact; one who exemplified fully the beautiful harmony of this fraternity in all his manner of life, and one whom all may seek to make their model while journeying toward the bourne whence none return.

Resolved, That we tender to his bereaved family our heartfelt sympathy.

Resolved, That these resolutions be engrossed on the Lodge records; that a copy be presented to the widow of the deceased, to Placer Lodge, No. 95 (of which our brother was a member at the time of his death), and that they be published in the PACIFIC STATES WATCHMAN.

H. C. HINMAN, Committee.

[Published by request.]

BRO. NEHEMIAH J. OWEN, late a member of Harmony, No. 9, was buried from Pythian Castle, under the auspices of the A. O. U. W., on the 24th of December. The painful circumstances attending his death, he having, no doubt, committed suicide, has led to some assertions and statements which we wish to correct. Our late brother joined Occidental, No. 6, July 20th, 1877, and was admitted by card to Harmony, No. 9, January 7th, 1879. He has been, whilst a member of Harmony, up to a few days previous to his tragic death, an exemplary Workman and an honor to our Order. On the Saturday night previous to his death he acted as one of the tellers at the semi-annual election. From the best evidence we can procure from his own family, we believe that his age was as he represented it at the time he joined Occidental, No. 6, West Oakland. We would suggest that when animadversions against a deceased brother or a Lodge of which he is a member are being circulated around, it would be eminently proper to investigate the facts before indulging in wholesale strictures. COM.

True to Their Obligations.

One day last week Mrs. D. W. Collins, visiting at Galena, bought a ticket from that place to San Francisco, Cal., her home, and on arriving at Freeport she discovered that she had lost her ticket, and was alone among strangers with only $15 in her pocket. Conductor Beals brought her to Amboy in hopes that the company might help her out of her trouble, who, after telegraphing to Chicago, succeeded in securing her a pass as far as Omaha, and a letter to the U. P. R. R.—meantime the fact that her husband was a member of the A. O. U. W. was communicated to C. E. Arnold, the Master of the Lodge at this place—she having her husband's certificate in her trunk, signed by H. G. Pratt, former editor and proprietor of this paper, as G. R. for State of California. The Lodge at this place took immediate action, and by a loan of $50 she was enabled to proceed on her way, rejoicing that a Workman's wife among Workmen, though in a distant land and without money, was not friendless.

We clip the above from the Amboy, Ill., *Journal*, and it speaks for itself. Those who can see nothing in the A. O. U. W. but $2,000, may have their vision quickened by this incident. We would have no one think for a moment that we undervalue the pecuniary consid. ation above mentioned—it is the great specialty of our Order, so to speak, but fraternity not only gives us assurance of that but of numberless blessings beside. In behalf of the Order in California, we tender thanks to Palestine Lodge, No. 122, of Illinois, for the kindly act bestowed on the wife of our brother.

A Grammar of the Frisian Language.

We note in *Good Literature* that there will soon be issued from the London publishing house of Trubner & Co. a grammar of the Frisian language, by Adley H. Cummins. Friesland is a province in the northern part of the Netherlands, and the language has much resemblance to the old English. Bro. Cummins is a member of the Olympic Lodge, No. 127, of this city, and will be remembered as the author of an excellent article in a recent number of the WATCHMAN. We wish our brother the full measure of success in this undertaking. We quote, as follows, from the paper referred to:

It will be awaited with interest by students of philology, and especially by those who devote themselves to the Germanic family of languages, and old English in particular. Mr. Cummins says: "There is probably less difference between Friesic and our own ancient mother tongue, than between any other two dialects of any family of languages." Should this grammar prove to be useful, Mr. Cummins hopes, within the next few years, to publish several works designed to make the study of philology more easily accessible to English and American students.

In a recent visit to San Jose the reporter of the WATCHMAN had the pleasure of being the guest of Bro. Chas. E. Pearson, of Valley, No. 30, who is the proprietor of the well-known resort, the "Auzerais House," of San Jose. It has been undergoing a thorough renovation for the last three months—repainting, frescoing, etc., etc. Mr. Pearson knows how to keep a hotel, and we recommend this house under its present management, as one of the best homes for families and travelers in this State.

THERE were two deaths on this coast to be paid for by the Supreme Lodge jurisdiction in December. One was Bro. Thomas H. Moore, of Victoria, B. C., aged 27. The brother was a member of the Order nine months, and died of heart disease. The other was Bro. Valentine Blacklock Tait, of New Westminster, B. C., aged 46. Joined the Order July 30, 1880, and died from the effects of a gun-shot wound October 1, 1880.

BRO. BARNES, G. F., has the floor as the boss conundrum solver. The tastefully painted banner at the San Jose visitation bore the inscription—"Welcome, Oaklanders, A. O. U. W., C. H. P.," and as there were several who did not hail from our sister city, Bro. Barnes interpreted the words, A. O. U. W., as: "And all of you welcome."

FRANK G. ABELL, G. M. W., of Oregon, requires the newly-elected officers of subordinate Lodges in his State to be letter-perfect in their duties, or he will not permit them to be installed.

OHIO furnished two deaths in the Supreme Lodge jurisdiction for December; British Columbia, two; Massachusetts, one; Kansas, one, and Texas, one.

THE Supreme Recorder reports the total membership of the A. O. U. W., up to 1st of November, at 89,629.

Fraternities.

I. O. O. F.

IOWA gained over 700 members during 1879.

PENNSYLVANIA has passed a law fixing a limit to benefits.

A CORRESPONDENT of the New York *Dispatch* says that Masonry originated anterior to the days of Abraham. In a certain passage of Homer this modern seer discovers a fancied reference to a Masonic symbol, and accordingly claims that the mythical writer, whose date of existence remains wrapped in the mists of obscurity, and of whom it is said that

"Seven ancient cities claimed him dead,
Through whose streets the living Homer begged his bread."

was a Mason. We have given some little attention to ancient history, and cheerfully concede the claims of our good brethren of the square and compass, but feel convinced that the three-linked fraternity can establish claims to a greater antiquity of origin through the medium of the oldest historical record known to modern man, *i. e.*, the Bible; for does not the good book plainly tell us that Adam was an Odd Fellow, that Methuselah was a Patriarch of over 800 years' standing, and that Patriarchs existed for all time before Solomon's day?—*Rochester Herald.*—The *N. Y. Era* has the following comments on the above: Who dares to say *now* that Odd Fellowship is not older than Masonry? Who has the temerity to deny Bro. Harris's deep researches and adduced proofs of the great age of Odd Fellowship. Masonry is a baby in comparison with Odd Fellowship. Odd Fellowship was covered with the rime of years long before Masonry was born. For this important discovery Bro. Harris deserves the thanks at least of the Order, if not a tall, heaven aspiring monument emblazoned with a record of his work.

Knights of Pythias.

THE Lodges in and about Virginia City, Nev., work the Amplified and without rituals.

THE number of Sir Knights necessary to form a quorum in a Division has been reduced to 10 by the Supreme Lodge.

COLORADO has 641 members, 50 of whom were added to its roster since the meeting of the Grand Lodge, last September.

WHILE individually the Supreme Representatives favor the ladies, yet collectively as a Supreme Lodge they do not take to the Ladies' Rank.—*The Knight.*

MANY worthy brothers who have been elevated to the responsible position of Chancellor Commander seem to have no appreciation of the dignity of the station. They do not seem to regard the present and prospective privileges it bestows upon them. Too often they permit their prejudices to get the better of them, and great mistakes are made. When once inside the Castle Hall the Chancellor Commander, as well as all other true Knights of Pythias, should forget all differences that they may have had with brothers on the outside, and meet round the altar as brothers. The C. C. in his work should not by any means suffer his personal likes or dislikes to interfere with his bounded duty as the head of his Lodge. Appointment of officers and committees should be made on account of their fitness and not on account of any selfish motive. He should ever and always take into consideration the good or evil results of any particular work that he may perform. Let him preside fearlessly and impartially, and evince a spirit both prudent and zealous, make himself familiar with all the laws governing his Lodge, and then preside with dignity befiting his exalted station, always being courteous; in short, should not forget to be a gentleman, and his administration will be a marked success, and his brothers will feel proud that they honored the Lodge by honoring a worthy brother. —*Pythian Journal.*

Knights of Honor.

THERE are 2,323 Lodges now registered.

TEXAS has instructed her representatives to work for the repeal of the law on the organization of German Lodges.

THE *Cal. K. of H. Journal* has been enlarged, and is well filled with interesting K. of H. reading.

HON. R. J. BRECKENRIDGE, of Kentucky, has been appointed Supreme Treasurer. His address is Springfield, Ky.

SIXTEEN hundred and fifty death benefits, amounting to over three and one-fourth millions of dollars, have been paid by the Knights of Honor during the past seven years.

SUPREME DICTATOR HOKE decides that the legal definition of the word *family* (vide medical examiner's certificate) embraces all the kindred of a man descending from the same common ancestor, and, therefore includes aunts, uncles, brothers and sisters.

A DECISION has recently been rendered by Supreme Dictator Hoke, which is of much interest. It is to the effect that it is not necessary to send the subordinate Lodge's medical examiner's blank to the State Medical Examiner for his inspection, in case of the *re-instatement* of a suspended member.

A DECISION has been rendered by the Supreme Dictator in a case where a variance occurred between the directions given in the petition for membership and the directions given in the benefit certificate. It is held that the latter must govern, the certificate being regarded as the executed contract, and every thing else merely preliminary.

AURORA LODGE, No. 202, S. F., K. and L. of H. has elected the following officers: Mrs. L. A. Rapp, Protector (re-elected); Mrs. L. A. Balch, Vice-Protector; Mrs. L. J. Wheelock, R. Sec. (re-elected); W. J. Johnston, Fin. Sec.; C. E. Baker, Treasurer (re-elected); Mrs. H. A. Thayer, Chaplain; Mrs. F. J. Williams, Guide; Mrs. K. C. Harmon, Guardian; A. V. Dyberg, Sentinel (re-elected); C. S. Haley, William Levvit, L. J. Henry, Medical Examiners; C. S. Haley, L. J. Henry, Henry Coad, Trustees (re-elected).

OBJECTION is justly raised to the demand of the Supreme Reporter, compelling all members of the Order who have devised their beneficary money to their wife and children, to specify the names of each child; and it is argued that there is a possibility of future children being deprived of the participation in the death benefit because of either the neglect or inability of the insured to alter his certificate to include his last born. We can see no reason why "my wife and children" would not answer as well as "my wife Hannah and my children, Thomas, James and Augusta." In the one instance the children would all share alike, those now born and those yet to be born, while in the other, if a child was born after the certificate was filed, unless it was recalled and altered, it would be deprived of all participation in the benefit.—*N. Y Era.*

THE *K. of H. Reporter* has the following about Judge R. J. Breckenridge, recently appointed Supreme Treasurer: The new Supreme Treasurer has been a member of the Supreme Lodge since 1877, and has taken an active and prominent part in its deliberations. Being an eloquent and fluent speaker, kindly hearted and pleasing in address, he has been one of the most influential in its councils. In 1878 he was a candidate for Supreme Dictator, and came within four votes of the number given his successful competitor, Past Supreme Dictator Cummings. At the close of the last session he was appointed chairman of the finance committee by Supreme Dictator Hoke. He is of the celebrated family of his name of Kentucky, and has been for some years a judge of one of the State courts. Bro. J. J. Aldrich, of Mayville, N. Y., has been appointed his successor upon the finance committee of the Supreme Lodge.

A MEMORIAL has been issued to the Knights of Honor of the United States by a committee appointed at a mass meeting of the K. of H. Lodges, held recently at Louisville, Ky. The memorial has the approval of Lewis C. Garrigus, Grand Dictator of Kentucky, and Supreme Dictator Hoke. After a few introductory remarks the committee proceed to say as follows:

The Supreme Lodge Knights of Honor is incorporated by an act of the General Assembly of the Commonwealth of Kentucky, approved April 5th, 1876 (pages 3, 4 and 5 Constitution of Supreme Lodge of 1880), with the following powers:

SECTION 1. "Perpetual succession, and be capable in law of suing and being sued, pleading and being impleaded, and of purchasing, leasing, holding, granting and receiving in its corporate name, property, real, personal and mixed, and of instituting Grand and subordinate Lodges, as it may see fit, under such laws, rules and regulations as the corporation may enact, not in conflict with the laws of this State (Kentucky), and the United States."

Unlimited power is here granted the Supreme Lodge to enact such laws, rules and regulations for the government of the Grand and subordinate Lodges, and its own body, as it may see fit; provided, same be not in conflict with the laws of Kentucky, or the United States. It is vested with the entire legislative, judicial and executive authority over the Order.

SEC. 2 recites the object of the Order, and authorizes the establishing of the Widows' and Orphans' Benefit Fund, not to exceed $5.000 to each member, with no restriction as to their manner or means of raising or disposing of same.

SECS. 3, 4 and 5 confer no powers.

SEC. 6 provides that, "The said Supreme Lodge shall provide for the election of such officers as it may deem necessary to transact the business of the corporation, and to further its objects, who shall hold office until their successors are duly elected, qualified and installed into office."

The officers necessary, the number and electors thereof, the manner and time of electing same, is wholly with the Supreme Lodge. It is competent, under this authority, to elect and perpetuate themselves in office.

SEC. 7 gives full control of the fund to the Supreme body.

This charter confers most extraordinary powers upon the Supreme Lodge. It can make laws and constitutions, alter, change, amend, and repeal them at pleasure.

It can legalize illegal acts of subordinate Lodges, as has been done by confirming the act of a subordinate Lodge in receiving an applicant under the age prescribed by law (pages 100 and 101 Sup. Lodge Proceedings, 1880).

It can order extraordinary assessments, without providing who shall disburse same, or the manner in which, or the purpose for which, they shall be disbursed.—(Law XXIV, 1880.) It can raise a revenue by unlimited taxation for its purposes, of which purposes it is the sole judge.

It can demoralize and confuse the members by radically changing the ritualistic and secret work, thereby entailing enormous expense, and producing dissatisfaction, with no benefits whatever.

It can provide *how* the members shall be represented in the Grand Lodges and Supreme Lodge, or whether they *shall* be represented.

In fact, to enumerate all its powers, is to say it can do anything not in conflict with the laws of Kentucky and the United States; all of which results from a defective plan of government, immediate remedy for which commands serious consideration.

Legislation by the Supreme Lodge, prompted by the very best interest of the Order on the part of the members, has been, and will be, as at present constituted, excessive, hurried and unconsidered. The enormous expense and brief period of its sessions, occasion hurry and confusion in matters that demand calm deliberation and cool reflection; and suggestions from the Supreme officers, and particularly the Supreme Dictator, are often adopted by reason of their source rather than for their merits.

The members should have a voice in the affairs of the Order through their representatives. The Supreme Lodge is not a representative body; the Grand Lodges are, being composed of representatives chosen directly by the members. No law should be enacted, no change or alteration in the organic law should be made without their sanction. The laws would then be the laws of the Order, and understood, which is now not the case, as the frequent changes afford the members little opportunity to understand one code before it is displaced by another.

This can be accomplished by so amending the charter, as to require the Supreme Lodge first to submit to the subordinate Lodges all proposed laws for the government of the Supreme, Grand and subordinate Lodges, and all general laws and changes of same, and changes of ritualistic and secret work, that they may have an opportunity to examine same, and act thereon, through their representatives in the Grand Lodges; and further provide, that same shall not go into effect until ratified by two-thirds, or at least a majority of the Grand Lodges. An amendment to the charter, and not the Constitution, is proposed.

If it be proper at all, it cannot be too binding upon or placed too far beyond the exclusive control of the Supreme Lodge. If the latter body should never have an inclination to interfere, it will have no occasion to object; if it should, then it cannot.

The intention of this is to lay these matters before the subordinate Lodges; that if they approve the proposition, they may instruct their representatives to the Grand Lodges to there use their efforts to have the representatives to the Supreme Lodge instructed, to there use their efforts to have the Supreme Lodge secure the passage of the proposed amendment by the Kentucky Legislature.

This is no unlawful infringement upon the prerogatives of the Supreme Lodge, or a reflection upon the conduct of the members heretofore or now composing that body; but with full recognition and due appreciation of the rectitude of their intention at all times and in all matters, and that *the good of the Order* is their personal concern no less than every member; to perfect a defective plan of government will, therefore, impress everyone as the sole object of this proposition, and that its merits will recommend it to the members of the Supreme body.

It would be suicidal to close our eyes to the fact that insurance companies are our enemies; that they would spare no means to destroy us; and that by sacrificing principle and money, it is possible for them to obtain position in the Supreme Lodge, where with its present authority and power, they could by unfriendly legislation, in one session, tear down the entire structure.

Let us, therefore, be forcibly reminded of what *can*, and not what *may* be done, and of the imperative necessity of immediate remedy.

Let every subordinate Lodge consider at once, this proposition; and if it meets their approbation, instruct their representatives accordingly.

This will be placed before every subordinate Lodge of the Order before the next election for representatives in December, that concert of action may be had on the subject at the next session of the Supreme Lodge, to be held in the year 1881.

Workmen's Guarantee Fund Association.

Admission fee, $3; Annual dues, $2. The object of this Association is to afford additional protection o $1,000 to all Master Workmen in good standing of the A. O. U. W. The average cost, including assessments, will be about $8 per year, or less than 20 cts. a week For further particulars address, or apply to the Secretary, at the office, No. 38 St. Ann's Building, San Francisco, Cal.

WM. H. JORDAN (Past Grand Master), PRES'T.
E. M. READING, Sec'y.

DO NOT DELAY.—Send us your subscriptions promptly. Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

Our Isthmus Avenue.

All the world seems to be working for the development of the Pacific coast, and like Barkis, we are "willin'." The rival canal routes from Atlantic to Pacific oceans across the Isthmus are pushing forward with zealous haste. De Lesseps with his Panama project has made his attack upon the world's purses, and has come off with a victory beyond the anticipation of the most sanguine. The subscription of about $120,000,000 in a few days to carry out a scheme of this kind is certainly a surprise to most people in this country. Something over $1,000,000 worth of the stock was taken in San Francisco, where the Panama has not been looked upon as the popular route. The present state of the enterprise is that the stock has all been taken, the books closed, and there seems nothing for De Lesseps to do now, but to break ground and go forward with the mammoth ditch. He has secured the services of Hon. R. W. Thompson, U. S. Secretary of the Navy, to lead his American adherents.

The success of De Lesseps has proved a sort of bomb in the camp of the Nicaragua route people, and they are stirred to unusual activity. The dispatches of Wednesday morning brought the text of a bill introduced in Congress to incorporate the Maratime Canal Company of Nicaragua, in which U. S. Grant heads the liat of incorporators. The bill provides that the capital stock shall consist of 1,000,000 shares at $100 per share, thus yielding a fund of $100,000,000 for the construction of the canal. One per cent of the value of the stock shall be paid at the time of subscription, and other payments at such time as the directors shall determine. The bill, it is expected, will pass Congress with but little delay, and the enterprise will be pushed forward with the full force of the comparative cheapness of the route, and the pride of the country in having an avenue across the Isthmus wholly under American control. As soon as the charter is obtained and the subscription books opened, the real test of the project will come, for the money is the root of the venture after all.

Thus the two rival canal routes have entered the lists together with the apparent lead in the possession of DeLesseps. We of this coast can but rejoice at the speed of the contestants, for if each succeeds in gaining the requisite funds there seems little to prevent the building of both canals. It may be of advantage to have competition, providing both enterprises can be supported by the business there will be to be done; if not, a combined effort to put through a single canal would be preferable. The future alone can decide all issues and in the meantime we can but hope that no disaster will interfere with the speedy union of the oceans.

It may be expected that the canal projects even during the process of construction will give a new impetus to Pacific coast industries. It is announced that P. Huerne, an architect of this city, has received an appointment from M. Convreux, chief engineer of the Panama canal, as head engineer and agent for making plans and furnishing materials for the inauguration of the construction of the canal. Much of the machinery needed will be manufactured in this city, and the material will be purchased here also. This will bring activity to our founderies and machine shops and also have an indirect effect upon the produce market by increasing the number of well paid consumers. It will also bring to this a new tide of capable immigrants who will come to invest in productive enterprises because the coast will be brought so much nearer to the world's markets. To those who have already enlisted in Pacific coast production and have had to bear the burden of shipment around the Horn or overland the new outlet will bring encouragement and better returns for their labor.

It does seem from all indications that the Pacific coast is now upon the course toward a wider and sounder prosperity than ever before. It is true that now and then some manipulator in the stock market folds his tent and steals away for new fields in the East where people are not so well educated in stock gambling mysteries as they are here. Many of these men have done but little for the real prosperity of our coast but have rather amassed their wealth by shrewd ventures to secure the money which others have earned in the small industries of life. They have invested little or nothing in true productive enterprises, and consequently were not firmly wedded to the best interests of the country. The few of this class who have left us are over balanced by the many active eastern capitalists who are now buying our mines and our farming lands and spending money freely to develop the properties they have acquired. We can well afford to exchange citizens with the East if the transfers should continue in the kind of material which has thus far been delivered.

Meantime the railroad projects which are to open new quarters of our State, are being pushed with vigor and all the benefits of competition seem to be promised to the most remote corners of the State. There was never better heart and hope among the people, and the decade now beginning promises to be the most important and interesting one in our existence.

United States Fish Culture.

We have just received from the Smithsonian Institution, the report of Hon. Spencer F. Baird, U. S. Fish Commissioner, concerning the work done under his management during the year 1878. It is a massive volume of more than 1,000 pages, and is full of valuable information concerning food fishes and other things pertaining thereto. We shall not attempt an outline of the features of the report, for they are so many that the space we have at command would only allow us to catalogue them. Rather would we call attention to the immensity of the work undertaken, by referring to what has been done by the United States within our own State. We read that the season of 1878 proved the most productive in the history of the establishment on McCloud river, and the number of eggs of the California salmon obtained was truly enormous. There were taken 14,000,000 eggs, a number far exceeding those taken in any one season by all the salmon establishments of the world put together. Mr. Stone, who had the work in hand, reports that 18,000,000 eggs could have been taken, but there was no need for so many. The fish from which these eggs were drawn were taken between August 20th and October 5th. Several times from 7,000 to 9,000 fish were taken from the water in a day. Of the 14,000,000 eggs taken, part were hatched out at the McCloud river establishment for the maintenance of the supply in the Sacramento river, and the balance sent to the East; a part being sent to foreign countries in return for their fishes sent to our commissioner.

It must interest all Californians to read of the way in which our peerless native salmon is being transplanted to the waters of the world. Mr. Baird writes that, owing to the very high opinion entertained by European fish culturists of the California salmon as a food fish, both on account of the ease of its cultivation and the fact that it resists higher temperatures of water than the Atlantic salmon, it was determined to renew the experiment by a transmission in 1878; and Mr. Mather was authorized to repack the eggs in his own way and accompany them to their destination. In accordance with instructions he therefore met the car containing the eggs from California at Chicago, and received 250,000 for Germany, 100,000 for France, 100,000 for Great Britain and 100,000 for the Netherlands. These he carried to his residence at Newark, and after repacking them by his own method, he took passage by the Bremen steamer *Oder*, and arrived at Bremerhaven on the 23d of October. The consignment for France was shipped from Southampton, on the way, and that for England was sent, for the most part, to the Southport aquarium. The eggs for the Netherlands were met by an agent of the government at Bremen and transported to Amsterdam, where they were hatched out by the Zoological Garden. The new venture proved to be a perfect success, a very small percentage of the eggs failing to be hatched out. Of the eggs of the German consignment, 45,000 were sent directly to Mr. Haack, at Huningen, for introduction into the Rhine. One hundred and fifteen thousand were sent to Mr. Shuster, at Freiburg, for the Danube and the Rhine; and 30,000 to Hameln, for the river Weser. Various smaller lots were distributed to other places; and all were successfully hatched out and placed in their destined waters. The 100,000 sent to France were also hatched out with comparatively small loss and introduced into various rivers of the republic. Those for the Netherlands were equally successful. The number actually received in Amsterdam was estimated at 85,000, and of these over 60,000 produced healthy fish, and were planted in various streams.

Another feature of Prof. Baird's report of especial interest to Californians is a paper by R. A. Poppe, of Sonoma, describing the introduction of carp to this State by the late J. A. Poppe. It is the first complete account ever published of an effort which must be counted of great service to the State, for carp are now to be found in ponds in all parts of California, and their successful growth is leading to the building of artificial ponds and stocking of natural ones by many land owners. It is a story of deep interest which is told of Mr. Poppe's unyielding endeavor. How he obtained 83 carp in Germany and started with them across the Atlantic, with his own hands nursing them during the voyage, continually pouring the water back as it ran from the first can through the second into the third; thus keeping his fish in the same water, because he could get no fresh water for them. Despite his effort, and because of the lack of ice to cool the water, more than three-fourths of the first died before he reached New York harbor, and more died while the steamer lay in quarantine. When he landed in New York city he had only eight alive to give the benefit of fresh water. Hence he came overland, and arrived in San Francisco August 5, 1872, with the eight still alive; but delay here caused more to die, and he reached his ponds near Sonoma, with only five puny fish, "not larger than a steel pen"—the very smallest of the lot with which he started from Germany. The hardiness of the carp enabled these five to thrive; and in May, 1873, the five had grown to be each 16 inches in length, and they were attended by a progeny of 3,000. Henceforward Mr. Poppe's effort was eminently satisfactory.

His ponds became stocked, and he sold fish to other breeders, and they, too, filled their ponds, and ate and sold the fish; until now, as we have said, the whole State is being interested in carp culture. Mr. Poppe's life was spared until he saw the full success of his persistent enterprise; and his memory may be cherished as one who enriched his chosen State by the introduction of a new and valuable food supply.

In addition to his account of the introduction of this fish to California, Mr. R. A. Poppe gives a paragraph concerning the adaptation of carp to this State, which seems well justified by the experience of many in this State. He says: As to the probable extent to which carp culture may be carried in California, and what its probable success will be, no one, of course, can be able to say. That it can become profitable, I have not the least doubt. The carp, more than any other fish common to us here in the extreme west, is hardy, prolific, and does excellently in our waters. It can be raised with much less trouble and expense than any other, and is as good if not better than any. There are hundreds of acres of marsh and waste lands in California which, by a little labor could be prepared for the culture of the carp. An acre devoted to this purpose is the most profitable investment a farmer could make. Anyone making the experiment will acknowledge beyond a doubt, that the money necessary was never invested to better purpose. Besides supplying the market, there is a delicious dish for home consumption.

THE drainage of ancient Rome was perfect. The famous sewers of Tarquinius Priscus lasted over 700 years, and he had them built of such vast dimensions that a wagon of hay could be driven through them. Then came the northern barbarians and pests and earthquakes. The aqueducts were ruined; the grand sewerage became clogged up, and its existence forgotten. Strange to say, there is no map of the present sewerage of Rome, no certain knowledge of the complicated network of drains that lie under the many and tortuous streets. This work has been taken in hand lately. It is, however, a labor of many years, and its completion depends on the length of the present government. It is an undertaking that has been commenced many times by the popes at various epochs: by the French during the occupation and possession of Rome by the First Napoleon; by Pius IX; and now by the Italian government.—*Rome Letter.*

WHY A PUMP WILL NOT LIFT HOT WATER.—The suction pump depends for its action on atmospheric pressure. When the piston of such a pump is raised, a vacuum is formed beneath it, and the water from the well or reservoir is forced to follow the piston up to the top of its stroke, by the atmospheric pressure on the water surface with which the pump is connected. When the attempt is made to lift very hot water, however, the rise of the piston causes an abundant evolution of steam or vapor from the water surface, which fills the space beneath the piston. This steam or vapor has considerable tension, and exerts a sufficient back pressure to counterbalance and equalize the atmospheric pressure. On this account, the lifting of hot water, save for very small lifts, is impossible. When hot liquids are to be pumped, therefore, the point of supply should not be below the pump, but rather a little above it, so that the liquid may flow into it.

POURING OIL ON THE TROUBLED WATERS.—We have several times made allusion in these columns to the use of oil for softening down the violent action of the sea waves. According to the Dundee (Scotland) *Advertiser* some recent experiments were made at Peterhead, and struck the assembled Scotchmen as so successful that the proposal to lay oil on to the mouths of harbors by means of pipes, was discussed as a not very remote project. Bottles filled with oil were sunk to the bottom of the harbor in which the sea was breaking heavily. The oil was then released, and rising to the surface, it exercised an immediate and magical effect in smoothing the troubled waters. Instead of the waves breaking, the sea became quite smooth and glassy-looking, and there was a visible softening down of the waves, which, in place of being sharp and crested, were turned into long, undulating seas.

COFFEE GROWTH IN THE UNITED STATES.—There was a premium lately given to Mrs. E. S. Warner, of Manatee, Florida, for the first coffee ripened in the open air in the United States. The seed was obtained by Mrs. Warner from Cardova, Mexico. In a letter lately received from the gentleman who sent the seed, we read that in Cardova they prefer to plant coffee in fresh, timbered land, cutting out at first only the underbrush, and then removing the trees gradually, thus securing both such shade and ventilation as the coffee trees require. The banana plant makes a good shade for coffee plants, as the under leaves may be trimmed out to give the coffee room. Coffee requires a rich vegetable soil or manure. This connection of the banana with coffee seems a natural one; and as some of our Southern friends still think they can grow bananas, they may succeed with coffee at the same time.

A GALVESTON woman, just married, wishing to impress her husband with her ability as a house-keeper, bawled out to the servant as she entered the door: "Matildy, bring me the washboard; I want to wash the potatoes for dinner."

Manufactures and Interest.

Just now the attention of the public is drawn prominently in the direction of home manufactures. California is not as prosperous as her sister States just at this moment, and we are beginning to think that we must establish manufactories to work up our raw material. The question is, whether we can do this under the conditions existing here at present. Theorizing is all very well, and "general principle" statements sound nicely. But have we the men among us with the nerve to put their money into manufacturing and take it out of the old grooves where it earns interest without responsibility.

The truth of the matter is, that our California capitalists have, in the way of manufactures, done very little. They have never taken any risk. They let the poor man do that. In other countries, capitalists start up an establishment, put in their money honestly, and go to work. If the thing fails, they lose their money; but if it succeeds, they are gainers. They take ordinary business chances, of course.

With us it is different. A man or a few men want to start up a manufacturing establishment, and must rent premises or put up buildings, and buy machinery, and have some means to start in on. With the necessary knowledge of how to accomplish their object with the works prepared, they haven't the money to prepare them. They therefore go to the capitalist. He does not ask them how many men the project will give employment to, nor how much they can make per annum. He asks them what *security they can give* for the money. He don't propose to go into any manufacturing institution with his money. He wants, simply, to lend it. If they can give good security and pay good interest, all right; if not, they may say good-morning.

Now, there is more truth than poetry in this statement. Nearly every man who has started in at a manufacturing business here has had the same experience.

The consequence is, that the manufacturing establishments of California are fewer than they should be. The capitalists are more money lenders than anything else. Another result is, that what institutions there are in existence, are on a smaller scale than they should be. Persistent men go to work with a desire to build up a business, and those who can't give security must do the best they can, or give up the idea.

It is the poor man who takes the risk in all these transactions. He has got to run the works, take all the responsibilities and chances, and the risk of failure. The capitalist sits in his office and draws the interest. If it does not come promptly, he shuts down, and that is the end of the works. He loses nothing. It makes no difference to him.

Those who have had the temerity to go into manufacturing here have always had to fight their way against older established institutions East. They have had to overcome the absurd prejudice against home productions. They have had to pay higher wages than their competitors, and higher expenses also. But the worst fight they have had is with high interest. When they overcame all other obstacles, there stood the interest in the way. The man supposed to be their "backer" and helper financially, is the man drawing the life blood from the institution in the shape of interest. He is the "Old Man of the Sea" on the shoulders of the business, bearing it down.

We must not expect to make any advance in manufacturing here until these conditions are changed. People ought to be satisfied to invest their money legitimately in an enterprise, and depend upon its profits. Unless our capitalists will do this, it will be extremely difficult for us to compete successfully with similar establishments East. Or perhaps some enterprising capitalists from the East will come here and go into manufacturing among us, as they are already coming and buying up our good mines, under the noses of our money-lending, interest-consuming capitalists. When they do, perhaps our monied men will come to their senses and start in to help the State in the way they should have done long ago.

THE INDIAN CENSUS.—A Washington dispatch says: The attempt to take the Indian census by the patriarchal plan met with great obstacles. Special agents notified census officials that, owing to the Indians scattering and their superstitious reluctance to give the names of themselves and families, they have been unable to make any headway yet among the savage tribes, and must have more men and money. Secretary Schurz directed the Indian agents to assist in the matter, but they do not seem to have obeyed very effectively. It is not expected to have any reports in this year, and it appears the attempt to take families by name will have to be abandoned.

CONSIDERATE mother to governess: "Miss Smith, don't let Alfred and Jamie sit down on the damp grass, for fear they should catch cold. When they are tired you can sit down and take them on your lap."

THE RECORDERS of all Subordinate Lodges are requested to correspond and act as agents in securing subscriptions for the WATCHMAN. We will pay liberal rates for services rendered. Remember, Brothers, that you can accomplish a mutual benefit to the Order and ourselves.

Progress of Engineering in America.

Until the close of the last century, natural power had ever been employed in its most primitive forms. Wind and water were the only motive powers called in to aid man in his labors; and the appliances to utilize them were of the simplest possible character. It is true, some great engineering works were undertaken and completed; but only at large expenditure of mere labor and muscle. But with the introduction of steam, in 1778, a new wide field was opened up for the exercise of the genius of the engineer and mechanic. The invention of Watts was a triumph which set men to thinking, and its successful application contributed more to the prosperity and welfare of nations, and the advancement of science and mechanism, in the next succeeding century, than had been achieved by the united efforts of all previous time. Perhaps in no part of the world has it given birth to greater activity, or accomplished greater triumphs, than in the United States.

At a late meeting of civil engineers in St. Louis, a very interesting paper was read by Mr. O. Chanute, summarizing the progress and wonderful growth which engineering has made in this country, and alluding to the high position which the United States has attained among nations. From this paper we briefly summarize as follows: In the matter of supplying towns with water, the application of steam as a power, and the improvements made in pumping machines, engineers have made a gain of 50% over what was accomplished 20 years ago. There are now 569 towns and cities in the United States and Canada supplied with water works, involving 13,000 miles of pipe, 10,000 of which is of cast iron. Important progress has also been made in canal engineering; and we now have 3,257 miles of canal.

Experiments are in progress in the way of steam propulsion, which it is confidently expected will effect a saving of fully 37% over present methods. In railways, Americans were among the first to appreciate Stephenson's inventions of 1828, and are foremost among nations in utilizing it. The United States leads the world in the extent of her lines, reaching 86,000 miles; all Europe has but 90,000, and the balance of the world only 25,000. Our railroad engineers and locomotive builders lead all others. Our roads reach farther and cost less than any others, and our engines pull heavier trains and run more miles in a year, or during their lifetime, than those of any other nation. The Pennsylvania railroad was pronounced one of the best, if not the best, managed railroad in the world. [The present writer would name the Baltimore and Ohio as the only road whose management can be pronounced either equal or superior to that of the Pennsylvania.] In regard to bridges, there are now in the United States 900 miles of these structures—one-third of them stone or iron, and two-thirds wood. [The East river bridge, at New York, may be instanced as the boldest conception of bridge construction ever attempted.] The matter of river improvements is just now attracting much attention, and the fact is being realized that, until quite recently, but little has really been done in this direction. It has been demonstrated that the currents of the largest rivers may be controlled by simple brush dikes. The movable dam on the Ohio—a French idea—has already proved a success, and the best engineering talent in the country is now engaged in effecting certain needed modifications required to meet the peculiar nature and needs of our rivers. The recent improvements to navigation at Hell Gate and Flood Rock were referred to as great and novel feats of engineering. In telegraphic and gas engineering, we have made wonderful strides. In the former, we lead the world; in the latter, since 1850, the number of companies has increased from 50 to 900, with a capital of $200,000,000. In metallurgy, the increase of our blast furnaces is especially notable. In the amount of iron produced, we are next to England, Germany standing third. Our steel industry, which is now second only to that of Great Britain, will exceed that country in another year. Our increase has been 50% in two years. Our mining industry, especially in regard to the precious metals, is simply enormous. The petroleum industry was briefly alluded to. Our exports of that product are now the fifth on the list in point of value. In agricultural engineering, our progress has been truly wonderful, and before this all other branches become as dust in the valley. In the plow alone the annual saving of labor in producing our crops amounts to fully $36,000,000 less than the same work would have cost 30 years ago. It is in ship-building and maritime trade alone that we have lost ground during the last two decades. This decadence is attributed to the war of rebellion, and to unequal competition with England in ship-building, and the superiority of iron over wood—an industry to which our engineers and capitalists have not given proper attention; but it was confidently predicted that in the early future we shall once more assume our proper place on the ocean.—*Californian.*

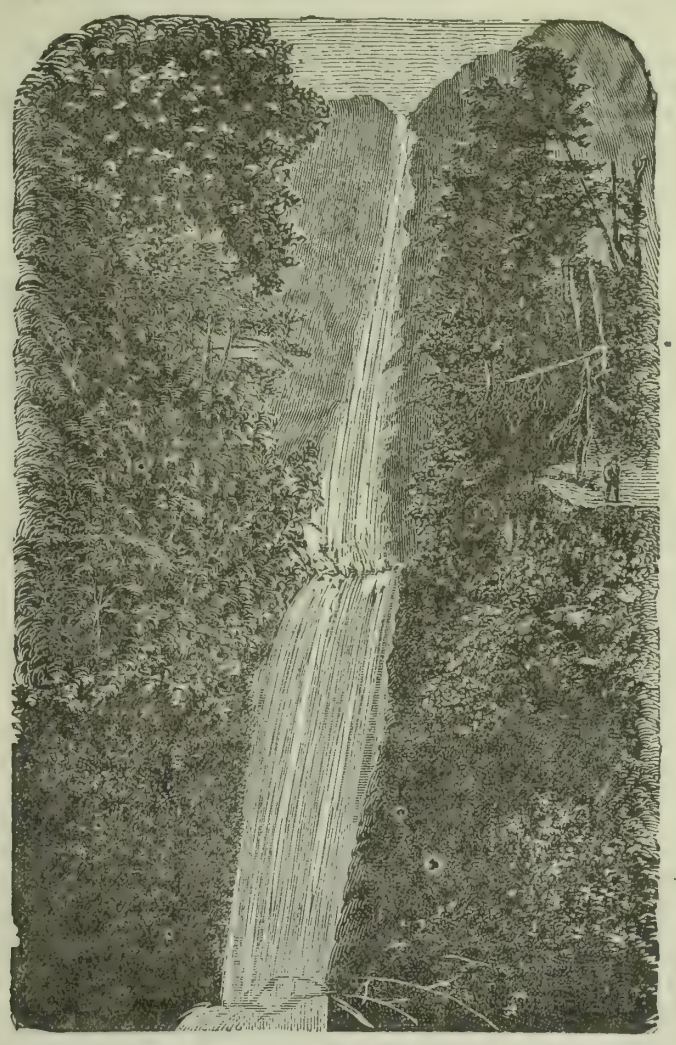
THE owner of a pair of bright eyes says the prettiest compliment she ever received came from a child of four years. The little fellow, after looking intently at her eyes a moment, inquired naively, "Are your eyes new ones?"

THE medicinal rule is that an elevation of 4,000 ft. above the level of the sea confers immunity from yellow fever.

Milk and Mystery.

The following communication, by a writer in the *Rural Press*, and the editor's comments, presents a phase of the "milk industry" which may seem novel to our readers. We hope there are not many such establishments in our city. Perhaps the coming Legislature may let a little light into the matter. We quote:

EDITORS PRESS:—I saw an article in your paper on city milk. Perhaps my experience may be of some interest. I engaged on a San Francisco milk ranch one afternoon and went to work at once. We had not a drop of milk for tea, and, after tea, we commenced to milk and had less than 13 half-cans of milk from the cows. To my surprise we put into the wagon 21 full and overflowing cans and started for the city. After the return of the wagon I washed the cans, but it was a much more difficult job than I expected, as there was some curious stuff in the bottom of the cans difficult to remove and a mystery to me.—M. J. O'B., Merced.



This statement of experience on a city milk ranch cannot prove very consoling to our city readers, who use milk from the back lots. Our correspondent evidently chanced upon one of the most pronounced of milk-making establishments. We did not know there was such an institution in the city. Watering milk is, of course, a sort of a classic art with milkmen; but no milkman can increase his product as described by our correspondent by the use of water alone. There was evidently an emulsion of whitish, sweetish matter, which padded out the amount of milk and gave it a rich, heavy appearance, which would deceive the unthinking into the idea that they were securing a very creamy liquid. Of course, setting for the cream would have dispelled the illusion, but the milk-maker was doubtless wise enough to sell his mixture to some restaurant or other establishment, where it was to be doused into coffee soon after it arrived. There are so many ways of "ennobling" milk, that it is impossible for us to tell what the nature of the deposit is in the cans which gave our correspondent so much trouble. If any of our city milk consumers find anything in their milk which puzzles them, we shall be glad to examine it for them if samples are furnished. We believe that San Francisco has better milk, as a rule, than any large city in the country; but it is not well to rest in fancied security. Bad milk is one of the most insidious foes a man can admit to his household, and all should be on the watch against it.

UTILIZING LEATHER SCRAPS.—A process for making buttons, heels, etc., out of powdered leather has been patented in France. The leather waste which is used, is first freed of all fatty substances by being cleansed and then immersed for an hour in a warm bath having a temperature of about 66° centigrade. Next the leather must be dried in a rotating drum located in a room having also a temperature of 66°. Then it is ground fine or coarse, as desired, after which it is cast into shapes and heated to about 120° centigrade. Then it is finished off by being subjected for 10 minutes to a pressure of from 700 to 800 lbs.

CONTRACTS have been let for grading 18 miles of railroad from San Diego northward.

Another Waterfall on the Columbia.

In our issue of December 1st, we gave an engraving of La Tourelle falls on the Columbia river together with some interesting statements concerning this mighty water course of the North. Along the same river there are many cascades, and another of them is shown on this page. It is known as Multnoma falls. The engraving is from Mr. Conklin's forthcoming book, "Picturesque Northwest," to which we have frequently alluded. The "Multnoma" falls are about 700 feet high, and divided into two sections; the upper being 500 and the lower 200 feet. The first section falls into a pool, carved from a rock, about 20 feet in diameter, filled with the finest mountain trout, and festooned with the finest maiden-hair and other delicate ferns. At this pool, hemmed in by the botanists' choicest studies, from fern to mountain timbers, and protected and ornamented by rocks and boulders, a general formation of the whole producing a concave grotto in the side of the mountain, over and down which "Multnoma" chooses her leap, is a model picnic ground, where one can be scared into superstition by the echo of his own voice.

MULTNOMA FALL ON THE COLUMBIA RIVER.

ELECTRICAL PHENOMENA IN TROPICAL COUNTRIES.—In a note addressed to the French Academy (*Comptes Rendus*, p. 446), M. L. Amat calls attention to the fact that the electrical phenomena produced by the friction of the hairy coat of animals, acquire a remarkable intensity in tropical countries, especially to the north of the Sahara, toward the 35th degree of latitude. At an altitude of 2,500 to 3,600 ft., he found that by passing a comb through the hair of the head or beard, sparks might be produced two or three inches in length. The phenomenon occurred at its best at from 7 to 9 o'clock in the evening, when the weather was warm and dry. In horses the effects are still more marked, and the hairs of their tail stand out from each other so as to form a sort of fan. If the hairs be touched, a crackling of the sparks is heard, and at night these are distinctly visible. Sparks are also easily produced by the use of the brush or currycomb. According to M. Amat, the electricity developed in the tail of the horse is positive, as he learned by experiment. Naturally, during rainy or moist weather, the electrical tension is considerably lessened, and it is likewise less sensible in the stable than in the open air. In man the accumulation of the electric fluid is not so great as in the horse, doubtless because he is not so well insulated from the earth as the latter, the horny hoofs of which furnish insulating supports.

HUMAN POWER.—At a late national trial of hand fire engines, Prof. Hartig made some experiments on human power for short intervals. The engines were worked by foot soldiers, on a warm day, and under an exposure to the direct rays of the sun. The mean velocity of the handles was 5.81 ft. per second; the mean value of the effective work for each man, 163.32 ft.-lbs. per second; or about 4.1 times the value which Morin and Weisbach assumed for the average of eight hours continuous labor.

The United States Compared With European Nations.

The total valuation of the natural wealth of the leading nations of the earth, according to the best authority, ranks as follows:

The United Kingdom of Great Britain and Ireland head the list with a capital valuation of 44,400 millions of dollars. Next comes France, with a valuation of 36,700 millions.

The third in order is the United States, with 32,000 millions.

Next follows Germany, with 22,000 millions; Russia, with 15,000 millions, and the Low Countries with 11,150 millions, collectively.

The average annual income, per inhabitant, of the various nations, makes a better showing for our own country, and presents the singular fact of an equal per capita income for both the United States and Great Britain of $165 for each man, woman and child in the two countries. France ranks next with $125. Then follow the British colonies with $90; Germany, $85; Scandinavia, also, $85, while Russia, with her 90,000,000 of inhabitants, is quite out of sight. With her imperfect statistics, no reliable estimate of income can be made.

But it is in the annual accumulations of wealth that the United States far exceeds all other nations, leading off with 825 millions, while France follows next, but at a long distance, with only 375 millions; then comes Great Britain with 325 millions, and Germany with 200 millions. The bare *increase* of wealth in the United States since 1850, according to good English authority, would purchase the whole German empire with its centuries of accumulations, its farms, banks, cities, shipping, manufactures and mines. With these facts before the world, it is no wonder that Clare Sewell Read who, during the past year has visited this country in the interest of British industry, reported on his return that "the American nation is destined to become the greatest in the world;" or that a late number of the London *Spectator* should exclaim: "America excites the half awe-struck admiration of the world at her material prosperity!" Every day that the sun rises upon this nation there is more than two and a half millions of dollars added to its wealth.

The recent estimation of the population of English cities furnishes results which afford an opportunity to make some interesting comparisons with the cities of the United States. London alone, stands out in advance of any city in the United States—not only in its aggregate, but also in its actual increase of population. Apart from that city which most wonderfully maintains its supremacy by an increase of 366,000 in 8 years; the other great cities of England fall below the measure of the same class of cities in the United States. Liverpool is fully equalled by Brooklyn or Chicago. The great city of Manchester has gained only 10,630 in numbers since 1871; and that city together with Leeds and Bradford, unitedly, contain a population only equal to that of Philadelphia alone. The great manufacturing cities of Sheffield and Birmingham, Liverpool and Hull, Newcastle and Bristol, which represent the commercial interests of England, have only increased 10% during the past 8 years. The great manufacturing city of Manchester has gained only 3% during the past 8 years; and it is quite noticeable to observe that the cities of Philadelphia, Brooklyn, Chicago and St. Louis are fairly running away from the ancient and historic cities of British commerce.

The aggregate population of the 15 largest cities of England is 6,843,000. This includes London, which counts more than half the entire enumeration. The aggregate of the 15 largest cities in the United States is 5,654,282. Another decade will carry this municipal growth quite beyond the aggregate of the English cities, the majority of which date their importance back to or before the 14th century.

It was claimed as quite a triumph, in 1871, that there were 12 English cities which numbered a population of 100,000 or more. The present report brings that number up to 16. But the census of the United States, just completed, gives us *twenty* of that rank, with many others closely approaching it. If this comparison of cities was extended to the nations on the continent of Europe, it would be even more favorable for us than in its relation to England alone.

The future of the United States, when contemplated in the light and logic of statistics already realized, fairly staggers our faith. Our rapid increase in population and wealth, as shown by the census returns, is already the wonder of the world. We have all the elements for sustaining a population fully equal to that of the most populous nations of Europe. A few statistics in that direction may be interesting: Georgia is as large as England, and is capable of supporting 10,000,000 of inhabitants. California, with a little less than 1,000,000 of people, is nearly as large as France, and quite as capable of supporting as large a population. If Texas was as densely populated as Massachusetts, and there is no reason why it might not become so, it would contain 52,000,000 souls. If the whole territory of the Union was so thickly settled as the State of Massachusetts, our population would reach 560,000,000. If it contained as many to the square mile as England, it would number a population almost equal to the entire globe at the present time.

PACIFIC STATES WATCHMAN.

[Consolidated with Pacific Workman.]

A. O. U. W. Home Paper.

(Formerly the Golden Gate Sentinel.)

Issued on the 1st and 15th of each month.

Subscription (in Advance), $2 a Year

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Recommended to the support of the Fraternity at large—by resolution of the Grand Lodge, A. O. U. W., of California, at Sacramento, Feb. 6th, 1880.

San Francisco, - January 1, 1881

Call the Roll.—The recent violent death of a member of the A. O. U. W., in this city, calls up the question, are there any other such members belonging to the Order, who are on the downward course by reason of indulging their appetite for strong drink? We are reliably informed that the member in question has for some time been drinking freely; in fact, so apparent had it become, that his employers were compelled to notify him that his services would no longer be required after the 1st of January. This, it seems to us, is a case in which a brother has been allowed to continue his membership in the Order, when it was a self-evident fact that such membership would prove a loss to the Order at large. Our Oakland correspondent, in our last issue of the Watchman, spoke forcibly and truthfully of the evils which result to the Order from the habitual drinking of intoxicating liquors. We are glad to learn that some of the Lodges try to stop the evil. Notably is this so in a case which recently occurred in one of the interior Lodges (Enterprise, of San Jose, we believe), where a member was dropped from the roll on account of his intoxicating habits, and 12 months after the Order got rid of him, he died, saving $2,000. Meanwhile we would suggest that the roll be called all along the line, and thus see if there is not any material which an investigating committee might get rid of. The new year is a good time to remove the chaff from the wheat. By all means let it be done.

We have received a query from Oscar Robinson, Colusa, Cal., asking our opinion as to the most appropriate monument to place over the grave of the late Bro. Oliver. We would suggest that some of the brothers of the Lodges which he organized, might give the benefit of their artistic knowledge for this worthy enterprise. Let a competent committee be appointed (and perhaps our worthy Grand Recorder would act in conjunction with them), and the best and most appropriate design can be chosen, or the ideas from several can be incorporated into one. This, it seems to us, would be a good way to do.

Outside Associations.—We have received communications (pro and con), concerning the "Workmen's Guarantee Fund Association," and the "Select Knights of the A. O. U. W." Neither of these associations belong to the A. O. U. W. organizations. There is a decided difference of opinions as to their merits among some of our best and most sincere Workmen. Can brothers best settle their quarrels in public print? We think a heated discussion concerning these associations in the Watchman would do more harm than good to the Order at this time, and shall govern our columns accordingly.

Compulsory Separation.

Under our system, when a jurisdiction has 2,000 members in good standing, it may petition and thereupon the Supreme Lodge may set apart such jurisdiction to collect and disburse its own beneficiary fund under certain restrictions not necessary to enumerate for the purposes of this article. It would seem to follow logically that the Supreme Lodge ought to possess the right to compel separation of a jurisdiction when the best interests of the Order might so require. The one appears to us should follow as the corollary of the other. This subject is brought prominently to our notice by several of the small jurisdictions, notably that of Maryland. The complaint is made that most of the jurisdictions under the direct supervision of the Supreme Lodge are composed principally of fresh material, amongst whom the death-rate is very low, while Ohio, which was once a separate jurisdiction, but fell back to her first estate on account of her membership falling below 2,000, has an exceedingly high death-rate, while now she has more than sufficient members for a separate jurisdiction.

It is contended that under the Relief Law, Ohio should pay her assigned maximum number of assessments, and then if continuing persistently above that, the extra burden should fall on the whole Order alike, instead of on the young jurisdictions where the losses average a lower per cent. than elsewhere. Furthermore, it is alleged that the heavy assessments prevailing in the Supreme Lodge jurisdiction, as a result of this state of things, stifles their energy and retards their growth, so that other Orders put us to a disadvantage because of the wrong that is done.

There is force in these arguments, a force so great that the Supreme Lodge should give them the most careful consideration, and bravely do what may be necessary to give such relief as may be safely done. Assuming that the law should be so changed that the Supreme Lodge might force a jurisdiction into separation, it is plain that to force such separation should not be obligatory on that body, any more than it is now obligatory to grant the petition of a jurisdiction to be made separate. It may be conceded that we have now an extreme case in the relation of Ohio to the balance of the Order under the beneficiary department of the Supreme Lodge, and yet so near is she to the 2,000 limit that to force her against her will into separation, might speedily result in so decimating her ranks as to compel a resumption of the same relations she now holds, with a probable increase of her death-rate, for the poorest risks would be more likely to hold fast than the better ones. We present this phase of the question to show the difficulties and dangers that would attend the exercise of the power, once bestowed, on the part of the Supreme Lodge, to force into existence separate jurisdictions. And yet we believe that our laws should provide that under proper restrictions, and when the best interests of the Order should plainly require it, the Supreme Lodge should possess the power to create separate jurisdictions even against the will of those most directly interested, firmly adhering, as we do, to the doctrine of the greatest good to the greatest number.

Great preparations are making for the reception of the Grand Lodge in February. It promises to be one of the grandest fraternal meetings ever held in this city. The Mechanics' pavilion, corner Market and Eighth streets, has been chosen as the place for the reception. The programme will include addresses, musical and literary exercises, a ball and supper. The entire membership of the State are invited, with their ladies. No pains will be spared to make the event one to be remembered in the annals of the A. O. U. W. in this State. Brothers who intend to visit the city will do well to postpone their coming till that time; and it will well repay all to make a special visit to the Bay City.

We intend to publish a double-sheet edition of the Watchman (24 pages), January 15th. It will consist of choice reading, and will be graced with several fine illustrations. Recorders and officers of Lodges are requested to send us the names of the newly-elected officers, together with representatives to the Grand-Lodge session. Items concerning the progress of different Lodges will also be thankfully received.

Our New Officers.

We suppose the officers elect for the first term of 1881, are duly impressed with the responsibilities of their positions. A Lodge that conducts its business with dispatch, whose officers are fully imbued with a spirit of pride in their work, cannot fail of success. We therefore say to those members who have been honored with official positions, and are not letter perfect in their duties, to at once begin and show the Lodge that in giving them "chairs," they selected the "right man in the right place." It is not such a hard task to memorize the "work" as some imagine. It only requires a little zeal on the part of an officer. The Order expects it of all members who have been honored with official positions. Officers should remember that in thus taking the initiatory, and doing the "work" in good style, they are setting an example which may be followed for years. If the Lodge has heretofore been weak, perhaps this newly-awakened zeal of officers may be the turning point in its success.

The presiding officer can do much to bring out the talent of members. By a wisely directed effort on his part, many a member who is not confident of his own powers, may be led to be one of the most useful members of the Lodge. But members should not depend too much on the presiding officer for the purpose of bringing their "light from under the bushel." They should strive to speak themselves, and with each succeeding repetition they will gain confidence, and in the end can express themselves upon any subject that may come up.

Old and experienced members should assist their new officers as far as possible, and thus make it easy for them instead of hard. They should lend all the assistance in their power to make the meetings agreeable and effectual. We would also suggest that older and bolder members should encourage and draw out the talent that may lie hidden in their modest and younger brothers.

Officers and members should always remember that upon the prosperity of each and every subordinate Lodge depends the success of the Order. Give us live officers, live members, and the future may be well left to itself. Let Workmen vie with each other in bringing in new recruits, and thus keep up a continual infusion of fresh blood. The new year opens auspiciously for California. Let Workmen see to it that the A. O. U. W. share in the general prosperity which now seems dawning upon our Golden State.

We understand that it is the intention of many of our Deputies to install no Master of a Lodge into office who is not proficient in the secret work; and we mention this fact to give it our commendation. Regarding, as we do, the fraternal features of our Order as the foundation on which it must stand or fall, we would have none other superior in this regard, and perfect "work" is one of the most essential factors in promoting success in any society of this character. Not only should the Master be fully qualified in the secret work, but also the Foreman, for at any moment he is liable to be called to do the duties of the chief officer. The experience of the oldest and most successful fraternal societies are full of instruction on this point and we cannot afford to disregard them. Any improvements we may be able to make certainly do not lie in the way of performing our ceremonies in a slip-shod and careless manner. And now, while we are upon this subject, the suggestion is ventured that some of our Lodges that are just now suffering from what the doctors call inanition, could be most effectually cured if only the new officers, from the highest to the lowest, would come into their respective positions with no portion of their duties unlearned. How thoroughly true it is, that whatever is worth doing at all, is worth doing well, can be most satisfactorily, and, we may add, wonderfully exemplified by following the suggestion before mentioned.

Members should attend the installation of officers of their Lodges. They should show them that they have not only given them their votes, but will sustain them in their work, and if need be, watch them and see that they do their duty fully. We take it that it is considerable encouragement to new officers to see the members turn out in force.

Our energetic agent, J. J. Hassell, sends us 10 new subscribers from Chico, Cal. Thanks for the favor.

1881—A New Volume.

With this number of the Watchman we commence a new volume—Vol. 5. In looking back over the year just brought to a close, we see much that brings to us pleasure and satisfaction. The Order has steadily pressed forward, extending its beneficent arms around many a home, and bringing in its joyful wake such deeds of benevolence as would never have fallen to desolate firesides, were it not for the A. O. U. W. Let anyone read the touching words of the stricken widow, published in our last issue, and then say that the A. O. U. W. is not a grand and glorious institution. This case is but one of many which have been blessed by the Order's benefactions. Homes—desolate, dreary homes—have been lighted up by its ministrations. Truly, it is a grand work upon which we are engaged—this one of lightening the cares and smoothing the sorrows of our wives and children.

In closing this volume we are pleased to record the fact that the Watchman has an increased list of friends. This fact serves to encourage us to greater exertions to merit their confidence. We have striven to conduct our paper upon as correct a plane as our knowledge of the Order and its needs would admit. In this we hope we have succeeded, and if an increased subscription list is a sign that we have met with the Order's best wishes, then we are confident of having the respect and esteem of the members. From all over the coast, and also in the Eastern States, we have received assurance that the Watchman is a creditable representative of the A. O. U. W. For this token of esteem we are truly grateful. Newspapers are like men. A kind word, an encouraging smile will call forth renewed exertions from both editors and publishers. But one of the most potent forces to give tone and sustenance to a newspaper is a healthy subscription list. This the Watchman is continually receiving, and we hope to make the paper, in all its features, a welcome visitor to every Workman's family.

The A. O. U. W. in California ought to have a membership of 15,000 at the close of 1881. It only needs a little exertion on the part of the membership to do so. We shall do all in our power to attain this result. Let members circulate the Watchman among outsiders, and they will find it will be of great assistance in propagating its principles. Let Lodges in the country send us notes of what they are doing, and then let the paper be circulated generally in the neighborhood. We are confident it will result in both increased life and vigor to the Lodge, and be the means of bringing in many new members. Brothers, let the good work go on unceasingly. It is a grand work we are all engaged upon—the dissemination of the principles of the A. O. U. W. Then let there be no halt during 1881. Let the tidings spread that here is something which merits the encouragement of men—something which will make them better in all the essentials of citizenship. Let the good work proceed.

Square Your Accounts.—The beginning of the year 1881 would be a good time for those who are indebted to the Watchman for subscriptions to square their accounts. The publication of such a journal as we are engaged upon, necessitates considerable expense, and while we are thankful for the support which the members of the Order have given us, there are some accounts which we would like to have settled with the beginning of the new year. Brothers, in settling up your affairs, remember your own fraternal journal, and start in the year 1881 with a clean balance sheet. It is not customary for first-class papers in this age to depart from the principle of strictly cash in advance payments for subscriptions; but to accommodate brothers, in some instances, we have done so, and we do not believe that they will fail to keep their promise. We have striven faithfully to give the Order a live representative. It has involved considerable expense to do so, hence those who have promised our agents to pay at some future time, are respectfully requested to do so with the beginning of 1881. Let the month of January, then, be the time for brothers to settle their accounts with us. You may be sure, brothers, it will give us renewed strength and vigor in our work and in behalf of our mutual cause.

Valley, No. 30, will give a public reception and entertainment January 12th.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

District Deputies will confer an especial favor by making prompt remittance of the per capita tax collected from Lodges after installations, so it may be available for use at the meeting of the Grand Lodge.

Many of our Lodges have paid one of the two assessments for December from their general fund, a procedure which seems to grow more and more in favor with practice. It's a benefit which each member receives and appreciates.

Some mortifying errors occur in the list of deaths sent out for the January assessment. Death No. 7 reads: "Henry Maittance;" when it should be "Henry Maitland;" and then the cause of death is omitted, which should be given as "Pyaemia." All this the result of hasty Christmas preparation.

Recorders are charged with the duty of making monthly reports of the changes occurring in their respective Lodges, together with the number of members in good standing, but they don't all do it; and many who do, are so slow about it, that it might about as well not be done at all. This is all wrong, and in most cases without excuse. It is but a moment's work to fill the blanks, and it should never be deferred beyond the date of the first meeting-night in the month.

All Lodges are required to make semi-annual reports, and pay capitation tax at the beginning of January and July of each and every year, whether meeting semi-monthly or otherwise. A dispensation to meet emi-monthly carries with it no privilege or exemption but that. The Deputy should collect and forward the tax, and the Recorder the report immediately after installation of officers; or, in case there be no installation, then immediately after the first meeting-night in the month. All this business should be concluded in time to get our books written fully up, before the meeting of the Grand Lodge, February next.

Frequent complaint is made that a member has joined some other Lodge by deposit of card, and the Recorder of such Lodge fails to give notice of that fact to the Lodge of which he was before a member. The result of such negligence always involves unpleasant complications. Our law in relation to clearance cards seems to be very generally misunderstood. It should be borne in mind that a clearance card is simply the evidence of privilege granted a member in good standing to join another Lodge. It changes the member's relation to his Lodge in no other particular. He should be treated in all respects the same as any other member, till official information is received that he has been elected into some other Lodge. Hence, the necessity of immediate notification by the Recorder of the Lodge he joins to the Lodge granting the card. Some Lodges grant a card without specifying any time beyond the date of granting it, to which his dues are paid. The card in such case is of no value whatever, and should not be given. No member can lawfully join another Lodge till official notification is received that all assessments standing against him have been fully paid.

The application for beneficiary certificate is the written contract the member makes with the Order, and the beneficiary certificate is the written contract the Order makes with the member. The proper time and date for the member to execute his part of the business is when he takes the J. W. degree, and not before. The Recorder should fill all the blanks except that for the applicant's signature, and should exercise great care in writing plainly the directions for payment in case of death. If to be paid to some person or persons, let such be named, and relationship, if any, to the member set forth. Simply "wife and children," for instance, is not sufficiently explicit. The wife and children should be named, and also the sum to be paid to each. Nor should a certificate be made payable "subject to will" or "to order," for in case of a member's dying intestate or leaving no order, it is a matter of grave doubt whether anybody could substantiate a legal claim against the Order. A little care and plain writing on the part of the Recorder will oftentimes save much trouble. It should always be remembered that these papers are legal documents, and should be as carefully executed as a deed or a mortgage.

The Grand Lodge of California.

Well may the A. O. U. W. boast of its Grand Lodge. We believe all its members are actuated by an earnest desire to guard, direct and perpetuate the noble fraternity of which they are the members. A graceful tribute was paid to it at San Jose, Dec. 15th, by Wm. H. Barnes, Grand Foreman, where representatives from Oakland, the country, and some San Francisco Lodges united in a fraternal visit. After a few remarks of a general nature, the eloquent Foreman of the Grand Lodge addressed the assembled brethren as follows:

Mr. Chairman:—It is with no ordinary pleasure that I rise to respond to the sentiment you have just read: "The Grand Lodge of California—the Golden Diadem of the Noble Brotherhood of Workmen."

The Grand Lodge! How many precious memories cluster around its head, although so young. But three years ago, on *November 13, 1877*, was it called into existence. Thirty-five brethren, representing 10 feeble little Lodges, were present, and the whole strength of the Order in California was but few over 300 members. That body adjourned to meet on *July 16, 1878*. It became necessary, however, to call a special session ere that date, and it was so called on *February 27, 1878*. A marked advance was manifest, and at this special session, the number of Lodges *had doubled* in the three months gone, and 20 Lodges were now in fraternal line. On *July 16, 1878*, the semi-annual session convened, and behold what five months had accomplished: *41 Lodges now wheeled into marching order, with over 2,000 members!* The rapid lightning flashed the news to Supreme Master Sackett that our quota was complete, and we asked for a separate jurisdiction. Grand Master Jordan had prepared the way, and the clicking of the electric key announced to all the world that *California had started business for itself!*

Six months rolls by, and the Grand Lodge meets in San Jose (in January, 1879), your beautiful Garden City home. How stands the record? *Seventy-seven Lodges, 4,700 members*, a gain of 2,200 in six months! A year passes, and we meet in Sacramento, in February, 1880. Has this wonderful increase been sustained? What does the Ledger say of this session? Read and ponder! 160 Lodges, 9,000 members! Soon the fourth session will convene; and, notwithstanding the losses by death, suspension, and other causes, the stars of nearly 200 Lodges will glitter on our fraternal firmament, with 11,000 Master Workmen within our borders.

It is no ordinary privilege to respond to a sentiment like this. We honor venerable Masonry, that comes down to us from past centuries, grand and majestic in its honorable career; we greet Odd Fellowship with joy—the great, practical, beneficial organization of the 19th century; we pay a tribute of respect to Druidism, Forestry, Pythianism and Red Manship for their noble, self-sacrificing missions and heroic deeds; but let me say to you, my hearers, as one who, for more than a quarter of a century, has been familiar with fraternal societies, that here on the Pacific coast, we have culled the choicest flowers from all of these Orders, we have united them with the bands of Charity, Hope and Protection, and this rare, rich and perfect bouquet is called *The Ancient Order of United Workmen.*

Without disparagement to any other, without desiring to be either fulsome in compliment or false in statement, I unhesitatingly assert that in point of ability and willingness to work—in point of honesty, faithfulness and integrity of its members—in point of harmony and earnest desire for the welfare of each other and of mankind—the Grand Lodge of California is inferior to no deliberative body that meets on the American Continent; and this means that it is excelled by none throughout the globe!

You have been pleased to gracefully allude to it as a Diadem—a Golden Diadem. And so it is, as the emblem of power and authority; may it never mar the fair brow it rests upon. But what would even the golden circlet be without its attendant gems—its Kohinoors of priceless value? It would be but half a crown. But ours is lighted by many a flashing light. You, my brethren of San Jose, attach the glittering talismans of Enterprise, Mt. Hamilton, and their sisters of Santa Clara county; you, my brethren of Alameda county, headed by good old No. 1, add more than a score of costly jewels; San Francisco as many more; Shasta sends its contribution; San Diego gives its quota; from mountain and valley, hill and plain, the subordinate Lodges have added gem on gem, until it is in very fact a priceless diadem, worthy of our nation—free, happy America! worthy of our home—fair California! Nor must we forget the many busy hands, whom, from the mines of Fraternal Love, have brought these jewels forth—*our noble, toiling, honest 11,000 Master Workmen!* Oh, no, amid the festive scene, let our hearts go out in gratitude to God, who has blessed our Order; to Father Upchurch, who first sowed the seed; to Pratt, who transplanted it to the Pacific coast, and to every man who, from its origin to the present moment, has labored to advance the standard upon whose folds is inscribed "Charity, Hope and Protection."

Oh, it is a brilliant diadem indeed! Already its refulgent light has penetrated to the home of many a widow and orphan, and although it does not possess the power to call back the loved ones gone, it stands, as a flaming sword, to keep hunger and poverty from the door.

Its beams are seen far out upon the ocean, where the mariner brother is rocked in the cradle of the deep; they penetrate down the shafts of mines, thousands of feet below the surface of the earth, and cheer the heart of the toiling miner; they gleam upon the axe of the woodsman, and glint upon the machinery of the mechanic; the dewdrops in the farmer's path reflect its rays, and they glisten in the beaded sweat of honest toil in every sphere of life, and whenever and wherever seen they are the symbols, the types, the emblems of Fraternity and Protection.

May our Father in Heaven give us grace and strength, and honesty and desire to preserve this diadem pure, untarnished, and lovely in the days to come, as it is to-day. Should the murky clouds of dissension, selfishness, discord, or distrust ever drift over our pathway, may they be rent in twain and forever dissipated by the glowing fervor of honest indignation that shall rise from the altars of our subordinate Lodges. Let the motto ever be "private advantage shall yield to the public good." Cultivate the spirit of harmony and love, not only in Lodge-rooms, but wherever you may be, so that the world at large, as well as home and friends may feel the good influence of our being Workmen. Labor earnestly for the right. Strive to elevate and ameliorate the condition of those by whom you are surrounded. Let not the teachings of our ritual be mere sounding words, but vital truths to be illustrated in our lives.

Young men, we who are older, must sooner or later pass away. Our work will have terminated, but the work of our Order will never have been finished until

> Misfortune has no want to relieve, and
> Sorrow no tear to dry.

You are to take our places, therefore fit yourselves for the duties which will soon devolve upon you. I have every confidence in your ability, integrity and determination. Keep the polar star of truth ever before you. Guide our honored vessel by the cardinal points of Charity, Hope and Protection, and in days to come, when the speaker has passed from time to eternity, may our successors be enabled in spirit and in truth to give, and respond to the honored sentiment:

"The Grand Lodge of California—the Golden Diadem of the Noble Brotherhood of Workmen."

While listening to the eloquent words of those who have preceded me, I have jotted down a few lines, with which I will conclude these remarks to which you have so kindly listened:

> When, in the future days to come,
> Our heads grow gray with added toil,
> We'll think of San Jose's bright home
> And this night's welcome by you all.
>
> God bless the hearts so full of love
> Who clasp to-night our outstretched hand;
> And may they never cease to prove
> The brightest jewels of our land.
>
> Long life to one—long life to all!
> May increase visit Lodge and life;
> May dark clouds never o'er you fall
> Nor in your path be care or strife,
> And years but brighten up the way
> Of the noble boys of San Jose.

According to the report of the Supreme Recorder, the three largest jurisdictions of the A. O. U. W. are New York, Pennsylvania and California, with a membership, respectively, of 14,897, 11,300, and 10,412.

An Address of Welcome.

Dr. M. S. Levy, P. M., of Mt. Hami' Lodge, and Rabbi of the San Jose Synagogue, delivered the following address of welcome to the visiting brethren, on the occasion of the recent fraternal visit to San Jose. Bro. Levy recognizes the A. O. U. W. as being worthy of the best wishes of society. He is an earnest advocate of the principle that only upon the fraternal feature of our Order receiving the fullest encouragement can it ever hope to attain its highest usefulness. He is also considerable of a punster, as a reading of his hits upon prominent Workmen will show. Bro. Levy spoke as follows:

In the name of, and on behalf of the united Lodges of this city, I bid you a hearty welcome. Yea, thrice welcome! worthy representatives of the greatest, grandest and most ennobling institution that has raised its head during the present century.

You have come here this evening, as we understand, for the sole purpose of paying us a fraternal visit, and of exemplifying to us in a very marked degree, what you believe to be one of the most pleasant features connected with the brotherhood. We, too, recognize the force of your argument in connection with this feature, and believe it to be a feature worthy of imitation. For I am of the opinion that through fraternity alone our cherished institution of a united brotherhood may raise the standard of its usefulness to such a hight as to elicit the applause and admiration of all sister organizations, as well as the respect and gratitude of the philanthropic world. Under such circumstances how can I otherwise but proclaim with an overflowing heart, that you are welcome to our temple, and I extend the cordial grasp and honest heart of a Master Workman. Before retiring, permit me to say: Thus far you have been piloted safely across the Jordan, and we promise you later in the evening some of the fruits of the promised land, for we have emptied our overflowing and well-filled "Barn(e)s"(but not our barn-yards), with all the good things of the valley. We likewise promise you such singing that will put your own sweet "Nightingale" to shame. While on your homeward trip should you "Pratt'le" about us, we beg you to remember that you have seen considerable "Enterprise" in our midst, notwithstanding our youth; and should the humble orator fall into abuse for his folly, I beg you to leave I (Levy) alone.

Substantial Compliment.

Hall of Bay City Lodge, No. 111, A. O. U. W.
Eureka, Humboldt Co, Cal., Dec. 23, 1880.

Watchman Publishing Co.—Dear Sirs and Brothers:—At a regular meeting of our Lodge, held this evening, a warrant in the sum of $3 was ordered, drawn in your favor, in payment of *publication of Lodge card from July 1, 1879 to July 1, 1880*, 12 months at 25 cents per month; please acknowledge receipt. This action was taken as an evidence of the appreciation of the members of this Lodge in your noble efforts in promoting the interests of the Order. We hope every Lodge in the jurisdiction will do their duty in the premises.

Fraternally in C. H. and P.,
Fred W. Bell, D. D. G. M. W.,
Recorder Bay City, No. 111.

We tender our sincere regards to a Brother Editor, in the northern part of this State, for his kind words in recognition of our paper. Coming as it does, from an old newspaper man, it makes us feel happy to think that our conduct of the Watchman has met with his approval. He says: "Your last number (December 15th), permit one to say, was one of the best Order sheets I have ever seen, and as a home paper it is actually high-toned, entertaining to all classes, and an educator of the highest degree. Let me congratulate you." These kind words will spur us to renewed efforts, not only to continue to meet his approbation, but the entire Order's also.

H. G. Pratt, G. R.; W. H. Jordan, P. G. M. W.; Dr. M. W. Fish, Foreman Supreme Lodge, and W. H. Barnes, G. F., were among some of the leading members of the A. O. U. W., who attended the fraternal visit to San Jose.

FURNITURE.

New and second-hand at auction prices, at H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

The Effects of Patents on Capital and Labor.

In the Economy and Trade Department a paper was read by Mr. John Standfield, of London, on "The Effects of Patents on Science, Capital, and Labor." The writer asserts that the three things which most require protection were science, capital, and labor. It was evidently our interest, he submitted, to afford inventors all the scope we possibly could, so that our trade and income might increase and our expenditure diminish. Contending that we had legislated so badly with regard to the development of science, and the value of both capital and labor had been kept considerably below what it would otherwise have been, he remarked that the prosperity of a nation depended upon its scientific progress—using these words in a wide sense to embrace all discoveries and improvements in our numerous and varied industries—that scientific progress, in its turn, depended upon invention, and that the inventions of a nation were practically dependent upon its patent law. This was, perhaps, more particularly the case in this country than in any other. In the United States, a patent was granted for 17 years, after careful examination by experts, for the small sum of £7; whereas a patent in this country was burdened with the heavy stamp duties of £175 and was not subject to any examination. This enormous difference handicapped the British inventor by 25 to one in favor of the American, and thus, taking the average of the last 10 years, there were 13,356 patents granted to the United States against 3,030 in this country. Mr. Stanfield accordingly proposed that our stamp duties should be so reduced that a patent in this country could be obtained as cheaply as in America. His proposal was to charge a stamp duty of £2 on application of a patent, and a further duty of £3 when the patent is granted, and an annual stamp duty of £1, £2, or even £3, so that the Patent Office may be more than self-supporting. He also proposed that patents should last 21 years, including provisional protection for one year. Mr. E. J. Watherson also condemned the present state of the English patent law, and urged the necessity of appointing a Minister of Commerce. Mr. R. A. Macfie opposed licence only for patents, on the ground that it granted a monopoly. Prof. Heinemann said he was opposed to the abolition of patent duty, as it would discourage invention. Mr. Westgarth (London), thought the patent duties were the greatest possible stimulus to invention. Mr. Rendall (Leith) remarked that this was a country of monopolies, as was proved by the existing patent laws.

Spontaneous Combustion of Coal.

Herr Haedicke, of Hagen, Germany, has been making some investigations on the causes of spontaneous combustion of coal, which indicate that some of the views now held relating to the subject are erroneous. It has been quite generally believed that the decomposition of the pyrites often contained, finely distributed in coal, and the increase of temperature due to that decomposition, were chiefly responsible for the greater number of accidents reported as having risen from "spontaneous combustion." Herr Haedicke has endeavored to produce ignition of coal artificially, and though his experiments were conducted with materials differing in their nature from those in coal, his results are not without some significance. It should be stated that far from overrating their value, he insists that they be looked upon as preliminary only. He took small pieces of charcoal, soaked them in sulphate of iron and then treated them with sulphide of ammonium, thus impregnating them with a sulphide of iron. Placing them into a glass tube he exposed them to different temperatures, at the same time forcing a gentle current of oxygen through the tube.

He found that ignition took place only after a temperature of about 300° Celcius had been reached. Ozone did not cause an ignition at a lower temperature, nor did powdering the charcoal affect the general result. On the other hand, saturation of the oxygen with steam prevented any ignition, even at a temperature of 360 degrees. The result was a little different when the sulphide of iron impregnating the charcoal was produced by soaking it in an ammoniacal solution of sulphate of iron and passing a current of sulphureted hydrogen over it. In this case the temperature of ignition was about 200° to 220°, while sulphide of iron by itself ignited at 200°. It is important to state that no combustion of the impregnated carbon took place when a current of atmospheric air was passed over it instead of a current of oxygen.—*Iron.*

"We had a short-cake for tea," said a little girl to a neighbor's boy, to whom she was talking through the fence. "So did we," he answered; "very short—so very short it didn't go round."

Sir Walter Scott once lent a book to a friend, and as he gave it to him, begged that he would not fail to return it, adding good-humoredly: "Although most of my friends are bad arithmeticians, they are all good *book-keepers.*"

Sample copies of this paper will occasionally be sent free to persons supposed to be interested in our enterprise and likely to subscribe. If any one should receive duplicate copies, please circulate them where they will do the most good.

Our Manufacturing Possibilities.

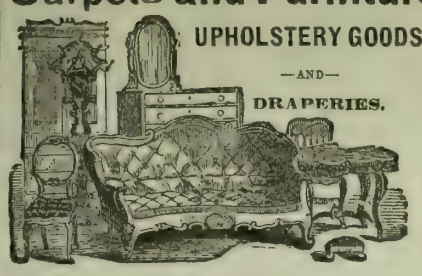
It does not admit of question that California has within her borders more of the elements of commercial greatness, more things necessary to the sustaining of life, more things capable of making existence comfortable and even luxurious, than any half dozen other States of the Union. The statement is not new, but it will bear repetition, and it can be easily proved. Besides our silver and gold we have iron, copper, coal, wood, marble, building stones of all kinds, of which cities can be built, and innumerable articles of use and beauty wrought. We can raise our own wool, silk and cotton for woven fabrics. The rivers flowing from the Sierra will, at slight expense, furnish power to run innumerable spindles and looms, and our ports are within easy distance of the countless markets already open or to be developed in the Pacific, in South America, in Australia, and in Oriental countries. The raw material is ready, or can easily be produced, to employ hundreds of manufactories in widely varying fields of industry. Capital and enterprise are all that are wanting to place California in the front rank of manufacturing and exporting commonwealths.

It may be profitable to pause for a moment to note the substantial progress we have already made in various departments of manufacture. While our speculators in mining securities have been impoverished, except a few successful ones who have become fabulously wealthy, nearly all our manufacturers have, in spite of the hard times, made their way first to independence, and then to riches. Our iron manufactures have been successful, so have most of those individuals and firms who have made furniture, shoes, cigars, tobacco, or other articles, either of domestic or imported material. Several capitalists in different parts of the State have manufactured woolen goods of different kinds, which have proved excellent in quality, and have found a ready market. Wool we have in abundance, and it is cheap so near the place of production. A little bolder venture of capital would erect mills on Kern, King's and San Joaquin rivers to utilize the cotton product of the three counties at the head of San Joaquin valley. Will it make the venture? Hides we have in abundance, and from them we should have leather tanned and prepared by skilled workmen equal to the best imported. Clays we have in unlimited quantity, of which we should make for home use and exportation, not only the commoner kinds of pottery, but elegant terra cotta wares, crockery coarse and fine, ornamental tiles equal to the English, and even the finest porcelain. All this, in time, will doubtless be done on this coast. Materials for the making of glass are found everywhere. We have inexhaustible stores of them, and out of them we should produce, not only the commonest kind of glassware, but fine plate glass, such as we import from France. We can make and sell everything that can be created from gold, silver, copper, quicksilver, plastic clay, stone, kaoline, iron, tin, wool, flax, cotton, silk, leather, wood, not to mention articles of diet or for other uses, that can be manufactured from the grape, from wheat, corn, beets, potatoes, or other vegetable products that grow luxuriantly in the State. The very capitulation suggests vast possibilities of wealth and commercial greatness, when our own capitalists waken from their dreams of rapid speculative money-getting, or when Eastern capital, having been made aware that there are other and surer means of investment on this coast than mines, begins to overflow upon us.—*Bulletin.*

THE YOSEMITE.—J. M. Hutchings, the guardian of the Yosemite and Mariposa Big Tree parks, passed through Stockton yesterday, en route to San Francisco, whither he is called by the burning of his house. Mr. Hutchings states that the valley was dreadfully neglected by the old commissioners; in fact, everything seemed to have been done to keep tourists away from it—the grandest of Nature's wonders. He recently set men to work clearing the river from the timber which had fallen into it, and had made sufficient from the sale of the same for firewood to pay the cost of clearing. Mr. Hutchings believes that much can be done to make the place more attractive to tourists. There are a number of improvements which can be made. For instance all the roads to the valley should be thrown open without toll, so that a visitor should not have to pay a cent for this class of expenditures the moment he gets within the grounds. To carry this out, it will of course be necessary to buy out the owners of the present toll roads, but this would be a paying investment, as inviting travel to this State. Footpaths should now be made between the different hotels, to afford visitors the opportunity ofading when-

---

SOLID MUCILAGE.—Mucilage in a convenient, solid form, and which will readily dissolve in water, for fastening paper, prints, etc., may be made as follows: Boil one lb. of the best white glue, and strain very clear; boil, also, four oz. of izinglass, and mix the two together; place them in a water bath—a glue pot will do—with ½ lb. of white sugar, and evaporate till the liquid is quite thick, when it is to be poured into molds, dried, and cut into pieces of convenient size.



PASSENGER arrivals in San Francisco last month aggregate 4,439, and the departures 4,482, a net loss of 43. The arrivals from China and Japan were 453 and the departures, 1,363.

CANADIAN ASSOCIATION.—The fourth annual ball of the Canadian Association was given on Tuesday evening, Dec. 28, 1880, at B. B. Hall, Eddy St. At 9 o'clock the entertainment was opened by a grand march, presenting a scene of beauty and animation. There was a large number in attendance, the hall and gallery being well represented in gay and happy participants as well as interested spectators. The programme of dances was arranged on glazed paper in the shape of an oak leaf, in beautifully colored and artistic design. The numerous committees, represented by their different colored rosettes, welcoming and assisting their guests, made them feel that the parties given by this society were in keeping with the reputation it has of being one of the leading social institutions of our city. This pleasant reunion was kept up with unabated interest until 2 A. M. The society is social and protective in its character, and is increasing in membership and prominence, and its monthly entertainments are always looked for with pleasant anticipations. The officers for this year are: Mr. D. McLeod, President; Charles E. Hunt, First Vice-President; James Harris, Second Vice-President; W. G. Gillilard, Recording Secretary; W. G. Buchanan, Financial Secretary; R. S. Falconer, Treasurer; W. Sansom, Corresponding Secretary.

THE California buckskin gloves have the best reputation in the world. The manufactory (G. Winehill, P. M. W., of Unity), 125 Sansome street, is one of the leading houses in this line. He gives employment to 35 men and women; and what is commendable, none but white labor is employed.

BRO. RAPH. ROSENTHAL, importer and jobber in all kinds of merchandise, has been compelled, from lack of room, to remove to more commodious quarters, and may be found at 227 and 229 Washington street, between Front and Davis.

ONE of the leading industries of the interior is the San Jose foundry. Their large experience enables them to design and manufacture everything in their line. Our genial Bro. Mitchell, who is Superintendent, is the right man for the position. See their card.

Report of Election of Officers, A. O. U. W.

Recorders of all Lodges are requested to send us a list of the officers of their respective Lodges for publication.

California Lodge, No. 1, Oakland.—C. R. Taylor, M. W.; E. W. Berry, F.; A. Z. T. Barker, O.; W. H. Wilkinson, Rdr (re-elected); J. L. Edwards, Fin. (re-elected); C. Ivan, Rvr; — Berdan, G.; U. A. Bear, I. W.; J. J. Lawler, O. W.; Geo. E. Bugbee, Trustee (long term); Dr. W. N. Brown, Med. Ex.

Lauer, I. W.; W. A. Babcock, O. W.; Dr. J. L. Ross, Med. Ex. (re-elected). Reported by G. T. Wagstaff, Rdr.

Keystone Lodge, No. 64, Oakland.—This Lodge elected all its officers down to O. W. unanimously, the Recorder casting the vote of the Lodge. For O. W. five ballots were necessary. The following officers were elected: J. C. Plunket, M. W.; F. M. Cary, F.; J. W. Nelson, O.; C. E. Alden, Rdr; Wm. Kilpatrick, Fin.; J. J. White, Rvr; Robt. Gay, G.; J. J. Smith, I. W.; Geo. Atkinson, O. W.; Trustees: A. T. Dewey (18 months), J. W. Dodge (12 months), M. E. Clough (6 months).

Burns Lodge, No. 68, S. F.—W. K. Doherty, M. W.; Robert Wilson, F.; M. J. McGrath, O.; Gus Pohlmann, Rdr (3d term); John McDonald, Rvr; (4th term); A. J. Fairweather, Fin.; C. C. Butt, G.; Chas. Thomson, I. W.; D. B. Bell, O. W.; W. C. Flint, Trustee; Lee O. Rodgers and W. K. Doherty, Med. Exs.

Sts. John Lodge, No. 73, S. F.—J. O. Jephson, M. W.; J. N. Prather, F.; Elias Rodecker, O.; Wm. B. Marshutz, Rdr; O. H. Smyth, Fin.; J. D. Wheelock, Rvr; Martin Kelley, Ge.; Edward De Courcy, I. W.; R. T. Hawton, O. W.; H. G. Prince, Trustee; F. H. Dennis, Med. Ex.

Visalia Lodge, No. 79.—Alfred Dagget, M. W.; V. D. Knupp, F.; S. B. Hunt, O.; L. V. Nanscawen, Rdr; J. M. Harter, Fin.; R. E. Hyde, Rvr; Fred A. Warner, G.; Thos. Hall, I. W.; W. McIntosh, O, W.; L. A. Huhmason, Trustee; Drs. Asay and Hall, Med. Exs. Reported by L. V. Nanscawen, Recorder.

Silver Star Lodge, No. 84, Downey City.—S. W. Burke, P. M. W.; E. S. Gray, M. W.; E. U. Skidmore, F.; Geo. Skidmore, O.; Joseph Smith, Rdr (re-elected;) W. R. Condit, Fin.; W. C. Smith, Rvr (re-elected); William Spencer, G.; W. P. McDonald, I. W.; W. F. Cooper, O. W.; W. C. Smith, Med. Ex. (re-elected). Reported by Joseph Smith, Rdr.

Olympic Lodge, No. 127, S. F.—F. W. Rossbach, M. W.; E. P. Fish, F.; W. R. Morton, O.; R. H. Orton, Rdr (4th term); E. Holland, Rvr (4th term); W. H. Barkley, Fin.; J. P. Keating, G.; Owen Jones, I. W.; S. F. Freeman, O. W.; Drs. H. H. Ingerson, and C. T. Deane, Med. Exs.; C. S. McLaren, Trustee (long term).

Fidelity, No. 136.—S. F.—E. B. Young, M. W.; Harold D. Mitchell, F.; F. J. Symmes, O.; C. E. Brinsmade, Rdr. (re-elected); John B. Curtis, Fin. (re-elected); A. D. Hawks, Rvr. (re-elected); Thos. S. Barton, G. (re-elected); R. C. Hanson, I. W.; F. H. Carpenter, O. W.; Geo. R. Sanderson, Trustee; H. A. Morton, Med. Ex.

Ashler Lodge, No. 165, Alameda.—Geo. L. Birkmaier, P. M. W. (ex-officio); H. B. Wheaton, M. W.; J. E. Baker, F.; E. T. Barnes, Rdr; A. S. Cheminant, Fin.; F. Boehmer, Rvr; L. Beck, G.; Thomson Collie, I. W.; Richard Wheeler, O. W.; S. Winant, Trustee (long term); Geo. P. Reynolds, Med. Ex. Reported by E. T. Barnes, Recorder.

Memorial, No. 174.—S. F.—J. H. Gyselaar, M. W.; M. A. Clark, F.; C. N. Carkeet, O.; H. Schaffner, Rdr.; Geo. E. Gerlach, Fin. (re-elected); J. M. Hudson, Rvr.; J. J. Kenney, G.; Thos. R. Harrold, I. W.; Wm. Eybs, O. W.; L. Schufeldt, Trustee (re-elected); M. Livingston, Med. Ex. (re-elected).

Triumph Lodge, No. 180, S. F.—E. Lichan, M. W.; Jos. H. Cattram, F.; James G. Boobar, O.; T. W. Ray, Rdr; Chas. E. Dugan, Fin.; Frank N. Nicolaysen, Rvr; Jos. Van Lochner, G.; T. Sullivan, I. W.; Geo. H. Durant, O. W.; A. Buswell, Trustee; C. P. Chesley, Med. Ex.

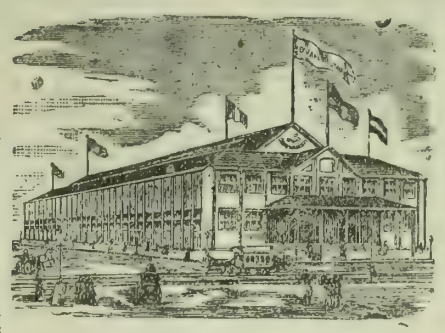
Hill's Ferry Lodge, No. 181. — Henry Klehn, M. W.; J. H. Barker, F.; E. Horn, O.; C. F. Miller, Rdr; J. McNish, Fin.; J. L. Crittenden, Rvr; J. J. Gorham, G.; C. Huber, I. W.; Henry Meier, O. W.; Dr. C. F. Miller, Med. Ex.; C. Krogh, Trustee. This Lodge meets on the 1st and 4th Tuesdays of each month. Reported by C. F. Miller, Recorder pro tem.

Silver Spray Lodge, D. of H., No. 3, S. F.—Mrs. M. T. Lyon, P. W. S. of H.; Mrs. E. McLeod, W. S. of H.; Miss N. Thompson, S. of H.; Mrs. E. Jones, S. of C.; Miss L. McNear, S. Secretary; Mrs. A. E. McDonald, Treasurer; Mrs. C. H. Caldwell, S. Usher; Bro. Herbert Jones, I. W.; Bro. R. Mayo, O. W.

Silver Spray, D. of H., will have an installation party some time in January. The Committee of Arrangements, consisting of Sisters Terrill, Shaw, Lincoln, Caldwell and Macdonald, with full power to act. We may expect a fine party, as Silver Spray is noted for her fine entertainments.

The citizens of San Jose turned out in force to witness the arrival of the visiting brethren to their pretty city on December 15th. The fine appearance of the delegations called forth many encomiums.

Seven deaths to be paid for in the Supreme Lodge jurisdiction for the month of December. A notable reduction compared with previous months.



The total beneficiary money received by the who le Order in October was $94,588; disbursed $90,784.

Grand Recorder Pratt has forwarded to Tucson, Arizona, supplies to form a Lodge in that place.

The Winthrop portable range is recommended as the best. It is highly praised by those who have used it. Bro. Chas Brown, No. 18 Dupont street, is the agent.

Reception to the Grand Lodge.

It has been determined by an almost unanimous vote of the city Lodges to give the members of the Grand Lodge, at their coming session, a worthy reception. Each Lodge appointed one representative to form a committee. This committee, represented by 18 out of the 23 Lodges, met in Shiels' building, and discussed the best manner to carry out this proposition. A sub-committee was appointed, who reported on a plan to be adopted. This proposed programme was sent to each Lodge for ratification or rejection. At this time, as we are informed, 15 Lodges have endorsed the plan. Five Lodges have given it a partial endorsement, and three Lodges have not reported. At a meeting held by the General Committee in Shiels' building on December 27th, 18 Lodges were represented. After an interchange of views the Committee adjourned to meet at the same place on Tuesday, January 4th, hoping in the meantime that the different views might meet and have unanimity and harmony. It is to be hoped that some modification of the original plan may be made, and that every Lodge in the city will take part in this, the first welcome we have ever given to the Grand Lodge of Workmen of California. The plan that meets with the most favor is as outlined: To give a literary and musical entertainment at the Mechanics' pavilion, ending with a grand ball and supper.

The Mechanics' Institute.

List of U. S. Patents for Pacific Coast Inventors.

From Official Reports for the "Mining and Scientific Press," U. S. and Foreign Patent Agents.]

For the Week Ending December 7th, 1880.

235,060—Axle Nut—Henry Anderson, S. F.
235,121—Hoisting System—Z. Blanchet, assigner to Prescott, Scott & Co, S. F.
235,125—Glove—F. H. Busley, S. F.
235,210—Fence—S. H. Chase, San Jose, Cal.
235,127—Tramway—C. M. Chubb, Oakland, Cal.
235,132—Electrical Signal—C. Cummings, Virginia City, Nev.
235,135—Safety Car—Jean Denechaud, S. F.
235,224—Galvanic Belt—E. J. Fraser, S. F.
235,231—Manufacture of Carbonate of Magnesia—Frederick Gutzkow, S. F.
235,233—Shingle Machine—Oley C. Hanson, Eureka, Cal.
235,085—Carpet Sewing Machine—Joseph Hesse, S. F.
235,167—Vehicle Wheel—J. M. Nelson, Oakdale, Cal.
235,163—Washing Machine—Geo. M. Pursell, San Jose, Cal.
235,296—Air Compressor—E. A. Rix, S. F.
235,108—Cleaning Fiber—Thomas Threlfall, S. F.
235,322—Packing Bran, Etc.—W. L. Williams, San Diego, Cal.

For the Week Ending December 14th, 1880

235,505—Amalgamating Mortar—Joshua S. Buck, Oakland, Cal.
235,417—Door Hinge—J. Decombe, S. F.
235,356—Seal Lock—Abraham Halsey, S. F.
235,438—Thill Coupling—G. W. Hunter, Merced, Cal.
235,444—Extracting Cartridge Shells—James F. Marvin, Fort McDowell, Arizona.
235,573—Water Closet Valve—W. M. Sack, Oakland, Cal.
2,371—Label—Benj. Hastings, S. F.
2,373—Label—John R. Williams, Stockton, Cal.

For the Week Ending December 21st, 1880.

235,730.—Soap—Henry J. Borie, S. F.
235,622.—Ditching Machine—Thomas J. Chappele and J. T. Ricketts, Gilroy, Cal.
235,764.—Filter—T. Guinean, Sacramento, Cal.
235,632.—Sash Fastener—Antone Haytt, S. F.
235,816.—Air Compressor—E. A. Rix, S. F.

Note.—Copies of U. S. and Foreign Patents furnished by Dewey & Co., in the shortest time possible (by telegraph or otherwise) at the lowest rates. All patent business for Pacific coast inventors transacted with perfect security and in the shortest possible time.

There were several prominent citizens—members of the A. O. U. W.—at the fraternal visit of the Oakland brethren to San Jose Among them we noticed Hon. W. R. Andrus, ex-Mayor of Oakland; Deputy City Clerk, L. J. Rector, and City Marshal Clough.

The largest retail store for furniture and carpets in this city is J. W. Burnham & Co., opposite the Palace Hotel. Bro. J. W. Burnham is always at his post, ready to accommodate his customers.

For diamonds, clocks, jewelry and watches, go to 7 and 9 Third street, under the Nucleus. Bro. T. Lundy is a reliable dealer. See his card.

For fine toilet soap, at low rates, go to that palace of soap under Palace Hotel.

Information Wanted.

EDWARD S. JACKSON,

Born in the State of Mississippi, came to Cloverdale, Sonoma county, in the Spring of 1875, a carpenter by trade, about 26 years of age, 5 feet 10 inches high, weight, 165 pounds, fair complexion, dark hair, with beard thin and sandy. Blue eyes and rather small, and had on right leg between knee and ankle, a scar caused by white swelling, a portion of the shin bone having been removed. Left Cloverdale June 27th, 1880. When last seen was under the influence of liquor, on boat between San Rafael and San Francisco. He had on a new suit of light cassimere clothes, had a silver watch. He belonged to Cloverdale Lodge No. 32, A. O. U. W., a member of good standing, and it is feared that he fell overboard into the bay, or has been foully dealt with. Any information in regard to him will be thankfully received by the Cloverdale Lodge of Ancient Order of United Workmen.

An Elegant Holiday Present.

Give your friends at home, in the East or abroad, a year's subscription to that popular monthly, The Californian. It will be a permanent pleasure through the entire year, and will be something appropriate as a California gift. Office, 202 Sansome Street.

Recorders of all A. O. U. W. Lodges are requested to correspond often for our columns, and to call attention to the Watchman in open Lodge and to individual members at any time. Also (in places where we have no agents) obtain subscriptions at the rate of $2 a year, forwarding the cash and names weekly as fast as taken. We will pay liberal commissions for time and services rendered.

Jared C. Hoag—California.
B. W. Crowell—Colusa and Yolo counties.
D. W. Kelleher—Fresno, San Benito, Monterey and San Luis Obispo counties.
W. O. Warnock, Sonoma County.

An Interesting Experiment.

The New York *Evening Post* gives the following details of a scheme for supplying heat for warming houses and for cooking, which is about to be tried in the district bounded by Fourth and Madison avenues and Fourteenth and Thirty-fourth streets.

From the central station the "plant," or reservoir, the mains will run through every street. One line of iron plates, from three to six inches in diameter, placed about three ft. below the pavement, packed around with some non-conducting material and inclosed in a wooden box, will be the conducting mains from which the water will be carried by means of smaller iron pipes, one-half an inch to an inch in diameter, into the house. Auxiliary or return pipes of about the same size as the conducting mains, will be laid alongside, through which the water, after it has passed through the houses, will run back to the reservoir.

The water heated in the reservoir to from 350° to 400° Fahrenheit, will be forced out through the conducting mains and through the pipes which connect with the houses, and to each connecting pipe will be attached a water meter. The return pipe will also be provided with a water meter. Each house is to be provided with a steam converter, which in general terms is simply a small metal chamber inclosed in a large metal chamber. The water leaves the reservoir at about 400° Fahrenheit, and as soon as it enters the inner chamber it will form steam, if not confined, 212° Fahrenheit, the boiling point. The chamber is so constructed that a pressure of 10 lbs. will close a valve and shut off the supply of water. The steam will force its way through a valve into the outer chamber, whence it can be conducted through steam pipes to any part of the house and used for heating, cooking, or power, and returned through the auxiliary pipe back to the reservoir.

The steam cooking ovens are coils of pipe through which the steam passes inside of the ovens. Some of the steam will be condensed in the bottom of the converter, and can be drawn off as hot water. The steam made in the converter is of the same temperature as the water from which it came, and hence cooking which requires a heat of from 350° to 400° can be done.

There are about 12,000 houses in the district to be covered first by this system, many of the owners of which, it is said, have consented to have the pipes brought into their houses, and it is to be hoped that about 20% of the buildings in the district will be connected at the outset.

It is remarked that by using heating water less heat is lost by condensation and radiation than in the case of steam, and that the cleanliness and simplicity of the system will commend themselves. It is asserted that any head of steam can be secured, from the fact that a cubic foot of water will make 1,700 cubic ft. of steam. It is estimated that the water which returns to the reservoir will be only three or four degrees cooler than when it started out on its journey. It will be used again, and thus fuel is saved.

Sensitive Railway Metal.

The accidental displacement of rails is known to be a fruitful source of railway disaster. The rains and floods of winter usually occasion the mischief, but it seems that the "iron horse" has an even more insidious enemy than accumulated storm water to threaten it and to imperil its swift career. The danger in question is one, moreover, that those who can restrict their railway traveling to serene summer time are not exempt from. One day last week an excursion train was jogging on its peaceful way on the Caledonian railway, at the rate, fortunately, of not more than 15 miles an hour, when on approaching Auchinraith, the engine suddenly left the metals, and sliding down an embankment about 10 ft. deep, turned and lay on its side, dragging with it a composite carriage and part of the next one, the remainder keeping their position on the line. The driver and stoker were badly scalded, and several persons more or less shaken, but no lives were lost. Investigation into the cause of the accident showed that the rails, which were of steel, and of the heaviest kind made, had "bugged," owing to the heat of the sun; and further examination disclosed the startling fact that at a point only 40 yards distant from the first disturbance, and on the down line, the rails were bulged 8 inches from their original position, carrying the sleepers with them. The bent rails were preserved for the government inspector, who will, no doubt, give the matter the attention it deserves, especially as regards the quality of the metal of which the rails are composed. There are all manner of new and improved processes for the manufacture of railway running gear, and it may possibly be found that some sorts of steel are more sensitive to solar heat than others. Anyhow, it is to be hoped that the eccentric behavior of the metals at Auchinraith is capable of explanation.—*London Graphic.*

SAFETY PAPER.—A bank in Lyons uses a paper which is colored with ultramarine green. The bills of exchange are lithographed, and the figures are written with an acidulated ink, so as to appear white upon a green ground. This seems to furnish a perfect security against adulterations.—*Dingler's Journal.*

WORKMEN receiving sample copies are invited to examine the WATCHMAN, and subscribe for it.

Educational.

Barnard's Business College

Gives the privilege of attending for two or three days free of charge to examine the Course of Study and see the Methods of Instruction. Professor Barnard gives his personal attention to the work, and entrusts nothing to Assistants. He does not hold out any false inducements to draw a large crowd and then hire teachers to do the important part of the work. He admits only as many as he can attend to personally. It will well repay a visit to his College, at 120 Sutter street, to see the elegant specimens of Pen Flourishing executed by Professor Barker. Mathematics and English Grammar, Spelling and Composition receive special attention.

Professor Barnard's new Grammar, now in press, will be published in a few weeks.

The Utility of Arctic Explorations.

Chas. Walcott Brooks, in his interesting paper on the Arctic regions read before the Academy of Science on Monday last, remarked as follows on the utility of Arctic explorations: To the few who question the value of Arctic voyages, a brief outline of their utility may be needed. Dr. Benjamin Franklin, one of the wisest men born on this continent, was in 1753 one of their earliest advocates. Abroad we have seen British, Germans, Austrians, Swedes, Norwegians and Dutchmen taking part in polar explorations. Their results are very varied. Their constant observations aim at the discovery and seek needed information to aid the correct demonstration of great physical laws, necessary to advance almost every department of science, astronomy, navigation, hydrography, meteorology, including electricity and magnetism. Specimens collected for students of natural history furnish needed data for drawing correct geological analogies. The observed variations in the movement of pendulums within the Arctic circle gauge the extent that the earth is flattened at the poles. Great laws are world-wide, and a knowledge of the whole earth is essential to their perfect understanding. Such knowledge increases the effective powers of man by augmenting his mental resources, and thus accelerates scientific discoveries, useful in arts, agriculture, commerce and manufactures. In the climate and winds of polar regions the world has obtained a partial clue of fundamental laws regulating the motor agents of atmospheric currents, and the equalizing influence of warm, gulf and icy streams, that traverse oceans as arterial rivers. How general will be the benefits bestowed when our national Weather Bureau, assisted by such knowledge, is able to apply wider rules of judgment and more surely predict the probabilities of approaching storms and seasons, one week in advance more certainly than it now ventures to forecast a single day. In Boothia, the two Rosses found the magnetic pole, whose mysterious influence the mariner's compass obeys. The mass of observations collected on all sides of this magnetic pole, have assisted science to perfect our knowledge of the laws of magnetic declination and dip. Providence has peopled these high latitudes with human beings, who winter and summer there, as well as animals on which they subsist. Each successive voyage has swept away some old error, and brought to light new phenomena, tending to advance human knowledge. The problem of a northwest passage around North America is not one of direct utility, although the gain to commerce through such scientific expeditions has doubtless been very great, yet difficult for the masses to always comprehend. Their authentic surveys are valuable to our whaling interests, annually representing many millions. The northeast passage around Asia, accomplished by Nordenskjold, in 1878-79, promises large rewards to both science and commerce.

HEAT WITHOUT FIRE.—Prof. Wells, of the Massachusetts Institute of Technology, has invented a machine for heating railroad cars without the use of fire. The principle of the machine is friction. It consists only of an iron cylinder two ft. long and one ft. in diameter, having a fixed plate of hardened iron in one end, and a second plate, attached to a revolving shaft, which presses lightly or closely upon the fixed plate, as circumstances require. The cylinder is filled with water, the shaft revolves, and from the friction of the plates, the water in an incredibly short time is heated, and by means of pipes can be carried to great distances for heating purposes. The construction of the machine is such that it is easily adapted to every place where there is waste power, as in mills, factories, public buildings and cars. Thus, to carry a machine with 36 square inches of friction plates—the ordinary size—one-half horse power only is said to be required, while a machine with 225 square inches of friction surface will require only four horse power, and will heat a room 60x200 or 126,000 cubic ft. In steam cars the machine is easily and cheaply adjusted to the axles, the power being taken directly from the wheels, so that in case of accident, all danger from fire is eliminated. This machine has been in practical operation for some months, and it is claimed that with 36 inches of friction surface a room of 10,000 cubic ft. can be heated more uniformly and quicker than by the use of coal, wood or steam, and absolutely without expense save the wear of the friction plates and the pittance for extra coal under the boiler.

AN ELECTRIC HAMMER.—Messrs. Siemens & Halske, the well-known German electricians, have brought out a novelty, the electric hammer. The device consists of three hollow coils of insulated wire, having a movable core or rod of soft iron, which is free to move up and down under the axial attraction of the coils when a current circulates in them. The central coil is traversed by a constant current, which magnetizes the rod or hammer, and the two extreme coils are traversed by alternating currents from a dynamo-electric machine in such a manner that they alternately attract and repel the magnetic rod up and down so as to make it beat like a hammer. The range of blow is limited on one side by a spiral spring placed within an elastic cushion. Of course a very great rapidity of action can be given to the hammer, while the arrangement is apparently applicable to working a rock drill.

Shiels' Building.

The illustration on this page represents one of the magnificent structures in our city. It is situated on the corner of O'Farrell and Stockton streets, near Market, having a frontage of 137½ ft. on O'Farrell and Stockton streets, with three stories and basement. The lower story is used for stores and the second and third stories for offices, suits and halls for Lodge rooms and Societies. The magnitude of this structure may be inferred from the fact that 40 different Lodges and Societies meet in this building. There are eight halls for Lodge purposes, divided as follows: First story, Laurel Hall, 45x68 ft.; Eastern, 33x59 ft.; Western, 27x49 ft. Second story, Pro section Hall, 35x68 ft.; Charity, 25x50 ft.; Fraternity, 25x50 ft.; Mutual 30x60 ft.; Banquet room, 20x40 ft. The building is fire-proof, easy of access, wide halls, short landings, well ventilated and rated as a very safe building. There are 9 Lodges of Workmen who meet in this building, 10 Lodges of Knights of Honor, 4 Lodges A. L. of H., 4 Lodges Chosen Friends, 3 of O. E. S., 2 Odd Fellows, together with several social clubs, business, professional and scientific societies. The Lodge rooms are nicely carpeted, well furnished with costly drapery and canopies over the principal chairs, and a fine organ or piano in each Lodge room.

This building and lot is owned by Wm. Shiels, Esq., now on a tour in Europe. The real estate agent, Mr. E. Petterson, 314 Bush street, has charge of this property and as janitor has secured the services of Bro. Geo. Dickson who, with his assistants, keep this large structure scrupulously neat and clean and in perfect order. What adds an additional interest to the place is the generous gift of Valley, No. 30, of the use of Laurel Hall for the meeting of the Grand Lodge of Workmen in February. The negative from which the electrotype was made for our illustration was taken by the well-known artist, Bro. I. W. Taber, cor. of Montgomery and Market. This engraving is by the well-known artist, E. Schultze, whose skillful work has appeared on the pages of the WATCHMAN in the illustration of a number of our pioneers and are now grouped together on one page of this issue. On the first floor is situated the office of the *Masonic Monthly* in connection with a job printing office of the firm of J. W. Kinsley & Co., the senior, Bro. Kinsley, being our Grand Lecturer. The well-known firm of Schoenfeld & Heyman, occupy a large portion of the lower story as furniture and upholstery warerooms. This store is 137x70 ft., and displays a complete line of goods, from the finest sets to those of common use. Their former place of business, 749 Market, was given up for more commodious room and lesser rents. They have been in the business 17 years, and import their solid black walnut furniture from the East direct. A prominent feature of their business is the Kosers' patent sofa bed, of which they are the sole manufacturers and which took the first premium at the State Fair and Mechanic's Fair, 1880 The

SHIELS' BUILDING, CORNER OF O'FARRELL AND STOCKTON STREETS.

Representatives should become overheated in their arduous labors, shampooning here would again make them cool and level-headed.

Bro. D. Edwards has opened a fine dressmaking establishment next door. His long experience and skill in this line bring him the best custom, especially for cutting and fitting. From the experience in our own family, we believe our lady friends would do well to enlist his services.

Next door to the main entrance is the leather store of Bro. F Hall, P. M., W., of, junior, Mr. B. Heyman, and assistants, are always ready to show you through these large and elegant warerooms, and give list of prices.

John Guy, who for several years past has been manufacturing fine custom shoes for the trade, has opened a first-class custom shoe store next door. Following closely the latest French and Eastern fashions, he can make as fine and fashionable styles of ladies' shoes and slippers as any house on this coast. As he does his own cutting and makes the French heels he can safely warrant reasonable prices and a perfect fit; ball, theatrical, carnival shoes and gents' toilet slippers a specialty. From our experience we recomend this house as one of the best in this city for custom work or to choose from his select stock.

As an adjunct to this attractive center Bro. Jos. Bleiley has opened tonsorial parlors. For a "boss hair cutter" or a clean shave we endorse this tonsure as the place for a good cut or a smooth shave. If any of our Grand Lodg San Francisco, No. 4, and delegate to Grand Lodge. Our genial delegate can sell boot legs, gaiter and shoe uppers and leather findings, with less inconvenience to his business perhaps than any other one that will attend the Grand Lodge of Workmen.

Bro. J. Meyers, who carries an extensive business as a merchant tailor, at 501 Kearny, also a fine large store in Oakland for boys' clothing ready made, and merchant tailoring, has opened a store for tailors' trimmings in this building. He carries an extensive assortment of all kinds, as well as dressmaking trimmings. The enterprise and long experience of Bro. Myers in this business gives him ample knowledge to select a varied stock of goods, that will meet the general wants of the community.

On the corner fronting on Stockton, Mr. W. B. Pixley has opened a new and elegant drug store. Mr. Pixley has had an experience as druggist and apothecary of 24 years, and wishes to extend his business by making a specialty of prescriptions and compounding medicines. In his department of toilet and fancy goods he has selected the choicest kinds, and will make his bow to this growing part of our city by selling at very reasonable prices.

Opposite from Shiels' building, 105 Stockton, is the large piano warerooms of Woodworth, Schell & Co., formerly of No. 12 Post, established in 1852. They are the sole agents for the celebrated Schumacker, Henry F. Miller, and Groveseen & Fuller pianos, upright and square; also Taylor & Farley organs. This house has made a reputation second to no other on this coast as reliable dealers in first-class pianos. Having a large capital, their musical instruments can be had on easy installments, and they do a large business in repairing and also tune pianos. The urbane manager, Bro. J. B. Curtis, Reciever of Fidelity, 136, is always pleased to entertain his friends and show them his choice pianos.

Opposite diagonally from Shiels' building is the house of F. S. Chadbourne & Co., dealers in furniture and bedding. This store is 40 ft. by 170 ft., and occupies four stories and basement as store room. The lower floor is used for exhibiting a general assortment of all kinds of furniture; the second floor, for fine upholstered goods; the third and fourth floors, as manufacturing and upholstering departments. This house carries $150,000 worth of stock, from the common articles of everyday use to the finest styles of elegant sets of the latest design, and upholstered in the most costly fabrics. The genial head of the house, Bro. F. S. Chadbourne, and his urbane assistants are always ready to show customers through this labyrinth of furniture, and fill an order for a private house or hotel.

The building in all its features is admirably suited for the purpose for which it is built, and we have no doubt but that in time it will be the meeting place of a much larger number of societies than are held at present within its walls.

WE have received two communications from Newcastle, Placer county, both giving an account of the social of Placer Lodge, No. 95, held Jan. 3d. As one of them is written by a lady, our native gallantry compels us to give it preference. We thank our other correspondent for his kindness in furnishing a report, and hope he will give us items for future issues. He also writes us that the Order is prospering in that place, and all feel proud to belong to so grand a fraternity.

SILVER SPRAY, Degree of Honor, will give a social party at Ixora Hall, on Monday evening, January 31st. The entertainments given by Silver Spray in the past have been a complete success. This one will be an invitation party, and we hope the WATCHMAN office will be remembered.

Home Miscellany.

California.

Betwixt old Ocean's dread and angry crest
That sweeps her rock-bound confines on the west,
And mountain chains with giant peaks sublime,
Rearing her domes along her eastern line,
Proud California lies; the noblest state
In all Columbia; first among the great.
There ancient woods unfolding verdure wear,
Whose floral perfumes lade the healthful air;
The Sire of Frost ne'er comes with frozen chains
hold an annual ruin on her plains.

There pleasant homes the cultured vales adorn
Like jewels set amid the fields of corn,
And burdened orchards skirt the winding rills
That well far up among the vine-clad hills.
'Twas this far western land in former time,
That brought her golden treasures from the mine,
Displayed on high before her sister states,
While myriads flocked to pass her mountain gates;
And all the world transported 'gan amain
To seek her wealth across the ocean plain.

From far Del Norte to the genial clime
Around Los Angeles where blooms the lime,
E'en to the regions where the burning South
Wraps Arizona in perpetual drouth,
Extends her realm of mountains, moors and dales,
Lakes, rivers, woods, broad plains and fertile vales,
Luxuriant fields, where prosperous plenty crowns,
With ten-fiold store, the toil of Labor's sons;
A land where Empire might have fixed a seat
To bring surrounding nations to his feet.

All hail, fair daughter of the Western queen,
Bright star midst her bright constellation seen!
While island thrones Ind and Mongolia wait
To pour their commerce through the Golden Gate,
While thy swift fleet shall ride the Asian seas
To waft Columbia luxury and ease;
Forever loyal, may thy glory shed
Rich luster round Columbia's sainted head;
Long may thy beams with hers in union blend,
Till Destiny shall seal the nation's end.

—*C. L. Wheeler in Young Folks' Rural.*

The Deacon's Experiment.

"I hope the children haven't been any trouble to you, Miss Peck?" said Deacon Grinder, as his one-horse chaise drew up on the green in front of Miss Philena Peck's house.

Miss Peck hurried out, all smiles, to greet the portly widower. "The little darlings!" she cried effusively, "Trouble indeed! Why, deacon, how you talk! It is a positive pleasure to have them here. I should like to keep them a week."

The deacon smiled and shook his head.

"That would be a little too much," said he. "Come, children, jump into the wagon."

And the three apple-cheeked little Grinders—two girls and a boy—were hugged and kissed, and lifted into the wagon by the beaming spinster.

"I shall be lonely when they are gone," she said. "I do so dote on children! Remember, darlings, that the gooseberries will be ripe next week and that your Peck will be only too happy to see you again."

The widow Clapp came hurrying out as the chaise rattled by, with a tin pail in her hand.

"Dear me, Deacon Grinder," said she. "You are always in such a hurry. Do stop a minute, can't you? Here's a pail of new honey in the comb. I know the darlings will like it on their bread and butter of an evening. When are you coming to spend the day with me? I declare, Josie is growing a perfect beauty!

"Tut, tut, Mrs. Clapp!" said the deacon. "'Handsome is, that handsome does.' That's my motto."

"Nobody can't do handsomer than my little Jo," said Mrs. Clapp. "And there's Tommy grown as handsome as ever was, and Dolly the very picture of you; drop into tea some evening this week."

The deacon had hardly guided his old horse around the corner of the village green when Miss Barbara Bowyer tripped out of the millinery store.

"I do hope you will excuse me, Deacon Grinder," said she with all the pretty confusion which naturally belonged to a maiden of six and thirty summers, "but I was so edified with your beautiful remarks in prayer meeting Monday night, that I couldn't help setting myself to work to think what I could do for you. And here's a collar I've stitched for dear Tommy, and a handkerchief I've embroidered for Josie, and a doll as I've took the liberty to dress for Dorothy. Oh, don't thank me pray. It ain't nothing, compared with the peace of mind I got listening to your precious remarks!

But Naomi Poole, sitting at her needle work, by the old red farm-house window, had only a smile and nod for the party as they drove by.

"Pa," said Josie, who was a shrewd, sallow-faced child of 11, don't Miss Poole love us as well as Miss Peck, and Mrs. Clapp and Miss Barbara?"

"I hope so, my child," said the benign deacon. "Why do you ask the question?"

"Because she never gives us anything," said Josie.

"She is poor, child—she is poor," said the deacon. "But I am sure you all have her good wishes.

"I'd rather have the honey," said Tommy.

"And gooseberries and dolls," added little Dorothy.

But when the deacon sat alone by his hearthstone that evening, his sister, Miss Mahala Ann Grinder, expressed herself on the subject with a great plainness and perspicuity. "If you've really made up your mind to marry again, Josiah," said she—

"I think it would add to my domestic felicity," said the deacon serenely.

"In that case," said Miss Mahala Ann, "I do hope you'll make a sensible choice, not allow yourself to be imposed upon by a set of selfish widows and scheming old maids."

"Sister," said the deacon mildly, "you are severe."

"No I ain't," said Miss Mahala Ann. "If you wasn't well to do in the world, and hadn't a nice home and farm, and money at interest, they wouldn't none of them look twice at you."

"Do you think so?" said the deacon, and he pondered the question long and earnestly in his own mind. "Upon the whole," said he, bringing down his palm upon the table, "I ain't sorry that those investments of mine in the Mariposa Silver company have proved a failure."

"What do you mean?" said Miss Mahala Ann, curiously eying him over the top of her spectacles.

But the deacon only shook his head and smiled. "Time will show," said he, "time will show."

The news that Deacon Grinder was wrecked in Mariposa Silver mining stock, flew like wildfire through the peaceful community at Fitchville, Four Corners.

"Well," said Miss Philena Peck, "I am beat!"

"He never had no judgment in money matters," said the widow Clapp.

"I've thought all along he was living too fast," said Barbara Bowyer.

"Those poor little children. What is to become of them?" said Naomi Poole, wistfully.

The next day the deacon made his appearance at Miss Peck's homestead, pale and rather shabby, with a child in one hand and one following him.

"Miss Peck," he said, "I suppose you have heard the news?"

"Yes," said Miss Peck, looking vinegar and tack nails. "If it's your failure as you mean."

"I think of going to California," said the deacon, "to see what I can do, and in the meantime, could you be induced to give my children a home—"

"Oh dear, no!" said Miss Peck. "I never could get along with a pack of children! I dare say you could find some half orphan asylum or place of that sort by enquiring around a little."

Miss Peck sat very upright, and glared so frightfully out of her light blue eyes at the deacon, that he was fain to beat a retreat as soon as possible.

He knocked next at the widow Clapp's door.

"Is Mrs. Clapp at home?" he asked.

A head was thrust over the stair railing, and the widow's shrill voice called out:

"Is that Josiah Grinder with his swarm of young ones? Tell him I'm particularly engaged. Do you hear Betsey,—particular."

Miss Barbara Bowyer, was arranging trimmed hats and rolls of bright-colored ribbons in her bow window as the deacon and his little ones entered the shop.

"Miss Bowyer," said the deacon, "you were ever a genial and charitable soul, it is to you that I trust to make a home for my motherless ones, while I endeavor to retrieve my fortunes in the far West."

"I couldn't think of such a thing," said Barbara, dropping a box of artificial rosebuds in her consternation. "And really, I think, Deacon Grinder, you haven't no right to expect it of me! It's all I can do to support myself, let alone a pack of unruly children! I dare say the poor master could do something for them, or—"

"I thank you," said the deacon, with dignity. "I shall trouble neither you nor him."

"Well," said Miss Bowyer, with a toss of her head, "you needn't fly into a rage because a neighbor gives you a bit of good advice!"

But Naomi Poole ran out to the little garden gate, as the forlorn deacon went by.

"Deacon Grinder," she hesitated, turning rose red and white by turns, "is this true?"

"About my Mariposa investment? Yes."

"And that you are going to California?"

"I am talking of it," said the Deacon.

"Would—could you let me take care of the little ones while you are gone?" said Naomi, tenderly drawing little Dolly to her side. "I am very fond of children, and I would take the best of care of them. And you have been so kind to mother and me, Deacon Grinder, that we should feel it a privilege to be able to do something for you."

And poor soft-hearted little Naomi burst into crying.

There was a moisture on the Deacon's eyelashes, too.

"God bless you, Naomi!" said he "you are a good girl—a very good girl."

* * * * *

"Ain't it true?" said Peck.

"Well," said Mrs. Mopsley, "it is, and it ain't. He did lose what he invested in them Mariposa mines, but only a thousand dollars; and the rest of his money is all tight and safe in United States bonds and solid real estate."

"Bless me!" said Barbara Bowyer.

"Well I never," said the widow Clapp, with discomfited countenance.

"And," went on Mrs. Mopsley, with evident relish at the consternation she was causing, "they are building a new wing to the house, and he is to be married to Naomi Poole in the fall."

"A child like that!" said Mrs. Clapp.

"With no experience whatever!" said Barbara Bowyer, scornfully.

"I only hope he won't repent of his bargain," sighed Miss Philena Peck.

And Miss Philena's charitable hopes were fulfilled. The deacon never did repent his bargain.

Women in the Laboratory.

At the late session of the womans' Congress, the paper on "Woman's Work in the Laboratory," by Professor Ellen Richards, of the Institute of Technology, Boston, was a contribution to human need beyond price. What has been lost to the physical and mental stamina of this nation by the ignorance of women of household chemistry can never be measured. Professor Richards uttered simply the truth when she said: "Let me not be misunderstood when I say that laboratory work, rightly carried out, makes women better housekeepers, better cooks, better wives, and mothers more fitted to care for the versatile American youth, to whom knowledge is the chief divinity to be worshiped." She might have added that the woman who, reigning in her home, understands the properties of the materials which she combines for the food of her family, the chemistry of the very wall paper that may poison the breath of her children, who can detect the thousand adulterations which, entering our homes, are now destroying human life, is doing a work not second in practical importance to that of any scientific professor. It means something bearing directly on the health and comfort of every home it touches. The class of women now connected with the School of Technology in Boston are study ing practical chemistry—as many other women are studying painting, languages and music—not to make themselves professional experts, though a few may become such, but that they may know enough to understand the chemistry which enters so largely into the comfort or discomfort of every kitchen and home. This study, put to practical use, must lead to the largest and most beneficent results. Already in the increasing stamina of the American people we see the proof of the growing intelligence, larger knowledge, and finer physique of its women. Despite the too many false conditions of our civilization—its excited haste, its greed for gain, its passion for display, its lust for place and power, that consumes while it impels—muscular men and deep, broad-chested women are no longer to be exceptional as they used to be. Picture, then, what the Anglo-American race may become when knowledge of all the forces of life put to practical use by women and men shall add to nervous energy the conditions of high health, to endless activity the capacity for repose, to sordid ambitions the possibilities of high and fine aspiration.—*Mary Clemmer.*

A Judicious Wife.—A judicious wife is always nipping off from her husband's moral nature little twigs that are growing in wrong directions. She keeps him in shape by continual pruning. If you say anything silly she will affectionately tell you so. If you declare that you will do some absurd thing, she will find some means of preventing you from doing it. And by far the chief part of all the common sense there is in this world belongs unquestionably to women. The wisest things a man commonly does are those which his wife counsels him to do. A wife is a grand wielder of the moral pruning knife. If Johnson's wife had lived, there would have been no hoarding up of orange peel, no touching all the posts in walking along the streets, no eating and drinking with a disgusting voracity. If Oliver Goldsmith had been married he never would have worn that memorable and ridiculous coat. Whenever you find a man whom you know little about, oddly dressed, or talking absurdly, or exhibiting eccentricity of manner, you may be sure that he is not a married man, for the corners are rounded off—the little shoots pared away—in married men. Wives have generally much more sense than their husbands, even though they may be clever men. The wife's advice is like the ballast that keeps the ship steady.

The Game of Roly-boly.—This is a great amusement to the smaller children of the family, and may be made a source of instruction to them. Take the tea tray and divide it into six parts, more or less, with a piece of chalk. Then number the parts 5, 10, 15, 20, 25, 30. Then one of the family group rolls a marble quickly round the tray. If it stops at the division marked 5, we set down five to the credit of the person rolling. So of the other numbers. If it it stops on a line we count it 0. After each member of the party has rolled five times, the amounts are added together, and the one who has the highest number has the game. If each member of the party adds up his or her own score it may be made quite an exercise in arithmetic.

A Galveston gentlemen was pricing an old sofa at an auction room. "This sofa once belonged to Lafitte; it is full of historical reminiscences." "There is one now, pa, crawling right up the back," observed the gentleman's little boy. "That's a fact, it's alive with historical reminiscences," said the gentleman, punching in a corner with his cane.

A five-year-old son of a family the other day stood watching his baby brother, who was making a great noise over having his face washed. The little fellow at length lost his patience, and stamping his foot, said: "You think you have lots of trouble, but you don't know anything about it. Wait till you're big enough to get a lickin' and then you'll see—won't he, mamma?"

Hope.

O'er daily cares, why anxious grow,
And load the heart with sorrow,
The winds to-day that rudely blow
May softly sigh to-morrow.

Why look for bliss to coming years,
Our happiness o'erreaching;
To day's bright smile may change to tears,
With stern to-morrow's teaching.

When motives pure are misconstrued,
Why yield to vain repining?
All goodly acts will end in good,
Through paths oft hid from finding.

Why think our own peculiar ills
Are greater far than others,
The pain that one sore bosom fills,
As sharply stings another's.

Life's lesser ills and greater cares,
Its trials and its grieving,
Are steps in the ascending stairs,
To peace—for the believing.

—*Albany Sunday Press.*

Advice to Young Housekeepers.

Do not commence to keep house too extravagantly. Young folks, generally, like to have everything done up in grand style. But if your husband cannot afford it, be a little moderate at first; never mind what Mrs. Grundy says. If your home does not suit you exactly when you first go into it, do not commence to grumble, but furnish it little by little to suit your circumstances. Then, when it is completed, you can appreciate its comforts.

And another thing, do not think you must have one or two servants, to be aristocratic. A young husband thinks a great deal more of things made by his wife's own hands. If you do not know how to keep house, you must learn, and go about it systematically, too. Don't be afraid of soiling your hands. Have large, gingham kitchen aprons, and dark dresses; never mind your cuffs while you are washing and scrubbing; wait until you have finished, and then tidy up. When you are arranging the things on the table, have everything, if possible, clean and in order; if convenient, have a nice bouquet of flowers placed in the center of the table. It fills the room with a fragrant odor, and is also very pleasing to the eye. When your husband comes home from his work or business, meet him with a pleasant smile and a few cheerful words; never look cross or glum, simply because something has gone wrong during the day; just let him think you are a model housekeeper. I think I have written sufficient for the present. If acceptable, I will write more at a future time.

I bid young housekeepers all adieu, with this advice to *expectant* housekeepers. Be sure you know how to make nice, light bread, broil a steak, and finally, to be enabled to cook a savory meal, while yet in your teens, and the lesson of married experience will be easier practiced, when the necessity occurs. It certainly becomes a great pleasure to prepare palatable food for those we love, and whose approval we so much desire and appreciate.—*Ada E. Taylor, Mt. Pleasant.*

Home Dressmaking.—O. W. D. writes to the *Rural New Yorker* as follows: Twelve yards of black satin, or seven yards of the plain satin, and five yards of brocaded satin, at a cost of $1.40 a yard, will make a lovely suit, rich, stylish, and at a cost of $18.50. Make the basque round and finish to wear either over or under the skirt, make it plain and laced behind. The sleeves tight-fitting and trimmed to the elbow with three bands of brocaded silk, graduated, the highest band one-third the width of the one at the wrist, finished at the neck with a shirred ruffle of the brocade. Make a short walking skirt of the plain satin trimmed with a flounce 12 inches in depth of the brocade cut bias and shirred—very scant, for it sets out too much if made full. The back of the skirt is two breadths of satin shirred at the top six inches in depth very closely. A wide belt lined with very stiff material, and two yards of the brocaded silk tacked to the dress as a sash and tied loosely, either on the left side or at the back finishes the dress. It can be worn without the sash. The dress is lined throughout with fine, corset jean—without dressing or starch in it. A plain skirt to look well, must set well, and for years I "labored" over skirts pulling back, so they would not "bulge" before, or "flop" behind, as a tantalized dressmaker said. I finally got a perfect fit and am happy.

A Lady Entomologist.—Emily A Smith, a well-known entomologist of Peoria, Illinois, has gone to Leipzig, where, if the university authorities will allow it, she will pursue a general course of zoological work in the new laboratory of Prof. Luckart, This lady was recently elected a member of the Entomological Society of London.

A notion seller was offering a Yankee clock, finely varnished and colored and with a looking glass in front, to a certain lady, not remarkable for personal beauty. "Why, it is beautiful," responded the vender. "Beautiful, indeed! a look at it almost frightens me," said the lady. "Then, marm," said Jonathan, "I guess you'd better take one that ain't got no looking glass.

This is the season of the year when venerable hens enter their second childhood and are broiled for spring chickens.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of 15 letters.
My 6, 7, 15, 9, 14, 4 is a sign of the zodiac.
My 13, 3, 11, 1, is a Greek letter.
My 5 is a personal pronoun.
My 2, 10, 8, 11 is a plant.
My 4, 12, 6, 14 is an esculent grain.
My whole is the proudest title of our country.

OLD JOE.

A Constellation.

1. Defaces.
2. A Hebrew, a vegetable, and to revolve curtailed.
3. A Roman numeral, a consonant, and ourselves.
4. An exclamation, a grain, and upon.
5. A personal pronoun, and a bony covering of certain insects and fishes.
6. A conjunction, to propel a boat in a certain manner, a beverage, and an exclamation.
7. An appeal, assistance, and luxurious repose.
8. Having taken a certain position and a vase.

JAMES.

Problem.

A gentleman, watching a fort at a distance, perceives the discharge of a gun, and hears the report in exactly twenty-one seconds afterwards. Supposing light to travel at the rate of 192,000 miles per second, and sound 1,090 feet per second, what is the distance from the fort to the point where the observer stands. O. G.

Letter Arithmetic.

E G R O W I
M N T

T I W O E D R
O M D E R T M
I T W M G O T

M D G T T D W M R

The letters in the multiplication above, when transposed into the order indicated by the figures represented, form a word signifying at an improper time.

The Discontented Chair.

"Oh, dear! I'm sick of having so many people sit in me! The boys get on my arms and play horse; and then, when the girls undress their dolls, they stick pins into my back, just as if I was an old pin-cushion. I don't believe any one in the world has such a hard time!"

"Would you really be glad never to have any one sit in you again?" asked a little voice right by the side of the chair; for it was an old green leather chair that had just spoken.

The chair was very much surprised to hear the voice so near it, and asked:

"Who is talking to me?"

The voice answered:

"I am a fairy. I have heard all you have said, and feel so sorry for you that I am going to give you a present that will prevent any one going near you. When the next person sits down you shall make a noise like a pistol, which will frighten him away, so that you will never complain of being tired again."

The chair thanked the fairy, but it did not speak again. The chair almost believed it had been dreaming—the voice and what it had said seemed so strange.

Soon after dinner old Mr. Lee, the grandfather, thought he would take a little nap in his favorite seat. The poor old gentleman had no sooner sat down than "bang" went the chair, with such a noise that grandfather forgot all about his rheumatism, and jumped so high in the air that he lost off his wig.

"Those bad boys have put torpedoes in my chair, and they deserve a good whipping," said he. "I shall tell their father."

When his son John came home that night he told him all about it, and John promised they should never do such a thing again. He went down stairs, but the boys were not there, so he thought he would wait until tea time, and then speak to them.

Being very tired, he threw himself into the chair, when "bang" it went again. He did not wonder that his poor old father had been frightened.

"They do deserve a good whipping, and no mistake about it," he remarked.

Going to the door he called, "Harry! Walter! Ned!" The boys hearing his voice rushed down stairs, wondering what papa could want.

"Harry, what do you and your brothers mean by frightening your grandfather?" he asked.

"Why, papa," said Harry, "we hav'n't done a single thing."

"Don't tell me a story, Harry, but go and sit down in that chair," said Mr. Lee.

Poor Harry had no sooner sat down than he was up again, looking terribly scared.

Their father saw by their looks that they did not know anything about it. Of course, every one in the house wondered and wondered what could be the matter. They turned the chair upside-down and all around, but not a thing could they find that should cause a noise.

The next morning Mr. Lee had a man take the chair apart to see what the matter was. After working at it a long time, he said he could not find anything wrong.

Of course the chair could not be used; so it was sent up into the garret, where it stood for a long time.

One day it began to think how nice and warm it was downstairs in the library, among the birds and flowers, and how much it would like to know what the family were doing and talking about. At last, it could not stand it any longer, so it said to itself:

"Oh, how foolish I was to be so cross and discontented! If I could only be downstairs once more, the boys might ride and whip me as much as they pleased; and if the girls wanted to put a whole paper of pins in my back I never would say a word. Anything is better than being covered with dust and having mice run all over you."

"I am glad you have learned a lesson of contentment," said the fairy voice that it had heard once before, "and that you find that idleness does not bring happiness. Shall I take my gift back again?"

"Oh, yes," said the chair; and if it had had eyes it would have cried for joy.

That same day it rained so hard that the boys could not go out to play, and as their cousin Tom had come to see them, their mother said they might go into the garret, and make all the noise they wanted to. The boys were delighted, and rushed upstairs shouting like a band of wild Indians.

After they had played everything they could think, they saw the old chair, and thought it would be great fun to have Tom sit in it. Now, you know boys don't like to have any one think they can be frightened; so, when they dared Tom to sit in it, he said, "Who thinks I am afraid?" and marched up as bold as a lion, and down he sat.

But not a sound was heard. The children were at first perfectly astonished; but after they had tried it all around, they ran down and told their mamma, who was as much pleased as any one, and had it moved right down stairs, to surprise papa at night.

It seems so nice to see it in its old place again; and when little Nellie went up, patted its back, and said, "Dear old chair," the chair was so proud that it puffed out its cushions to be as soft as possible, and wondered how it could have ever been so foolish as to think itself abused.

Humorous.

Chips.

BOUND to succeed—A new book.

MICHIGAN has produced a pig with a trunk. This thing should be checked.

THERE are some men so mean that they will not give others the benefit of a doubt.

A MAN who is continually sticking his nose into other people's business can be said to possess a roamin' nose.

THE ladies are wearing little gold tuning-forks for hair-pins, which indicate that "There's music in the hair."

FASHION says, "gathered waists are still very much in favor with young ladies." They are with the gentlemen also.

"WHY should we celebrate Washington's birthday more than mine?" asked a teacher. "Because he never told a lie!" shouted a little boy.

"IT is true," said an old philosopher, "that two heads are usually better than one, but it never could be thus with the two heads on the same pin."

AN old lady who has several unmarried daughters feeds them on fish diet, because it is rich in phosphorus, and phosphorus is the essential thing in making matches.

LITTLE boy—"Grandmamma, has my rocking-horse got rheumatism?" Grandmamma—"No, my love. Why?" Little boy—"Because its legs are stiff like yours."

"NO MARM," said the shoe-dealer; "I would like to give you a smaller pair, but to sell you anything below eights would render me liable under the statute for prevention of cruelty to animals."

TODDLEKINS is a very small man indeed, but he said he never minded it at all until his three boys grew up to be tall, strapping young fellows and his wife began to cut down their old clothes and cut them over to fit him. And then he said he did get mad.

"WHAT is a crime?" asked the grave professor. "A crime!" answered the wit of the class, "why it is when a man does something." "Then," said the professor, as he looked over his glasses at the youth, "I think no one could accuse you, Mr. Brown, of ever committing a crime."

WIVES ought really to be more careful about telling all the truth to their husbands. "Why do you start so when I come into the room?" asked a brusque man of his better half. "It is only my nerves, my poor nerves," she replied, "which are so very weak that I am startled at every stupid thing I see."

FITTING emblems are not always appreciated. The neighbors of a poor fellow who died erected a tombstone to his memory, and had placed above it the conventional white dove. The widow looked at it through her tears, and said: "It was very thoughtful to put it there. John was very fond of gunning, and it was an especially suitable emblem."

Health Column.

Colds.

A cold in the head can usually be cured in a few hours if, as soon as discovered, the person will sniff the fumes of ammonia or spirits of camphor every few minutes as strong as they can be borne. When a severe cold attacks the throat and lungs, there is no safety in neglecting it for an hour, for there is more or less inflammation of the lungs, which interferes with their action, rendering them liable at any moment to take on serious and, possibly uncontrolable disease. Go home and remain there. In the evening take a warm foot bath, and at bed time take three or four liver pills. These will stimulate the liver to healthy action, and promptly relieve the lung trouble; but it renders the system sensitive to renewed attacks, and, therefore, the greatest care should be observed for several days not to take fresh colds. Ordinarily, no other treatment is necessary; but, should the cough continue, have your druggist make the following mixture, and take one or two teaspoonfuls every hour till cured: Glycerine, 4 ounces; whisky, 4 ounces; morphine, 1 grain

Sore throat can be promptly relieved by applying a mustard plaster, or "mustard leaves," on the front of the neck, over the sore spot. In addition the throat and mouth may be frequently gargled with the following mixture:

A teaspoonful of salt, a pinch of red pepper and a tablespoonful of vinegar. If found too strong add a little water. A portion of the gargle may be swallowed, or sipped, little at a time.

Sweating has been quite generally recommended in the cure of colds. I think, however, that the risk of taking cold afterward will more than counterbalance the good that may be expected, and, except in cases of unusual severity, I would not recommend it.

The "Turkish bath" has been highly recommended as a cure for colds. With proper care afterward, there is no better or more effectual plan of cutting short a severe cold. It is not, however, necessary to go to a regular establishment to take such a bath. Any small comfortable room, where a good fire can be quickly made, will answer the purpose. In the early evening make a good fire in the stove and close the doors and windows, leaving only small openings for ventilation. Then let the patient put on his night clothes and lie down on a bed or sofa, or sit in an easy chair for an hour or more, with the temperature of the room from 90° to 100° F. Afterward the room should be gradually cooled to about 70°, and the patient should go to bed and remain there till morning. —*Hall's Journal of Health.*

Pertinent Facts About Eating.

In a recent number of the London *Standard* under the query, "Do we eat too much?" the writer gives many interesting facts. He says, for instance, that the amount of nourishment which a person needs greatly depends on his constitution, state of health, habits and work. A sedentery man requires less than one whose duties demand the exercise of his muscles, and a brain-worker needs more than an idler. But unquestionably the majority of us take more than we need. Indeed, food and work are distributed most unequally. The man of leisure is also the man of means, and accordingly fares sumptously every day; while the laborer toils for eight hours and finds it difficult to get enough to repair the waste of his tissues. Yet a Chinaman or a Bengalee will toil under a tropical sun, and find a few pice worth of rice or jowrah sufficient to sustain his strength. A Frenchman will not eat half what an Englishman engaged in the same work will demand, and a Spanish laborer, content in ordinary times with a watermelon and a bit of black bread, will toil in the vineyards and grow fat on a dietary of onion porridge and grapes.

It is true that Mr. Brassey, when building the Continental railways, found that one English navvy was worth a couple of spare-fed foreigners. But, on the other hand, the British-Columbian and Californian gold-diggers, than whom a more magnificent set of athletes does not exist, live in the remote mountains of the far West mainly on beans flavored with a few cubes of pork. But they also obtain the best of water and the purest of air, and their out-door life and active exercise enable them to digest every ounce of their frugal fare. The English soldiers, though better fed than those of any army except the American, do not get one-half the solid nutriment which the idlest of club-loungers considers indispensable for his sustenance. An athlete in training is allowed even less food; yet he prospers on the limited fare, and prolongs his life by the regimen by which he has been subjected.

King Victor Emmanuel was a monarch of the most robust physique; yet he only ate one meal per day, and it is manifestly absurd for any man to require three more or less weighty meals, and an afternoon cup of tea, to support the exertion of walking to the club, riding an hour in the park, writing a note or two and dancing a couple of miles around a ball room. The ancients had their "amethustoi," or "sober stones" by which they regulated their indulgences at table. The moderns have not even this. But they have their gout and their livers to warn them, when it is too late, that nature has been overtasked.

Household Hints.

FISH BALLS.—Salt fish to be used to advantage must be soaked the afternoon previous to using, the water changed before bed-time, and again early in the morning. Once more change the water after breakfast, put it on the back of the range or stove and never allow it to boil, scarcely simmer until you find it soft enough to pick apart very fine with a fork. It must not be chopped, but carefully picked; it takes more time, but is the only right way. For codfish cakes have the potatoes nicely mashed with milk and a little butter, proportion of one cup of fish to three of potatoes, a little pepper, red or black. Dip in egg or not, as you prefer, before frying brown. To be made into cakes not too thick.

CHOCOLATE PUDDING.—Melt two oz. of butter, mix in two oz. of flour, simmer to a soft paste in half a pint of good milk, sweeten with two oz. of sugar, and flavor with two oz. of chocolate. When cool, stir in the yolks of four eggs well beaten and the whites beaten to a snow; put into a buttered mould immediately; put the mould into a pan half full of hot water, set in the oven and bake one hour. Serve with sauce.

APPLE SHORTCAKE.—One quart sifted flour, two teaspoonfuls of baking powder, half a teaspoonful of salt, quarter of a lb. of butter, sweet milk enough to make a stiff batter. Mix and roll out in one sheet. As soon as baked split the cake open, spread with butter and cover with nice strained apple sauce. Place the other half of the cake on this and if liked, add sauce on top. Pour over all some rich cream. Serve hot.

APPLE FRITTERS.—Apple fritters make a nice and cheap dessert. Prepare a batter as for griddle cakes, that is a thin batter made of flour, sweet milk and baking powder, or flour, sour milk and soda. Then stir in apples which have been chopped fine, the quantity depending on your taste. Fry them as you would griddle cakes, and serve hot with a syrup made of melted white sugar.

PRUNE PUDDING.—Three cups of flour, one cup each of milk, molasses and chopped suet. One teaspoonful each of soda, salt, ground cloves and cinnamon. One-half lb. of dried currants well washed, and one-half lb. of prunes previously soaked for a few hours. Tie loosely in a floured bag and boil for two hours. Eat with rich sauce.

Worth Knowing.

DRY ROT IN HOUSES.—At the annual meeting of the Cryptogamic Society of Scotland, commenced in Glasgow recently, a paper by Mr. Young, architect, of Perth, was read by the Secretary, Dr. Buchanan White, on "Dry Rot Fungus in Houses, and the Best Means of Eradicating it." The following were the conclusions at which Mr. Young arrived: 1. That wood is necessary for the root or first production of the fungus. 2. That the wood, after a time, gets exhausted of its nourishment for the fungus, and when this is the case the plant attached to it dies. 3. That if it has wood for its root its branches will luxuriate even in the heart of a well-built dry rubble wall; but when the wood at the root is exhausted it dies in the wall. 4. That where the conditions are favorable, free ventilation is not against its growth; on the contrary, a draft aids in dispersing its spores. 5. The cure is to eradicate it as far as possible by burning the soil, applying a flame to the walls, and removing every particle of wood from its locality, and substituting stone, iron, or cement. 6. That upon perfectly dry and healthy wood it would not readily take root, but if it gets good root in dampish wood, its growth will ramify over dry fresh wood and prey upon and destroy its tissues, thus ruining it for all structural purposes.

REMOVAL OF GREASE SPOTS.—Fatty oils have a greater surface tension than oil of turpentine, benzole, or ether. Hence, if a grease spot on a piece of cloth be moistened on the reverse side with one of these solvents, the tension on the greasy side is larger, and therefore the mixture of benzole and fat or grease will tend to move toward the main grease spot. If we were to moisten the center of this spot with benzole, we should not remove it, but drive the grease upon the clean portion of the cloth. It is, therefore, necessary *to distribute the benzole first over a circle surrounding the grease spot*, to approach the latter gradually, at the same time having blotting paper in contact with the spot to absorb the fat immediately. Another method, namely, to apply a hot iron on one side, while blotting paper is applied to the other, depends upon the fact that the surface tension of a substance diminishes with a rise of temperature. If, therefore, the temperature at different portions or sides of the cloth is different, the fat acquires a tendency to move from the hotter parts toward the cooler.—*The Pharmacist.*

FROZEN POTATOES.—When potatoes are frozen the amount of sugar they contain is doubled, the starch undergoing a corresponding diminution, while part of the potein passes from the coagulable into the soluble form. During the process of rotting the potato loses half its nitrogenous constituents and the whole of the sugar.

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Banner, 131.

Dr. A. C. Smith, Medical Examiner of Banner Lodge, No. 131, Plymouth, writes us as follows of this Lodge: On the evening of Jan. 5th our officers were installed by D. D. G. M. W. Munson, after which the Lodge partook of a repast prepared by the wives of the newly installed officers. There were present visiting members from other Lodges of the county, and speech-making and much merriment were indulged in, while a fraternal and brotherly spirit prevailed that were truly gratifying. During the remarks of the brothers on the "Good of the Order," frequent allusions of a highly complimentary character were made of the WATCHMAN. The Lodge is in a healthy and prosperous condition financially and otherwise, having a membership of 37, with an immediate prospect of a goodly increase, which is speaking well of this little mining camp.

Bay City, 111.

EDITORS WATCHMAN:—Bay City is not retrograding. On the contrary, there seems to be a manifestation of new interest in the welfare of the Order here, and a promise of many new accessions to our ranks during the year. Ours is not a sleepy Lodge, as you may have been led to believe from the quiet manner in which its membership has treated the WATCHMAN heretofore. We are trying to inaugurate *something* which will awake the drones in this particular hive. Appreciating good example, we we may strive to emulate the ways of some of our metropolitan brethren. All that is needed to make our organization a power in the land, is earnest, whole-souled, careful work. Our insurance plan is one of the most admirable ever suggested, and in time the right kind of material will swell our ranks to a grand army of Workmen. God speed the coming of that time under the rules of caution which the teachings of the Order of United Workmen enjoins. You will hear from Bay City again in a week or two.—Fraternally, FAUST, Eureka, January 10, 1881.

Butte City, 114.

R. C. Hunter, P. M. W., writes us that this Lodge meets on every Monday evening, a good attendance is had and great interest is taken in the welfare of the Order.

Chico Lodge, 58.

EDITORS WATCHMAN:—Our Lodge has grown large enough to entitle us to two representatives to the Grand Lodge; and at our last meeting, Jan. 6th, Bros. J. F. Watkins and Dr. G. W. Davis were elected as such. Bro. H. W. Fuller, our efficient Receiver, has just entered on his fifth term of office, being re-eleeted every term. Our paper, the WATCHMAN, is read by a goodly number of the members. The regular monthly entertainment will take place on the 20th, which will be of a high character, as our Lodge has some of the best talent in the State. Applications are being made at every meeting, and we are growing nicely.—A. J. B.

Colusa, 66,

Is in a most flourishing condition. Within the last three months no less than 16 new names have been placed upon the roll book, and still they are coming. Every meeting we confer the degrees, which is a most pleasing and happy task. The list of members comprise men who are not only prominent socially but financially. We think the Order at large can well be proud of No. 66. At our last meeting, Jan. 4th, after the pleasant duty of installing the officers elect had been performed, our retiring M. W. was the recipient of a present in the shape of an elegant gold-headed cane, upon which was engraved, J. H. Pope, from Colusa Lodge, A. O. U. W. The little presentation speech was made by Bro. D. H. Arnold in a most happy manner. Bro. Pope was of course much surprised, but did well in his responses, which were to the point. The officers for the present term are young men, imbued with the right kind of feelings, and they propose to keep up the credit of the Lodge, and if possible, make it more prominent by giving literary entertainments the last meeting night of each month. For the last year the Lodge has been meeting semi-monthly, but from and after Jan. 4th, Colusa Lodge will "be at home" every Tuesday evening to any and all brothers who may chance to be in our little city. It is earnestly desired that those Lodges instituted by our late brother H. G. Oliver, will take some decided action in the matter of the proposed testimonial, and instruct their delegates accordingly. It will be desirable to have the delegates meet as early in the session of the Grand Lodge as possible, that some definite action may be taken before the session closes. OSCAR ROBINSON, Colusa, Jan. 10th.

Grass Valley Lodge, No. 51.

The officers of this Lodge (reported in another column), were installed Jan. 3d, by C. E. Mulloy, D. D. G. M. W. The Lodge has admitted one, lost one by death, one by withdrawal and six by suspension during the last term, leaving 74 members.

Highland Lodge, 104.

The newly-elected officers of Highland Lodge (printed under elections), were installed by C. E. Mulloy, D. D. G. M. W., Jan. 11th. This Lodge has not admitted nor lost any, and stands as last term with 68 members.

Merced 74.

T. C. Law, Recorder of Merced Lodge No. 74, tersely expresses the condition of his Lodge as follows: The Lodge is in a healthy and prosperous condition—physically, morally and financially.

Mission, 56.

EDITORS WATCHMAN:—The usual semi-annual installation of our officers elect took place on Jan. 1, 1881, and in accordance with the custom which obtains in this locality, the usual "good time" was enjoyed. A noticeable feature of the meeting, under the head of "New Business," was the presentation of a gold shield to P. M. W., Leopold Bachman. In a neat, short speech, M. W., Jas. Stanley, on behalf of the Lodge, presented the jewel. P. M. W. Bachman replied happily, sympathetically, and expressed his appreciation of the favor. On "installation night" we always have two feasts: first, a "feast of reason and a flow of the soul;" secondly, a feast of substantial and tempting delicacies of the season and a flow of —— coffee and ——. We enjoyed both feasts. Our Lodge roll calls for 64 Master Workmen, and all, or nearly all of them, in good standing. We hope before the close of '81 to have a membership of 101, so as to give our Lodge two representatives to the Grand Lodge of 1882. We paid our assessment for the current month out of the general fund. This is our "first attempt," and may be followed with others of a like nature, as it seemed to be agreeable to a majority of the members. We have re-elected our "solid man," Joseph Sunderer, for Receiver, for three terms, and it seems to be the prevailing idea to "keep old Joe" in that position until he "passes in his check," which event, we trust, will be delayed until he "outlives Methuselah." We send as our representative to the Grand Lodge, Bro. D. D. G. M. W. and P. M. W., Solomon Ehrman—a "stayer" of the Lodge—and "you hear me,"

"He's a jolly good fellow,
Which nobody can deny,"

And usually "takes the cake" as a far-seeing, clear-headed, conscientious business man. Our brawny, blacksmithian M. W., oratorical Recorder and Nasbian Financier will remain "at home," but probably will put in their solid, meek and humorous physiognomies at the grand ball of the Grand Lodge, and per the invitation of your issue, Jan. 1, 1881, "we will bring our ladies along," as these "helpers in the pilgrimage of life" seem to feel that, although a silent, *they* are an indispensable part of the programme—especially at a ball. Our Lodge has been exceedingly fortunate during 1880. No deaths have occurred; very few of the members have been sick. The meetings have always been interesting and well attended; officers, as a rule, in their places, business conducted properly and promptly, and, so far, a feeling of harmony, fraternity and good-will obtains among *all our members*. We stick tenaciously to the idea that, *after crossing the threshold of the Lodge-room door, we are all Workmen*. Our financial department is healthy, the Trustees' pride being to increase the amounts to our credit on the Bank book; the Receiver's pride to announce the general fund "korrect and increasing," "the beneficiary fund paid up;" and the members' pride, "one and all," to pay their assessments and dues to, and obtain from the Financier his receipt. We all *run* the Lodge—"no ring" of a few control it, but like the underlying principle of the general Government, "It is of the people, for the people, and by the people." We never admit politics or religion, as we hold that every member has an inalienable right and freedom on these matters. We believe in, and insist upon temperance, in its widest, broadest and fullest sense, throwing such restrictions in the pathway of all, that will deter any from being overcome by yielding to the criminal practice of becoming "habitual drunkards." We believe in (and put our belief into practical shape) keeping out unworthy, dangerous and hazardous risks, and we do not allow "narrow-minded specialists" to force their specialities upon us. "Hobbyists meet with no sympathy nor support here." We believe in "common sense"—plain, honest and practical—on any and all subjects. And above all, beneath all, and around all, are willing to "throw the mantle of Charity," which covereth a multitude of sins, and to *protect the brethren, as agreed by solemn oath and obligation*. Yours truly, as of yore, "P. M.," vich is a private member.

Nevada City Lodge, 52.

The officers of No. 52 (printed elsewhere), were installed Jan. 5th, by Charles E. Mulloy, D. D. G. M. W. This Lodge has gained three members during the last term, having admitted four and suspended one, giving at present a membership of 60.

Placer Lodge, 95.

EDITORS WATCHMAN:—A quiet social, one long to be remembered by the ladies of Newcastle, as an oasis on the journey of life, was enjoyed on the occasion of the installation of the officers of Placer Lodge, No. 95, A. O. U. W., which occurred Monday evening Jan. 3d. The members had invited their wives and Auburn friends and their wives, to witness the installation; but imagine the joyful surprise when a feast was announced, and the happy company marched to the lower hall. After disposing of a most delicious supper, which had been prepared at Sacramento and quietly spread for the occasion, they returned to the Lodge room, where the worthy officers talked to the wives and betrothals, about taking an interest in the two thousand dollar fund. But their hearts responded, "we wish you long lives, peace and prosperity; for gold is a small substitute for husbands, whose hearts are the fountain of such loving kindness, yet we will try to cheer you in your labors of charity, truth and love."—A GUEST.

Santa Barbara, 172.

This Lodge was organized, June 2, 1880, by District Deputy Walter Lindley, of Los Angeles, with 15 charter members, and now numbers 43, the material being as good as there is in any Lodge in the jurisdiction. The best men of the county are taking hold of it and wonder why the Lodge was not instituted years ago. The members seem to be much interested in it, and attend the Lodge meetings regularly.

Sacramento, 80.

The Lodge has 162 members, a good general fund, and is prosperous in every way. Meets every Tuesday evening at Red Men's hall, and is always glad to receive visiting brothers.

Vallejo, 75.

Wm R. Cox, Jr., Recorder of Vallejo Lodge, No. 75, sends us files of local papers containing an account of the second anniversary social of this Lodge. Our ubiquitous reporter told us he would attend, but other engagements prevented him going. The Lodge has a membership of 81, the growth from a start two years ago of 10 members, being in a prosperous condition, and more than favorable in comparison to other Lodges of the Order in other parts of the State, the whole Order on this coast numbering about 11,000 members. In the early part of the evening the newly elected officers for the ensuing term were installed by P. G. M. W. Jordan, assisted by W. H. Barnes, G. F. The list will be found on another page.

Soon after the installation the hall was thrown open to invited guests and the families of the members, and soon was crowded. A literary and musical entertainment was presented, beginning with an address by one of the Grand officers, W. H. Barnes of San Francisco. In an eloquent way he viewed the organization and growth of the Order, dwelling upon its philanthropic nature and the benefits possible to the members of families, by convincing figures demonstrated the value of membership as a safe and cheap life insurance, embraced in his review some pertinent recitations which amused the audience and gained generous applause. The remainder of the programme was: Instrumental duet, Misses Susie Chessman and Lizzie Fox; trio, Misses Moultry, Hobbs, and Mr. A. J. Brownlie; solo, Weary Heart, Miss Flora Winchell; recitation, Mother and Poet, Miss Katie Wood; piano solo, de l'Opera le cheval de Bronze, Mrs. L. O. Aubrey; quartette, Whippoorwill Song, Messrs. Breed, English, Weill and Brown; duet, Over the Howthorne Hedge, Misses Jennie McWilliams and Susie Chessman; Solo, Hours of Sweet Repose, J. W. Breed; address by P. G. M. W., William H. Jordan, all of which was rendered to the expressed satisfaction of the audience. Bro. Barnes added to the programme with some imitations of jubilee singers, his comical engine song, and a medley introducing some ventriloquil feats that captured the house. Immediately on the conclusion of the literary entertainment the company adjourned en masse to Hibernia hall where a vast stretch of table was laden with the choicest of edibles furnished by ladies matrimonially connected with the Order and which amply demonstrated their superior culinary accomplishments. Turkey in abundance, tongue, ham, cake in plentiful variety, winter fruits, steaming coffe, pies, sandwiches—anything that ordinary consumer could ask was served by a number of ladies who certainly deserve great praise for their efforts. After supper a re-adjournment to Farragut hall was followed by a dance to music by Rice's string band, continuing through a heartily enjoyed programme until half past two o'clock in the morning. Throughout all there prevailed a feeling of cordial fraternity that could not fail of pleasurable results, and stands as a notable illustration of value in the Order as a fraternal organization.

University, 88.

We are indebted to Bro. Wright, Recorder of University, No, 88, of Berkeley, for a report of the installation services of this Lodge. The officers, on January 8th (published on another page), were inducted into office by R. B. Nixon, D. D. G. M., assisted by Past Masters Shuster and Johnson, of Hearts of Oak Lodge, No. 61. The J. W. and M. W. degrees were conferred on two candidates in a very creditable manner. After the installation and conferring of degrees, a recess was granted, when a bounteous collation was served and enjoyed by the members of that Lodge and the visitors. Quite a number were assembled, a delegation being present from each Lodge in the district, beside some from Oakland. Short speeches were made by nearly every member present, and the company just avoided breaking the Sabbath by going home in the best of humor with themselves and the remainder of mankind. There are three Lodges of the A. O. U. W. in the small town of Berkeley, and membership and attendance small.

New Lodges.

HANFORD LODGE, No. ——, was organized Friday evening, Dec. 24th, by D. D. G. M. W., C. F. Hall, assisted by Bros. A. T. Cotton and G. G. Buckland, of Tulare Lodge; and Bros. L. P. Smith and J. W. A. Wright, of Grangeville Lodge. Twenty charter members initiated. The following officers were elected: N. W. Motheral, P. M. W.; J. A. Hill, M. W.; John I. McQuiddy, F.; J. W. Ramsey, O.; N. Weisbaum, Rdr; J. T. Baker, Rvr; C. H. Bingham, Fin.; D. C. Cheatham, G.; J. Breeding, I. W.; A. Sciaroni, O. W. N. W. Motheral, W. S. Smith, Jas. Coffey, Trustees. Time of meeting, every Monday night, in I. O. O. F. hall.

New Lodges in Nevada.

J. W. Kinsley, Grand Lecturer, instituted Security Lodge, No. 7, at Virginia City, Nev., on Dec. 31, 1880, with the following officers: Henry Rolfe, P. M. W.; Wm. Sutherland, M. W.; David B. Hunter, F.; Chas. Albington, O.; John Rosenbrock, Rdr; Frank M. Conn, Rvr; T. W. Lee, G.; John Carpenter, I. W.; S. Vucovich, O. W. The above are well-known citizens of Nevada and leading professional men of Virginia City.

J. W. Kinsley, Grand Lecturer, instituted a new Lodge (No. 8) of Workmen, at Lucille, Lyon Co., Nev., on Jan. 6th. The following are the officers: Peter R. Savage, P. M. W.; H. W. Borham, M. W.; Alex. Summerfield, F.; Robt. Rowland, O.; James H. Prince, Rdr; Wm. Gerry, Fin.; Mathews Ebner, Rvr; Jacob Paul, G.; R. P. Traut, I. W.; E. W. Cross, O. W.; C. B. Brierly, Med. Ex. The WATCHMAN extends the right hand of fellowship to our new brethren, wishing them abundant success.

Oakland Lodge Locals.

[We shall be pleased if some of the able brethren of each Lodge in Oakland will correspond weekly with the WATCHMAN from the "Father City" of the Order in California.—EDS. WATCHMAN.]

California, 1.

The officers of California, No. 1, published in our last issue, were installed Jan. 4th, by P. M. W., W. H. Fiske, assisted by P. M. W.'s Geo. E. Bugbee and W. H. Wood. There was a good attendance present, and a great deal of interest manifested. The mother Lodge always has a good attendance and is in a flourishing condition since she has abolished sick benefits.

Installation Week.

The week commencing with Monday, January 3d, was a busy and interesting one in the City of Oaks. On the evening above named, the officers for the ensuing term of Oak Leaf Lodge, No. 35, were regularly installed by the District Deputy, D. S. Hirshberg. The M. W., Bro. J. J. Jones, is a young man active, intelligent and well posted, and during his administration the banner of Oak Leaf will be held high. After the installation remarks were made by several members. The outlook for No. 35 is very encouraging. The sick benefit system has been abolished, and the change appears to give general satisfaction. On Tuesday evening, January 4th, the officers of Keystone Lodge, No. 64, were installed by Deputy Hirshberg. The retiring M. W., Bro. C. E. Alden, was elected to the recordership of the Lodge, the position previously held by him. Bro. James C. Plunket, the M. W., is an attorney of the city of Oakland, is wide awake and vigilant, and will work assiduously and industriously for the advancement of the cause of Charity Hope and Protection. Thursday evening witnessed the installation of Brooklyn, No. 3, and Pacific, No. 7, by D. D. G. M. W., D. S. Hirshberg. No. 3 was installed in the early part of the evening. This Lodge is one of the most active and energetic of our sisterhood of Lodges. No. 3 is unpretentious and moves along in the even tenor of the way, and contains some of the best material in the city of Oakland among its members. Mayor James E. Blethen and Supreme Foreman, Dr. M. W. Fish, hold membership in No. 30, Pacific, No. 7 was installed at 9 o'clock in the presence of a large membership. On this evening the matter of abolishing sick benefits was under discussion, and that no doubt had a tendency to draw out an unusually large attendance. The proposition to do away with the benefits was voted down, however, by a large majority. Among the officers installed was Past Grand Master Workman, William H. Jordan, as Guide of the Lodge, which position he was elected to, and which he promised to fill faithfully to the end of the term. This should be held up as an example to the brotherhood not to refuse minor positions at the hands of a Lodge, as many of our members persist in doing. Under the head of Good of the Order interesting remarks were made by the Deputy and P. M. W., C. H. Dunton, of No. 35. On Friday evening Bro. Hirshberg, assisted by M. W., J. J. Jones, of Oak Leaf, installed the officers of Oakland, No. 2. The M. W., Bro. Griffin is possibly one of the best presiding officers in the city of Oakland. After the installation interesting remarks were made by the Deputy and visiting brothers.

San Francisco Lodge Locals.

Installations.

E. F. Loud, Deputy Grand Master, installed the officers of Valley, No. 30, on Jan. 5th, assisted by Prince E. Hilton, as G. P. M. W.; W. W. Hanscom, G. F.; E. M. Reading, G. O.; Harry J. Lask, G. G. The large hall was filled by brethren of Valley and numerous visitors, making a scene that pleased the hearts of these enthusiastic Workmen. The installation services were performed with quick dispatch and dignity, and at the close the new officers immediately commenced work, their first effort being to initiate one to the J. W., and nine to the M. W. degree. We wish to congratulate the new officers on their work, the business being done in a correct and dignified manner; and as to the secret work, it was letter perfect.

B. F. Jacobs, D. D. G. M. W., installed the officers of Magnolia, 41, with the following officers assisting: J. Falkenstein, P. M. W. of San Francisco, 4, as G. P. M. W.; John R. Fishbeck, P. M. W. of Harmony, 9, as G. F.; P. Lansing, P. M. W. of Unity, 27, as G. Guide. There

was a very good attendance, and the services were performed in a dignified and creditable manner.

Prince E. Hilton, D. D. G. M. W., installed the officers of Hercules Lodge, assisted by W. W. Morrison as G. P. M. W.; E. J. Lewis, G. F.; H. G. Prince, G. O.; J. W. Reed, G. Guide. Hamilton hall was completely filled by invited guests and members of this Lodge. The installation services were given by the acting Grand Master, Bro. Hilton, from memory, without the use of the Ritual, correctly and in a very dignified and entertaining manner. At the close there was spontaneous applause and clapping of hands, that denoted general satisfaction. A vote of thanks was unanimously tendered to Bro. Hilton and the Grand officers assisting. The new officers immediately entered upon their duties, the first thing in order being the election of representatives, which resulted in the choice of Bro. Prince E. Hilton, T. H. Cunningham and P. Veasey. This was a very interesting meeting, 83 votes being polled for representatives. This Lodge has increased 50 members this year, and we may expect a larger increase the coming one.

Prince E. Hilton, D. D. G. M. W., installed the officers of Washington, 60, on Jan. 6th, with the following officers: E. F. Loud as G. P. M. W.; E. M. Reading as G. F.; Reed, of Hercules, as G. Guide. Representatives—Henry Wolfsohn, Philip Peck and Martin S. Meyer.

Deputy Grand Master, E. F. Loud, assisted by Prince E. Hilton, D. D. G. M. W., as G. P. M. W.; J. Davis, P. M. W., of Magnolia, as G. F.; W. F. English, P. M. W. of San Francisco, G. O.; Harry J. Lask, P. M. W., of Golden Gate as G. Guide, inducted the newly elected officers of Triumph Lodge, 180, into their respective chairs. The installation services were performed quick with dispatch in a straightforward, business-like manner, that was agreeable to officers, members and visitors.

D. D. G. M., B. F. Jacobs, installed the officers of Harmony, No. 9, on Jan. 8, 1881, the following Grand officers assisting: G. Falkensten, G. P. M. W.; L. J. Henry, G. F.; Chas. Hoffman, G. O.; Frank Harrold, G. Rdr; J. L. Lansing, G. G.; G. M. Lawton, G. Rvr; G. Palmer, G. W. There was a large number present and the able and dignified manner of the services lent a charm to the hour that was pleasing, instructive and profitable alike to officers and members. The newly elected officers commence their official term on very favorable conditions; a large fund in their treasury, a growing membership, and unity and harmony among the brethren. L. J. Henry, Wm. Thackery, and Z. T. Whitten were elected as representatives. The newly elected M. W., J. J. Vanderlit, showed tact and ability in disposing of delicate questions coming before the Lodge, that warrants us saying that Harmony will have this term what she had last, an efficient presiding officer.

Presentations.

The brethren of Washington Lodge, No. 60, on Jan. 6th, at the close of the installation services, presented R. A. Lindsay, P. M. W., a magnificent set of silver spoons and forks with ivory handled knives, on which was engraved R. A. L. Inscribed on the box—Presented to R. A. Lindsay, P. M. W., by Washington Lodge, No. 60, A. O. U. W., 1881. This was a valuable present and a well-deserved compliment to a worthy and efficient officer.

In this day of generosity and rewards, we are pleased to record the presentation of a fine, gold-headed cane to J. L. Lansing, retiring P. M. W. of Unity, 27. Bro. T. P. Williams had the honor of presenting this souvenir to a faithful officer, and in fitting terms set forth the hard labor and fidelity Bro. Lansing had displayed while an officer of this Lodge. Bro. Lansing gracefully received this staff, and in a few heartfelt words thanked his brethren for their confidence and valuable present.

After the installation services of Unity, 27, J. T. Hollings, sitting P. M. W. was presented with a solid gold P. M. W. badge, on which was inscribed, "Presented to John T. Hollings, P. M. W., by the members of Unity Lodge, No. 27." Bro. I. D. Martin, in choice and appropriate words, made the presentation speech, which was well received by the brethren present, and feelingly and happily responded to by Bro. Hollings. We can assure our brother that he carries with him the kind wishes of the Fraternity.

Bro. C. D. Fox, P. M. W. of Harmony, 9, who was so generously caned for by his brother Workmen last year, was presented, on Jan. 4th, with a heavy gold watch by his brethren of Magnolia, 29, I. O. O. F. A fitting compliment to a deserving brother.

Installation and Presentation.

The newly elected officers of Sts. John Lodge, a list of whom appeared in our last issue, were installed on Thursday evening, the 6th inst., by D. D. G. M. W., Prince E. Hilton, assisted by P. M. W. Knorp, of Sts. John, as P. G. M. W.; P. M. W. Smith, of Fidelity, as G. F.; P. M. W. Joseph Reid, of Hercules, as G. Guide. The ceremony of installation was conducted by Bro. Hilton in an excellent manner, which earned for him and his corps of Grand officers the hearty thanks of the Lodge. After the installation, an interesting incident occurred, in the presentation to the retiring P. M. W., Bro. H. G. Prince, of a handsome gold P. M. W. badge—about the prettiest we have yet seen. Bro. J. E. Purdy, in behalf of the Lodge, made the presentation in a humorous, happy little speech, to which Bro. Prince replied in terms equally witty, thanking the brethren for this handsome and entirely unexpected mark of their respect and esteem. The following inscriptions appear on the badge: "P. M. W. Sts. John Lodge, No. 73." "Presented to Bro. Henry G. Prince by the members of Sts. John Lodge, No. 73, as a slight token of respect and esteem, Jan. 6, 1881." Sts. John Lodge is working along smoothly and steadily, and we trust that under the new administration she will continue to press forward in the good work.

Degree of Honor Presentations.

Miss Lucy McNear, who has served her Lodge as Secretary for the 5th term, was presented with a fine gold locket set with a pearl in the center. C. C. Terrill, P. M. W., made the presentation on the part of the Lodge, which although a complete surprise, was happily reponded to by Miss McNear, adding this injunction on her part, that hereafter if notice was given of any more generous gifts to her she would prepare an elaborate speech for the occasion.

We are glad to record the fact that our brothers are not receiving all the fine gifts. Sister Mary T. Lyon was the recipient of a fine gold badge, shaped like a harp, on one side of which was engraved the Goddess of Liberty, and the letters W. W. T. Q. E. On the reverse side was the word "Talitha Cumi." On the border of the harp was inscribed the following: "Presented by Silver Spray, Degree of Honor." The presentation was made by F. F. Filmore, P. M. W., in one of his interesting and humorous speeches. Sister Lyon gracefully received her gift and in turn feelingly replied.

Fidelity, 136.

As a marvel of success, perhaps this Lodge stands unrivaled. Less than 15 months old, they now have $3,000 in their treasury and over 250 members. Although they have a good fund in the bank, they have paid each extra assessment from the general fund. Of the character and *personnel* of their members we may be justly proud, as they represent a large class of our leading business and professional men. The election of officers was characterized by unanimity and good feeling, and we feel assured that the coming term will add largely to their membership.

Franklin, 44.

The officers of Franklin Lodge, No. 44, were installed by W. W. Hanscom, D. D. G. M. W., on Friday evening the 8th inst., E. M. Reading filling the chair of G. P. M. W., and Harry J. Lask acting G. Guide. The service of installation was performed with that quiet, unostentatious manner that characterizes our District Deputy, Bro. Hanscom, but with an exactness and precision that is seldom seen. What brought forth many favorable comments, the whole ritual was given from memory without a skip or mistake. There was a full Lodge, and the interest was increased at the close by two presentations. The first, Bro. D. A. Brown, sitting P. M. W., was handed a fine gold P. M. jewel with very appropriate inscriptions, Bro. J. F. Brown, who has held the office of Financier for a long time, making the presentation and crowning it with a well-timed speech. Our venerable Financier, J. F. Brown, was the recipient of a handsome silver member's badge, Bro. J. A. Fairweather, P. M. W., doing the honors in a few select and complimentary words, recounting his long and faithful service, and regrets that they could not have his care longer. The response of Bro. Brown was equal to the occasion. This was a happy Lodge meeting for Franklin, No. 44.

Golden Gate, 8.

The installation service for this term was performed by E. F. Loud, D. G. M. W., with E. M. Reading as P. M. W.; G. Winchill, G. F.; Jas. Davis, G. O.; H. Shoenburg, G. G.; J. English, G. Rdr; E. J. Lewis, G. Rvr; W. I. McKay, G. I. W., as Grand officers. The services were pleasing and made before a very large audience. Harry J. Lask and E. J. Lewis were elected representatives. After the business of the Lodge was finished an adjournment was had to the banquet room, where a most bountiful repast was in waiting. There had been ample provision made for a large number, and a goodly company was in attendance, representing a large number of our city Lodges. After a time spent in discussing the good things, the cigars were passed. Bro. W. H. Voorhees, M. W., as chairman, called the meeting to order and asked the privilege of W. H. Barnes, G. F., and E. F. Loud, D. G. M., to allow the founder of the Order in this city, E. J. Lewis, P. M. W., to say a few words. Our esteemed brother then made a fraternal speech in presenting a souvenir (to Harry J. Lask, sitting P. M. W.) that was a choice gem, and found a fitting response in the hearty applause it received. Bro. Lask tried to respond, and although a ready talker, his feelings bridled his tongue; and he closed by saying, "God bless Golden Gate Lodge and the noble brethren of the A. O. U. W." The jewel presented was a very fine one made of pure gold, richly mounted, on which was engraved, "Presented to Harry J. Lask, P. M. W., by Golden Gate Lodge, No. 8, A. O. U. W., Jan. 6th, 1881." Wm. H. Barnes was in fine speaking condition and gave them one of his rousing speeches, which was given round after round of applause. E. F. Loud, Dep. Grand Master, then gave the brethren some very good advice, which was well received. E. M. Reading, P. M. W., made a few appropriate remarks on one of the prominent words of our Order. Caleb Brind, P. M. W., then made some congratulatory remarks, followed by Jacob Davis, P. M. W., and Bros. F. M. French, C. E. Carrall, F. Magner and W. H. Voorhees in well timed remarks. At a late hour this pleasant meeting was brought to a close by giving three cheers to the Grand Lodge officers present.

Noe Valley, 185,

This young Lodge is progressing well. They have increased their number to 25, and have several applications. One very good feature in this Lodge is, the members are enthusiastic and a large proportion attend their Lodge meetings. We are assured that this term will add largely to their membership.

Olympic, 127.

The officers of this Lodge were installed on Tuesday evening, January 4th, by Prince E. Hilton, D. D. G. M. W. The services were performed in a manner that was truly refreshing. Previous to his retiring from the Chair, the late Master Workman, Bro. Morgan, who has been elected to represent the Lodge in the Grand Lodge session, made one of his characteristic and neat speeches. We expect that this brother will have earned a good reputation when the Grand Lodge session closes. The affairs of the Lodge during the last term have been satisfactory, there being quite an addition to the roll. The new Master Workman, F. W. Rossbach, is a live Workman, and the Lodge will surely prosper under his guidance. Let the members stir up and add to the membership, so that when the next Grand Lodge will meet, three P. M. W's. will represent it in the councils of the Order.

Triumph, No. 180.

The growing interest in our Order has made it a common practice for the first officers of a Lodge to have this fact commemorated by grouping in a large frame photograph pictures of their first officers. We had the pleasure of seeing the most beautiful frame and artistic grouping in Triumph Lodge, 180, that we have ever seen. The frame is 27x42 in., heavy California gold gilt with passe partout, the emblems of the Order, together with their names, engrossed by Bro. Espina. In the center is the badge of the Order, on each side the M. W. and P. M. W., Foreman and Overseer. Above these are the Receiver, Trustee, Medical Examiner and Guide; while below are the Recorder and Financier, I. W. and O. W., beneath which is "Triumph Lodge, 180, A. O. U. W., officers of the first term, installed August 21st, 1880." This fine work of art was made at the photo studio of the New York Gallery, 25 Third St. The excellence of this gem of art is largely due to the skill of Bro. Jos. Van Lochner, negative re-toucher, who is an artist that honors his profession by his skill and artistic taste. The officers, through James Watterman, P. M. W., presented this beautiful souvenir, hoping that it would hang by the side of their charter to remind them of their early struggles and future TRIUMPH.

Valley, No. 30.

Wednesday evening, Jan. 12th, was one of Valley's off nights, so far as Lodge work was concerned. The Lodge was opened and 29 petitions received for the degrees. After the usual routine of business the Lodge was closed, and the doors thrown open to a large number of ladies and gentlemen who were patiently waiting in the halls and adjacent rooms. Laurel hall was completely filled, nothing but standing room left. The meeting was called to order by Wm. H. Barnes, G. F., who, in a few remarks, introduced the evening's entertainment by saying Valley was ready and willing to receive a few more petitions from good men. The programme was opened by Mrs. F. Whitney, in plantation melodies, which was accorded a deserving applause. Solo, Mrs. Wilder, accompanied by Col. Wilder on the flute, and piano accompaniment; a very artistic effort that was heartily applauded. Reading, Mrs. Friend, the subject being "Mrs. Flora McFlimsey." Solo, Mrs. Rachel Lowenthal, who, on this occasion, pleased her audience so well that she was heartily encored. Duett, Col. David Wilder on the flute and Mrs. H. J. Macdonald at the piano; this was a pleasing effort. Recitation, Miss Eliza Wise, subject, "Old Hulder," which was listened to with rapt attention, and at the close received a double encore. Solo, Mrs. D. Wilder, a sweet sentimental song that was rendered in an artistic manner and loudly applauded. Duett, Master and Miss Reynaud, a sweet sympathetic song that was well received and secured an encore.

Wm. H. Barnes, G. F., then gave a recitation. Enough to say he is always encored. Solo, Linda Hoag, "Keep the A. O. U. W. O'er the Door," and for an encore sang, "All of One Size." Miss Lowenthal sang a song. Rhinoceros Quartette, consisting of Bros. Barnes, Black, Filmore and Lutz, sang a new song entitled "One More River to Cross," and being encored, became pretty well mixed; however, they appeared to be happy, and so was every one else in the room. There were loud calls for more music, but the principal part of the quartette seemed to be exhausted, and Bro. Barnes sang a short humorous piece and dismissed a large and highly delighted audience.

CLUFF BROS.—This family of Workmen have planted four first-class grocery stores in different parts of the city. By strict attention to business they have extended beyond the city, and are now regular shippers to different parts of the Pacific coast. One benefit to customers, all goods are packed and shipped free.

Reception to the Grand Lodge.

In our last issue we outlined what seemed meet the general expressed wish in regard to the reception of the members of the Grand Lodge. We are pleased to inform our readers that the views therein expressed have been agreed to, and that every city Lodge has assented. It will be one of the grandest events in the history of our Order. The committees appointed are representative men of the different Lodges, and we may expect each one will do his duty. The reception will be held at the Pavilion, Thursday, Feb. 3, 1881. We here with give the several committees:

GENERAL COMMITTEE.

San Francisco, No. 4	F. Hall, P. M. W.
Golden Gate, No. 8	Harry J. Lask, P. M. W.
Harmony, No. 9	W. Decker.
Yerba Buena, No. 14	D. C. Mitchell.
Bernal, No. 19	George Stewart.
Unity, No. 27	G. Winehill, P. M. W.
Valley, No. 30	C. O. Burton.
Spartan, No. 36	I. E. Alexander.
Magnolia, No. 41	M. Warschauer.
Myrtle, No. 42	C. S. Haley, P. M. W.
Franklin, No. 44	W. W. Hanscom, D. D. G. M.
Hercules, No. 53	A. F. Bell.
Washington, No. 60	P. Peck, P. M. W.
Burns, No. 68	L. G. Schord, P. M. W.
Sts. John, No. 73	J. E. Purdy.
Excelsior, No. 126	W. S. Pierce.
Olympic, No. 127	E. H. Morgan, P. M. W.
Fidelity, No. 136	T. A. Farless, P. M. W.
Bay View, No. 159	G. T. Shaw, P. M. W.
Memorial, No. 174	C. W. Nevin, P. M. W.
Friendship, No. 179	J. R. Pickens, P. M. W.
Triumph, No. 180	W. I. McKay, P. M. W.
Noe Valley, No. 185	A. D. Jordan.

President	W. W. Hanscom
Vice President	Harry J. Lask
Secretary	Marks Warschauer.
Treasurer	G. Winehill

EXECUTIVE COMMITTEE.

W. W. Hanscom, C. O. Burton,
J. E. Purdy, J. R. Pickens,
L. G. Schord.

SUB-COMMITTEES.

On Finance and Auditing—E. H. Morgan (Chairman), P. Peck and T. A. Farless.

On Building and Decorations—C. O. Burton (Chairman), W. W. Hanscom, I. E. Alexander, W. I. McKay and G. T. Shaw.

On Printing—A. F. Bell (Chairman), Charles W. Nevin and J. R. Pickens.

On Literary and Musical Exercises and Music—W. S. Pierce (Chairman), Harry J. Lask and J. E. Purdy.

On Collation—M. Warschauer (Chairman), G. Winehill; G. T. Shaw, George Stewart and L. G. Schord.

Floor Committee—Director, Harry J. Lask; Chief Aids, W. Decker and W. S. Pierce. One representative from each Lodge to be selected as Aids.

On Hat Room—C. W. Nevin (Chairman), C. S. Haley and F. Hall.

On Invitation—P. Peck (Chairman), E. H. Morgan and G. Winehill.

On Reception—The entire General Committee and one from each Lodge as Assistants.

As yet the committee has not settled upon the programme in detail, consequently we are unable to give it. In our next issue, which will be on the 30th inst., we shall be able to give an extended report.

A FINE TESTIMONIAL TO ONE OF OUR P. M. W.—On Jan. 5th, the brethren of Concord Council, Order of Chosen Friends, presented their retiring officer, G. Winehill, P. M. W., of Unity, No. 27, several testimonials. One was a solid silver medal of the Order, on which was inscribed O. C. F.—F. A. P., Concord Council, No. 2, P. C. C.; with clasped hands, and chain and shield, inscribed State of California; also a heavy, gold-headed cane, with the following inscription: "Presented to G. Winehill by the members of Concord Council, No. 2, O. C. F., Jan. 3, 1881." An adjournment was had to the private residence of G. Winehill, where kind household friends had prepared a feast that seldom ornaments any table. The kindness and grace displayed by the hostess, Mrs. Winehill, and her coadjutor, Miss Davis, made their guests feel happy and at home. After the supper congratulations and toasts were indulged in until a late but happy hour. Our genial Bro. Winehill has been the recipient of valuable testimonials and souvenirs from each beneficiary Order of which he is a member, of which we can only say they have been well earned.

Workmen's Guarantee Fund Association.

This Association is duly incorporated under the laws of the State, and has for its object the additional protection of $1,000 to the families of deceased members of the A. O. U. W. Admission fee $3, annual dues $2, and $1 assessment on the death of each member. It will cost, including dues and assessments, about $8 a year.

Every member of the A. O. U. W. in good standing should give this additional $1,000 to his family, as the cost is within the reach of all.

The following endorsement is from the Grand Master of the A. O. U. W.:

OFFICE OF GRAND MASTER WORKMAN
A. O. U. W. OF CALIFORNIA.
SHASTA, CAL., Oct. 2, 1880.

To the Officers and Members of the Workmen's Guarantee Fund Association:—It affords me pleasure to say that the aims and objects of the "Workmen's Guarantee Fund Association" meet with my most hearty approval and endorsement. As an auxiliary to the A. O. U. W. of California, it is calculated to do great good, and I commend it to the favorable consideration of the members of our noble fraternity.

Yours, fraternally,
CLAY W. TAYLOR, G. M. W. of California.

Call or send for Constitution.

WM. H. JORDAN, P. M. W., President.
E. M. READING, Secretary.

Office—No. 33 St. Ann's Building, Powell, cor. Eddy St

Absence of Mind a Sign of Incipient Mental Disease.

It is essential to skill that the muscles of the body should work unconsciously; but the moment they assert, as it were, their independence of self-consciousness, and prompt to the initiation of efforts outside of what they have been taught, a diseased condition is begun which we call "absence of mind." Such a habit begins in little things, more generally by an omission than a commission. Thinking of something else while dressing, a part of the toilet is overlooked, the necktie is forgotten, the wrong coat is put on, the hair is unkempt. Soon, as the habit increases, absurd and even harmful acts are committed. The collection of anecdotes are full of such follies. We know of an able young lawyer, who, instead of pouring a tonic from a bottle on his desk, carefully emptied the ink from his inkstand into a spoon and swallowed it. Another, an ex-Attorney-General of the United States, went on a fortnight trip to attend an absorbing legal case. His wife packed a half dozen shirts in his portmanteau. On his return there were no shirts visible. Pushing her inquiries she found that her husband had regularly donned a clean shirt every other day but had forgotten to take off the soiled one, and now returned wearing the whole half dozen. An authentic anecdote of the great political economist, Adam Smith, tells us that when called upon to sign a contract, instead of writing his own name, he made an elaborate imitation of the signature of the other party which had already been affixed. Such incidents tend to depreciate a man, though perhaps unjustly, in the opinion of those with whom he does business. They become also a grave annoyance to the individual himself. In a sense they are mental weaknesses which, pushed to a certain degree, pass into mental diseases. Senility and insanity are not unfrequently marked by automatic actions, carried out without the will or consciousness of the doer. The absent-minded one, like the sleep-walker, performs actions without the knowledge of them, and neglects duties which are pressing. Justly, therefore, it is a source of anxiety with every thoughtful person when he finds himself falling into this bad mental habit. It is usually gradual in its onset, stealing over one in moments of intense occupation. Unlike other mind-weaknesses, it is not the foe of the idle man so much as the busy one. Yet habits of revery and day dreaming may, also, bring it about. Those who feel this habit creeping over them will do well to make an early and special effort to resist it. It can be conquered by a habit of attention, and by severe self-chiding when the mind yields to it.—*Medical and Surgical Reporter.*

The Body Never Idle.—The most inveterate idler cannot prevent his body from working; that is clearly impossible; the body must keep hard at work or it will die. Suppose the stomach refused to work within ten minutes after a hearty dinner, the man would die in convulsions in a few hours; or cholera or cramp colic would rack and wreck him. Supposing the pores of the skin—meaning thereby the glandular apparatus with which they are connected—should go on a "strike," he would in an hour be burning up with fever; oppression would weigh upon the system, and soon become insupportable. Suppose the liver became mulish, the appetite would become annihilated, food would be loathed, torturing pains would invade the small of the back, and the head would ache to bursting. And so with all the functions of the body. How wonderful the beneficence that enables us to keep this complicated machinery in order by the pleasant process of eating and drinking.

Convergent Squint.—Dr. C. A. Bucklin, in an article in the *Medical Record*, on the cause and treatment of squint, expresses the opinion that every squinting eye that is not due to paralysis of a muscle can be straightened. In convergent squint the use of one eye is usually lost; consequently its earliest symptoms should receive prompt attention. Dr. Bucklin has had the advantage of examining over 200 cases of squint, and illustrates his text with a few of the more interesting ones to show the success that has attended the treatment which he therein recommends, that of tenotomy, or division of the tendon of the abnormally shortened muscle.

Preservations of Wood.—The method of preserving wood by the application of lime, as pursued by M. Svostal, is published in the French journals. He piles the planks in a tank, and puts over all a layer of quicklime, which is gradually slaked with water. Timber for mines requires about a week to be thoroughly impregnated, and other wood more or less time according to its thickness. The material acquires a remarkable degree of hardness on being subjected to this process, and, it is alleged, will never rot. Beech wood had been prepared in this way for hammers and other tools for iron works, and it is said to become as hard as oak without parting with any of its elasticity or toughness, and to last much longer than when not thus prepared.

Tunneling the Simplon.—One hundred and thirty French deputies have signed M. Renault's proposition for a grant of 50,000,000 francs for the construction of a tunnel through the Simplon mountain. It is stated that Italy and Switzerland have promised subventions.

"Doth Become a Man."

It is a proud boast even for a Shakespearian hero to make; a happy boast, moreover. But how many a career is wrecked at the very outset from an entirely false estimate of what "doth become a man." How many vicious habits do most boys acquire, not from any real enjoyment derived therefrom, but from a mistaken ideal of manhood to be attained by indulgence therein. Real manhood, to be arrived at and proved by self-restraint from vice, they affect to ignore as effeminate and juvenile; as something "too thin" to be worthy of their serious consideration. So after a little qualmishness, both of stomach and conscience, the big high life cigar is mounted, the round-mouthed oath adopted, "commercial morality" practiced, vile company chosen, and the flesh and the devil pandered to in general that the boy may pass muster, forsooth, as a man. Heaven help those of us parents who are responsible by our actions for such an ideal of manhood in the minds of our children! Sowers of wind they must reap the whirlwind; a horrible blackness of darkness; disobedience, hate and contempt—all for greed, nothing for love. Alas, that successful greed is the loathsome devil at whose shrine we worship! So that a man has full coffers we do him obeisance, though blackness of heart and meanness of soul are there!

"With all thy getting, get money," is the parodied proverb that present-day example preaches. And so our boys are taught that the one virtue, the one possible road to success in life, is smartness, which, being defined, means lying with glibbest tongue and brazenest brow; and stealing so circumspectly that the law's grip cannot clutch, or clutching cannot hold.

Success, truly, is the "measure of right." In my days of boyish enthusiasm I felt indignant and scornful, and kicked against the idea that right was to be measured in any such bushel. I had not then realized with Poe that "this is a world of words." I had not then realized the all-success of God; that God is God and good by virtue of success. He wills and who shall let it? He commands and it stands fast. I now see clearly that success is the measure of right; but the success must be *permanent success.* A startling achievement in devilry of any kind is not success, but most miserable defeat and utter failure. Whole world gained, soul lost, exhibits a poor balance in the millionaire's favor. "Soul lost" means manhood gone, love gone, happiness gone. Smartness and devilry then do *not* become a man.

Suppose we turn once more to our Shakespeare (I always find a little spare time to pass pleasantly in re-reading some scraps of favorite plays) and get his idea of what "doth become a man." At the siege of Troy one of the Greek heroes is sulking in his tent, fancying his achievements overlooked and insufficiently honored. Ulysses visits him and rates him soundly. Says he: "Perseverance, dear my lord, keeps honor bright." Perseverance in what, do you ask? Perseverance in duty to be sure! Perseverance in the duty next to you; diligence in business; fervor in spirit; warmth of heart, that means love to wife, to child, to neighbor, to mankind. That's where your happiness lies. When you get that far, there's more to follow.—*Edward Berwick, Carmel, Cal.*

An Emetic for Infants.—A correspondent of the *British Medical Journal* states it as his experience, that half a teaspoonful of glycerine acts as a simple and efficient emetic for infants.

The warmest man this winter will be the one who is most completely coaled.

St. Ann's Building.

Our illustration on this page gives a view of another building connected with the A. O. U. W., in it being located the office of Grand Recorder Pratt. To the San Franciscan who should return to this city after an absence of 20 years, and see the many changes which have taken place, both in the topographical and architectural features of the Bay city, would be a source of pleasure and astonishment. Where were once dreary sandhills, now magnificent buildings stand in beauty and grandeur. We remember the time, when a boy, taking a trip to a then popular resort known as Hayes' Park on steam cars. In passing the spot on which stands the building illustrated on this page, and all around, scarcely a house could be seen. If a Californian were to be told in those days that the time would come when over the same route cars would be propelled by steam, and the noisy puffing engine, or animal power could not be seen, he would undoubtedly think his informant was crazy. But this is what will soon take place over that broad thoroughfare known as Market street. This main artery of our city in early times stretched over sand-hills, miniature lakes, and presented a scene most uninviting. Now most of the prominent business houses of the city grace its sides; and out and beyond where trade holds sway, happy homes fill up the space where once desolation reigned supreme.

ST. ANN'S BUILDING CORNER EDDY AND POWELL STREETS.

St. Ann's building, located at the junction of Eddy and Powell streets with Market, is one of the handsomest buildings in the city. Its lofty spire reaching heavenward can be seen from all elevated portions of the surrounding country. It is five stories high, covering an area of 80x 180 ft. The basement and part of the second story is occupied by the piano and music firm of

T. M. Antisell & Co.,

Whose salesroom for the disposal of pianos organs and sheet music is the largest in the city. They sell from 50 to 100 pianos a month, their business being conducted both on the installment and cash plan. The large room is set with French plate mirrors on both sides, making it the finest piano room west of the Rocky mountains. The upper floor occupied by this firm is a large drawing room, richly carpeted, used for testing pianos, and is approached by a winding pair of stairs. We have received a musical journal published by this firm, the subscription price of which is $2 per year. It is well filled with the choicest music, the number before us being well worth the subscription price alone. The taste and the quiet elegance of these rooms, with its assortment of pianos, organs and the great variety of sheet music is well worth a visit.

Taking the elevator on a recent visit we soon found ourselves on the fifth floor, where the studio of that well-known firm of

Artists,

Lussier & Hill, is located. They are the leading portrait painters of the city. Mr. Hill has attained an enviable reputation for the artistic manner in which he reproduces the features of his subjects. If we were anxious to have our likeness painted in enduring oil or water colors, we do not know of any artist in this city to whom we could more safely entrust the undertaking than to Mr. Hill, who, with his coadjutor, Mr. Lussier, turns out such excellent work.

Leaving the studio of Messrs. Lussier & Hill, and being on fine art intent, we called upon C. L. Rouse, room No. 103, same floor. Mr. Rouse is a landscape and ideal painter. His landscape scenes present a freshness that is truly delightful. Here views from nature stand out with such charming beauty, and withal so truthful, as to at once captivate the senses. Also in his idealistic fairy scenes does Mr. Rouse show his great artistic talent, the brush being wielded with an effect that must be seen to be appreciated. Truly San Francisco should be proud of having among her artists such a one as Mr. Rouse has proved to be by the work he has done.

Continuing our peregrinations among the gentlemen who are devoted to fostering in our midst a love for the beautiful, we soon found ourselves in the rooms of Mr. A. Moretti, on the fifth floor. This gentleman arrived in our city about three years ago from Italy, under whose genial skies both art and music have flourished for generations. Mr. Moretti was Professor of Design in the Academy of Brera, in Milan. As a sample of some of his work in design and frescoing since his arrival here, we can only refer to the Baldwin hotel, the residences of Fred Crocker and James G. Fair. At the present time he is engaged in frescoing the Jesuit's church on Van Ness avenue, where those of our readers who desire to see some beautiful work would do well to visit.

Descending to the fourth story, the studio of H. H. Halsey was visited. Mr. Halsey paints portraits in India ink, crayon, oil or water colors. Samples of his work seen, show how skillfully he handles the brush, the features showing out on the canvas with life-like distinctness. He also does considerable work for the leading photographers of our city. He has been 24 years an artist, and follows his profession for the love which he has for it and the real enjoyment it affords him.

Miscellaneous.

On the third floor of St. Ann's building is located the office of Bro. Pratt, Grand Recorder of the A. O. U. W. of California. Here is a room in which all the financial business of the subordinate Lodges of our Order is done in this State. Times are always busy here, as it must necessarily be when the interests of over 11,000 Workmen are to be looked after. With what fidelity Bro. Pratt has administered the affairs of his office since he introduced the Order into this State, we only refer to its present prosperity and its onward and the ever-increasing confidence which the people at large are showing by joining this truly great fraternity.

Adjoining the office of Grand Recorder Pratt is the office of the Workmen's Guarantee Fund, W. H. Jordan, P. G. M. W., President and E. M. Reading, Secretary, the object being to give members of the A. O. U. W. in good standing an additional insurance of $1,000.

On the same floor, and on the right-hand side of the staircase, is the office of W. H. Mahoney, Grand Reporter of the Knights of Honor. Marching side by side with the A. O. U. W., with the same objects, although differing in its form of government, it is a grand society, numbering among its members many Workmen and some of the leading citizens of this State and nation.

The west half of St. Ann's building is occupied by the billard parlor of Frank J. Laskay. The room is nicely carpeted, upon the floor of which stands eight of P. Leisenfield's billiard tables, each table having the celebrated Phelan-Collander cushion. A card-room and parlor bar-room stand out from the main billiard-room, also some neatly arranged private roome. Here may be seen at any time some of our leading citizens passing a pleasant hour in caroming with the ivory balls.

One of the leading physicians of the city has his office in this building—Dr. W. F. McAllister, Medical Examiner of Magnolia Lodge.

Thus we have given in brief some of the features which give this building prominence, apart from it being the office of the Grand Recorder. In all its details of construction it is a credit to both architect and builder, and an ornament to San Francisco.

Michigan has reduced her indebtedness to the yellow fever claims to the small sum of $600.

Suffering.

"Strength is born
In the deep silence of long suffering hearts,
Not amidst joy."

Not an hour is borne upon the viewless wing of time into the shadowy realm of the past, and unrolled amid its ever increasing myriads of inhabitants, but bears witness to that truth, so beautifully portrayed in the lines above.

All Nature teaches us that it is not amid ease or mirth that strength is produced. True, there is a time when she speaks of naught save joy, when earth seems one vast scene composed of naught save the beautiful. 'Tis seen when with gladness bright Spring comes, bringing to earth all her lovely things, in the soft tints of the azure sky just shaded by its light veil of silver, in the laughing rill bounding gaily from mound to lea, in the silvery fount as it flashes with joy, in the first tiny leaflet that decorates the elm's graceful boughs, and in the myriads of lovely flowers which spring o'er hill and mead, and glistening with the morning dews, as the Sun sheds his orient beams o'er the already lovely scene, making Earth rejoice and with sparkling eyes bid him welcome. Surely, all this can have no reference to sorrow; this speaks of naught save joy. But pause and ask of Nature whence came strength to produce this entrancing scene, and she will surely answer thee; for to him who aright seeketh knowledge of her, she is ever ready to give instruction. She will tell thee, that ere this glorious scene could be produced, there was a dreary time of coldness, when all the earth was clad in somber mourning robes; when gusts of wind swept by in sympathetic wails; when the skies were darkened, and even the sun gave forth but a tearful radiance, and she, the mother of all, was left to mourn her loneliness.

Truly, 'tis in the stern, drear winter that to nature, strength is given, whereby all the earth is strewn with beauty.

We are told by naturalists, that the pearl-bearing mussel, when found in shallow fords along the coasts, where it is often cast against the rocky shore, is more apt to contain pearls than those which lie in calm, still water. A tranquil life they lead; gaily they sport 'mid the bright coral groves in ocean's deep caverns; no storm disturbs their rest; but within their worthless shells are found no glittering gems, while those o'er which the wild winds sweep, which are tossed against the rocky main by every rushing tide, are often the resting place of many a gem of light. Whilst weeping o'er their sufferings, their tears are turned to pearls.

The pages of history are filled with examples which show that it is not in joy or ease that strength is produced. For instance, the history of Hannibal, who, but for the winter spent by him and his soldiers amid the luxuries of the fatal Capua, might have conquered Rome, the mistress of the world, instead of dying by his own hand, a grieved and disappointed old man. Though his soldiers, nerved by the hardships they were forced to encounter, had traveled o'er the rugged, snow-capped Alps, oft forcing a passage where before no human foot had trod, undaunted by the yawning abyss just beneath; these men who had dared so much, were rendered unable to bear the hardships of war as formerly, by one winter spent amid the ease and luxury of Capua.

In our own loved land it is acknowledged that the winter spent by Lord Howe amid the gaieties of New York city, aided as much in writing "Victory" on the American banner as any other event of that most eventful period.

Suffering is often productive of good. While this is true in the material world, 'tis in the immaterial world that its truth stands pre-eminent. Would the comforting yet sweetly sad lines which form the chief charm of the writings of the gifted Mrs. Hemans ever have been penned had she not "learned in sorrow what she taught in song?" Naught save the sad life of their authoress could have called forth the beautiful verses, which shed so brilliant a luster around the name of L. E. L. And when our kindest acts are misinterpreted, our words misconstrued, and even our best motives impugned, 'tis comforting to know that from another heart arose the cry, "I have not loved the world, or the world me!"

It has been wisely said that David never wrote so sweetly as when with a pen dipped in the ink of affliction, and the same is true of all earth's great singers. 'Twas amid blindness and suffering that Milton composed the most sublime of English classics.

Thus, we see that the sweetest, most comforting songs have been "slow ground from misery's crushing presses." Turn from the fields of fame to the more familiar paths of life. Few who reach the years of maturity can look over their brief career and fail to feel that

"Free doth sorrow pass.
Free and unquestioned thro' a suffering world."

She claims as her domain the universe; from the wild surges of the Atlantic to the roar of the Pacific; from dashing Southern to frozen Arctic; yea, though we flee to Everet's lofty hight, or dive to ocean's dark, still bed, there is she known. In vain we seek some delightful clime where she hath no admittance. Not Italy's sunny sky, or Greece's poetic isle can stay her coming.

Tho' in sunny youth we fondly imagine that to us she ne'er can come, a few years dissipate the bright dream; and over the spirit once all joy, dark sorrow reigns. Into each life come moments when human strength sinks low and "acknowledges that woe is mightier." Yes, all human hearts know such moments tho' the world sees it not, tho' cheek be "coined to smiles," the lip to laughter, e'en tho' the eye be schooled to force back its tears and sparkle cold and bright, yet within the heart, that world unseen by man, dark suffering is known. And is all this suffering for naught? Would a righteous God—a God of love—permit his creatures to suffer, and all in vain? Surely not. He who "doeth all things well" has scattered throughout the world abundant evidence, which proves that sorrow, if borne in meekness, brings its own reward; that suffering purifies the human heart and causes it, like the trodden flower, to send forth its richest fragrance 'neath her crushing hand; that it is in the heart which has suffered most that the tenderest sympathy for another's woe is oftenest aroused; that suffering arouses the energies of the soul, and is necessary to our welfare. Without disappointment to try us, we would never have our full powers developed, or even be conscious of them. Without sorrow to teach him his dependence upon his Maker, what might not proud man's haughty spirit dare? But for suffering, there would be naught to lift him to a higher, purer sphere, and teach him that this earth is but a transient home. Then, tho' called to descend into the valley of suffering, ever remember that the way, if traveled in meekness, cannot be long, and in the end will lead to where "the life that is, touches the life that is to come, thence to a land fragrant with the breath of flowers that never wither." Where, led by suffering,

"Old friends are brought together; hands are clasped
In joy unspeakable; the mothers arms
Again are folded round the child she loved
And lost. Old sorrows are forgotten now,
Or but remembered to make sweet the hour
That over-pays them. Wounded hearts that bled
Or broke are healed forever. In the room
Of this grief-shadowed Present, there shall be
A Present in whose reign no grief shall gnaw
The heart, and never shall a tender tie
Be broken—in whose reign the eternal change,
That waits on growth and action, shall proceed
With everlasting concord hand in hand."

—*Julia M. Goodlett, San Bernardino.*

How Our Children Are Educated.

Education is the keystone of a man or woman's honesty, happiness and success in life. The foundations of a useful life are good character, industry and intelligence, with good health. Our elaborate and expensive system gives us none of these. According to the present mode, our young people's education lasts from 5 to 20 years. During that time they are immured in buildings more or less over-crowded and generally ill ventilated; and then they must also study at home to keep up with their classes, necessitating still more indoor life. So the child grows up, and its physique is formed to a sedentary life in crowded class rooms, with heavy nerve pressure. As a result, we have increased nervous tension, decreased health to support it, and, as a general outcome, a marked tendency on the part of Americans toward sedentary pursuits and city life, no matter how poorly paid. As an illustration of this, Gen. Armstrong, of the Hampton college, in Virginia, says that he could not find a single American born blacksmith in the State of Connecticut, although the wages of the trade were at the time exceptionally high. Another illustration occurred in Baltimore. The commercial house where I was employed advertised for a boy, salary, $250 per annum, and received 369 replies, some of them from persons of evident culture. One is all the time hearing of the arrest of some vagrant or criminal, who knows Latin and Greek, or Hebrew, and other University subjects; but one rarely hears of a carpenter, or bricklayer, or a shoemaker as being arrested. The criminals are almost all without a trade. Indirectly, our children at school learn to avoid manual labor. Directly, they learn an extraordinary variety of things by *rote* out of a great number of books, changed from time to time, according to the lobbying skill of various publishing houses. The value of rote teaching was cleverly shown in a recent magazine article. Suppose you take a boy and teach him Latin for five years, out of a book, as per present school system. Let him learn skating during his spare time, for, say six months, practically. The Latin, as much as he learns of it, comes to him through much tribulation and hard indoor work. The skating, however, after a tumble or two, will come easy and be his pleasure. Ten years afterward, the boy that was, will skate nearly as well as ever. But his Latin—where will that be? A few words and sentences, at best, but the body of it gone completely. Reverse the process and suppose the boy to be living in a family, where he could only obtain his wants by speaking Latin. In five years he would speak and understand the language perfectly, and never to forget it. The skating, on the other hand, he will be taught by school methods, with explanations of the theory of balancing and progression, with diagrams of the "Dutch Roll, "Pigeon Wing," etc. The result is, he will know nothing about skating. As a summary of what is accomplished by our present school system, we may say that the children who are its victims come out young men or women with diminished vitality and impaired constitutions. This is especially true of the girls who follow severe courses of study in the critical years after 12 and 14.

No one can be a useful and happy citizen with poor health as a foundation for life. They come out with a disinclination to manual and farm labor, created by too much in-door life and too much mental strain. They come out with a rote education and know practically nothing of the subjects which they have studied. I remember a friend of mine whom I met 12 years after our school life, and he had even forgotten some of the letters of the Greek alphabet, a thing hammered into him for at least 10 years, but he had not forgotten how to play ball. The first had been learned by rote and the second practically. When these young people come out of our schools to go into the battle of life they come out innocent of any knowledge which will either make them happy, useful, or even enable them to earn their daily bread. The young man knows nothing of the principles of the government of which he is to be an elector. He knows nothing of the principles of a successful life. His real education has all to be commenced; most of his habits, tastes and ideas of life must be *unlearned* and he recommences at the A B C when he has finished (?) his education.

So, too, the young woman comes out of her seminary with no idea of practical life, no knowledge of the laws of health, no just idea of the responsibilities that await her. The pains, penalties and duties of womanhood are in a book still to be opened. When she is married the curtain rises on real life. She finds that it is not the romance she has dreamed. She, too, must recommence her education and under the most adverse circumstances. Delicate from the hot bed of an artificial schooling, unpractical in her ideas, ignorant of the care of children or domestic economy or any other thing of use, she is, alas! too apt to become unhappy and worn down by work which is necessary, but beyond her poor strength, and harder from her lack of interest in it, and still harder because she knows not how to do it right.—*Abbott Kinney, San Gabriel.*

The Activity at the Isthmus.

The activity in measures looking toward the canalization of the narrow strip of land known on this coast as *the* isthmus, continues. It is promised to be one of the most interesting topics before Congress as soon as that body recovers from its holiday vacation, and we may expect to read glowing debates within the next few days. Certainly the theme is one of the utmost importance to the Pacific coast, for the tendency toward the domination of the railway over ships by the Cape Horn route is increasing, and if we do not get a short cut by the isthmus for the ships, it looks as though we might be left wholly to the hard mercy of the rails. It is easy to forsee what such bondage would be. We have already had experience enough to know that transportation companies generally are quite willing to take all they can get without absolutely ruining the producer, and if there are to be any profits made by industry, there must be some healthy competition to check the longings of carriers for the lion's share. As this matter is of vital importance to our producing interests, we deem it our duty to call the attention of our agriculturists to the canal projects, so that they may exert their influence to advance the enterprise which seems so essential to their future success.

We have already given the figures to show how the saving of time and cost of transit which would be effected by shooting the ships through the isthmus. It is obvious that it would be a crowning advantage to our grain growers in their competition with other far-away countries for the rewards of supplying the European markets. There are also other considerations to be weighed when one comes to discuss the different projects which are now competing for the popular favor and funds. It is, we think, beyond question that so important an enterprise upon this continent should be under American rather than European control, and doubtless this point will be fully emphasized in the Congressional debates upon the subject, which may be soon expected. By way of drawing attention to this branch of the subject, we may introduce some points upon the relation of the so-called "Monroe doctrine" to the canal projects, which are furnished us by Capt. Merry, of this city, who has made the enterprise a thorough study:

From an intimate acquaintance with the Panama transit since 1855, I know 12 or 15 instances when the United States had to land 300 or 350 marines and sailors at each end of the line of transit to maintain the peace, and it has been a necessity and the policy of our Government to keep a man-of-war at those points to protect the transit. The Central American governments have no police, or efficient force to protect life and property, and during any of the constant revolutions down there these would have been in a tight place if the foreign residents and Americans had not called on our troops for protection. If the limited interests of a railroad, employing a steady force in limited numbers, need two men-of-war constantly for protection, would not the construction of a canal, employing 5,000 men, subject at all times to sickness and malaria, necessitate a larger, more accurate and complete protection than has been the case so far? When the Panama railroad has been sold out to the De Lesseps company, we have no longer distinct and large American interests on the Isthmus, and consequently would have no valid excuse for landing troops, whereas the French would have vastly more reason for doing so to protect proportionately larger interests. Now, further, after the French government shall have taken advantage of this necessity of maintaining the interests of French citizens and stockholders, what more natural to land their soldiers and keep them there? The question comes in, are the American people willing to see a European power control the key of the Pacific, or all the commerce between the Atlantic and Pacific oc[illegible] The American people cannot afford to allow a foreign corporation to construct an interoceanic canal which naturally and necessarily be protected by the power which creates that corporation. If we don't build it ourselves we will have to buy it sooner or later. That's what the Monroe doctrine means in connection with this subject. Another thing, admitting, for the sake of argument, that both routes have equal merits from an engineering point of view, the fact that the Nicaraguan is to be built by American capital, and will call upon the American Government for protection when necessary, renders it advisable that we should support the construction of that canal in preference to one by a foreign company, or purchase the rights of the foreign company after it is built. If the Monroe doctrine has any validity this brings it out in the strongest form. I don't say anything about the case of war with that country. Their occupation of the ground would be a standing menace at all times.

This is certainly a forcible presentation of the subject, and one which will commend itself to most minds. This country is now rich enough and powerful enough to take the leading part in an enterprise of such great importance to its citizens, and we trust that this view of the subject may prevail.

Although the canal route has by far the greater confidence of the people, it is interesting to note that Capt. Eads is still pushing his project for a railway over which ships can be drawn from ocean to ocean. A dispatch from New York on Tuesday announces that Capt. Eads has completed negotiations with Mexico for the construction of a ship railway across the Isthmus of Tehauntepec, and has received the most liberal concession it has ever granted, being a strip half a mile wide, with a mile width for stations, leaving him untrammelled as to plans and the execution of the work, which is to be commenced within two years and completed in twelve years. The government also grants a subsidy equal to 1,000,000 acres of public lands. It also gives him the right to consolidate the Tehauntepec railway, now being constructed by Learned and others, with a ship railway, on such terms as may be agreed upon between them, and in such an event the location of the Tehauntepec railway may be altered as desired by Eads. The Tehauntepec railway company has a subvention amounting to about $1,500,000, to be paid by the Mexican Government in custom house certificates, and has also a large land grant. In case of the acquisition of this railway, its obligations to the Mexican Government are to cease, and subvention would then attach to the ship railway. The duration of the grant is 99 years, at the termination of which the Government is to take possession of the works, and pay two-thirds of their value. Permission is given to Eads to hypothecate the revenues of the railway to any other government which he may select to aid him by money or guarantees in its construction, the intention being to secure the co-operation of the United States with Mexico in the control of the works, as this is regarded by leading men in Mexico as the American route across the isthmus, and the one in which these two republics are most vitally and directly interested.

Important Telegraphic Improvement.—A *Times'* Boston special of Dec. 30th, says: The Western Union Telegraph Co. has for six weeks been experimenting between this city and New York with a new invention, whereby five messages may be simultaneously sent from each end of the line, and so far, it is said, the contrivance has proved satisfsctory. The principle involved is that which underlies Prof. Elisha Gray's telephone, that by the vibrations of tuning forks, tones of a different pitch can be sent over the wire simultaneously, and separated at the receiving end by an ingenious contrivance. The vibratory tuning fork at the receiving end is made to break the circuit so as to deliver a message in the Morse alphabet. The Western Union Telegraph Co. is said to have offered the inventor $150,000 if he shall succeed in using one wire for four simultaneous messages during two months, and $25,000 for each line of message superimposed after that. As stated above, six weeks of the trial is successfully passed, and it is stated that on the 21st inst. five operators in New York and five in Boston, using one line, sent and received 2,130 messages.

Earthquakes.—A new Theory.—A new and somewhat bold hypothesis as to the cause of earthquakes has been propounded by Dr. Novak, in Pesth. He considers that, besides the rotation of the earth on its axis and its revolution round the sun, a multiplicity of motions of the earth appear in space, in virtue of which the earth's axis, and with it the equator, shift their position. This causes a variation of the forces influencing the earth's form (centrifugal and centripetal force), and the earth has the tendency to adapt itself to this change. He also considers a change of form of the earth to occur through the shifting of the pole and the equator, and that this may have effect some time afterwards, where the earth's crust is weak. —*Nature.*

Suez Canal and Rainfall.—M. De Lesseps states that the opening of the Suez canal has increased the rainfall in the surrounding country to a remarkable extent. Previous to 1870 rain fell only about once in a year, while now it falls at least twice a month.

Old Wine, says Macagno, owes its mellowness more to the increase of glycerine than to a decrease of tannin in the liquid. The "keeping" of the wine, he maintains, depends upon the proportion the alcohol bears to the tannin.

PACIFIC STATES WATCHMAN.

[Consolidated with Pacific Workman.]

A. O. U. W. Home Paper.

(Formerly the Golden Gate Sentinel.)

Issued on the 1st and 15th of each month.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞ For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Recommended to the support of the Fraternity at large—by resolution of the Grand Lodge, A. O. U. W., of California, at Sacramento, Feb. 6th, 1880.

San Francisco, - January 15, 1881

Let Us Be Satisfied.

Under auspices of no common character, the Grand Lodge A. O. U. W., of California, will meet in annual session in this city on the first day of next month. But a few short years ago the banner of our Order was first planted on this coast, but it was planted firmly and put in the care of good and true men, and in the hands of good and true men it has remained ever since. Hence we have suffered from no serious blunders, nor wicked misappropriation of our funds. Our history is without a parallel in the annals of our Order. No where else has the increase been so rapid. No where else, we feel safe in saying, has such a noble body of men gathered around the Workman's altar. No where else has the Order taken so high a place in the public esteem, and no where else, we believe, does such harmony exist and such unity of purpose prevail; and no where else can be found such proficiency in the ritualistic "work" of the Order. This is claiming a good deal, and may seem somewhat egotistical, but the results which will be shown by the forthcoming reports of our Grand officers will bear out the truth of the statements here made. We have confidence that the Grand Lodge at the coming session will continue in the course of wisdom which has characterized the former actions of that body. The danger lies in attempting to do too much, in making too many changes, and in trying too many experiments. Those are things we cannot afford. It is well to remember that any attempt to reform a successful institution, either in its laws or general management and policy, must necessarily be fraught with danger so great as to inspire the utmost caution on the part of those who feel any interest in its welfare. And yet with no change, progress cannot be made toward perfection; and this brings us to say that inasmuch as certain changes must be made in our constitution to harmonize it with the ritual and general laws of the Order, now is a good time to make such other changes as experience has shown to be necessary, but beyond these let us not go. The A. O. U. W. is a grand success. A little foolishness may make it a gigantic failure. Hold fast to that which is good.

A correspondent writes us that a visit from some of the Grand officers would be acceptable to the brothers of Santa Barbara Lodge, No. 172. He says they have a first-class Lodge, the applicants for membership coming in without much coaxing.

In our last issue we noted River Lodge, No. 6, as located at Gold Hill, when it should have been at Dayton.

Representatives to the Grand Lodge, A. O. U. W.

The following Past Master Workmen have been elected Representatives to the Grand Lodge to meet in this city the first Tuesday in February. We expect to have a complete list in our next issue:

California Lodge, No. 1—Oakland—Geo. Hadsell, Geo. Bugbee.
Oakland Lodge, No. 2—S. H. Mitchell, M. E. Ryan.
Brooklyn Lodge, No. 3—L. J. Rector.
San Francisco Lodge, No. 4—W. P. English, F. Hall.
Pacific Lodge, No. 7, Oakland—Henry Vrooman, Will H. Burrall, John Williams, S. M. Cushing.
Golden Gate Lodge, No. 8, S. F.—Harry J. Lask, E. Lewis.
Harmony Lodge, No. 9, S. F.—John R. Fishbeck, L. J. Henry, Wm. Thackeray.
Berkeley Lodge, No. 10—F. H. Payne.
Temple Lodge, No. 11, North Temescal, H. C. Babcock.
Fortuna Lodge, No. 13, Napa—A. D. Stockford, J. W. Hostetler.
Yerba Buena Lodge, No. 14, S. F.—C. A. Garthorne, J. G. Severance.
Eureka Lodge, No. 15, St. Helena—S. P. Conner.
Enterprise Lodge, No. 17, San Jose—George Featherstone, L. Finnigan, Geo. Lendrum.
Haywards Lodge, No. 18—Ed. O. Webb.
Bernal Lodge, No. 19, S. F.—R. P. Sanchez.
Union Lodge, No. 21, Sacramento—T. W. Sheehan, E. J. Gregory, Jos. Davies, J. N. Young, John L. Jackson.
Yolo Lodge, No. 32, Woodland—S. T. Pendergast.
Stockton Lodge, No. 23—J. R. Williams, J. V. Ball, W. M. Trivett.
Gilroy Lodge, No. 26—H. M. Briggs.
Santa Rosa Lodge, No. 28—S.T. Coulter:
Petaluma Lodge, No 29,—S. J. Hopkins, L. Ellsworth.
Valley Lodge, No. 30, S. F.—W. G. Buchanan, J. J. Hayes, H. H. Hoeber, E. H. Hunt, A. Heussler, W. B. Lyon, E. F. Loud, D. McLeod, J. P. McMurray, T. H. Macdonald, C. C. Terrill, F. Filmore.
Healdsburg Lodge, No. 30—L. A. Jordan,
Cloverdale Lodge, No. 32, J. F. Hoadley.
Lakeport Lodge, No. 34—R. W. Crump.
Oak Leaf Lodge, No. 35, Oakland—D. S. Hirshberg, E. J. Webster, C. K. Robinson, C. H. Dunton, J. A. C. Macdonald.
Marysville Lodge, No. 38—J. H. Flint, B. Eilerman.
Sutter Lodge, No. 39, Yuba City—M. C. Barney.
Oroville Lodge, No. 40—E. Higgins.
Magnolia Lodge, No. 41, S. F.—Jacob Davis, Caleb Brind.
Franklin Lodge, No. 44, S. F.—J. F. Brown, J. A. Fairweather.
Watsonville Lodge, No. 45—S. T. Dodson.
Santa Cruz Lodge, No. 46—Oscar L. Gordon.
Sausal Lodge, No. 47, Salinas,—H. S. Ball.
Vacaville Lodge, No. 48—Edw. Wm. Day.
Suisun Lodge, No. 49—G. A. Gillespie.
Dixon Lodge, No. 50—A. J. Buckles.
Grass Valley Lodge, No. 51—Thos. Dunkley.
Nevada City Lodge, No. 52—Chas. E. Mulloy.
Hercules Lodge, No. 53, S. F.—P. E. Hilton, T. W. Cunningham, P. Veasy.
Los Angeles Lodge, No. 55—C. F. Smurr, Jas Velsir.
Mission Lodge, No. 56, Mission San Jose—Sol. Ehrman.
Live Oak Lodge, No. 57—H. Luther.
Chico Lodge, No. 58—J. F. Watkins, Dr. G. W. Davies.
Mountain View Lodge, No. 59—Wm. F. Foss.
Washington Lodge, No. 60—R. A. Lindsay.
Industry Lodge, No. 63, Pleasanton—Herman Detjens.
Keystone Lodge, No. 64, Oakland—P. H. McGrew, C. E. McCord.
Colusa Lodge, No. 66—Oscar Robinson.
Burns Lodge, No. 68, S. F.—Wm. C. Flint, L. G. Schord, C. H. Vollmer.
Mendocino Lodge, No. 70—Geo. H. Bowman.
Shasta Lodge, No. 71—Aaron Bell.
Reading Lodge, No. 72—George Groves.
Sts. John Lodge, No. 73, S. F.—A. F. Knorp, H. G. Prince.
Merced Lodge, No. 74—A. Zirker.
Vallejo Lodge, No. 75—Wm. McWilliams.
Los Gatos Lodge, No, 76—John W. Miller.
Alviso Lodge, No. 77—Fred Wells.
Tulare Lodge. No. 78—T. A. Lewis.
Visalia Lodge, No. 79—A. Jay Cross.
Sacramento Lodge, No. 80—Ora N. Cronkite. John F. Farnsworth—Grove L. Johnson.
Justice Lodge, No. 81, Bakersfield—George H. Taylor.
Santa Ana Lodge, No. 82—Frank Monaghan.
Silver Star Lodge, No. 84, Downey—John Townsley.
Anaheim Lodge, No. 85—B. F. Subat.
University Lodge, No. 88, Berkeley—B. F. Conger.
Elmira Lodge, No. 89—J. H. Barrett.
Point of Timber Lodge, No. 92, Byron—C. J. Preston.
Reliance Lodge, No. 93, Alvarado—J. B. Sherk.
Benicia Lodge, No. 94—E. A. Randlett.
Placer Lodge, No. 95, Newcastle—G. D. Kellogg.
San Benito Lodge, No. 96, Hollister—J. G. Hamilton.
Covenant Lodge, No. 97, Auburn—Byron Lanyon.
Colfax Lodge, No. 99—R. F. Rooney.
Guardian Lodge, No. 100, Dutch Flat—O. H. Lee.
Biggs' Lodge, No. 102—W. A. Walker.
Castroville Lodge, No. 103—I. M. Pomber.
Highland Lodge, No. 104, Grass Valley—F. G. Beatty.
Mountain Lodge, No. 105, Truckee—J. T. Marr.
Lodi Lodge, 108—T. J. Clapp.
Elk Grove Lodge, No. 110—W. E. Everson.
Bay City Lodge, No. 111, Eureka—John A. Watson,
Empire Lodge, No. 112, Modesto—Chas. Maxwell.
Galt Lodge, No. 113—J. Brewster.
Grand Island Lodge, No. 116—A. A. Thayer.
El Dorado Lodge, No. 118, Placerville—Seneca Davis.
Riverside Lodge, No. 120, Compton—Andrew McFarland.
Georgetown Lodge, No. 121—E. L. Crawford.
Camptonville Lodge, No. 122—C. F. Hansur.
Forest Lodge, No 124, Forest City—T. H. Campbell.
Sierra City Lodge, No. 125—G. H. Abbe.
Olympic Lodge, No. 127, San Francisco—E. H. Morgan.
Mud Springs Lodge, No. 128, El Dorado—G. J. Brown.
Quincy Lodge, No. 129—N. H. Hapgood.
Wilmington Lodge No. 130—N. De Jausserand.
Banner Lodge, No. 131, Plymouth—J. Steinmetz.
Plumas Lodge, No. 132, Greenville—James Drysdale.
Amador Lodge, No. 133—Jas. L. Parks.
Laurel Lodge, No. 134, Susanville—W. H. Crane.
Fidelity Lodge, No. 136, San Francisco—Wm. H. Penfield, L. L. Dunbar, Geo. W. Brower, Geo. J. Mitchell, Wm. B. Smith.
Jackson Lodge, No. 138—Silas Penry.
Bald Mountain Lodge, No. 140, La Porte—G. J. Graham.
Ione Valley Lodge, No. 141—J. F. Stewart.
Sharon Lodge, No. 142, Brownsville—E. K. Hill.
Bodie Lodge, No. 143—Jos. J. Falkinham.
Meridian Lodge, No. 145, San Bernardino—N. D. Valentine.
Nicolaus Lodge, No. 146—C. E. Beran.

To Representatives of the Grand Lodge.

We send an extra copy of this number of the Watchman to each representative elected to the Grand Lodge, and also samples to the Recorder of each Lodge in this jurisdiction, requesting that a local agent be secured for our paper in all Lodges where none are at present acting for us. We believe that it is of sufficient importance to the Order, to each Lodge and to every Workman, that a first-class A. O. U. W. home newspaper be well sustained, to justify us in urging that an extra effort be made at this time for the pioneer advocate that has steadfastly done so much for the Order already without being a burden or expense to the Grand Lodge. We therefore urge each representative that he use all consistent efforts to bring a rousing list of new subscribers from each Lodge to the business manager of the Watchman at the Grand Lodge.

Our agent in Los Angeles, Bro. S. M. Perry, will receive subscriptions for the Watchman and transact such other business as may be intrusted to him. Brothers will confer a favor by extending to him all the aid possible.

The Order is flourishing in Storey county, Nevada, there being two Lodges in Virginia, and one in Gold Hill.

Thanks to C. E. Molloy, D. D. G. M. W., for Lodge items of Nos. 51, 52 and 104.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco.
H. G. Pratt, G. R.

There have been issued from this office 12,272 beneficiary certificates. The increase this month will probably be over 200.

It is pleasant to know that, as a rule, the Lodges have re-elected their Recorders and Financiers where those officers have proven efficient. It is a good rule to follow.

A deluge of business this month has kept us a little behind in writing beneficiary certificates, but we have done the best we could, and we beg the indulgence of the brotherhood.

About half the Representatives to the Grand Lodge will be new members to the body. The session will be the means of forming very many pleasant acquaintances.

Our Deputies have generally closed their schools of instruction and installed the subordinate Lodge officers. Where the tax and reports have not already been forwarded, that duty cannot be attended to too soon.

It is earnestly to be hoped that our Grand Lodge will so dispatch business that only three days' session will be necessary; otherwise it will sadly deplete the treasury and probably make an increase of per capita tax necessary.

Members of the Grand Lodge are cordially invited to call at the office of the Grand Recorder, at their convenience, before and during the session of the Grand Lodge. We will take pleasure in doing any favor within our power.

The Upchurch Testimonial Fund of this jurisdiction amounts now to a little over $800. Several of our Lodges are yet to hear from. It would be a source of much gratification if they would answer pro or con, so the business can be closed. We ought to make the fund just $1,000, and would if all would do their duty by the founder of the Order. As has before been stated, when Bro. Upchurch is dead and gone, there will be plenty of men ready to contribute money to raise a monument to the memory of so great a benefactor; but how much better it would be to raise a monument now—not of granite or marble, but of gold, that Bro. Upchurch so much needs to make pleasant his pathway down the decline of life. When the mother of Burns saw the admirers of the poet erecting a monument to his memory, she exclaimed: "Ah Robbie! ye asked them for bread and they hae gien ya a stane." Let it never be said of the A. O. U. W. that its founder when wanting bread was in like manner left to die hungry, and the money that should have fed him afterward applied to rear a stone.

We acknowledge the receipt of tickets of invitation to the first musical and literary entertainment of West End Lodge, Alameda, given at their Lodge-rooms, Webster street near Railroad avenue, Alameda, January 13th. We hope some of the brothers will send us an account of the occasion. We found it impossible to attend ourselves.

One of the pleasing and most desirable features of our Order is the unanimous reports of the Finance Committee of the different Lodges. As far as we know, the accounts of the Financier and Receiver in every city Lodge are correct. In a large majority of the Lodges the Financier and Receiver have been re-elected, and we hope to record the same desirable closing of the coming term, as no doubt we will.

In our last issue, we had a short article stating how Mrs. D. W. Collins was befriended by Palestine Lodge, No. 122, Amboy, Ill. We have since learned that D. W. Collins, and also his brother, are members of Golden Gate Lodge, No. 8, of this city. No. 8 has tendered a vote of thanks to Palestine Lodge, and will remit the sum which sent the wife on her homeward journey, if it is necessary.

E. M. Reading, P. M. W., presented a finely bound Bible to Franklin Lodge, 44, on Dec. 30th, on which was printed the name of the Lodge. Congratulatory speeches followed, etc.

DR. M. W. FISH,

Foreman Supreme Lodge and First P. G. M. W. of California.

Father Upchurch.

In our issue of November 1st, we gave an engraving of J. J. Upchurch. We have since had engraved a better picture, and also procured fuller details of the life of the Order's founder. Father Upchurch—as his friends delight to call him—was born March 26, 1820, in Franklin county, North Carolina. His father (Ambrose) was the only son of John Upchurch, his mother being the daughter of Hon. Henry Hill, of Franklin county. Bro. Upchurch's father was a tiller of the soil, the farm being located near Lewisburg, the county seat. In October, 1824, young Upchurch's father was shot and killed, the immediate cause of the trouble being land. After the death of the elder Upchurch, the farm upon which the family lived was taken from them, and in order to support herself and children (two boys and two girls) the mother was compelled to ply the needle for a livelihood, which furnished but scant support in those early times. Relief was finally afforded to the struggling mother by Bro. Upchurch's grandfather taking the children to live with him, where he remained until about the age of 17. The school facilities were very meager in those days, and, like many of the sons of the early pioneers who have risen to prominence in the affairs of the nation, his schooldays were few and far between. In the meantime, his mother having bought a small farm, he went to live with her, stopping two years, and upon her second marriage determined to strike out for himself.

Here commences the real life of the subject of our sketch. Upon leaving his mother's farm he went to learn the millwrights' trade, but being in poor health, he was compelled to give it up. He then went to learn carpentering, but this, also, was too hard for his physical powers. We next find him as a clerk in the store of Prof. E. A. Jones, in the village of Henderson. Here he remained until June, 1841.

At this time Bro. Upchurch took to himself a wife, in the person of Miss Angelina Zeingenfuss Grun, daughter of Charles Grun, Esq., of Bethlehem, Pa., and adopted daughter and niece of John Zeingenfuss, of Raleigh, N. C. Temperance had its advocates in these times, and Bro. Upchurch associated himself with the movement, joined the Washington temperance society, and tried to run a hotel on these principles in Raleigh. But after two years' effort he had to succumb, the time nor place being ripe for such a business.

We will here mention a fact which shows how, even at this time, Bro. Upchurch was striving to make men better and happier, if it was possible for him to do so. During the time he was running the hotel an old tramp came along and was taken sick, whisky being the cause. During his sickness, Bro. Upchurch prevailed upon him to join the temperance society. He was an engraver and designer, and Bro. Upchurch bought him some tools, rented a shop, and started him in business. Afterwards he joined him for the purpose of learning the trade, but at the end of six months the old appetite came on, and he died of *delirium tremens*.

This incident was also another turning point in Bro. Upchurch's career, for the short time he spent learning engraving and designing filled his mind with a desire to master the machine business. He procured a situation in the shops of the Raleigh & Gaston R. R., where he remained until 1845, and was then sent out on the road as engineer. He afterwards removed to Bethlehem, Pa., being employed in the shops of the Philadelphia & Reading R. R. He worked for this company two years, and was then employed by the Crain Iron Co., at Catasaquad, with whom he stopped one year. He was then engaged by the Mine Hill & Schuylkill Haven R. R., whose shops were located at Cressand, Schuylkill county. After being about three years on the road and in the shops, he received the appointment of master mechanic, which he held for 13 years.

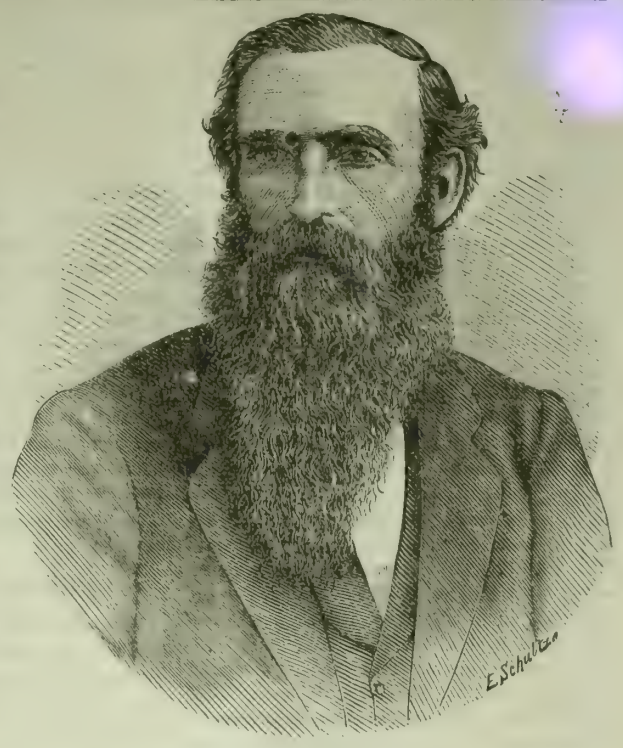
It was here that his mind became fully impressed with the importance of an organization being established for the purpose of uniting the two great interests of capital and labor, and he went to work to arrange his thoughts into some tangible form. For this purpose he resigned his position in the railroad company, Jan. 1, 1865, and went into the oil business as superintendent of the Martin Bernhorf Petroleum Co., where he had more time for thought on the great subject which he conceived to be of more vital importance than anything that had heretofore been presented.

He stated his plan of organization to Bro. Francis J. Keffer, P. M. W., now of Philadelphia, who commended it and urged him to perfect his work and introduce it. This he did, so that when an opportunity offered, he would be prepared.

On the 1st of February, 1866, he received the appointment of master mechanic of the Alabama & Florida R. R., headquarters at Montgomery, Ala. He only stopped here a short time, the climate not agreeing with himself or family. He then went to work for the Baldwin Locomotive Works. He was afterwards employed by the Pennsylvania R. R., and the Atlantic & Great Western R. R. In the latter company's works at Meadville, Pa., he found an opportunity of introducing the work which had given him so much thought. He was transferred from here to Leavittsburg, Ohio, to take charge of the shop for the company, where he remained three years, and then went back to Meadville. In 1873, he removed to Missouri, where he was employed for three years as master mechanic of the St. Louis, Salem & Little Rock R. R.

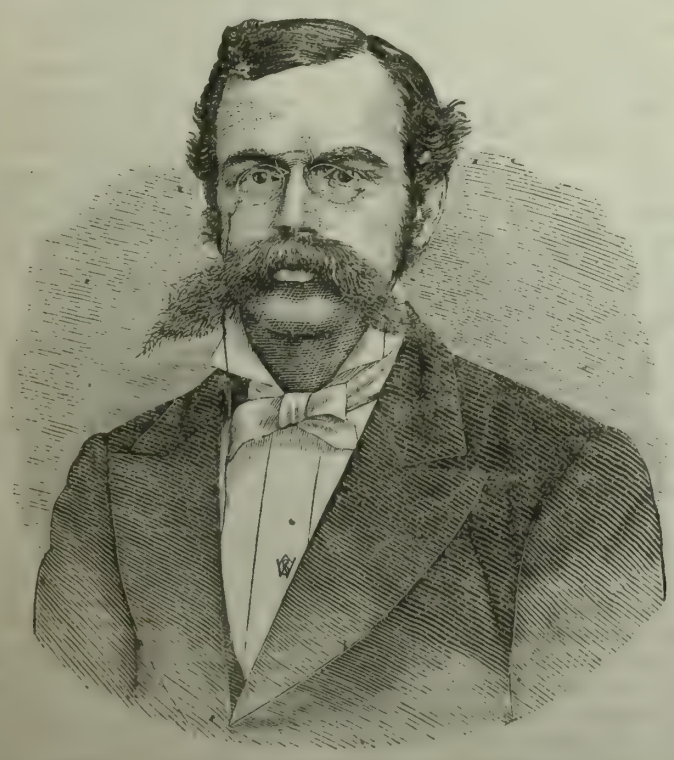
Bro. Upchurch is at present living at Sedalia, Mo. His family consists of six children, the two youngest not being yet old enough to take care of themselves, their ages being 10 and 15. His eldest son, T. F. Upchurch, is a machinist, and was one of the original seven who constituted the first Lodge.

Bro. Upchurch still works at his trade when his health will allow. A man who has passed through such a hard life as he has, necessarily must be worn out. It gives us pleasure to record the fact that California has responded so generously to smooth the pathway of his declining years. The Order which sprung from his humble efforts, has lighted with joy many a sorrowing fireside, and all sections of our country should do as we have done, and make Father Upchurch's passing years free from the cares which a struggle for existence entails upon man.



Dr. M. W. Fish, Supreme Foreman.

It is not necessary to repeat here the biographical sketch of Dr. M. W. Fish,



JOHN J. UPCHURCH,

Founder of the A. O. U. W. in1868.

H. G. PRATT,

Grand Recorder, and Founder of the A. O. U. W. of California.

WM. H. JORDAN,

Past Grand Master Workman of California.

CLAY W. TAYLOR,

Grand Master Workman of California.

LEADING PIONEERS OF THE A. O. U. W.

Supreme Foreman, which was published in the WATCHMAN of March 1, 1880. For the benefit of our new readers, it is sufficient to say that he was born in Kortwright, Delaware county, New York, March 20, 1828. In 1854, he graduated in medicine from Rush Medical College, Chicago. Shortly after his graduation he was appointed physician and missionary to the American Episcopal missions at Shanghai, China. He remained in China six years, three years of which he was U. S. Commissioner of Customs at Shanghai. At the breaking out of the war of the Rebellion, Dr. Fish joined the Union army as surgeon, and remained with it until after the fall of Richmond. In regard to his services in the A. O. U. W., he joined Brooklyn Lodge, No. 3, as a charter member. This Lodge was instituted Sept. 29th, 1876. He was elected P. M. W., and has been medical examiner of the Lodge since its institution. He was one of the delegates elected to form the Grand Lodge of this State, Nov. 13, 1877. He was elected P. G. M. W. at this time, and also a representative to the Supreme Lodge, and was the only one who attended from this State, the session being held at St. Louis, March 19, 1878. At the second session of the Grand Lodge of this State, held at San Jose, January, 1879, Dr. Fish was again elected a representative to the Supreme Lodge, which body convened at Nashville, March, 1879. At this session he was elected Supreme Overseer by a unanimous vote. At last session of the Grand Lodge of California, Dr. Fish, in his line of official duty, attended the Supreme Lodge, which convened in Boston, March 16, 1880, and was "advanced" to the chair of Supreme Foreman, as before by unanimous vote. Being in the prime of life, and a Workman noble and true, we expect to see him Supreme Master Workman of the A. O. U. W.

Horace G. Pratt, Grand Recorder.

Bro. Pratt's biographical record appeared in our issue of Feb. 15, 1880. He was born Sept. 12, 1827, near the old village of Waterford, Pa. His parents are of pure New England stock, both still living, the father being now in his 80th year, and his mother in her 77th. Having mastered all the studies taught in the country schools, he attended for two terms the academy at Waterford. Being of a mechanical turn of mind, he quickly learned the trade of carpenter from his father, following that business in summer and teaching in winter. In 1854, he emigrated to Illinois, following his trade for two years. He then went into the newspaper business, and met with fair success. At the breakout of the Rebellion he was commissioned by the lamented Richard Yates, then Governor of Illinois, as enrolling officer for Lee county, and afterwards by the Provost Marshal of the district, which position he held till the close of the war. He then returned to his old home in Pennsylvania, and went into the lumber trade, but owing to losses by fire and bad debts, this was not as successful as he desired, and again he entered the field of journalism as publisher of a newspaper. He followed this until he came to California in 1875. In the autumn of 1869 was organized, in Corry, Pa., the second Lodge of the A. O. U. W. known in the world, and Bro. Pratt was solicited and joined the Lodge. He was soon advanced in the Order, and after the formation of the Grand Lodge was made an officer of that body, and was never out of the harness till he left the State for his present home. On the night of August 21, 1875, he organized California Lodge, No. 1. The work progressed slowly at first, but when ten subordinate Lodges were in line, he organized the Grand Lodge of California, Nov. 13, 1877, and was elected Grand Recorder, which position he has since held.

W. H. Jordan, P. G. M. W.

Bro. Jordan was born in Cincinnati, Ohio, Sept. 3, 1849. In 1859, he came across the plains with his father. Bro. Jordan is essentially a self-made man. To recapitulate the events of his youth in this State, would be to write only of trial, poverty and toil. Through his indomitable energy he managed to secure the ways and means of fitting himself for and working his way through Yale College. His connection with the A. O. U. W. dates from July, 1877, when he was one of the charter members of Pacific, No. 7. When the Grand Lodge was formed in this State, he was elected as G. M. W., and was re-elected at the second session. The rapid growth of the Order is in great measure due to his conscientious efforts and personal influence in its behalf.

Clay W. Taylor, G. M. W.

We now come to the last subject of one of our illustrations on the previous page. In our issue of April 1, 1880, we gave a short sketch of our present Grand Master's life. We condense from it some of the salient features. Bro. Taylor was born Sept. 10, 1844, in Howell, Michigan. In June, 1858, his father, with family, came to this State. He has always lived in the northern counties of the State—first Sacramento, then Shasta, Sutter and Nevada, working as clerk, mining and farming. In 1861 and 62, during the Washoe excitement, he worked in the Comstock mines. In 1869, he was nominated and elected as District Attorney of Shasta county, and has been re-elected at every succeeding election. Bro. Taylor is another of our Grand officers who has carved out his own fortune. Through the greatest obstacles he has steadily moved onward and upward, and a bright future seems to lie before him.

A Thriving Subordinate Lodge.

We continually hear good reports from Healdsburg Lodge, No. 31; onward and upward seems to be its progress. We can do no better than quote from a letter recently received, written by J. Luedke, Recorder, showing how prosperous No. 31 is, and how the Lodge meetings are made a real pleasure to the members. He says: * * * "In connection with this I will mention here, that our Lodge (which is Healdsburg Lodge, No. 31), is a live Lodge. Our membership consists of 101 Master Workmen, and all as good material as can be found anywhere. Our meetings are well attended, because we make them attractive, agreeable and pleasant for all. After we are done with our regular order of business, we always open under the head, Good of the Order, with literary exercises; consisting of short speeches, select reading and vocal and instrumental music. This is a feature which should be adopted in every Lodge, it will have a tendency to bring members into a Lodge-room oftener than anything else we may introduce."

We are indebted to Bro. Luedke for a report of one of the regular meetings, held Dec. 3, 1880, on which occasion the Foreman, Bro. Pullee was presented with a handsome Workman's pin. The presentation speech was made by Bro. A. G. Burnett, and is a tribute to the zeal and ability of Bro. Pullee. Bro. Burnett said:

BRO. PULLEE:—I have learned with a great deal of pleasure of your fidelity to the interests of this Order. Your zeal not only merits the approval of every individual member, but also demands some public recognition upon the part of our organization. There is not a man in all the world, who has an intelligent and just conception of life, its responsibilities and duties, who is not thrilled with admiration for an unselfish devotion to a good cause. And I desire you to-night to feel assured that every member of this Lodge, who takes an abiding interest in its prosperity, not only esteems you very highly on account of your labors in our behalf, but also feels in a large degree indebted to you for that measure of success which has thus far crowned our efforts to advance the interests of the Order. Every man who rises above the low plane of selfishness, and stands upon the summits of self-denial and charity, deserves, what you doubtless enjoy at this time; the approval of your conscience, and the favor and esteem of your fellowmen. I would that I could gather from some source a few words of beauty that would be a fitting tribute to the strength of character and purity of purpose that you have displayed during your connection with this institution. But my poor feeble utterances are totally inadequate to represent our conception of your worth. It may be somewhat gratifying to you to know that we are not destitute of appreciation of your labors and are willing to make an acknowledgment of your services.

Human life is shorn of a great deal of its sin and deformity when the individual allows his affections to be enlisted in a good cause, and labors with all of his power for the good of those with whom he associates. I give expression to the sentiment of this Lodge when I declare that you have spared no pains to contribute to our well-being and happiness; and we would be basely ungrateful did we not, in some manner, respond to your consideration and kindness. In behalf of the A. O. U. W., of Healdsburg, I have the pleasure of presenting you this token of our esteem and gratitude. Its pecuniary value is not at all commensurate with our idea of what you deserve, but we trust that it will have to you a greater value than any which money could give it. Will you please accept it in the same spirit in which it is given, and may the Almighty strew your pathway with the richest blessings.

Bro. Pullee was evidently taken completely by surprise, as the motion to make the presentation was made during his absence in San Francisco, and was not recorded. He, however, made a neat and pleasing reply, in substance as follows:

MASTER WORKMEN AND BROTHER WORKMEN:—You have taken me unawares by this kind act this evening, and I do not know what to say. I accept the gift of this beautiful pin gratefully, as an expression of your good will and brotherly feeling toward me. What I have done, I did without any idea of reward other than what comes from the approval of conscience. I love our noble Order, and have simply done my duty, to the best of my ability, to serve its interests and promote its welfare. My feelings are deeply touched by this manifestation of your esteem and appreciation of my effort to do my duty. I thank you heartily for your kindness. May the good Father ever be watchful over the interests of our loved Order, and also over the interests of each individual member, and at last bring us all to the Supreme Lodge above. Brethren, again, I thank you, one and all.

Which is the Best?

The thorn that rankles deepest in the side of "legitimate" life insurance companies is the co-operative system. Take up any one of the many publications that owe their existence to the patronage of these incorporations, and you will find its columns filled with denunciations of "the co-operative humbug." The systems of life insurance as practiced by the Ancient Order of United Workmen, the Knights of Honor, and in connection with the Order of Odd Fellows, are its special aversion. Upon them it pours its vials of wrath and empties its buckets of ridicule. It brands them schemes for robbery, and wonders that they are permitted to flourish amid intelligent communities. It is sure co-operative insurance has nothing to commend it, and it is equally certain the "legitimate" combines all the principles of economy, safety and certainty. It is prolific of assertion, but barren of facts. Its zeal in behalf of the associations whose donations are its life-blood, is largely in excess of its judgment. Its desire to belittle benevolent institutions is out of all proportion when compared with its ability to attain the end in view. It is merely proclaiming itself a paid advocate and by its proclamation destroys the force of whatever argument it may advance. Meantime a hundred men associate themselves with societies in which co-operative life insurance is a distinctive feature, while one is deluded with the glamour of the "legitimate." The co-operative system of life insurance has its defects. It is not possible that it should be perfect, but that it is less perfect, less responsible and confers less benefit than the "legitimate," is an assertion the ablest publications devoted to the interest of companies that do not scruple to lobby through the Legislature a bill relieving them of all responsibility for the acts of their accredited agents, have not yet given the semblance of truth. This is not the time or place to discuss the advantages and benefits of the co-operative, or the shortcomings, quibbles and uncertainties of the "legitimate." An examination of the Legislative journals of this State, will convince the most skeptical that the "legitimate" has developed an abnormal passion for lobbying, and that as a rule its efforts in this direction have been to place on the statute book laws drawn with an eye single to an evasion of its responsibility to its policy holders. Another session of the Legislature is near at hand and before its adjournment it is to be hoped some of the most potent of these evasions will be stricken from the Codes. A free and full discussion of the laws affecting and protecting the "legitimate" will lead to a more equal balancing of the scales of justice.—*Golden Era.*

SEVERAL prominent members of the Order in Oregon are discussing the question of starting a new Lodge of 100 or 150 members, each member depositing $100 for the purpose of raising $10,000 or $15,000 to buy suitable property for a hall. It is stated that by selecting a business locality that will admit of their renting 1 or 2 stores for a good price, sufficient revenue may be realized to pay for the assessments of the members during their life. They could also rent their hall to other Lodges for a fair sum, say $10 a month, which added with the rent from other tenants, would swell the monthly revenue to about $200 or $250 per month.

THE Order is "booming" in Oregon. Our Web-foot brethren seem to have caught that spirit of go-aheaditiveness which characterizes the doings of the Workmen in this State. We think that the *Pacific Overseer* may justly claim credit for bringing about this happy change in Oregon. We see that Bro. Wheeler has given editorial charge of the paper to Lee McGowan; this addition making the *Overseer* much more attractive. The jurisdiction of Oregon is now well equipped. Let the good work go on.

Life's Locomotive.

[The following original poem was recently read by J. G. Severance, P. M. W, at a monthly social of Yerba Buena Lodge, No. 14, A. O. U. W:]

Since Homer learned to lubricate the Greek—
That somewhat ancient, very classic diction—
With epic oil, a compound then unique,
That, nothing lost by rust of time or friction,
Hellenic arts and history, sublime,
With all their early fame and primal glory,
On facile pinions might revolve through time
With force not given by prosaic story;

Down through the times when Virgil plied the art
For Troy's renown, on Latin; and when Schiller
Its unction to the German did impart
With like enduring skill; and Joaquin Miller
Greased his eccentric of the Saxon in
The crude petroleum of the wild Sierras;
And Bret Harte oleomargerined Ah Sin
And pliocenic skulls of Calaveras;

E'en from the time the Alpha of the "Nine"
Basked in the glories crowning proud Parnassus,
Till the Omega of the "art divine"
In Hippocrene laved, or strode Pegassus;
In ev'ry tale, dipped in Castalian spring,
By its fond Thetis, that it may not perish,
Of nature, man, of deeds, or anything
That we may either hate or fondly cherish—

We find that life is likened to a tide!
A purling stream in youth; in years maturer,
A ruthless torrent, on whose eddies ride
The freight of broken hopes; anon, the purer
And deeper waters of experience roll
In manhood's noble and majestic river,
Floating earth's commerce; then the human soul
Sinks in the unfathomed ocean of Forever!

How strange it is, 'mong all the changes made
In earthly things—so rapid in their making
The Rip Van Winkle of but one decade,
Would question on what planet he is waking;
When novel wonders cease to bring surprise,
And old-time things present the only rarity,
That, with the varied throng who poetise,
Life's simile preserves this similarity.

When Progress plucks the lightnings from above,
And with them makes each telegraphic station
A proud Olympus, forth from which its Jove
May flash his edicts throughout all creation;
Yet leaves the fervor of poetic fire
In locum tenens—shining as demurely
As in past ages—thoughtful minds enquire
The *motive!* Why, it must be *loco*, surely!

Hence, let us profit by this hint so plain,
And generate the steam of this improvement—
That life be likened to a railway train,
With all its parts, appliances and movement.
The route o'er which it flies, on iron pave,
With fir'y haste, from station on to station,
Runs from the cradle depot to the grave;
Beyond, its franchise is a speculation.

Its schedule time is three score years and ten,
By regulation train, for those who take it;
A few secure stop-over checks—but, then,
The masses choose express, and sooner make it
The Bible once was recognized the chart
To show life's way, when as a tide it glided;
But 'tis unheeded now, for science's art
Hath fixed the rails by which its car is guided.

Christ is the pilot who so safely steers,
Through storm and calm, life, as a naval structure;
But dogmas are the stokers, engineers
Who run the train, and isms the conductor.
While some will pay, and some their passage work—
Those being first and these the second classes—
Idlers and dead heads 'mong the baggage lurk,
And very few are favored with free passes.

The train moves slowly on the upward grade
That leads to fortune, and the many weary
Before they reach it; for the track is laid
Through mountain gorges, and o'er deserts dreary;
And oft the head-light glare of wisdom fails
To show the road ahead, or any token
Of danger there from misplaced switches, rails
Removed, collisions, earth slides, bridges broken.

But why enlarge? My chiefest object here
Is simply to submit a crude suggestion—
That we may profit by this new idea
I use but as the preface to this question—
Suppose that all, the train of life should find
Devoid of harms—constructed in compliance
With comfort, pleasure, safety, all combined
By rigid laws of ethics and of science.

And all the coaches which compose the train,
Supplied by hands, not selfish or penurious,
With food to nourish body, soul and brain,
And everything that's needful and luxurious;
With sturdy engines, jealous of delay,
In which ambition's fires are fiercely burning,
Eager to draw us swiftly o'er the way
To fame and fortune—time and distance spurning:

What would this all avail, as on we're whirled,
'Mid lovely scenes and constant summer weather,
Should some rude jar dissever the impearled
And coupling link that holds the train together?
Go read the answer in that human wreck
Whose misanthropic soul scorns social pleasures!
Go watch that miser's maniac eyes inspect
The sole companions of his life—his treasures!

There you will find a treatise on the fate
Reserved for those—all social ties ignoring—
Who revel in a hell of human hate,
Or have no God but wealth for their adoring;
What grander scenes surround life's iron ways,
O'er which we speed in such impetuous races,
Than our fraternal Lodge-room here displays,
Glad in the sunlight of familiar faces?

This is a station where we may regale
Our souls on social manna—where is ended,
A space, the jar we feel upon the rail
Of life, and where all broken links are mended;
And, as we move toward our journey's end,
These stations serve to make our ties still dearer,
And each repast of friendship makes each friend,
Both to his God and to his brother, nearer.

THROUGH the columns of the WATCHMAN we desire to inform its many readers that we have established a wholesale and retail hardware business at No. 28 New Montgomery St., under the Palace Hotel. Builders' materials, carpenters' tools, brushes, fine cutlery, parlor rifles, air-guns and everything in our line at the lowest rates. Call and examine our stock and prices.—FRANK P. LUTSON & Co.

[Frank P. Lutson was formerly with the late H. Rosekrans.]

THE RECORDERS of all Subordinate Lodges are requested to correspond and act as agents in securing subscriptions for the WATCHMAN. We will pay liberal rates for services rendered. Remember, Brothers, that you can accomplish a mutual benefit to the Order and ourselves.

A Decision in New York.

The *National Bulletin* has the following in regard to a recent decision of Grand Master Workman Case, of New York. It is based upon what perfects a suspended member to the privileges of a beneficiary certificate: While the decision is just in its conclusions, it is not as clear as it might be, or rather it is given upon an interpretation of the law that its letter does not warrant. The question presented him was simply this: Does the payment of arrearages on an assessment to the Recorder, and which was not accepted by the Financier before a report was made to the Lodge, affect the action of said Lodge in reinstating the suspended member upon the report of the Recorder alone that such arrearages had been paid? The matter of dispute arose from the death of R. H. Nagle, of Silver Creek Lodge, No. 10. Nagle, on the 28th of September last, was suspended for nonpayment of two assessments. On the 8th day of November the money to satisfy these arrearages was handed to the Recorder, and one hour after that Nagle died. The money was offered to J. J. Dalrymple, the Financier, the next day, who refused to receive it. On the 17th of November, nine days after the death of Nagle, the Recorder, at the regular meeting of the Lodge, reported the receipt by him of the money to pay the deceased brother's assessments, Nos. 10 and 11. The Master Workman, C. B. Bradley, decided that this payment of arrearages to the Recorder renewed the deceased brother's beneficiary certificate, and ordered the Financier to receive the money. An appeal was taken to the Lodge by the Financier, which resulted in the sustaining of the Master Workman's decision. The Financier therefore appealed to the Grand Master Workman.

It was not until nine days after the death of Nagle that the Lodge reinstated him. The money to pay his arrearages was only placed in the hands of the Recorder, to be sent through the proper authority in order that the preliminaries to the act of reinstatement could be fulfilled, one hour before the death of the delinquent brother. The Recorder, the next day, offered said money to the Financier, who refused to receive it.

Again, the Financier failed to lay before the Grand Master the error of reinstatement, regarding the suspended member as alive, in the Master Workman declaring upon the sole report of the Recorder that the arrearages had been paid, without presenting the matter to the Lodge for its action thereon, that the Nagle certificate was renewed from the time of payment thereof. In this act the Master Workman assumed the offices, privileges and right of the Lodge. It was not until the question came before it on appeal that the Lodge exercised its power which belongs to it alone, of reinstating the suspended brother.

But Bro. Nagle was dead at the time of this unconstitutional decision of Master Workman Bradley and the action of the Lodge in sustaining it. This was virtually reinstating a dead man as well as giving the Master Workman an unconstitutional prerogative. This does not appear in the decision of the Grand Master, as it should have done. However, granting that the Master Workman and the Lodge proceeded in a constitutional manner in renewing the Nagle certificate, they reinstated the suspended member who had been dead nine days, which was physically impossible, as well as in direct conflict with the organic law of the Order.

But aside from this particular case, continuing, however, the question which it presented to the Grand Master Workman, the mere placing of money in the hands of the Recorder, Financier, or any other officer or member of the Lodge, the said money to be applied in settling the arrearages of a delinquent member, does not constitute reinstatement. The debt to the Lodge, for such it is, must be paid, and it is not paid in fact until the credit is placed upon the Lodge's books to the said delinquent member, before the question of reinstatement can be considered. In this instance Nagle owed two assessments; he gave the money to the Recorder to settle said debt; but died directly thereafter. This act of giving the money to the Recorder did not reinstate him, nor would the acceptance of the money by the Financier have done so, nor the mere report to the Lodge of the money being in the hands of those officers for the payment of such arrearages. When Nagle was represented by the proper officers as being clear of debt on assessments, then and then only could the question of reinstatement be entertained. Whether Nagle was dead or alive did not matter. The arrearages occurred when he was in health and good standing in the Lodge. He owed them, and should have paid them. The money belonged to the beneficiary fund, and the Financier was wrong in refusing to receive it. It was a matter of super-sensitiveness on his part that Financiers cannot by any right indulge in, for such refusals to receive money to settle arrearages, even if the delinquent member dies before that refusal, keeps the Lodges out of their rightful dues. Hence the action of the Lodge, so far as it carried with it an acceptance of the money so tendered, was right, but beyond that it was a nullity, for it undertook to reinstate a dead man, which it could not do any more than it could initiate a dead one.

Those We Leave Behind.

A celebrated man says: "The acquisition of knowledge, the cultivation of virtue and friendship, the observance of faith and truth, an unrepining submission to whatever befalls us; life led in the accordance with reason is all that remains for us. Every appetite, lust, desire, springs from an imperfect knowledge." Our nature is imposed upon us by fate; but we must learn to control our passions, and live free, intelligent and virtuous in all things in accordance with reason. Many of us hardly take time to think if there is any purpose in life. Our labor exhausts us so that our mental qualities are left to die from utter inaction. At least it should be our duty to protect our families from the evils of poverty. Few men live who would seriously and knowingly leave their kindred in a state of destitution and distress. This mutual dependence on one another has given birth to an organization whose leading principles embrace the true attributes of charity, redeeming in a measure, the distress of the widow, and providing for the fatherless children. Is it not a pleasure to reflect that when we have passed away our beloved ones will not be suffering from want? that our friends will secure them, at least, from the attendant mysteries of mendicancy? In life, we receive great benefits from this Order. Our intercourse with each other, and the communion of friendship which links us together can hardly fail to be of inestimable value to us. Human life is so short, and the bright rays of the sun are so often obscured from the clouds of adversity and trouble, that we enjoy the prospect of a happier future, it casts its radiance over a long period, and thankful we should be that our nature is so constituted as to forget the troubles through which we have gone, and remember only the bright and pleasant thoughts, the pleasure we have enjoyed.

"Fixed is the term of all the race of earth." And such the hard condition of our birth, no force can there resist, no flight can save. All sink alike, the fearful and the brave. With some men, failure is a question of fear—some want the persevering courage to drag on amid trials which, subduing our actions to a law, governs and presides over every moment of our lives, making us even in our periods of excitement and irritability amenable to the guidance of reason.

Now, again, there are all our efforts. How fruitless are all our endeavors to struggle against our fate! We may stem for a short time the full tide of fortune, we may breast with courage high and spirits fierce, the rough billows as they break upon us; but we are sure to succumb in the end.

The close band of fraternity which exists within the folds of the "Ancient Order of United Workmen," and which unites its members into a common brotherhood, does much to ameliorate the poverty of circumstances. In contemplating the great advancement this Order has made, in common curiosity we are glad to question the spirit of its impulses and wonder at its spreading popularity.

Attention and close scrutiny establishes the fact that its principles are firmly based upon infallible truths, and that the most worthy and commendable of objects warms its breath of life.

The Order deserves success and prosperity, for they practice charity, the most exalted of all virtues, and the most redeeming attribute of humanity.

The greatest eulogy that can be devised is to remember how soon after death a benefit accrues. The Order provides for the widow or remaining relatives of a deceased member, by giving to them a stipulated amount, which by a proper exercise of economy and prudence will prove almost adequate to the requirements of life.—*Pacific Overseer.*

The Supreme Court Decision.

It must have been a year ago, that we discussed the different aspects of the law of this State, relating to beneficiary associations, and took the view that such societies as our own were not subject to the requirements of the law regarding insurance companies. It did seem to us then that, under the rulings of the St. Louis Circuit Court, any organization formed for the single purpose of insuring the lives of its members, was violating the law of the State if it did business without making the deposit of $100,000 required by the statute. When the Supreme Court entered a judgment for the suppression of the Merchants' Exchange Benevolent Association there was great alarm felt among the members of our own kindred societies. We believe that all this alarm and uneasy feeling is unnecessary, and that our rights are not affected for reasons we now will give.

The Supreme Court held that the laws of Missouri prohibited any association or company from "doing an insurance business" without conforming to the requirements of the act. It also decided that the Merchants' Exchange Benevolent Association was following the business of insuring the lives of its members, and was organised for that purpose alone. When this much was settled, it only was left for the court to take away the charter of the offender. Even now, as we take it, the association in question has only lost its charter or identity as a company, but can still continue in business, only the representatives of deceased members have no legal redress if payment of the sum due them be refused. Again the decision only prohibits future business; it does not invalidate or affect in any way the contracts it has already made with its members. The court does not say that a society organized for friendly and charitable purposes, but which incidentally pays a certain amount to the representatives of its deceased members, is in violation of law. It practically decides that such a society is acting legally.

If our Order was called upon to answer in a suit brought for its suppression, it would have a perfect defence. We do not do an insurance business. Our organization is a secret society formed for mutual society, comfort and assistance, for benevolent and charitable purposes. We extend aid to the sick, and if a member in good standing dies, we allow his representatives to participate in a fund on hand, and a fixed amount is paid from it. True, when it is exhausted it is renewed by assessments, but that is immaterial. So in no way do we pay insurances on the lives of our members; we only suffer them to participate in a beneficiary fund. Even this, theoretically, is only incidental to our organization, for our chief objects are fraternal and charitable.—*Missouri Overseer.*

"What Shall We Do to be Saved."

In order to interest our readers in the question contained in our head line it will be necessary to convince them that there is a possibility, if not a danger, of their being lost—not as individuals but collectively—as a beneficial organization. We are told by our disinterested friends, the life insurance officials, that as an Order we are rapidly growing older, and will soon reach old age, to be followed by decay and death. They tell us that every year we exist we are, as an Order, one year older, and that the death rate must inevitably increase in the same ratio; all of which appears plausible, but the correctness of which depends entirely upon the care exercised in the selection of risks. It is undeniable that the members are continually growing older and their expectancy of life is decreasing in the same ratio; and with this increase in age comes an inevitable increase in the number of deaths and assessments. But is it necessary that the Order shall keep pace with the average individual of the present membership in his journey with time? We think not; but will it? That will depend entirely upon the age of those who leave the ranks through death and desertion, and the age of those who are admitted. To keep the assessments at the present rate, the age of the Order must be kept at its present average, which, for illustrations, we will call 36 years. In one year from this time the average will be 37 years, provided there are no changes by death, lapses or initiations. If the aggregate age of those who leave the ranks during the year equal the increased age of those who remain, the average age of the Order has not changed, provided there has been no acquisition of members.

For convenience let us take 1,000 members as a representative of the whole, at an average age of 36 years the aggregate would be 36,000 years. If 100 members are lost during the year by deaths and suspensions, that would reduce the aggregate 3,600 years, leaving 32,400 years; but to this must be added one year for each of those who remained in membership, viz.: 900, which brings the total up to 33,300 years; if we have replaced the 100 members lost with 100 new ones of an average age of 30 years we have 3,000 years to add to the above aggregate, which brings the total to 36,300, an increase in the general average of less than one-third of a year; but suppose the average age of the 100 new members was 40 years, we then have 4,000 years to add to 33,300—37,300, giving an average age of 37.3 for the 1,000 members.

We cannot keep the age of the individual members from increasing, but we can keep the Order from aging rapidly by selecting young risks.

The age of an Order may increase much more rapidly than shown by our illustration, and may also by good management be greatly retarded. The answer to our question is, by selecting sound young risks.

Following the above, and intimately connected therewith is the question, are young men attracted or repelled by our beneficiary system? Are we competing on an equality with other Orders? Brethren, let us lay aside our prejudices and seek that which will be for the general good.—*Fraternal Censor.*

A SPECIAL effort is to be made in Kansas for the setting aside of that State as a separate beneficiary jurisdiction. W. A. Cooper, Grand Recorder, has issued a circular calling the members of that State to redouble their efforts for the purpose of gaining this desired end. There are now 1,500 M. W. in good standing in Kansas, and it would seem that with a little exertion on the part of members, she would soon be able to go alone. The Grand Recorder issues some excellent instructions to Lodges, and we are convinced from reading them it will not be his fault if Kansas as a separate beneficiary jurisdiction will not be soon an assured fact.

A Terrible Responsibility.

Tens of thousands of men whose labor is their only capital, who regard themselves as good citizens, and kind husbands and fathers, continue year after year without the least provision being made for the support of their wives and children in the event of death, leaving these children fatherless. The warnings that are daily presented of unexpected deaths, and destitute families, awakens no apprehension in their minds; health and home comforts are present, and death and destitution appear very distant. They do not regard the fearful lessons taught by the almshouse, the brothels, the criminal courts and all the attendant misery and crime; that poverty and despair could ever drive those beloved ones to a life of shame and crime, to the prison or almshouse, is too improbable for their belief; yet it is the history of thousands whose homes were once as happy whose prospects were just as bright. Present these possibilities to the uninsured man and he will tell you he cannot afford to insure; but each day he can afford to use five or ten cents' worth of cigars or tobacco or possibly take a glass of lager and invite a friend to drink with him, or if in a city he rides to and from his business on the street car, when the walk would oftener be beneficial than otherwise, and five cents per day in the A. O. U. W. would give him an insurance of $2,000 and five cents more would give him $2,000 more insurance in the E. O. M. A. and the income from this sum aided by the exertions of the widowed mother would keep want from the home, and educate their children that they may grow up and honor their father's name and bless his memory.

There are others, economical and well meaning, but short sighted, they cannot afford to insure for they are saving to pay for a home; but death overtakes them before the home is paid for, and by the process of law, under cover of a mortgage, the widow and helpless little ones are left homeless and penniless. A trifle less per year paid on the home would have paid for sufficient insurance to have saved the home, with a possible balance on which to live until other means of support had been found. The good citizen, the wise man, the true husband and loving father, will insure his life for those dependent upon him.—*Propagator.*

The Pacific States Watchman.

A. O. U. W. HOME Paper

Of the Pacific Coast.

This pioneer journal was started when our present Order was feeble in infancy, and has ever espoused its highest interest. With no uncertain voice has it battled against the enemies of our organization and furnished encouragement and nourished the strength of both weak and strong in the ranks of our fraternity in both flush and critica times.

It is now edited and managed by those whose hearts and hands are steadily and faithfully bound to the highest good of the Order. Its publishers have been successfully established in newspaper business on this coast for over 20 years. Long experience in their profession and chosen business, together with other rare and powerful advantages, enables them to issue regularly one of the most ably written, handsomely illustrated and faithful and reliably conducted newspapers in the United States.

It is a creditable representative of the A. O. U. W.
Its price is very reasonable for so good a paper.
Every Workman should take it,
Read it and proclaim its merits,
And show it to his neighbors.
It will influence worthy candidates for membership.
It will keep members better advised in our work,
And ensure greater benefits for each and all.
It is recommended by the Grand Lodge
And highly commended by its many readers.
Send for it, a trial is not expensive.

EDITORIAL OPINIONS.

AMONG our most valued exchanges, we number the PACIFIC STATES WATCHMAN, published at San Francisco, in the interests of the A. O. U. W., of California. It is a high-toned and well-conducted paper, full of good selections of miscellaneous matter, and well-written editorials, together with general and local Lodge news.—*Royal Arcanum Journal, Wooster, Ohio.*

AN ably edited paper, published semi-monthly and devoted to promulgating the principles of this, the most eminently successful organization of this active and energetic age.—*Lower Lake Bulletin.*

THE PACIFIC STATES WATCHMAN is golden, and glitters with interesting reading.—*Illinois Foreman.*

By extending our subscription list, our patrons will furnish the "stimulus" for improving the WATCHMAN and widen its power and good influence.

Subscriptions received at the rate of $2 a year in advance. Sample copies sent free to those who wish to assist in extending its circulation. Address

WATCHMAN PUBLISHING CO.,
No. 202 Sansome St., S. F.

RECORDERS of all A. O. U. W. Lodges are requested to correspond often for our columns, and to call attention to the WATCHMAN in open Lodge and to individual members at any time. Also (in places where we have no agents) obtain subscriptions at the rate of $2 a year, forwarding the cash and names weekly as fast as taken. We will pay liberal commissions for time and services rendered.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

Aims, Objects and Regulations of the Ancient Order of United Workmen.

The Ancient Order of United Workmen is a general organization for the mutual benefit of its members and their families. It embraces in its membership of every vocation, profession and occupation—employers and employees—workers of all classes, whether their labor be mental or physical. It has no connection with any religious sect, political party, or organization for affecting the prices of labor or commodities, but is designed to promote fraternity, mental and social improvement, and mutual assistance.

BENEFICIARY FUND.

The most distinctive feature of the Order is what is designated as the Beneficiary Fund—a carefully-devised, well-guarded, economical and beneficial system, by means of which the sum of

TWO THOUSAND DOLLARS

Is secured to each member's family, or such person or persons as he may choose to designate. During the several years since the Order has been established this sum has been promptly paid in full in each case of death, to the persons entitled to receive it, within a few weeks, and without any litigation or troublesome formalities. A careful examination of the working of the system will satisfy any intelligent person that such will continue to be the case.

HOW ASSESSMENTS ARE PAID.

Each person who becomes a member of the Order pays to the Receiver of his Lodge one dollar for the Beneficiary Fund. Every Lodge has on hand, at the beginning of the month, ready for a call, one dollar of Beneficiary Fund for each member. When a death occurs, if there is a sufficient amount of the Fund in the Supreme Lodge to meet the required payment of $2,000, no call is made upon the Subordinate Lodges, but if there is not a sufficient surplus from the last assessment, then the Lodges are notified at the first of the month to forward their portion of the Fund on hand ($1 for each member), and an assessment is made to replace the amount forwarded. By this means the Beneficiary Fund of the Lodge is again replenished, ready for a call at the first of the next month, if it should be made. Assessments are only made on the members at the first meeting night in each month, and a written and printed notice is sent to each member, bearing date of such meeting night. Twenty days time is given from that date to meet the payment. Thus the payments are made at such intervals, and are called for in such manner that they may be easily provided for and met without inconvenience even by persons of small income.

HOW MUCH DOES IT COST?

In the first year of the working of the Supreme Lodge (1873-4), the number of assessments made upon the members of the Lodges directly under its jurisdiction, was 20; second year, 14; third year, 15; fourth year, 15; fifth year, 14; sixth year, 16. The average cost to each member, therefore, has been $15.66 per year; or, leaving out the first year, the average has been $14 80, being a li tle more than four cents per day as the cost of a completely-secured guarantee of $2,000, to be paid on the death of a member. Can any man who is in circumstances to avail himself of this system be justifiable in neglecting to give to his family the security which it affords? Does not prudence and affection dictate that he should secure for them the protection thus offered? A number of States, having over 2,000 members in each, collect and disburse the Beneficiary Fund separately through their Grand Lodges, instead of through the Supreme Lodge. In these, the cost per year has been, in some cases less and in others greater than that given above, but the average has been about the same.

California was set apart as a separate Beneficiary Jurisdiction in July, 1878, and at the end of July, 1879, had levied and collected ten assessments for deaths occurring in the State, and for the months of August and September three more, making a total for 14 months of 13 assessments, or an average of a little less than 93 cents a month for each member.

ADVANTAGES OF THE SYSTEM.

The A. O. U. W. Beneficial system is simple, easily understood, economical in its workings, and in all its details comes under the direct observation and care of the members who meet weekly in their Lodges, where the business is transacted, and where they enjoy the advantages of social and fraternal intercourse, and of mental improvement. These Lodges are governed by officers regularly elected by the members—the financial affairs are under the proper guards and restrictions, and a careful system of checks prevents fraud or betrayal of trust.

PROTECTION AT NET COST.

All money paid on assessments for the Beneficiary Fund goes to the payment of death benefits without reduction even for expenses, these being provided for out of a General Fund raised in each Lodge. This fund is made up from initiation fees (usually about $10 for each member, with sometimes an advanced rate, according to age), and weekly dues of not less than 25 cents per month. The advantage which each member derives from the social, fraternal and educational features of the Order, and the good which is accomplished by it in these respects, afford a more than ample return for the sum he pays into the General Fund, which meets all the expenses of the Order, leaving the entire Beneficiary Fund intact for the beneficent purpose for which it is intended. There are no commissions, fees or salaries to be paid out of it, but the entire amount paid in goes to the widows, orphans and other heirs of deceased brethren. Thus the Beneficiary system may be fairly said to be carried on absolutely without any working expenses, and, at the same time, to be more closely under the observation of those interested in it, and more carefully guarded than any other method adopted for similar purposes.

REQUIREMENTS FOR ADMISSION.

A medical examination is required under such rules as are generally adopted by life insurance companies The character of the applicant must also be investigated, and the Lodge pass upon his application by ballot. Persons between the ages of 21 and 50 only are admitted.

BENEFITS OF SICK OR DISABLED MEMBERS.

The payment of weekly sick benefits to members is a matter left to the control of each Subordinate Lodge. Some provide in their By-Laws for such benefits—others do not. If sick benefits are to be paid, the initiation fees and weekly dues are fixed at an amount sufficient to cover the expense—each Lodge having the power to fix the fees and dues at such sums (not below $10 for initiation and degrees, and $2 for Beneficiary Fund and certificate, and 25 cents per month for dues) as may be determined upon.

GENERAL FEATURES OF THE ORDER.

The A. O. U. W. is a secret Order, having two degrees, with appropriate initiation ceremonies. These are simple, but impressive. The teachings are calculated to strengthen the character and elevate the moral principles of the members.

The Order is composed of Subordinate Lodges, Grand Lodges and a Supreme Lodge. Subordinate Lodges in States or Territories where no Grand Lodge has been established, are under the immediate jurisdiction of and report to the Supreme Lodge, until a Grand Lodge is established.

When a Grand Lodge has over 2,000 members under its jurisdiction, it can be set apart as a separate Beneficiary district if desired. In this case the members are assessed for the deaths which occur within such district or jurisdiction, and the Grand Lodge collects the assessments and pays the death benefits under the laws and regulations adopted by the Supreme Lodge. The Grand Lodges of Pennsylvania, New York, Illinois, Iowa, Missouri, Minnesota, Tennessee, Indiana, Michigan, California and Wisconsin, have been thus set apart as to the Beneficiary Fund. In all other respects they remain integral parts of the Order.

PROGRESS OF THE ORDER.

The A. O. U. W. was started in Pennsylvania in 1868, but was not sufficiently established to pay the $2,000 benefit until 1873, from which time up to the 1st of January, 1879, the Grand Lodge of that State alone has paid over $400,000 of Beneficiary Fund.

The Supreme Lodge, up to March, 1879, had paid out $438,056.90 on deaths of members of Lodges under its immediate jurisdiction. The amount p id by the Order during the year 1879, was $639,979.90, making an aggregate of over

ONE AND ONE-HALF MILLION OF DOLLARS

Already paid to the widows or heirs of deceased members of the Order.

The membership reported on the first of March, 1879, was 62,993, with Grand Lodges established in the State of Pennsylvania, Ohio, Kentucky, Indiana, Iowa, New York, Illinois, Missouri, Minnesota, Wisconsin, Tennessee, Michigan, California, Georgia, Kansas, Ontario (Canada), Oregon and Washington Territories, Massachusetts, and Subordinate Lodges in a number of other States. In all these States the Order is steadily and rapidly growing. With the increase already since the above date, it is safe to say that before the close of the year 1881 it will number over 100,000 members.

The Order was founded by a few earnest, honest men, for fraternal and beneficent purposes. Its sphere of usefulness has been enlarged, and it has been faithfully conducted as its founders designed it to be—not to subserve the selfish interest of a few, but for the mutual benefit of all. Thoughtful and prudent men join it because they can thus provide, without present embarrassment, for the contingencies arising from the uncertainties of life, and at the same time aid each other in mutual improvement and the elevation of humanity.

FORMATION OF NEW LODGES.

Any ten or more persons having the prescribed qualifications and complying with the requirements of the Order, may become organized and receive a charter for a Subordinate Lodge. If residing in a State, District or Territory under the immediate jurisdiction of the Supreme Lodge, application should be made to the Supreme Recorder or a Deputy S. M. W. for information as to the course to be pursued. If residing in a State in which a Grand Lodge has been established, the application should be made to the Grand Recorder of such Grand Lodge. In the formation of a new Lodge the proper officer has power to grant a dispensation to reduce the fees of charter members to $5 for the degrees, but the other fees remain the same as for old members, and this privilege may be extended for a period of 30 days. The cost of supplies, and institution fee of Deputy to a Lodge is $100, to be paid at time of institution. Fifty dollars go to the Grand Lodge. At the minimum fee for degrees it takes just what 20 members pay into the Lodge to meet the cost of institution. There is in addition the cost of a medical examination for each member.

THE ORDER IN CALIFORNIA.

The Order was introduced into this State by Horace G. Pratt, Deputy S. M. W., who organized California Lodge, No. 1, in West Oakland, Aug. 21, 1875. He also organized Nos. 2, 3, 6 and 7 in Oakland; Nos. 4, 8 and 9 in San Francisco; No. 5 in Alameda; No. 10 in Berkeley, and finally the Grand Lodge of California on Nov. 13, 1877. There were then but 355 members in the Jurisdiction. On Jan. 1, 1879, the membership had swollen to 4,263, which was increased to 6,286 on Aug. 1, 1879. These figures include only M. W. degree members in good standing at the dates given. The pecuniary interest involved in the Order in California alone, is over $22,000,000, and this at a yearly cost to the membership of less than the taxes on so much value of property if it had been given them free. The widows and orphans are our beneficiaries. We snatch them from the jaws of poverty and make them more comfortable and independent pecuniarily, than the average citizen of this or any other country. Is it any wonder then that the success of the Order is without parallel in the history of fraternal organizations.

Further information cheerfully given by applying to H. G. PRATT, Grand Recorder, S. F., Cal.

Saved by Redemption.

With bowed head and folded arms, Clinton Roberts paced the length of the library, not once resting from his aimless tramp. Three hours had he thus spent without heed of the passing time. Wrapped in deep meditation, he did not hear the soft, light step of his wife, and not until her small white hand was laid upon his arm, and her sweet voice called his name, did he arouse from his reverie.

"What do you wish, Mary?"

"There are friends in the parlor waiting to see you, I did not know you were home until I heard your step over my head. You must have come home some time ago, as it is growing dark, and long past our dinner hour."

"Mary, you will please excuse me to my friends. I do not feel well to-night, and cannot see anyone."

"Why, Clinton, the fire is quite out, and your hands are very cold," said Mrs. Roberts, as she clasped his hand tenderly in her own. "Come down in the sitting room; we have a bright fire, and when you have partaken of a hot cup of coffee, you will feel better."

"No, Mary, I do not wish coffee to-night. As for fire, I did not know it had gone out. Send Henry up with kindling and coal; I dare say I shall soon feel better; I only wish quiet; I shall retire soon; do not let my indisposition trouble you in the least."

Quite well she knew her husband's disposition. It would not do to pry into his secret, if he had a secret; he was not in a habit of making a confidant of his wife in his business affairs. That there wes something wrong, Mary Roberts was sure. When the curtains of night were thrown back, giving all nature the light of day, she arose from her couch unrefreshed and ill at ease.

Clinton Roberts was by birth an American, loyal and true as steel to his country, having served with distinction in the civil war, first as a private, and passing through various posts of service to that of first lieutenant. At the close of the war, by the advice of an old friend of his father, he accepted a position as head clerk in a wholesale house. At the age of 35 he became an honored partner in the firm. Then feeling he could support a wife with comfort if not elegance, he was married to Mary Pierce, second daughter of Leonidas Pierce, a gentleman of wealth and influence, residing in the town of L—, but a few miles distant from the city in which he, Clinton Roberts, had started in life.

Although married quite early in life, Mary Roberts still retained the bright, fresh appearance of her girlhood. The charm of her good looks lay in her cheerful disposition. In this one trait alone, her husband had, indeed, found a treasure. She was a true woman in the widest sense of the phrase. While justly proud of her personal appearance, polished manners, and varied accomplishments, Mr. Roberts was not a demonstrative man, and did not often make known the great love he bore his wife. He had a mistaken idea (I am sorry to say it is one that prevails in the over-wise heads of more than one husband), that it was useless to make a business confidant of his wife. It was much better to keep these affairs strictly to himself. In this one thing Clinton Roberts was wrong, as he found out at no distant day, not to his sorrow, but to his astonishment and gratitude.

We will now return to the point in our story where we left off so abruptly.

— ——

After Mary Roberts had bathed her tired eyes and completed her morning toilet, she gave a few moments to the awakened children, soothing their fretfullness into quiet obedience by her soft low voice; taking each by the hand she led them to the dining room, where a tempting breakfast awaited them. After a refreshing cup of coffee, Mrs. Roberts left the little ones in care of the maid. With sad foreboding she returned to the chamber where she had left her husband the night before. What was her astonishment to find him gone. With a throbbing heart and faltering footstep, she descended to the parlor hoping to find some clue to his absence. As she turned from the room disappointed, her eye caught sight of a slip of paper pinned to the table cover, addressed to herself. There was but very little satisfaction given in the note—briefly stating that he had gone away on business, and would return on the night train.

There is scarcely any need to picture the troubled heart of Mary Roberts. She devotedly loved her husband, and did not dare to think wrong of him—nay, she would not. Perhaps, she thought, he had had trouble in his business affairs of which she knew nothing; that he would tell her all about it when he returned; he would do justice in this case at least. Thus she reasoned hour after hour through the winter's day.

"Thank God for this short day," she murmured; "I could not stand it many hours more."

The evening passed away in agony of suspense. "At last, oh! at last!" said she, when the well-known step, with its quick, sharp tread sounded along the garden path. A click of the night latch, and Clinton Roberts had returned. Mrs. Roberts opened the door of the sitting room, and reached forth her hand as he came into the room. He did not speak; only clasped her hand with a tender pressure. The night was intensely cold. Throwing aside his overcoat, hat and gloves he sank into a chair in front of the fire and buried his head in his hands, his form shaking with suppressed emotion.

"Clinton, what is it that troubles you?" asked Mrs. R., as she rested her soft, fair hands upon the broad shoulders of her husband.

"Nothing, Mary, that you can help."

"Surely you can at least give me your confidence in this case. I may be able to help you." As she spoke she drew near to her husband's side.

"Mary, the time has come—yes, too soon—when you must know what a rascal I am, and how unworthy I am of even your respect. Nay, do not leave my side; while I have the courage I will tell you—to night!" Then rising from his chair, Clinton Roberts paced the length of the room restlessly in silence for a moment; then resuming his chair, and drawing another close by, he made his wife sit near him.

Mary Roberts sat down with ill-concealed emotion. The sight of the pallid face of her husband, and anticipation of what was to come, deprived her of her usual self-possession.

"Mary, I know you thought strange of my conduct last night. First, I must ask your forgiveness for the wrong I did you in leaving you alone as I did, to suffer as you must have done to-day. When you know the full extent of my sin, you will not blame me for my absence. It is just four months ago to-day I invested a large amount of money, which I borrowed from a friend, giving mortgage on my interest in the firm of which I am a partner. This money I invested in a speculation, the failure of which it is not necessary to particularize. I had great hopes of this thing, and expected to realize a great deal of money. Day before yesterday I was apprised of the failure of the investment, and to-day, unless some unforeseen hand interposes to save me from utter ruin, I am a beggar. Hush, Mary!" continued he, as his wife was about to speak; "I have not told you all yet. Like a thunderbolt came the thought, there is a way out of this. I can use the amount I need from the treasury of the Ancient Order of United Workmen, and replace it before it will be needed. I was elected Treasurer of the Order only a few weeks ago; I have the confidence of the entire brotherhood; no man stands higher in the estimation of his fellow-men than I do. That was why I could not stay at home yesterday. I would not trust myself; the temptation was so strong upon me to do this great wrong, even if it were possible to return it before any one learned of the action. But if I failed to do so, dishonor would fall upon me; I would be expelled from the Order as one not worthy to be called brother. Believe me, Mary, when I tell you that this dread possibility, and your sweet face, together with the thought of my children, saved me; yet my conscience still brands me a weak man for having given even a passing thought to such a crime. To-morrow's sun will proclaim to the world my fallen fortune. It is not on my own account I grieve; It is for you, Mary, and the children."

"What is the amount of indebtedness, Clinton?"

"Three thousand dollars," said Mr. Roberts.

"Listen, Clinton, a moment;" and the flush of excitement glowed upon the usually pale cheeks. "I want you to thank God on bended knee to-night for the impulse that prompted you to confide in me. Oh! Clinton; do you know that I can help you; that I can save you from ruin; that I have the means to pay this debt?"

"How is it, my dear, that you are able to place at my disposal a sum so great?"

"When we were first married, you said you would give me an allowance each week sufficient to pay all household expenses. I realized at once that it was much more than I should need, but did not think it worth while to acquaint you of the fact. I wished to surprise you some time with a bank account. Little did I think at that time it would be the means of saving you from disgrace."

"O my good wife! I cannot sufficiently thank you for this. I do indeed ask your pardon for not taking you into my confidence long ago. I have always thought the affairs of business beyond the comprehension of women; but I find in you a worthy partner in all that may concern me in the future. But for you I would stand to-day bankrupt if not dishonored. And how terrible is the thought of my unfitness to fill the honorable position of Treasurer in the Ancient Order of United Workmen! I feel that I ought to resign my office."

Again Clinton Roberts bowed his head upon his hands, and this time tears fell thick and fast, moving to pity the heart that had loved this man above all others.

"Clinton, it can do no good to thus give way. To me you do not owe thanks; but to God, the giver of every good and precious gift. You have sinned only in thought, not in deed. The evil you might have done does not make it a reality; let this console you. Your past record is pure; live in the future so that your record may be to your children not a terror, but a sweet and lasting memory."

We drop the curtain here. There are some things in life too sacred to even touch upon.—*Mrs. K. M. in National Bulletin.*

THE COURSE OF A LIGHTNING FLASH.—Prof. Tait, of Edinburgh, insists that when people think they see a lightning flash go upward or downward they must be mistaken. The duration of a lightning flash is less than the millionth part of a second, and the eye cannot possibly follow movements of such extraordinary rapidity. The origin of the mistake seems, he says, to be a subjective one, viz., that the central parts of the retina are more sensitive, by practice, than the rest, and therefore that the portion of the flash which is seen directly affects the brain sooner than the rest. Hence a spectator looking toward either end of the flash very naturally fancies that end to be its starting point.

Workmen's Guarantee Fund Association.

Admission fee, $3; Annual dues, $2. The object of this Association is to afford additional protection of $1,000 to all Master Workmen in good standing of the A. O. U. W. The average cost, including assessments, will be about $8 per year, or less than 20 cts. a week. For further particulars address, or apply to the Secretary, at the office, No. 38 St. Ann's Building, San Francisco, Cal.

WM. H. JORDAN (Past Grand Master), PRES'T.
E. M. READING, Sec'y.

PALMER'S,

No. 730 Market Street, S. F

The best place in the city for gloves, fans, toilet articles, perfumery, ladies' cotton and merino underwear.

For fine goods at the very lowest prices go to Palmer's, 730 Market street.

FURNITURE.

New and second-hand at auction prices, at H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

CORRESPOND for the WATCHMAN.—Read, under "Good of the Order," all local notices of your own and neighboring Lodges.

Masonic News.

An exchange has this item: "The reason why, in the E. A. Degree, the apron is dominated 'a badge more ancient than the Golden Fleece or Roman Eagle, and more honorable than the Star and Garter,' etc., is that the Jewish priesthood wore an apron composed of the three Masonic colors—blue, scarlet and purple; and the prophets on all occasions of moment clothed themselves with a girdle or apron. All the ancient statutes of the heathen gods were similarly attired."

The following is an account from the *Chaine d'Union* of the alleged initiation of a female in the Lodge Fraternitad Iberica, No. 90, at Madrid, Spain, on the 14th of June: "An illustrious lady belonging by birth and possessions to the Austro-Hungarian nobility, and by ties to Spain, was the candidate. There were 79 brethren present, from many Lodges, and among them some Americans. She was dressed in a white robe of great richness, her figure of great beauty, inspiring sympathy and respect. After she had received the light between the columns, the Master descended and conducted her to the altar, where she renewed her obligation. The arch of steel was formed, and all the brethren present threw flowers in her path. She was then invested with a pretty apron of white silk, bordered with gold, in the middle of which was printed the insignia of Masonry." In commenting upon the above relation of asserted facts, the venerable *Keystone* says: "French Masonry and Spanish Masonry seem to be much alike in their dissimilarity to all pure Freemasonry."

It has long been known that there are traces in China of Freemasonry. Bro. Herbert A. Giles, in his recently published "Freemasonry in China," quotes several statements of the Chinese ancient bodies, which have a Masonic character about them. At No. 33 Golden Square, London, is a figure of Confucius, wearing a "square" and an "apron," and a very fine square of "Jude," which must be very old indeed. We have always understood that the "Triad" Order was Masonic, but being a secret society now, and forbidden by the government, and some say "political," as favoring the "Ming Dynasty," it has never yet been proved whether European Masonry has any connection or identity with it. Bro. Giles evidently thinks not, but we confess we do not, as yet, see that his reasons are altogether good, nor his facts clear on that point. We should like the trial to be made, if possible, in order to ascertain if there be the slightest connection now, or if the "Triad Society," which is Masonic in its organization, and even in its catechisms (as far as known), is a portion of the great wide-world Masonic Fraternity, or has drifted into what Oliver calls "spurious Freemasonry." The question is a most interesting one, *per se*, and in its relation to and bearing upon other complex and moot points. Bro. Giles is W. M. of Ionic Lodge, No. 1781, of Amoy, China.—*London Freemason.*

At the battle of Corunna (says a correspondent of the *Freemason*), fought in 1809, an English officer was badly wounded in the leg, and left on the battle-field. The next morning one of the enemy's pickets fired at him three times in succession, but, in consequence of a defect in the flint, the gun was not discharged. The man was in the act of manipulating the flint, in order to make it "bite" (I believe that is the correct term), when the officer made a certain sign, by which he was at once recognized as a Mason. His assailant communicated with his commanding officer, himself a Mason, and by his orders the wounded officer was conveyed to excellent quarters, and, although exceeding faint and prostrate from loss of blood, he underwent the operation of amputation, and received such careful and skillful treatment that he perfectly recovered. When an exchange of prisoners took place he was restored to his country, and became the father of a family. One of his sons, Bro. J. Bennet, P. M., Anchor and Hope Lodge, No. 234, has in his possession his father's medal; and I have his authority for recording another instance of the utility of Masonry in saving life on the battle-field, where, ordinarily, little respect is paid to persons, and where the *coupe de grace* is administered to suffering humanity with as little ceremony as would be observed in slaughtering a mad dog or any other quadruped.

Masonry in Germany.

Masonry has flourished in Germany, in some form, for a time whereof the memory of man runneth not to the contrary; but it revived in its present form of government about the year 1738, under a charter which brought in the members of independent Lodges, or those transient Brethren which seemed to be without rule, and were liable to mistake the landmarks; and they made there submission to those rules that are so wholesome for government and so preservative of order.

There is something in Freemasonry that seems admirably adapted to what I understand to be the proclivity of the German mind. Its deep mysteries would awaken the natural keenness of interest—the thirst for the marvelous that distinguish the German; and the constant pursuit of the object thus concealed by the veil of mystery would be most consistent with the unbending energy of the German character. The science hidden beneath its forms would find willing students among a people with whom the arts and sciences of old are common themes, and who have redeemed, from the darkness and waste of past centuries, the glories and triumph of the best days of Egypt and of Greece.

The principal of special regard, which binds the Masonic Fraternity, suits the high sense of honor that chivalric Germany entertained; and it was consistent with the sense of vested rights, that there should be a ready acknowledgment of an unknown claim upon his sympathies, which should make his enlarged charity a matter of astonishment to the uninitiated. Feudal power, too, seemed to create the convenience of Masonic forms for others than Masons; but we may suppose that, though Masonry was shared by others than the architects and their assistants, yet its principles were never prostituted to political purposes, or its mysteries used to clothe the language or veil the conduct of traitors to a government.

Freemasonry, in its primary uses, must have found a genial home and profitable exercise in Germany, where gigantic architecture was imposed by the warlike necessities of the country, and where every mountain and elevated point—every river's bend and every naked rock—was crowned with impregnable castles, which only genius of extraordinary kind could have planned, and only combined talents and united force could have accomplished. Peak answers to peak along the bold profile of interior Germany; and castle to castle forms a baronial grandeur; and, though the archer who drew his bow from the battlement has mouldered into indiscriminate dust on the waste of the rocky floor, and the later cannon that breathed its thunder from the embrasures of the fortresses has lost its voices, yet the spirit of Freemasonry is there; it has set its mark on every rock that looks gray in its Ehrenbretztein, and its record will be found when time shall expose the corner-stone on which the Craft poured their libation and set their seal.

Yes, brethren; you, who may have stood in the shadow of these remnants of other days, these defenses against foreign aggressions or domestic revenge, can tell what was the organization of the brethren when such things rose by their united force. You, who in crowded cities on the Continent have seen the solemn cathedral rear its lofty towers, and its thick walls grown gray with the rust of ages; you, who have seen the chiseled form of saints, or the nicely sculptured pillars that decorate the lofty interior of these sanctuaries, have stood in the influence of that Masonic power which, though exercised for building thousands of years before, has never been withdrawn from its favorite haunts, and has mingled with the genius of the place, until religious impressions have been united with that, and the heart has bowed down to the union of Masonry and religion.

Masonry, then, in its practical form, found a home, an active home, and a rich harvest of labor in Germany; and she set her seal upon every hill and mountain throughout the length and breadth of that land of science and song—and when laying aside the gavel and the trowel, she assumed her speculative shape, she had a home in the breast of the chivalry of that land, and multiplied her abiding places by warming the hearts of the great and good of every class.

The progress of Freemasonry was so rapid, and the society was so exclusive in Germany, that government became jealous of its operations; not the less, perhaps, as certain political demagogues conspired, under the name of Lodges, to do mischief to the rulers, and thence to bring discredit on our Craft; and hence the Emperor, in December, 1785, put forth an imperial edict, allowing all privileges to Freemasonry, provided they would make known the existence of their Lodges, and the names of the officers and members of the same. This edict, while it gave security to the government against the machinations of designing men, served much to aid the true intentions of the worthy of our Craft, separating them from the spurious and the hypocritical, and throwing around the good the protecting shield of a powerful and jealous government.

It is not strange, therefore, that the brethren readily accepted the conditions of the edict, and placed themselves on good terms with the powers whom they were bound to obey.

It is true that, on examining the edict, the brethren found occasion to remonstrate against two words, which the author had used to express our truly Masonic terms of ART and MYSTERY. These most expressive words were rendered by the offensive epithets of *Gauckelei* and *Geldschneiderei*—words which I need not tell this audience were anything but agreeable to the German brotherhood, who scorned *Gauckelei*, as unworthy the sacred mysteries of this admirable fraternity, and who, by their bond of obligation, were above the *Geldschneiderei*, which the emperor wrongly imputed.

The fraternity of Freemasonry have lived down these imputations in Germany, and by its excellent arrangements and abundant philanthrophy, has shown that the toleration granted by the Emperor was eminently deserved.—*J. R. Chandler, late P. G. M., in Keystone.*

The average cost for $1,200 insurance in the Masonic Relief Association of Clayton, Ill., has been $18.45.

The eminent Masonic writer, Jacob Norton, in a recent issue of the *Masonic Index*, says the only difference between the Memphis and Scotch rites is that one cheats a brother out of $10, and the other palms off an equally worthless commodity for one hundred or more dollars.

I. O. O. F. Gleanings.

New York has 37 Past Grand Masters living in the Order, and two in a state of suspension.

New Hampshire has gained on an average of more than 300 members a year for the past 21 years.

The Fraternal Department in the New York *Era* is first-class. The editor, John E. Heartt, evidently understands his business.

Sending new representatives every year to the Sovereign Grand Lodge may aid in gratifying the ambitious pride of individuals; but it is bad for legislation.—*Courier.*

The extension of American Odd Fellowship to Europe was an error, and the subsequent efforts for its spread on that continent are void of success.—*Review.*

Of the 29 amendments to the Constitution of the Sovereign Grand Lodge called up at the last session, 28 were either lost, indefinitely postponed or laid over—*only one adopted.*

Any person having any knowledge of the death of J. R. Heltzel, a member of the I. O. O. F., who is supposed to have died near Animas Forks, Colorado, in the latter part of August last; or (if still living) having any knowledge of his whereabouts, or of one J. D. Brunson, his companion, will confer a lasting obligation upon the wife, the mother of three small children, by conferring with Charles S. Robinson, Secretary of Clinton Lodge, No. 169, I. O. O. F., Clinton, Missouri.

Honoring Worthy Officers.

We have always been in favor of honoring worthy officers who devote their attention and time to the interests of the Order and the Brethren without any hope of fee or reward. When a Brother serves the Order for years, takes a pride in its welfare and is faithful to his trusts, he should, when retiring from the active labors of office, receive some token that he has been a good servant. The laborer is always worthy of his hire, and those who labor for nothing should not be forgotten. It has been said that the honors of the position should be sufficient pay for the services rendered; but with this we do not agree. It is certainly an honor for a Brother to receive at the hands of his Brother Odd Fellows the election to a high office; but the honors not only call for a large share of the chosen Brother's time, but often also a large expenditure of money. When a Brother is selected to be the Grand Master of an Order, like the Odd Fellows of the State of New York, the members of the Order are very likely to exact from him more than he can, in justice to his family, at times afford. If these exactions are cheerfully complied with, and both time and money expended in the interests of the Order, it is but right that the Brethren thus benefited should manifest their appreciation in some more tangible form than by the mere passage of a few resolutions of thanks, which are entered on the minutes, and perhaps never after heard of unless some antiquarian should dig them out.—*N. Y. Courier.*

How to Increase the Interest of Lodge Meetings.

Experience teaches me that members of the Order must be kept interested in duties that will lead them into harmonious labors. It will not do to let new members come into dead Lodges, where they will go to sleep, as if listening to a long, prosy sermon. There must be something to attract attention, or the spirit will soon begin to flag. The question is, how can this be done? How can members be made to feel sufficient interest in the work of the Order to bring them steadily into their Lodges every meeting night? Perfection in the work is necessary to give confidence to the initiate, and make him hunger for information. The *New Work* will afford a wide field for the play of imagination, in thrilling explanation and contrast. Advantage should be taken of this fact to impress upon the mind the great importance of being perfect in the work. In a Lodge, when at work, this cannot be properly done. There the text of the work must be properly observed; there is no chance for explanation of the whys and wherefores; but if the member understands the minutia of initiation and degress, every word and every motion will be expressed on his mind. Each will watch the other to see if every word is used at the proper time and in its proper place, so that they will be able to correct each other and thus perfect themselves. How, then, can it be done, if not in a Lodge, and during the work? This question I propose to answer. First, let the Grand Lodge pass resolutions, urging frequent lectures before audiences entitled to hear the explanation of the work. Then let each Lodge select a Brother to lecture and explain the initiation and general principles of the Order, to which all members should be invited, of course, taking precaution to know they are all entitled to be present before commencing the lecture. Then have another selected to lecture on the work of the first degree, showing plainly the forms and teachings, with the uses, so as to impress upon the mind its necessity and importance, exemplifying by contrast, inference and imagery all that pertains to that degree, omitting nothing that would leave mystery to the understanding. Let every word, sentence and motion be made so plain that the most common mind will comprehend its use and meaning, and be able to impart the information to others. And so on with the second and third degrees; making the initiate fully understand what has been taught him before he can receive the first degree. Then let the work of the first be well understood before the second degree is conferred; and examine the candidate in all his prior work before he gets the third degree. In this way an interest will be created and kept up so that the members will take pride in becoming perfect in the work of the Order. I have often seen degrees conferred on intelligent men in such a bungling manner that it produced no other feeling than one of disgust, so much so that many have never returned for further information. Sensible men must know the reason for every lecture, charge or motion; to which they are certainly entitled, for nothing should be required without reasons given for their introduction and use, and particularly so it is to be expected in the *New Work.—Gen. A. M. Winn in New Age.*

Odd Fellowship.

We find the following address reported in the Brooklyn *Review*, delivered before the members of Ivanhoe Lodge, No. 127, Brooklyn, by Edgar Whitlock, P. G.:

To-night we celebrate the beginning of the thirty-third year of the existence of Ivanhoe Lodge, No. 127, of the Independent Order of Odd Fellows. As you are enjoying the hospitalities of this Lodge, it might be deemed egotistic to sing its praises. No objection, however, can reasonably be made to a few remarks upon that great and beneficent Order of which it forms a component part. Originating with a handful of devoted adherents, so few in number as to be insignificant, but so steadfast in purpose as to be invincible, our Order has grown through over sixty years of existence, until it has long since ceased to be an experiment, and has become an accomplished fact. Born within the limits of a single room, its ambitions and its influence are to-day only bounded by the globe itself. Steadily and surely it has won its way, and now stands forth before the world, presenting its works and its purposes as an earnest of its worth. It desires the approbation and fellowship of the community, but is as independent of that approbation, by reason of its great strength and prosperity, as any human and secular organization can ever be. No longer does the Order need to truckle to the ignorant prejudices of mankind. It can stand unwaveringly in the defense and support of those great truths and principles which it inculcates, with the full consciousness that they must ultimately prevail. As the Order was democratic in its origin, so it has continued to be democratic in its prosperity. It is emphatically an Order "of the people" and "for the people." It is our maxim that in the Lodge-room all men meet upon one common level, unaffected by conditions of sect, creed, nationality, or the artificial distinction of society. It therefore appeals to all fair-minded citizens, to all who believe that

> "Rank is but the guinea stamp,
> A man's a man for all that,"

for sympathy and support. To the humble artisan it holds forth promises of aid in "hard times." To all, and particularly to the man who, by reason of a fair inheritance or his own endeavors, is beyond the probability of want, we offer opportunities for acquaintanceship with his fellows, for acquiring a knowledge of who and what they are, and for seeing beneath the surface of the man the throbbings of the great heart within, such as are afforded by no other organization, not even by the church itself. We don't have hired pews in Odd Fellowship, and when a worthy applicant presents himself for admission, he enters and finds that he does not need an usher to make room for him. As the old song runs,

> "We've room for all creation,
> And our banner is unfurled,
> Here's a general invitation
> To the people of the world."

You all know (unless you are entirely behind the times) that this Order is a beneficial institution; that one of its chief purposes is to give pecuniary relief to its members in those times of distress which so frequently and unfortunately overtake the great mass of humanity. Many a man in this city of Brooklyn breathes more freely to-night because he knows that in case of sickness or want, there is a fund, not only of money, but also of cordial and heartfelt sympathy, upon which he can draw for aid and assistance. Many a husband and father feels a burden removed from his mind by the consoling thought that if death should suddenly "claim him for its own," his widow and little ones would not be left entirely without means or friends. These facts are often appreciated more by the wife, even more than the husband; and it is a frequent occurrence with us to have some Odd Fellow's wife make it her especial business to pay his dues for him, and thus keep him entitled to benefits in case of need. And to convince you that our promises are not "airy nothings," I have only to tell of the $1,800,000 paid by the Order for relief during last year, of the great sum of $30,000,000 paid during the last 50 years of its existence, and of the many millions more which are stowed away in its treasuries ready to respond to the call of distress.

I must no longer dilate on all the manifold virtues of this Order of Odd Fellows. One of the poets has beautifully written:

> Birds are singing round my window,
> Tunes the sweetest ever heard;
> And I hang my cage there daily,
> But I never catch a bird.
>
> So with thoughts my brain is peopled,
> And they sing there all day long;
> But they will not fold their pinions
> In the little cage of song.

Mechanical and Scientific Progress.

It is an interesting feature of our times to note the rapid progress which has been made in manufacturing ingenuity and scientific skill in the production of substitutes for expensive or scarce raw materials and articles in general demand. It cannot be controverted that art is fast invading the domain of nature. Chemistry is enabling us to replace animal and vegetable dyes, and to form artificial gems or creditable imitations of them, which, as ornaments, answer every purpose. Mineral oils replace animal and vegetable ones for illuminating purposes, and the electric light is slowly superseding the use of noxious and costly gas. The sea tortoise no longer lures the adventurous sailors, nor are the ostriches of the desert hunted at the sacrifice of health and often of life itself. These genuine products have been so long in universal use as to become necessities of our civilization unless very similar articles can be ingeniously substituted for them.

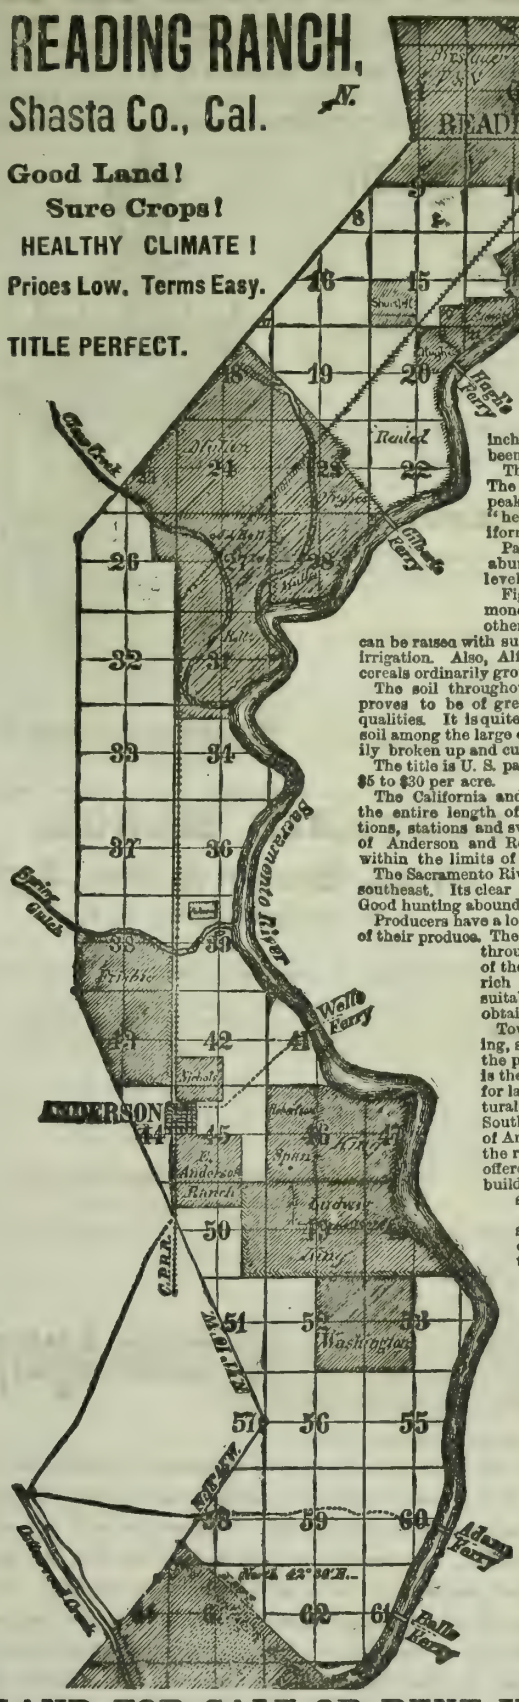
Chemistry and science have enabled us to manufacture our own tortoise shell, ivory, and feathers, without the risk of visiting wild jungles and arctic or tropic seas for our supplies. A half dozen available substitutes for whalebone are manufactured. Ivory, so extensively in use, is superseded by celluloid. Piano and organ keys, billiard balls, hand mirrors, and handles of knives and forks, are nearly all made of this ingenious chemical substitute for ivory. In the imitation of tortoise shell, it is made into combs, card cases, napkin rings, and the like; while the pink coral, so popular with jewelers and ladies, is imitated by it to perfection.

Ostrich feathers, even the court plumes of fashion, and held formerly at prices which only admitted of their use by the wealthy few, are eclipsed in beauty and durability by the ingenious hand of skilled manufacture. A compound of silk or celluloid, spun glass, and other materials is now so cunningly combined as to be equally desirable with the genuine ostrich feathers, and a very close examination is required to detect the original from the substitute. Artificial stone and marble are made to any extent, actually rivaling the originals in strength, beauty and durability. Artificial alizarine is now substituted for the natural product of madder. It is not much more than one-third the cost of madder as originally supplied from the dye-root. We might find plenty of other similar examples to impress the fact of our subject, namely, the rapid mechanical and chemical progress of the times.

THE ICE HARVEST.—Prosser creek, Boca and Camp 20 are the points at which natural ice is cut for the market below. Prosser creek is about seven miles below Truckee, where Prosser creek forms a junction with the Truckee river. Boca is about a mile and a half beyond, and Camp 20 about four miles still further down the Truckee river. These points, though considerably lower than Truckee are much colder, the thermometer at Prosser creek frequently being from 10° to 15° lower than at this point. At Boca, Wednesday morning it was 15° below zero. The low temperature of these points and the almost chemically pure water with which they are supplied, give them great advantage over any other section for the production of good marketable ice. At Prosser creek is located the works of the Summit Ice Co. At Boca the Pacific Ice Co. is located, and at Camp 20, the People's Ice Co., holds forth. The capacity of the Summit Co., is greater than either or both of the others. Mr. James McDonald is the foreman and J. B. Brogan the agent. They have had a hard fight to make this season against the snow. They have had between 60 and 100 men employed for a week scraping snow from off their immense pond.—*Truckee Republican.*

AN ENGLISH ENGINEER ON AMERICAN LOCOMOTIVES.—Mr. R. M. Brereton, C. E., writing on this subject, says: "I argue that the greater duty done by the American motor is due to the better design and the better system of working the locomotives. The American builder excels in the system of framing and counter-balancing, and in the designs of crank axles, etc., so that the engine may run remarkably easy and without jar round sharp curves, and work not only the light roads, but also diminish the wear and tear on the solid roads, and at the same time increase the effective tractive force. The English engine is a very heavy affair, and in running it not only wears and tears itself very rapidly, but also the roadway, and it greatly, by its unsteadiness and jar, fatigues the drivers and firemen. I have ridden hundreds of miles on engines in India, in England, in France, and in the United States, and I have always found the American engine most easy and comfortable, but I never did the English or the Continental engines. It is almost impossible to give these engines their full hauling power, simply because the greater portion of the weight cannot be thrown on the driving wheels."

THE POTATO BUG UTILIZED.—The long suffering and much vilified potato bug has at last vindicated his right to exist by proving his use fulness. No longer will the cheerful cochineal and mercenary madder monopolize the furnishing of the scarlet dyes that brighten our fabrics. Alongside of these aristocratic and costly pigments the lowly Colorado beetle will take his humble place, and plunging into the dyer's kettle will slowly dissolve himself into a beautiful scarlet dye. Thus shall he become precious, and the Granger, heretofore his bitterest foe, shall foster and care for him as a most precious product.



No Drouths! Sure Crops!

READING RANCH,

Shasta Co., Cal.

Good Land!
Sure Crops!
HEALTHY CLIMATE!
Prices Low. Terms Easy.

TITLE PERFECT.

The Reading Ranch, in the Upper Sacramento valley, originally embracing over 26,000 acres of choice grain, orchard and pasture land, is now offered for sale at low prices and on favorable terms of payment, in subdivisions to suit purchasers.

The ranch was selected at an early day by Major P. B. Reading, one of the largest pioneer land owners in California. It is situated on the west side of the Sacramento River and extends over 20 miles along its bank.

The average rainfall is about 30 inches per annum, and crops have never been known to fail from drouth.

The climate is healthy and desirable. The near proximity of high mountain peaks give cool nights during the "heated term" which occurs in our California summers.

Pasturage, wood and good water are abundant. The tillage land is mostly level, with complete drainage.

Figs, Grapes, Peaches, Prunes, Almonds, English Walnuts, Oranges and other temperate and semi-tropical fruits can be raised with success on most of the tract without irrigation. Also, Alfalfa, Vegetables, Corn and all other cereals ordinarily grown in the State.

The soil throughout the tilled portions of the ranch proves to be of great depth and enduring in its good qualities. It is quite free from foul growths. The virgin soil among the large oak trees on the bottom land is easily broken up and cultivated.

The title is U. S. patent. Prices range principally from $5 to $30 per acre.

The California and Oregon railroad traverses nearly the entire length of the tract. There are several sections, stations and switches, besides depots at the towns of Anderson and Reading, all of which are located within the limits of the ranch.

The Sacramento River borders the whole tract on the southeast. Its clear waters are well stocked with fish. Good hunting abounds in the surrounding country.

Producers have a local market, which enhances the value of their produce. The railroad transportation route is level throughout to San Francisco. A portion of the land is auriferous and located near rich mines now being worked. Land suitable for settlers in colonies can be obtained on good terms.

Town lots are offered for sale in Reading, situated on the Sacramento river, at the present terminus of the railroad. It is the converging and distributing point for large, prosperous mining and agricultural districts in Northern California and Southern Oregon. Also, lots in the town of Anderson, situated more centrally on the ranch. Lots in both these towns are offered at a bargain, for the purpose of building up the towns and facilitating settlement of the ranch.

Purchasers are invited to come and see the lands before buying here or elsewhere. Apply on the ranch, to the proprietor,

EDWARD FRISBIE,
Anderson, Shasta Co., Cal.

Location of Shasta County.

Shasta County lies not far from midway between the two most important ports on the Pacific shore, *i. e.*, San Francisco and Portland Oregon, and directly on the overland route, which in the future will become the grand thoroughfare from Mexico to British Columbia. The town of Redding, at present, and probably for years to come, the head of railroad transportation on the California side of the mountains intervening below Oregon, is distant from San Francisco by railroad (via Vallejo) 255 miles; from Sacramento City, 169 miles; from Marysville 117 miles.

Persons thinking of buying or renting land will not likely regret a camping or excursion trip to this upper Sacramento country.

LAND FOR SALE OR RENT IN SUB-DIVISIONS.

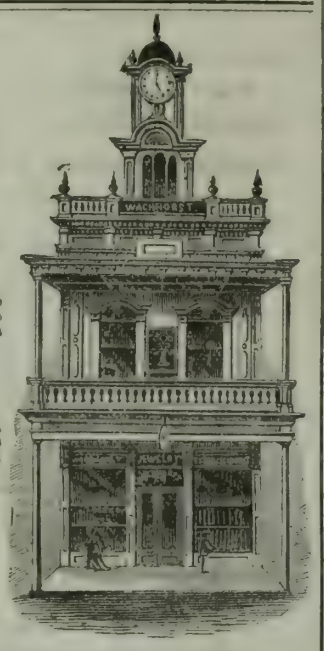
First Principles.

There is such a harmony in science, its various departments are so closely connected and correlated, that the knowledge of first principles is not only a necessity, but, in fact, if properly understood, forms the means of an extensive and correct practical application. Without the understanding of the principles which underlie a science or practice, the most practical of men will enact or repeat the grossest blunders. Practice forms a not-to-be underrated means of teaching principle, but it often requires a long experience, great practice and at all times good judgment to deduce principles, which an intelligent study of the theory of the science will convey to us in a shorter time and more satisfactory way. Practice should constitute the embodiment of known principles and the means of deducing new ones, but not, as is now often the case, a method of teaching or verifying old, well known principles, which have long been accepted, and knowledge of which would have prevented a useless outlay of time and money.

The greater portion, if not the whole, of the work of finding the necessary strength of bridges can be reduced to an application of the principle of moments, and similarly the strength of the working parts of the steam engine is, to a great extent, an application of this same principle. The numerous failures of roofs of buildings are solely due to a lack of knowledge of first principles. As a general thing the architect scorns the use of the formulæ of mechanics, of which he is too often grossly ignorant. The "rule of thumb" is the favorite method adopted, and consequently when a roof is designed for a building of a form and size which has not come within his previous experience, or that of his immediate advisers, the proper additional and required strength or "the extra inch of timber" is guessed at in a slip-shod manner, instead of being calculated, and a truss constructed fully able to successfuly withstand the strain to which it is subjected.



"Accidents" like that of the Hippodrome and of the post-office, New York, where one might have justly expected that the best talent would have been secured, were due to the fact that instead of applying the fundamental laws of mechanics to compute the required strength, the architect thought the roof was strong enough—a matter of guess-work and not of positive knowledge, as was within his power to have. The Tay bridge disaster was in the main due to the neglect of not considering the effect of the pressure of the wind. In the construction of the Hudson River tunnel, attention was not paid to the universal law that that portion of a structure which is most constantly used, and upon the strength of which the safety of the remainder of the structure and its occupants depends, should possess sufficient strength under the most adverse conditions possible. The principles of the conservation of energy are the basis of all our reasoning relative to the transformation of energy in various modes of motion, and without a knowledge of these principles we must inevitably fall into error, and indorse valueless schemes for realizing fabulous power. In ordinary discussions in technical journals, especially in communications, the general lack of the fundamental principles is being constantly exposed. We propose to enter this subject of first principles more thoroughly, and especially to present the views of some of our more prominent engineers upon the value of the knowledge of the first principles in particular, and more important branches of the engineering profession.

HIPPOPHAGY IN FRANCE.—Some very interesting statistics have been published by the society for promoting the use of horse flesh and the flesh of asses and mules as food, showing how steadily the consumption of these articles of diet has been increasing in Paris and the provinces since the foundation of the society in 1866. The weight has increased from 171,300 lbs. in 1866 to 1,982,620 lbs. in 1879. In the principal cities of the provinces the consumption of horse-flesh may be considered to have fairly taken root. At Marseilles, in 1870, there were 599 horses eaten, 1,031 in 1875, and 1,533 in 1878. At Nancy, 165 in 1873, over 350 in 1876, and 705 in 1878; at Rheims, 291 in 1874, 423 in 1876 and 384 in 1878; at Lyons, 1,839 in 1873 and 1,313 in 1875. In both the latter cases some difficulties had been thrown in the way by the town authorities, as was the case recently at Chalons-sur-Marne, where the Mayor fixed the price of the horse-flesh at a higher rate than that of beef. The average price of horse meat is from 25 to 30 cents per lb. Each horse furnishes about 200 kilogrammes (four cwt.) of meat, which is capable of being prepared in many by no means unappetizing ways, such as *pot-au-feu*, boiled, roast, hashed, haricot, jugged fillet, etc.

A LONG BRIDGE.—A large undertaking has recently been completed in Russia, in the shape of a long bridge over the Volga, on the Syoran and Orenberg railway, connecting the cities of Syoran, in the government of Simbrisk, with that of Samara. The width of the river is nearly a mile, and as it is liable to the occurrence of heavy spring floods, the piers (of which there are 14 altogether) had to be built 100 ft. above mean water level, the depth of the river being more than 50 ft. The girders, 364 ft. long and 20 ft. wide, were all riveted and put together on the right bank of the river, and then floated to their position. The whole cost of the bridge was 7,000,000 silver rubles, and it is worthy of mention that it was completed without loss of life or accident of importance.

Patent Agency.
[ESTABLISHED 1860.]
Inventors on the Pacific Coast will find it greatly to their advantage to consult this old experienced, first-class Agency. We have able and trustworthy associates and Agents in Washington and the capital cities of the principal nations of the world. In connection with our editorial, scientific and Patent Law Library, and record of original cases in our office, we have other advantages far beyond those which can be offered home inventors by other Agencies. The information accumulated through long and careful practice before the Office, and the frequent examination of Patents already granted, for the purpose of determining the patentability of inventions brought before us, enables us often to give advice which will save inventors the expense of applying for Patents upon inventions which are not new. Circulars of advice sent ree on receipt of postage. Address DEWEY & CO., Patent Agents, 202 Sansome St., S. F.

The New Masonic Temple.

We illustrate on this page that magnificent building which the Masonic fraternity of Oakland have erected for their wants in our beautiful city across the bay. It is situated at the corner of Twelfth and Washington streets, and stands out prominently as an object of interest, not only to the passing stranger, but also to those who have made Oakland their home. Both in its size, construction, beauty and convenience of all the details, does it fulfill the expectations and wishes of those for whom it was built. Oakland has many fine public buildings, but we think in this case the Masonic Temple can justly claim the credit of being the finest in the city.

The building covers an area of 65x100 ft., and is built of brick, granite and San Jose sandstone, the style of architecture being semi-Gothic. Standing on the opposite side of the street, and gazing upon the majestic front which the building presents, one can take in the beauty and grandeur of the building. To the artist, it must be a source of supreme delight to gaze upon its fair proportions. The finest pressed brick, with sandstone finish in the pillars, vases and Maltese crosses that enter into its construction, make a pleasing and delicate contrast.

On the Washington-street side are five niches, two in front of the first, two on the second, and one on the upper floor, bearing beneath them the inscriptions, "Prudence," "Justice," "Temperance," "Fortitude" and "Charity." In the course of time these will be replaced by stone statues, which will add greatly to the beauty of the exterior of the building. The large windows have nine panes each of heavy plate glass, the smaller ones six. The contrast that these windows and niches present is very beautiful.

There are three stores in front on the ground floor, 20x70 each, and one in the rear, 20x65, each having an apartment in the rear. On the Twelfth-street side there are on each floor two large windows and five smaller ones. The entrance is in the form of a heavy Gothic portico of polished Penryn granite, supported by plain pillars of exquisite Penryn black granite, with the letter "G" over the gateway. The roof is of slate, and is laid in a very unique and pleasing manner. The main tower over the stairway is finished square with Gothic windows, framed at the apex in *fleur de lis*. The sub-tower is at the north end on the Washington-street side, presenting a neat contrast. Near the center is the sharp-cut roof tower, with gable, facing the street, adorned with crosses in circles, and all around the building are pinnacles and peaks handsomely arranged.

THE NEW MASONIC TEMPLE, OAKLAND.

The walls are from 2½ to 3 ft. thick, the building being thoroughly braced and girded from roof to foundation. Between the floors there are iron girders running in every direction, making them capable of bearing any strain that may be put upon them. Wrought-iron girders also run through the building, and there is 10,000 of them which cannot be seen by the eye.

The stairways are 9 ft. wide from the ground to the first floor, and 6 ft. wide from the first to the second floor. The handways and newells are of black walnut, and the balusters of oak of the finest quality.

The first floor contains the main hall, 70x42 ft., finished in white and oak, making it one of the handsomest halls in the city. Attached to this is a large banqueting hall, 65 ft. in length, with folding doors, which can be thrown open, extending the capacity of the room to 80 ft. A committee or waiting room is attached to this. There are also three other rooms on the inside, one of which is fitted up for a ladies' retiring room, with all necessary conveniences. This floor will be plainly furnished for the present, and will be rented to societies and outside parties. Half way between the first and second floors is the culinary department, the kitchen being furnished with a sink, shelving, cupboard, etc., that pertains to its successful management, it being equally accessible from either floor.

But it is on the second floor, which will be used strictly for Masonic purposes, that the greatest skill of construction is shown, it being arranged for the work of the Lodge, Chapter, Commandery, Council, Ancient and Accepted Scottish Rite. The main hall, by means of its highways and adjacent rooms, can be converted into an asylum Council chamber, or any necessary use. The platforms are arranged on rails, upon which they can be rolled out. The main coloring is white, with oak finish and heavy wainscoting, surmounted by heavy reredos. The baldachins are constructed of black walnut, highly ornamented. The windows are heavily mullioned, the aspect of the room being singularly attractive. The dimensions are 42x60 ft., 25 ft. high in the clear, with a central dome reaching 5 ft. higher. The banquet hall on the Twelfth-street side is heavily framed in oak, chapel style, of the same dimensions as that immediately below it, and with the same arrangement of folding doors.

A large hat and outer reception rooms adjoins this, through which it is necessary to pass to the Tyler's room, from which entrance is effected to five other ante-rooms, these being used for the general purposes of the various Orders. In these rooms wardrobes are arranged, and cases for the reception of books and papers for the several secretaries. As on the first floor, this also has a furnished reception room for ladies. The windows are all arranged with inner blinds, water is furnished on every floor and gas in every room. The meters and stop-keyes are so arranged that gas can be turned on or off on either floor at pleasure, and on each floor the lights in the main hall can be turned out, while those of the committee rooms and on the stairways remain lighted.

From the second floor there is a small stairway leading to a dormer floor, which is arranged in three large rooms, fitted up for the purposes for which they are intended, and completely furnished. Adjoining this is a large store room for the paraphernalia of the different Lodges. Closets are provided on all the floors, and every convenience applicable to the uses for which the building is intended. It will be furnished in fine style throughout, and, as it stands, it is a splendid monument to all those engaged in its construction.

The cost of the building has been about $70,000. It was erected by the Masonic Hall Association, a joint stock company, the stock being divided into 10,000 shares of the value of $10 each. The project was started about two years ago, the lot bought and stock issued. Six thousand shares of stock have been subscribed for, leaving 4,000 for future use.

The following is a list of the officers and directors of the association, and the committee: Officers—F. K. Shattuck, President; A. Chabot, Vice-President; F. W. Cushing, Secretary; Chas. H. Twombly, Treasurer. Directors—F. K. Shattuck, A. Chabot, F. W. Cushing, N. W. Spaulding, John Crellin, John Marsh, Judge Lintell, S. Hirshberg, Frank Warner, R. C. Gaskill and J. Patterson. Building Committee—N. W. Spaulding, John Crellin and S. Hirshberg. The architects of this handsome structure were Wright & Sanders. The dedicating services will take place on Washington's Birthday, Feb. 22d, at 2 o'clock, P. M., and will be on a scale of magnificence never before witnessed in Oakland. Invitations have been extended to the Grand Commandery of Knights Templar, Grand Chapter Royal Arch Masons, Grand Lodge of Masons, Grand Consistory Ancient and Accepted Scottish Rite, Grand Chapter Order Eastern Star, Masonic Veteran Association, and Past Masters' Association. The exercises will conclude with a Masonic ball in the evening in the upper and lower halls, and thus will close a memorable event in the Masonic fraternity of Oakland.

We are pleased to record the fact that new subscribers are coming in from Lodge agents in various quantities, for which we are thankful, as it shows that the efforts of those connected with the Watchman are appreciated. This confidence in our work strengthens our sinews for renewed exertions, and will incite us to fresh endeavor to make the Watchman a worthy exponent of the principles of the A. O. U. W. We would like to have others co-operate and give us good cheer all around the circle. Correspondence on subjects that would likely prove a benefit to the Order are solicited, together with Lodge items and other news that may occur in the Lodges. We here tender our sincere thanks to local agents for the faithful and intelligent manner in which they have conducted the interests of the Watchman, and commend them as worthy Workmen in the vineyard or ranks.

We notice a very excellent address delivered at a social of Anaheim Lodge, No. 85, by J. M. Gunn, and published in the *Gazette*. We regret that want of space will not allow its production in this issue, but will try and make selections in our next.

The A. O. U. W. in Nevada.

On Monday evening, Jan. 3d, it was my p[rivi]lege to be present at the installation of offi[cers] of Gold Hill Lodge, No. 2, of this State, and it affords me much pleasure to report to you the great success of this Lodge. Only 18 months old it has a membership of 124 brothers in good standing, and as fine a set of men as you will find anywhere.

The installation was conducted by Deputy Supreme Grand Master, J. W. Kinsley, assisted by the Past Masters of the State, and "the work" was performed without a single hitch or break, all the officers being up in their parts to such a degree of perfection that it would put to the blush many of our older Lodges in California. There were present delegates from five of the seven Lodges in Nevada, and it would have done you good to look around the large hall so well filled with such a healthy, noble looking set of men. Surely the medical examiner is not remiss in his duty, in this district, at least.

After the business of the evening, all present were invited to adjourn to the ante-room, where a sumptuous repast was spread, of which all partook with a relish that told of their ability in another direction. After supper we returned to the Lodge room, where several toasts were proposed and responded to. First, "The Supreme Lodge," was replied to by D. S. G. M. Kinsley, who set forth in most glowing terms the often unnoticed benefits of the Order, aside from the beneficiary certificate, namely, the care which ought to be, and is in many locations exercised over the widow and orphans of a deceased brother, thereby seeing that the $2,000 is made to do the most good possible for the bereaved ones, especially when that is all that is left for them to depend upon. He also spoke upon the great benefit which would accrue by making this district a separate jurisdiction. He was followed by Bro. Eastman, of Mission Lodge, No. 56, of California, who responded to "the Order in California," by telling the brothers how "Snyder went out fishing mit the boys, and burned his pringle;" being encored, he gave a moral and temperance lecture, in character, in the selection entitled "Lodge Night," which brought down the house and made the boys feel glad that we A. O. U. W.'s could go home sober and find the key hole to the front door. "Story Lodge, No. 3," was next heard from by Bro. Harris, of Virginia City, Master elect of No. 3. He dwelt especially upon the death rate in Ohio, and argued that it ought to be made a separate jurisdiction. "Ormsby, No. 4," was reported by Bro. Frank Sterling in a brief but happy manner. Bro. S. is just what his name indicates, a frank, sterling fellow, and we want plenty more like him. Bro. Hunt, of Virginia, responded to "Security Lodge, No. 7," of that city, which is the second that the D. S. G. M. has formed. "River Lodge, No. 6," of Dayton, by Bro. T. E. Picotte, and Sutro was heard from in the person of Bro. Dr. Brierly, examining physician of River Lodge. We have since learned that Sutro has its own Lodge, making the eighth in Nevada. "Gold Hill, No. 2," was then replied to by the newly installed M. W., C. H. Likins, who promised to bear his newly acquired honors as best he could, and we think that will be in an "A No. 1" manner; and last but not least, "The Order at Large," was answered by P. M. D. Thorburn, the Recorder of the Lodge. He seemed to think it a great burden for his shoulders, but we notice that in his happy, off hand way, he filled us all with enthusiasm, as does his genial presence. The music by Bro. J. O. Bennetts and assistants was good and must not be forgotten. Also the song and encore by Bro. Joe Brennen, the new Overseer. We have written, at great length but so would anybody who witnessed the success of last Monday night. And now we say that as the Order is so well represented in Nevada by live men, that she really deserves a Grand Lodge and a separate jurisdiction, and we hope Bro. G. M. Kinsley will be supported in his noble work and that the Order at large will yet have cause to be proud of the Grand Lodge of Nevada. Give the boys good times here and you will see a boom. Hector.

The Air We Breathe.

It is composed of one part of oxygen and four parts nitrogen. The former supports life, the latter extinguishes it. The more oxygen there is, the livelier, the healthier and the more joyful are we; the more nitrogen, the more sleepy and stupid and dull we become. But if all the air were oxygen, the first lighted match would wrap the world in instant flame; if all were nitrogen, the next instant there would not be upon the populated globe a single living creature. When oxygen was discovered by Priestley, nearly 80 years ago, there was great jubilation among doctors and chemists. The argument was plausible, and seemed perfectly convincing: "If oxygen is the life and health of the atmosphere, as we have found out how to make oxygen, we have only to increase the quantity in the air we breathe, in order to wake up new life, to give health to the diseased, and youth to the aged." But, on trial, it was found that it made a man a maniac or a fool, and if continued, a corpse. Various other experiments have been made to improve upon the handiwork of the Allwise Maker of the Universe, but they have been successive failures, and thinking men have long since come to the conclusion that, as there can be no improvement upon the cold water of the first creation in slaking thirst, so there can be no addition made to pure air which will better answer its life-sustaining purposes. And as there is not, in all nature, a still, warm atmosphere that does not instantly begin to degenerate decay, corruption and death, so there is no chamber of the sick, graduated to a degree, that will not hasten the end desired to be averted.

Unsinkable Ships.

A party of gentlemen interested in steam navigation lately met at North Woolwich to inspect a steam launch built on Mr. James Long's unsinkable system. The principle consists in attaching to the sides of the hull of a vessel a series of flat air-tight metallic cylinders or drums, the inner heads of which are built into and form part of the framing and inner skin of the vessel. These drums project on either side of the ship and are cased in, the under sides of the casing normally resting upon the surface of the water and becoming slightly immersed under a load. The result is a light draft with great freeboard, and it is claimed that a greater stability under canvas and a higher rate of speed under steam or sail are thereby attained, besides the advantages of greater cargo capacity, economy in construction, and, above all, unsinkableness, however damaged by collision or otherwise. The launch in question, which is only experimental, is steel built, 37 ft. in length, 6 ft. in depth, and 5 ft. 8 inches beam internally. She has 7 cylinders fitted on each side, each cylinder being 3 ft. 6 inches in diameter and 1 ft. 8 inches deep, and which give her a width on deck of 9 ft. over all. She draws 2 ft. of water without her load, and has a freeboard of 4 ft. A short run was made with the vessel, a fair rate of speed being attained, while its unsinkable character and other points were demonstrated by Mr. Long by means of a model vessel.

TOO MUCH CIGARETTE.—There is too much cigarette. The small boy has got it into his mouth, and it is using him up. The Philadelphia *Times* says physicians and other people in that city are pained by the spectacle, growing more common every day, of pale-faced lads, ranging in age from 6 to 20 years, who are puffing their little lives away in smoking. Day and night they throng the streets, where the peculiarly offensive odor generated by cigarettes made of cheap paper and bad tobacco renders their smoking as obnoxious to others as it is hurtful to themselves. Every evening before the doors of the theaters they raise a cloud of foul smoke that is equally injurious to their own rickety constitutions and to the noses of their victims. Doubtless, also, they carry their pernicious habit into their homes—when they are old enough to do so without risk of the spanking that they deserve—thus still further doing harm to themselves and making other people uncomfortable.

A WRITER in the Providence *Journal* predicts a useful future for the milkweed, which has heretofore been considered only a cumberer of the ground. Its seeds yield a finer oil than linseed; its gum can be used in place of India-rubber, and from its floss a fabric resembling Irish poplin has been made; while the young shoots are used in the spring by some people instead of asparagus, which they resemble in flavor. Now, pertinently adds the writer, if uses can be discovered for the thistle and white-weed, they may prove friends in disguise.

WISHING to pay his friend a compliment, a gentleman remarked, "I hear you have a very industrious wife." "Yes," replied the friend, with a melancholy smile, "she is never idle, she always finds something for me to do."

An Elegant Holiday Present.

Give your friends at home, in the East or abroad, a year's subscription to that popular monthly, THE CALIFORNIAN. It will be a permanent pleasure through the entire year, and will be something appropriate as a California gift. Office, 202 Sansome Street.

PACIFIC RURAL PRESS.

[Established in San Francisco, 1870.]

This is the leading farming journal on the western half of the continent, and second to none in America. It is well printed and illustrated, weekly. Contains an unusual amount of fresh, original farm, household and family circle literature. Careful attention is paid to giving full and reliable weekly market reports. The following are among its ably conducted departments: Editorials on agricultural and other timely and important subjects of live interest to farmers and their families; agricultural, and other useful and ornamental illustrations; correspondence from various quarters of our new and rich developing fields of agriculture on the Pacific Coast, embracing new hints and ideas from progressive men and women in all branches of rural industry; Horticulture; Floriculture; The Garden; The Home Circle The Grange; Young Folks; Domestic Economy; Good Health; Entomological; Sheep and Wool; The Dairy; The Stock Yard; Poultry Yard; Swine Yard; The Apiary; The Vineyard; Queries and Replies; New Inventions (and illustrations of new and improved machinery); Agricultural Notes; Items of General News, etc. Its columns are studiously filled with chaste, interesting, fresh and useful reading, devoid of questionable literature for old or young and fancifully alluring clap-trap advertisements.
Subscriptions, $3 a year, in advance. Agents wanted, on liberal pay. Send for sample copies.
DEWEY & CO., Publishers,
No. 202 Sansome St., S. F., Cal.

Australian Patents.

The attention of Pacific Coast Inventors is called to the benefits which may be derived from Letters Patent of the Australian Colonies. We invite correspondence from all who may desire full information on the subject. The geographical location of San Francisco gives an advantage in our favor over Eastern agencies, rendering it possible for us to transact business in much less time.
Send for our circular giving full information regarding Patents for the following countries: Victoria, New South Wales, Queensland, South Australia, Tasmania, New Zealand, East India, Etc., Etc.
DEWEY & CO.,
U. S. AND FOREIGN PATENT SOLICITORS,
202 Sansome St., San Francisco, Cal.

Remarkable Echoes.

In the sepulchre of Metella, the wife of Sulla, in the Roman campagna, there is an echo which repeats five times, in different keys, and will also give back with distinctness a hexameter line which requires two and a half seconds to utter it.

On the banks of the Naha, between Bingen and Coblentz, an echo repeats 17 times. The speaker may scarcely be heard and yet the responses are loud and distinct, sometimes appearing to approach, at other times to come from a great distance.

Echoes equally beautiful and romantic are to be heard in our own islands. In the Abercorn family at Paisley, when the door of the chapel is shut, the reverberations are equal to the sound of thunder. If a single note is breathed, the tone ascends gradually with a multitude of echoes, until it dies in soft and bewitching murmurs. In this chapel is interred Margery, the daughter of Bruce and the wife of William Wallace.

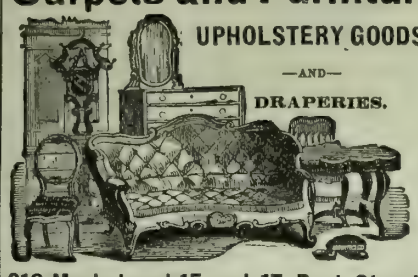
The echo at the Eagle's Nest, on the banks of Killarney, is renowned for its effective repetition of a bugle call which seems to be repeated by a hundred instruments, until it gradually dies away in the air. At the report of a cannon the loudest thunders reverberate from the rock and die in seemingly endless peals along the distant mountains.

At the Castle of Simonetta, a nobleman's seat, about 20 miles from Milan, a surprising echo is produced between the two wings of the building. The report of a pistol is repeated by this echo 60 times; and Addison, who visited the place on a somewhat toggy day, when the air was unfavorable to the experiment, counted 56 repetitions. At first they were very quick, but the intervals were greater in proportion as the sound decayed. It is asserted that the sound of one musical instrument in this place resembles a great number playing in concert. This echo is occasioned by the existence of two parallel walls of considerable length, between which the wave of sound is reverberated from one to the other until it is entirely spent.

TANNING.—A process of improved tanning for the improved treatment of leather, is described in the technical journals. It appears in this process iron salts were originally resorted to, but no practically successful results could be obtained with it, the iron salts being found to attack the leather fiber, destroying its durability. The addition of chrome was found to be a great improvement, but the chrome and salts became partially dissolved by moisture, thus rendering it necessary to protect, by an absolutely non-soluble coating, the fibers of the leather. This end was at last attained by producing an iron and chrome soap, and it is by using this compound in a manner adapted to the purpose in view that the material is prepared, the appearance being that of ordinary leather, though somewhat lighter than bark-tanned hides. Some experiments are reported to test the value of the article produced by this method, the results proving very satisfactory; that is, the tensile-breaking strength of several specimens was found to average some 4,550 lbs. per square inch, which is about equal to that of good bark-tanned leather, the improved fabric also showing a remarkable resistance to the absorption of water.

VINEGAR.—A method employed in France, which converts cider or other liquid into vinegar much more expeditiously than do ordinary practices, prefaces the process with preparing the barrels or casks by first scalding them with water and next pouring into them boiling vinegar, rolling the barrels, and allowing them to stand on their sides two or three days, until they become thoroughly saturated with the vinegar. This preparation over, the barrels are filled about one-third full with strong, pure cider vinegar and two gallons of cider. Every eighth day thereafter two gallons of cider are added until the barrel is two-thirds full. In 14 days after the last two gallons are added the whole will have been converted into vinegar, one-half of which is now drawn off and the process of filling with cider begun again. In summer the barrels during the process of conversion are exposed to the rays of the sun, and in cold weather are stored where a uniform temperature of about 80° can be maintained.

HOW TO USE OIL-STONES.—Instead of oil, which thickens and makes the stones dirty, a mixture of glycerine and alcohol is used by many. The proportions of the mixture vary according to the instrument operated upon. An article with a large surface, a razor, for instance, sharpens best with a limpid liquid, as three parts of glycerine to one of alcohol. For a graving tool, the cutting surface of which is very small, as is also the pressure exercised on the stone in sharpening, it is necessary to employ glycerine almost pure, with but two or three drops of alcohol.



IMPROVED MORTAR AND ARTIFICIAL STONES. M. Decourneau attributes the cracks in common mortars and cements to the uncombined quicklime that they contain. In order to neutralize the lime, he uses an *agregat* composed of a very fine silicious powder, mixed with diluted nitric acid. He thus obtains mortar with much greater, more uniform and more lasting resistance than those hitherto used. The application of his method, especially in the new forts of Paris, has given excellent results, without a single failure. Stones made by his process may be sawed and chiselled like natural stone.

BAY VIEW LODGE, No. 159.—Frank Suling, M. W.; J T. Welby, F.; Jos. Latham, O.; John Sloan, Rdr; W. J. N. Prydz, Fin.; Henry Lehrke, Rvr; Thos. Curran, G.; Saml. Bee, I. W.; J. F. Lewis, O. W.; Jos. Latham, Trustee; Dr. M. A. McLaughlin, Med. Ex.; Geo. T. Shaw, Representative to the Grand Lodge.

SANTA BARBARA LODGE, No. 172.—The following named officers were duly installed into their respective chairs on Saturday evening, Jan. 8, 1881, by Thos. R. Dawe, District Deputy for Santa Barbara county: Thos. Nixon, M. W.; W. D. Carter, F.; G. White, O.; L. D. Lilley, Rdr; C. H. McNally, Fin.; J. Miller, Rvr; J. F. Janesen, G.; Wm. Smith, I. W.; G. W. Leland, O. W.

WEST END LODGE, No. 175, Alameda.—At a regular meeting of this Lodge, held on Jan. 3d, D. D. G. M. W., William Sanderson installed the following named officers of this Lodge for the ensuing term: John Conrad, M. W.; Herman Bremer, F.; H. C. Ballheimer, O.; Harvey McGoun, Rdr; W. P. Byler, Fin.; Chas. C. Volberg, Rvr; J. D. Quast, G.; Nels Holm, I. W.; Fred. Benn, O. W.; Theodore Steinmetz, for long term (18 months), and H. Traube, to fill unexpired term (12 months), Trustees. Bro. P. M. W. William Holtz was elected Representative to the Grand Lodge. This Lodge meets every Monday evening in Holtz's hall, Webster St. Reported by H. MCGOUN, Recorder.

FRIENDSHIP LODGE, No. 179, S. F.—David Hart, M. W.; George L. White, F.; Chas. Creighton, O.; Henry Gombs, Rdr; John C. Fitchen, Fin.; Ernest Adelsdorfe (re-elected), Rvr; Dan. Bruton, G.; Claus H. Schumacher, I. W.; J. Simon (re-elected), O. W.; A. Mann, Trustee; Albert S. Adler (re-elected), Med. Ex. Reported by ALBERT S. ADLER.

Nevada Elections.

GOLD HILL LODGE, No. 2.—C. W. Likins, M. W.; H. W. Hand, F.; Jos. P. Brennan, O.; D. Thorburn, Rdr; C. W. Keith, Fin.; J. O. Bennetts, Rvr; P. T. Langan, G.; J. A. Winterbeam, I. W.; W. L. Rees, O. W.; D. Sutherlin, Trustee; Dr. P. Manson, Med. Ex. Reported by D. THORBURN, Recorder.

NEVADA LODGE, No. 5, Reno.—Geo. W. Cunningham, M. W.; C. R. Wickes, F.; A. Lyman, O.; F. McRae, Rdr; W. D. Wagard, Fin.; A. Dawson, Rvr; R. W. White, G.; D. McKay, I. W.; P. B. Comstock, O. W.; C. R. Wickes, Trustee; A. Dawson, Med. Ex. Reported by F. MCRAE, Recorder.

Degree of Honor Elections.

SILVER STAR LODGE, No. 2, D. of H.—Mrs. Franc Billington, P. W. S. of H.; Mrs. Nellie G. Babcock (re-elected), W. S. of H.; Miss Maggie Bankhead, S. of H.; Mrs. Hattie Harrison, S. of C.; Mrs. Flora A. Morrill (re-elected), S. Sec'y; Miss Lena Maroff, S. Treas.; Miss Fannie Nixon, S. Usher; Mr. Freeman Lewis, I. W.; Mr. H. C. Babcock, O. W. Reported by MRS. F. A. MORRILL, Sec'y.

On Wednesday evening, Jan. 5th, the following officers of Ivy, No. 4, were installed by D. S. Hirshberg, District Deputy: Past Worthy Sister of Honor, Mrs. J. T. Gardiner; Worthy Sister of Honor, Mrs. D. Markel; Sister of Honor, Mrs. Flora Harris; Sister of Ceremonies, Mrs. Ida Bradley; Sister Treasurer, Mrs. Mary Macdonald; Sister Secretary, Mrs. J. R. Stunock; Sister Usher, Miss Dora Hirshberg; I. W., Geo. Mosbacker; O. W., D. Markel. After the installation, addresses were delivered, and then a fine collation was partaken of. Ivy is prosperous and is doing well.

WE overheard several commercial travelers a day or two ago eulogize the American Exchange Hotel, in this city, as furnishing one of the best tables on the Pacific coast. No higher compliment could be paid to Mr. Charles Montgomery, the proprietor, for commercial men see much of the world, and are the most competent critics.—*Hotel Gazette, Jan. 7th.*

Grand Officers' Visit.

Bros. Clay W. Taylor, G. M. W., E. T. Loud, Deputy G. M. W., and J. Meredith Davies paid a visit to Franklin, No. 44, on Jan. 14th. There being no candidates in waiting and the usual routine passed, Bros. Taylor, Loud, Davies and others made some remarks, being congratulating and advisory in their nature rather than an oratorical effort. It seemed like a large well-regulated family, counseling and laying plans for the future good and protection of their families.

The Grand officers had, at the suggestion of some one, agreed to visit one more Lodge, and to carry out the programme excused themselves and immediately called upon Yerba Buena, adding to their number Bros. W. W. Hanscom, P. M. W., and E. M. Reading, P. M. W. Bros. Taylor, Davies, Loud, Hanscom, Reading and Severance made short speeches, in a measure reviewing the results of their labor for the past year and pledging anew their fealty to our growing Order. And, as Bro. Taylor remarked, it originated in an obscure town in Pennsylvania less than 12 years ago, in the humble walks of life, now numbering 90,000, what may it do when it has gathered together in the strong bonds of fraternal love an army of such numbers and of such a class of men as I see around me to-night.

"S. M. Davies of Iowa."

'Tis with pleasure that we announce the return of Brother Davies from the East to this coast, to remain permanently as the general agent of one of the largest railway corporations in the world, namely, the Chicago and Northwestern railway, the advertisement of which appears in another column. Brother Davies also represents the Chicago, St. Paul, Minneapolis and Omaha Railway Co., thus making him a representative of 4,000 miles of railway. Workmen and their friends, who contemplate an Eastern visit, should place themselves in communication with Bro. Davies, as he will gladly attend to their wishes.

Bro. Davies travels extensively throughout the State, and is always a welcome visitor in our Lodges. He is a reader, speaker and an enthusiastic Workman. We hope that many of our Lodges may have the pleasure of receiving a visit from him.

THE BALDWIN CIGAR.—One of the principal resorts of smokers is the Baldwin cigar store, fronting Market street, under the Baldwin hotel. The enterprising proprietor, Bro. A. A. Burton, has made the business a study and the experience and facilities at his command has made him a reputation of keeping a fine stock of goods in his line. The brand known as the "Baldwin" is made especially for this house, from selected tobacco and has gained quite a notoriety. Whenever we want a good cigar we go for the "Baldwin."

IT IS said that the dress ofttimes proclaims the man—in no part, however, more than a well-fitting shirt. Bro. Howard Black, southeast corner of Sutter and Montgomery, up stairs, has justly the reputation of being master of this art. He has just imported a fine line of shirtings of the latest pattern.

WE are pleased to note that many of our faithful officers in our Order are honored in others of the same character. Bro. J. T. Hollings sitting P. M. W. of Unity, 27, was presented with a fine silver Past Dictator's Jewel, at the end of his term as Dictator of Occidental Lodge, K. of H., 1,990, Bro. J. D. Martin, for a long time Financier of Unity making the presentation and speech.

DON'T WAIT to be called upon, if you are not a subscriber to the WATCHMAN. Let old subscribers as well, help get up a list to send in by the local agent, or your representative to the Grand Lodge.

Concerning Beds and Bedding.

Mary Wager-Fisher gives the *Rural New Yorker* an article on the above subject, from which we quote as follows: A very expensive feature of the house furnishing is the bedding, and a nice bed, and a good one, should be well taken care of and protected from dust. A great many people who claim to possess "common sense" still continue to have their bed-room floors covered with a carpet which is nailed down and not taken up and shaken more than twice a year. It follows that whenever the carpet is swept, more or less dust is put into motion and settles in due proportion upon the bed. If, prior to the sweeping, the bed be covered with a large duster this difficulty will be avoided.

For a bed of large size it requires ten yards of calico to make a duster—four widths, two and a-half yards in length. Very nice calico, well starched, can be had for from seven to eight cents a yard. For ten cents a yard beautiful chintzes can be had, in bright rich colors. For a three-quarter bed three widths of the calico are enough, but the length must be two and a-half yards. If all the bed-rooms in the house are swept on the same day, at least two dusters are required for "sweep-day" purposes, while a duster each for all beds not in constant use is needed. To keep a spare bed "made up" is a great piece of extravagance. The bed linen and bed spread become gradually soiled, and when the bed is to be occupied it needs to be made up afresh in order to be in proper condition. The best house-keepers keep all their bedding pillow-cases, sheets, covers, etc., folded when not in use, and the bedding carefully protected with a chintz cover, which lends a bright and tidy appearance to the room. Some have a case made of blue-and-white checked cotton for protecting the mattress from soil. A pair of sheets the size of the top of the mattress, with a thin layer of cotton between, and quilted on a machine, is very nice for a sandwich between the sheet and mattress. It is easily worked, adds to the comfort of the bed, and protects the mattress. Whatever will keep bedding *clean* is desirable, for it is undeniably laborious work to clean bedding.

Long sheets which turn down a full half yard over the bed covers protect them very much from becoming soiled. For warm, heavy blankets in constant use, and which can only be cleaned without injury at considerable expense, a shield of white muslin can be very effectively used. If the blanket be two and a half yards wide, that much in length of muslin will be required, with a little allowance at each end for a hem. Fold the muslin straight through the center the long way, so that one-half will go on one side of the top end of the blanket and one-half on the other side. With a needle and thread fasten the muslin to the blanket across the top with basting stitches, and again at the bottom of the muslin. The muslin shield can be removed and washed as often as one likes.

Bed-ticking stained with blood from nose-bleeding, wounds or other causes, may be cleaned by applying starch, well moistened with water, to the spot. Renew the wet starch until the stain is extracted, the wet starch absorbing it.

A cheap and very comfortable bed, with an under-bed of straw, hay or husk can be made by putting on the top a light cotton "mattress," which can be made at home. For the two sides of the "mattress" bed-ticking is best, and they should be somewhat longer and wider than the top of the bed, as in tying the size is somewhat reduced. Put two or three times as much cotton between the "sides" as is put between those of a "comfortable," and tie quite closely; finish by turning in the two edges and sewing them overhand, or stitch on machine.

Beds of straw or husk look infinitely better and are far more comfortable when the ticks are made like those of a mattress, with a straight, upright piece sewed in all around. The corners should be clipped off, so that the tick will be round at the "corners," as it fits the bedstead better.

INFLUENCE OF MISSISSIPPI IMPROVEMENTS.—The effect of the jetty improvements at the mouth of the Mississippi river, in extending the commerce of the Mississippi valley, is already very great. Since the beginning of this year, St. Louis has shipped to Europe, by way of New Orleans, twice as much grain as passed out of the country by that route during the first 10 months of last year. The shipments down the river would be still greater were it not for the lack of barges to carry the grain. It is said that a fleet of boats are being built to supply the want. In regard to the improvements in progress on the Upper Mississippi, it is reported that the commission having them in charge has finished the examination of that portion of the river between St. Paul and St. Louis, a distance of 700 miles. Great improvement was found in the channel, especially for low water navigation, the result of the improvement works in process of execution by the corps of engineers. These works consist of low wing-dams of brush and stone, projecting from the shore for the purpose of narrowing the water way, supplemented by a brush and stone revetment of the opposite bank and elsewhere if necessary wherever the contraction produces caving.

Educational.

Barnard's Business College

Gives the privilege of attending for two or three days free of charge to examine the Course of Study and see the Methods of Instruction. Professor Barnard gives his personal attention to the work, and entrusts nothing to Assistants. He does not hold out any false inducements to draw a large crowd and then hire teachers to do the important part of the work. He admits only as many as he can attend to personally. It will well repay a visit to his College, at 120 Sutter street, to see the elegant specimens of Pen Flourishing executed by Professor Barker. Mathematics and English Grammar, Spelling and Composition receive special attention.

Professor Barnard's new Grammar, now in press, will be published in a few weeks.

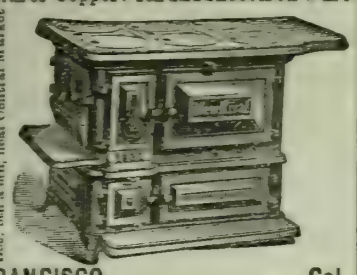
Glass Cloth Made in Pittsburg.

One of the chief characteristics of glass is brittleness. "As brittle as glass" is a comparison frequently made, but, notwithstanding this marked characteristic, glass is susceptible of being spun and woven into fabrics as perfect, delicate, durable and handsome as the finest silk. Glass has been spun and woven in Austria for a number of years, but not until recently has this feat been attempted in the United States. A prominent Pittsburg glass manufacturing firm, Messrs. Atterbury & Co., says the *American Manufacturer*, have provided themselves with facilities for producing various kinds of fabrics from this ordinarily brittle substance, some of which they have already made. Among the articles they are prepared to exhibit are a napkin, a towel and tablecloth. The latter is about six ft. square, and white in color, except the ends and sides, which are a delicate green, and the four edges are fringed. The towel and napkin are the same as the tablecloth, except the ornamental border, which in one is red and in the other pink. These fabrics are as flexible and but slightly heavier than those woven of flax, and the manufacturers state that they can be washed and ironed, like the ordinary tablecloths and napkins. Besides these articles the firm have a number of large feathers made by them, which are fashioned of variously colored threads of glass, the base being a piece of brass wire. These feathers resemble ostrich feathers, and are wondrously beautiful in shape and color. These goods Messrs. Atterbury & Co. will place on the market just as soon as there is a demand for them.

The firm can spin 250 of these fine threads, each ten miles in length, in one minute, the process being much more interesting than the spinning of cotton or other threads by the usual methods. The weaving is done with an ordinary loom, some of the machinery of which the firm have adapted to the requirements of the manufacture. The fabric cannot be ripped or torn, and can be sold at a less price than cotton, silk, or whatever other fabric imitated. The firm state that the cloth, whether coarse or fine, when worn as a dress or shawl, or other garment, will be just as warm, easy-fitting and comfortable every way as clothing of any other kind.

The firm are now fully prepared to receive orders for glass garments of any description.



LOSSES BY FIRE.—It is estimated that the total annual losses of insured property by fire, throughout the world, average nearly $200,000,000. Add to this the annual destruction of uninsured property, and we should probably have a total amounting to quite double these figures. How great the loss, how severe the tax upon the productive industry of mankind, this enormous yearly destruction amounts to, will come home to the minds of most readers more directly if we call attention to the fact that it just about equals the value of our total wheat crop during a year of good yield. And it is a direct tax upon productive industry everywhere, because, although here and there a nominal loser, fully insured, has only made what is sometimes called "a good sale" to the companies holding his risk, this is only a way of apportioning the loss whereby the community at large become the sufferers. Thus it is that we find all ably-managed insurance companies earnestly endeavoring to make it plain to the public how fires should be guarded against, or most effectually localized and controlled when once started.

A MAN OF NERVE.—A thrilling accident occurred at the American Iron Works, in Pittsburg, on the 2d ult. While Robert Moore was at work at his rolls his catcher failed to sieze with his tongs a bar of white-hot iron which had been placed between the rolls. The iron twisted itself thrice around the roll, forming a "collar." The catcher struck the iron, when there flew off a piece in the shape of a ring, with a stem 20 inches long running off at right angles to the circle. The band flew back and fell around Moore's head, resting on his shoulders. Quick as thought he grabbed the long stem with his tongs and the white-hot ring with his hand, and with steady nerve and gentle movement lifted the fiery thing from his shoulders. His face was badly burned and the flesh of his hand was cut to the bone. After the iron had cooled he put the ring over his head—it was but two inches larger in diameter than his head.

SPONTANEOUS IGNITION.—Attention has recently been called to some peculiar cases of spontaneous ignition of hydrogen in air, the phenomenon having been noticed, it seems, in factories where quantities of zinc were being dissolved in hydrochloric acid for the preparation of zinc chloride. Violent explosions took place when no flame was near, and it was eventually ascertained that the gas took fire spontaneously. It is thought to be caused by fragments of very porous zinc, which, when lifted above the surface of the liquid, during the violent evolution of the gas, and so brought into contact with hydrogen and air, act just as spongy platinum would do under the circumstances. The performance of such operations in the open air is recomended. The ignition can be shown, according to M. Hoffman, by treating a few kilogrammes of finely divided zinc with acid; the zinc dust, he says, may even ignite by contact with water.

PACIFIC STATES WATCHMAN.

CONSOLIDATED WITH "PACIFIC WORKMAN."

A Home Journal for the Ancient Order of United Workmen.

VOL. 5.—NO. 3. SAN FRANCISCO, CALIFORNIA, FEBRUARY 1, 1881. { In advance, $2 a year. Single copies, 10 cents.

A. O. U. W.
Home Paper.

Subscription, $2 a year.

The Reception to the Grand Lodge.

We give in this issue the programme of literary exercises, together with the *menu* prepared for the banquet. The doors will open at 7 o'clock, and the exercises will commence promptly at 8. The Grand Lodge officers, with the Chairman of the Reception Committee, will occupy the rostrum, the members of the Grand Lodge and their families will be seated on the main floor in front of the Grand officers. All others at the side and gallery. After the literary exercises are closed, the chairs will be removed and dancing may be enjoyed by all who desire.

Tickets have been issued to every member in San Francisco, with an additional ticket to give to a friend. Invitations have been sent to every Lodge in the State for their members to attend, and they can procure tickets of admission from their representatives to the Grand Lodge. The members of the Grand Lodge will be entertained free. Members will be admitted to the pavilion free, and those desiring hat room will be charged 25 cents. There will be a cloak-room for the convenience of ladies, at which no charge will be made.

Those who desire can procure tickets which will admit them to the banquet-room, where a fine collation will be served between the hours of 11 and 2 o'clock, at 50 cents for each person. The supper will be under the supervision of Jules Harder, caterer at the Palace hotel. It is estimated that there will be over 6,000 in attendance, and be one of the grandest affairs in the history of fraternal societies. There will be seating capacity for 600 at one sitting at the banquet table. Mr. Harder has made preparations to supply his guests with all that they wish. The smoking-room will be at the right from the entrance on Mission street. The oyster-room will be located on the Eighth street side at the right from the entrance on Market street. We are assured by Mr. Harder that there will be ample accommodation at the supper table for all.

Order for the Week.

On Tuesday evening, February 1st, at B. B. building, 120 Eddy St., Unity lodge, 127, will exemplify the secret work. A cordial invitation is extended to all brothers to be present.

On Wednesday, February 2d, in Covenant Hall, B. B. building, Valley Lodge, No. 30, will give the M. W. degree to from 75 to 100 candidates. Such an occasion will be well worth visiting. It is the largest number ever initiated at one time in this State.

On Thursday evening, February 3d, the reception of the Grand Lodge Representatives will take place at the Mechanics' Pavilion. It is expected that it will be one of the most notable events in the history of fraternal organizations.

There will be interesting exercises in each Lodge during the week. Let the Representatives call on their city brethren during their stay in this city. By consulting our Lodge directory the location and night of meetings of each Lodge can be learned.

"CHARITY, HOPE AND PROTECTION."

We have to thank the Recorders and other officers of Lodges for their kindness in furnishing a list of officers of their respective Lodges. From the names presented we give in this issue a corrected directory, and if there are any errors, we should be pleased to learn of the fact. The names as printed have made about 11 columns of our paper, and is valuable as showing where the Order is organized in different portions of the State.

The Virtues of the A. O. U. W.

Gaze, gentle reader, upon the figure on whose brow is engraved the letters "A. O. U. W.," and then picture to your mind some home whose father has passed away to the brighter world beyond, leaving those dependent on him as wards of the Order, and you will grasp in all its fullness the mission of the A. O. U. W. In a word, the picture typifies that out of its abundance the Order will protect the family of every deceased brother. It pledges its Faith; It guarantees that the Hope of each and every one of its members will find full fruition; and with Faith and Hope is associated the greatest of all—Charity—with Protection encircling and enfolding beneath its broad mantle the home of every brother in the land. The Order has in this State over 10,000 good and true men—the flower of California's manhood pledged to protect the home of a departed member, and then if disaster should befall us, there is back of that 80,000 more to whom we can call for assistance. Let those who are not yet enrolled in its ranks lose no time in being so. They will bless the hour when they joined the Ancient Order of United Workmen.

Our Grand Officers.

The past year has been a successful one to our Order. Every Workman (who has been true to himself and associates) has reason to rejoice at the growth and accomplishments of the A. O. U. W. thus far. In a word, we have special reasons to be proud of our Order in California, and great cause to be thankful as well. Has this work been done by chance? Do we not owe a sincere vote of thanks to our principal officers—present and past—in both subordinate and Grand Lodges? And more than that, our lasting love, gratitude and respect. They have certainly done well. They have won the confidence and respect of the Workmen who placed them in the lead. They have WELL HONORED the choice. They have stood in bold relief before us, and in strong contrast with many men in social and political positions who have demeaned themselves and their offices.

ATTENTIONS TO DUTY.—It is a good sign to see Representatives to the Grand Lodge punctual in attendance, and strict in attentions to the business of the sessions, as they are in the habit of giving to their individual business when at home. One member from Shasta County remarked, during the session last year, that he was paid by his Lodge to do his whole duty, and be able to report the important transactions of the entire session of the Lodge, and he should attend to no private business, or allow amusements to interfere with his first duty to his Lodge.

WE have to beg the indulgence of some of our correspondents. The pressure upon our columns has compelled us to leave over for our next issue several communications. Our usual department of "Fraternities" has suffered in like manner. Our next issue will be a 24-page edition, when we expect to have room enough to accomodate all.

THE total beneficiary money received by the whole Order during November was $133,659.50; disbursements, $118,302.50.

Home Miscellany.

A Cashmere Suit.

O, softest Cashmere, since thou art the fashion
Tell me thy story, as we sit to-day;
Came thou from Tartar steppes, or plains Circassian,
Or guardian hills of mystical Cathay?
Australian "walks," or Zulu's savage strand
Or broomy braes of lovely Westmoreland?

So soft and delicate, that English fairies
Might wear thy fleecy folds. Thou mayhap came
From the green pampas around Buenos Ayres,
Or mountains where fierce Affghans guard their fame.
Not Jason's fleece had tale more wild and strange
Than thou could tell of travel and of change.

Of lonely watches and of patient labor,
Of peaceful shepherds underneath green trees,
Of flocks kept only by the gun and saber,
Of weary journeys over pathless seas,
Of giants made of cranks and wheels and bands,
And wondrous dyes from far-off tropic lands.

Of cunning hands that wove in strange devices
Endless reliefs and borders, fold on fold;
Until thy web with many a charm entices
The smile of beauty and the meed of gold.
Yet, marvelous fleece, forget each memory
In the still fairer ones that yet shall be.

When young Jeannette, with soft, persuasive fingers,
Foldeth thy beauty o'er her gentle heart;
For love around the maiden ever lingers,
And all sweet things in her have share and part.
Then thy strange fate shall find its noblest place,
Blent with fond human hopes and human grace.

The Wife's Wages.

"Well, Nettie, what do you want? said Mr. Jarvis to his wife, who stood looking rather anxiously at him after he had paid the factory hands their week's wages.

"Why, Donald," said she, "I thought as I had worked for you all the week, I would come for my wages too. You pay Jane two dollars a week, surely I earn that, and I would like very much to have it as my own."

"Pshaw, Nettie, how ridiculously you talk! You know that all I have belongs to you and the children—and don't I furnish the house and everything? What under the sun would you do with the money if you had it?"

"I know, Donald, that you buy the necessaries for us all, and I am willing that you should do so still, but I should like a little money for my very own. We have been married fifteen years, and in all that time I do not seemed to have earned a dollar. As far as money is concerned I might as well be a slave. I can not buy a quart of berries nor a book, without asking you for the money, and I should like to be a little more independent."

Mr. Jarvis, proprietor of Jarvis Mills, worth hundreds of thousands of dollars, laughed derisively.

"You're a fine one to talk of independence," he said. "If you should start out to make your own living, you'd fetch up in the poor-house soon enough, for what could you do to earn a living? The girls in the factory know how to do their work, and they earn their wages. When I have paid them my duty is done; but I have to board and clothe you, and to take care of you when you are sick. If I had to do that for the girls, they would have precious little money left, I can tell you."

"Donald, I gave up a good trade when I married you. For five years I had supported myself by it, and many a time since have I envied myself the purse of those days. As for my not earning anything, now I leave it to you to say whether it would be possible to hire another to take my place; and how much it would cost you to go without me a year? I know the girls have but little left after paying their expenses, but they enjoy that little so much. Allie Watson supports herself and mother with her wages, and they both dress better than I do. Jennie Hart is helping her father pay off the mortgage on his farm, and she is so happy that she can do so. Even Jane, the kitchen girl, has more freedom than I, for out of her own money she is laying by presents for her relatives, and will send them Christmas, as much to her own pleasure as theirs. Yesterday an Indian woman was at the house with such handsome bead work to sell, and, altho' I wanted some money so much, I had not a dollar. I felt like crying when Jane brought in her week's wages and brought half a dozen articles that I wanted so much. You often say that all you have is mine, but five dollars would have given me more pleasure yesterday than your hundreds of thousands of dollars worth of property did."

"No doubt of that, Mrs. Jarvis. You have no idea of the value of money, and would have enjoyed buying a lot of bead trash that wouldn't be worth a cent to anybody. Jane needs a guardian if she fools away her money like that. She will be in the county house yet if she don't look out. It's lucky that men do hold the money, for there's not one woman in a hundred who knows how to use it."

"For shame, Donald Jarvis! You know better! Look at Jerry and Milly Craig will you, and say that he makes the best use of his money. She is at home with her parents every night, making her wages go as far as possible toward making them comfortable, while he is carousing in the village, wasting his time and money, and making a brute of himself besides. And why does Mrs. Satron come to receive her husband's wages herself? Simply because he can not get by the saloon with money in his pocket, and if she did not get the money they would all go hungry to bed the day after his wages are paid. And I believe that every woman who earns money here spends it as wisely as the average of men, and I have yet to hear of one of them being in debt."

Mr. Jarvis knew that he could not gainsay a word his wife had said, for they were all true. Luckily he thought of Jane.

"Well, how much do you suppose Jane will have left when New Year comes? If she should get sick how long could she pay for such help as you have?"

"It is not likely she will lay up many dollars out of a hundred a year; but she is laying up something better, I think. Last winter she sent her mother a warm shawl and a pair of shoes, and to her brother and sister money to buy new school books and the warm, loving letters they send her do her more good than twice the amount of money in the bank would. This year she is laying by a number of useful and pretty things for them, and if any misfortune should happen to Jane they would only be too glad to help her."

"Well who do you suppose would help you if you needed help?" said Mr. Jarvis, for want of a better question. Mrs. Jarvis eyes sparkled angrily as she answered:

"Nobody. If you should loose your property to-day I should be a beggar, without a claim on any one for help. You have always held your purse strings so tightly that it has been hard enough to ask for my own necessities, leaving others out altogether. Many a time a dollar or two would have enabled me to do some poor man or woman untold good, but altho' you have always said that all your property was mine, I never could and cannot now command a dollar of it."

"Lucky you couldn't; if you wanted to spend it on beggars"

"Donald you know that I would spend money as wisely as you do. Who was it that only last week gave a poor, lame beggar five dollars to pay his fare to Burton, and then saw him throw his crutches aside and make for the nearest saloon? Your wife could do no worse if trusted with a few dollars. You say that the money is all mine, yet you spend it as you please, while I cannot spend a dollar without asking you for it and telling you what I want it for. Any beggar can get it in the same way? Christmas you bought presents for us and expected us to be very grateful for them. A shawl for me of the very color that I cannot wear, a set of furs for Lucy that she did not need, a drum for Robin that has been a nuisance ever since, and a lot of worthless toys that were all broken up in a week. There were $40 or $50 of my money just the same as thrown away, yet when I ask you to trust me with two or three dollars a week you cannot imagine what use I have for it, and fear it will be wasted.

"Well," snapped the proprietor. "I guess it is my own money and I can spend it as I please. I guess you'll know it, too, when you get another present."

"Oh, it's your money, then? I understood you to say it was all mine, and intended to protest against your spending it so foolishly. If it is your own, of course you have a right to spend it as you please; but it seems to me that a woman who left parents, brothers and sisters, and all her friends, to make a home for you among strangers, a woman who has given her whole life to you for 15 years, might be looked upon with as much favor as you give to beggars, who are very likely to be impostors. I know that you seldom turn them off without help. Perhaps I might be more successful if I appealed to you as a beggar. I might say, kind sir, please allow me out of your means a small pittance for my comfort. It is true I have enough to eat and do not suffer for clothing, but altho' I work for my master from morning till night, and if his children happen to be sick from morning until night again; yet he does not pay me as much as he does his cook, and I am often greatly distressed for want of a trifling sum which he would not mind giving to a perfect stranger. The other day while he was from home, I had to go to the next station to see a dear friend who was ill, and not having a dollar of my own, I was obliged to borrow the money from his cook. I was so mortified! And not long since the berry woman came with such nice berries to sell, and my little girl, who was not well, wanted some very badly, but I had not even five cents to pay for a handful for her. Yesterday a friend came to me to assist in a work of charity. It was a worthy object, and I longed so much to give her a little money for so good a purpose, but tho' the wife of a rich man I had no money. Of course, I might ask my husband for money, and if I told him all about what I wanted with it, and he approved of my purpose, and was in a good humor, he would give it to me; but, sir, it is terribly slavish to have to do so, even if I could run to him every time I wanted anything. People say I am a fortunate woman because my husband is rich; but I often envy the factory girls their ability to earn and spend their own money. And sometimes I get so wild thinking about my helplessness, that if it was not for my children, I think I should drop into the river and end it all."

"Nettie! Nettie Jarvis! What are you saying?" cried the startled husband at last, for the far-away look in her eyes as if she did not see him, but was looking to some higher power to help her, touched his pride if it did not his heart, for he had a good deal of pride in a selfish sort of way. He was proud to be able to support his family as well as he did. He was proud to think he did it himself. He was proud that when his children needed new shoes he could tell his wife to take them to Crispin's and get what they needed. He did it with a flourish. He was not one of the stingy kind—he liked to spend money; and when Nettie, who was once the most spirited young lady of his acquaintance, came meekly to him for a dress or cloak, he was sometimes tempted to refuse her money just to show her how helpless she was without him. Yes, he was proud of his family, and wanted them to feel how much they depended upon him. He would have felt aggravated if any one had left his wife a legacy, thus allowing her to be independent of his purse. The idea of her earning money as the other work-folks did, never entered his mind. He "supported her," that was his idea of their relations. He never had happened to think that it was very good of her to take his money and spend it for the good of himself and his children. He never had thought that any other woman would have wanted big pay for doing it. He had even thought himself very generous for allowing her money to get things to make the family comfortable. Things began to look differently to him just now. Could it be that he was not generous—not even just—to his wife? Had he paid her so poorly that her 15 years of faithful labor for him that if she had been obliged to begin the world for herself that day, it would have been as a penniless woman, notwithstanding the houses, the lands and mills that he had so often told her were all hers; for he knew, as every one else did, that not one dollar of all he had would the law allow her to call her own.

How fast he thought, standing there at the office window looking down at the little houses where the mill hands lived. Could it be possible that his wife envied them anything? Could it be that he was not as good a man as he thought? He had felt deeply the wrongs of the slaves, whose labors had been appropriated by their masters, and when a negro who had worked 20 years for his master before the emancipation had freed him, came to Jarvis mill friendless and penniless, the heart of the proprietor swelled with indignation at such injustice. He was eloquent on the subject, at home and abroad, and wondered how any one could be so cruel and selfish as to commit such an outrage against justice. He had called him a robber many a time, but now Donald Jarvis looked to himself very much like the old slaveholders. Massa Brown had taken the proceeds of Cuffee's labor for his own without even a "thank you" for it. True, when Cuffee ate he had given him food, when he was sick he had given him medicine, and he had clothed him too, just as he himself thought best. Mr. Jarvis had married a loving, conscientious woman, and for 15 years had appropriated her labors. Her recompense had been food and clothes, such as he thought best for her. A little better than Cuffee's perhaps, but the similarity of the cases did not please him. He had expected his wife to be very grateful for what he had done for her, but now he wondered that she had not rebelled long ago. Had his life been a mistake? Had his wife no more money or liberty than Cuffee had in bondage? Was Donald Jarvis no better than Massa Brown?

His brain seemed to be in a muddle, and he looked so strange that his wife, anxious to break the spell, took his arm, saying, "Let us go home, dear. The tea must be waiting for us." He took off his hat in a dreamy way and they walked home in silence. The children ran joyously to meet them. The yard was so fresh and green and the flowers so many and bright that he wondered he had never thanked Nettie for them all. Hitherto he had looked upon them as his; but now, he felt that his interest in them was only a few dollars, that would not have amounted to anything without his wife's care. His children were tidy and sweet, and everything around and in the house had that cheery look that rested him so after the hard, dull day at the mill. They sat again at the table which had been a source of comfort to him so many years, and he wondered how he could have enjoyed it so long without even thanking the woman who had provided it. True, she had used his money in bringing it all about, but how else could his money be of use to him? Who else could have turned it into just what he needed day after day for years? And he began to have an undefined feeling that it took more than money to make a home. He glanced at his wife's face as he buttered his last slice of bread. It was not that of a fair, rosy bride whom he had brought to the mill years before; but at that moment he realized that it was far dearer to him, for he knew that she had given the bloom and freshness of her youth to make his home what it was.

And a new thought came to him. "Who was comforting her now when she had so much care?" Was not that what he had promised to do when he brought her from her old home? He sighed as he thought how far he had drifted from her while holding her in a bondage equal to Cuffee's. Nay, he felt that her claims were far more binding than any which had ever held the negro, and that his obligations to her were so much the greater.

Something called the children out doors, and Mr. Jarvis took his easy chair. His wife came and stood beside him. "I fear you are not well, Donald, or you are displeased with me?"

He drew her into his arms and told her how her words had shown him what manner of man he was, and there were words spoken that need not be written, but from that day forth a different man was the proprietor of the Jarvis mills, and there was a brighter light in Mrs. Jarvis' eyes, for at last she had something of her own, nor has she regretted she "applied for wages."

Homely Accomplishments.

There are a few of the accomplishments prized by our grandmothers which even in those days of machinery, of co-operation, and of luxurious living, we cannot afford to have classed with the lost arts. Among these is the art of plain sewing. In the olden times the sampler and patchwork made girlish fingers early acquainted with the use of the needle, and though no one can care to see those particular industries revived, yet there are few women who do not find sooner or later that in their lives "the needle bears equality with the beautiful craft of the pencil and the mighty power of the pen." Whether it is cheaper or not to buy ready-made under-clothing is not the question. The point insisted on is that every woman should know how to make her own clothing neatly, skillfully and readily. She may add to this knowledge that of embroidery and lace making, just as she may add to practical knowledge of bread making that of making cakes and desserts. There is a great effort made now-a-days to acquire accomplishments comparatively useless and the neglect of those which are of first consequence. The little girl may begin her apprenticeship to the needle by making doll clothes, and as patterns for all manner of lilliputian garments are for sale in pattern stores, she can learn to cut out and put together at the same time. Of course she must have instruction, direction, assistance; to give these is one of the purposes her mother was specially created for. By and by the juvenile seamstress may be promoted, and permited to exercise her skill on large garments and later be taught machine sewing. But before this she should master all the mysteries of "over and over" stitch, of hemming, felling, overcasting, catstitch, backstitch, gathering and facing down. Little folks always want to do what they can't do, and a promise of permission to undertake a difficult task will often stimulate a child to do well that which is entirely within its power. Then they should be permitted to enter upon large undertakings.

Mending is another accomplishment possessed by very few young ladies. This branch of domestic industry is usually relegated to the mother or grandmother of the family when there is a grandmother, and the young ladies play the piano or embroider when they would be more usefully employed in mending. This imposes a great deal of drudgery on the one who has all the mending to do, and releases from what should be a pleasant task, those most able to perform it. No matter how wealthy a young lady is, she should know when her wardrobe is in perfect order and be able to keep it so with her own hands.—*Religious Herald.*

What Women Invent.—Some one who has taken the trouble to count the patents issued to women finds that the number for the year ending July, 1880, was 70, and 10 more than the average. Most of the inventions of women have to do with household appliance. Among the past year's are a jar lifter, a bag holder, a pillow-sham holder, a dress-protector, two dust pans, a washing machine, a fluting iron, a dress chart, a fish boner, a sleeve adjuster, a lap table, a sewing machine treadle, a wash basin, an iron heater, sad irons, a garment stiffener, a folding chair, a wardrobe bed, a weather strip, a churn, an invalid's bed, a strainer, a milk cooler, a sofa bed, a dipper, a paper dish, and a plaiting device.

The Soft Answer.—Not long ago I heard a little boy calling out in a loud, angry tone to his sister, a little older, "Let my book alone!" Very softly and pleasantly she replied, "I will, I was going to put it on the shelf, where it would not get soiled." Walter (that was the little boy's name) sat still for a long time and said not a word. But when at last he did speak, his voice was soft and kind as that of his sister. The words of the wise man came immediately to my mind—"A soft answer turneth away wrath"—and I could not help thinking, if all the harshness of manner and angry words were only met by gentleness and kindness, how many who at first seem harsh and repulsive would soon become kind and companionable.

Women's Work.—I have often wished that a corner of your paper was devoted to the farmers' wives, and therefore read with pleasure the letter from Mrs. W. Hatcher. The similarity of our accounts has tempted me to reply. My account for the year show $81.45 received for eggs and $110.65 for poultry. But I did not have charge of the butter. I think a neighbor of mine has done much better than I, for she has taken in $235 for butter, eggs and poultry, and in addition has had the sole charge of the house and four children, all under seven.—*Eunice, in Yolo Democrat.*

Man's Love.—Thus writes Bushnell: Every man's life, practically speaking, is shaped by his love. If it is a downward, early love, then his actions will be tinged by it; all his life will be as his reigning love. This love, you perceive, is not mere sentiment, or casual emotion, but is the man's settled affinity; it is that which is to his character what the magnetic force is to the needle, the power that adjusts all his aims and works, and practically determines the man. It must only be a downward love, or an upward love; for being the last love and deepest, of the man, there cannot be two last and deepest, it must be one or the other. And then, as this love changes, it works a general revolution of the man.

For our Boys and Girls.

Our Puzzle Box.

Cross-Word Enigma.

My first is in poetry, also in prose;
My second is in tulip, but not in rose;
My third is in heal, but not in cure;
My fourth is in certain, but not in sure;
My fifth is in knowledge, but not in books;
My sixth is in actions, but not in looks;
My seventh is in gentile, but not in Jew;
My eighth is in false, but not in true;
My ninth is in humble, but not in low;
My tenth is in nimrod, but not in bow;
My whole was a brave patriot, and kind;
Whether statesman or general, please find.

CEPHA.

Geographical Puzzle.

One morning in (cape on the southern point of New Jersey) I went to my sister (cape on the coast of Massachusetts), who lived in the country. I boarded the cars at Jonesville. Soon I cast my eye on a nicely dressed young (island in the Irish sea) sitting in front of me. We dropped into conversation; he said he was just returning from a visit to his uncle (mountain in Massachusetts). I arrived at my sisters about dinner time. We had for dinner roast (country in Europe), bread and butter, baked (river in Idaho territory), with plenty of (lake in Utah), and (islands west of North America), and lots of (river in Montana territory) to drink. My sister then proposed going to a festival to be held that afternoon and evening. I consented. She gave all the children a (city in England) and dressed them; then handed me a bottle of (city in the German Empire). I could not get the (city in Ireland) out, so she handed me a cork-screw with which I removed it very easily. We started, but had not gone far when I saw a very large (river in Wisconsin) lying near the road, but approaching it, I saw that it was (river in Maine). When I got to the place where the festival was to be held, I ascertained that a (cape on the Western Coast of Africa) had killed it with a (river in Montana territory). We enjoyed the festival. I stopped at my sister's two days and then went home.

Hidden Animals.

1. Why should I be arrested.
2. You are commanded to do good to all men.
3. That plant I germinated in a hot-house.
4. Shall I only travel to Ohio?
5. You came late, my friend.
6. I placed in a pan the richest of the fruit.
7. Did you see the Modoc at Dover yesterday?
8. I made errands to the store often.

OLD JOE.

Easy Problem.

The sum of five hundred dollars, let at five per cent. interest, has amounted to nine hundred dollars. How long has it been at interest?

DICK, N. S.

LETTER ARITHMETIC.—Wrong-timed.

POETICAL SELECTION—

"When the warm sun, that brings
Seed time and harvest, has returned again,
'Tis sweet to visit the still wood, where springs,
The first flower of the plain"

The Little Girl and the Birds.

There lives near Harrisburg, Ohio—an out-of-the-way place in Hancock county, about three miles west of Mount Blanchard—a very remarkable child only five years old, who seems to have the power to charm birds at will. Her mother first noticed this strange fascination the child possesses about a year ago. The little girl was out in the door-yard among a bevy of snow birds, and when she spoke to them they would come and light upon her, twittering with glee. On taking them in her hands and stroking them the birds, instead of trying to get away from their fair captor, seemed to be highly pleased, and when let loose would fly away a short distance and immediately return to the child again. She took several of them into the house to show to her mother, who, thinking she might hurt them, put them out of doors, but no sooner was the door opened than the birds flew into the room again, lit upon the girl's head, and began to chirp. The birds remained about the premises all winter, flying to the little girl whenever the door opened. The parents of the child became alarmed, believing that this strange power was an ill omen, and that the much-dreaded visitor, death, was about to visit their home. But death did not come, and during the last summer the child has had many pet birds. The child handles the birds so gently that a humming-bird once in her hands does not fail to return. Last winter a bevy of birds kept her company, and she played with them for hours at a time. Every morning the birds fly to her window, and leave only when the sun sinks in the west. The parents of the little girl are poor, superstitious people, and have been reticent about the matter until lately, fearing that some great calamity was about to befall them.

A NOBLE BOY.—A crippled beggar was striving to pick up some clothes that had been thrown from the window, when a crowd of rude boys gathered about him, mimicking his awkward movements, and hooting at his helplessness and rags. Presently a noble little fellow came up, and pushing through the crowd, he helped the poor crippled man to pick up his gifts and put them in a bundle. Then, slipping a piece of silver into his hand, he was running away, when a voice far above him said, "Little boy with a straw hat, look up." A lady, leaning from an upper window, said earnestly, "God bless you for that!" As he walked along he thought how glad he had made his own heart by doing good. He thought of the poor beggar's grateful look; of the lady's smile and her approval; and last, and better than all, he could almost hear his heavenly Father whispering, "Blessed are the merciful; for they shall obtain mercy." Little reader, when you have an opportunity for doing good, and feel tempted to neglect it, remember the "little boy with the straw hat."

Humorous.

Chips.

NEVER kick a man when he's down unless you're sure he can't get up.

WHY didn't a dog want a place in the ark? Because he had a bark of his own.

THOSE that have tried it say that kissing is like a sewing machine, because it seams good.

THE telegraph tells us "the Kurds have fallen back," which, perhaps, indicates that the whey is clear.

THE tramp question: "Madam, will you please give me some old clothes? I am so hungry I don't know where I shall sleep to-night."

A STUDENT at a veterinary college on being asked, "If a broken-winded horse was brought to you to cure, what would you advise?" very promptly replied, "To sell him as soon as possible."

IN a recent article on a fair in his locality, the editor of a western paper says a brother editor took a valuable premium, but an unkind policemen made him put it right back where he took it from.

A CONNECTICUT farmer, who had set out an elaborate scarecrow in his strawberry patch, was disgusted to find that a pair of robins had built their nest and were raising their young under its hat.

A CLERK in one of our Market street stores who is somewhat smarter than his employer, was heard to remark the other day: "Thank fortune, the boss has stopped advertising for the season. Now we will have a rest.

"OH!" said a poor sufferer to a dentist, "that's the second wrong tooth you've pulled out!" "Very sorry, sir," said the blundering operator; "but there were only three when I began; I am sure to be right the next time."

A LADY was praising the ability of her friend's husband and asked how in the world she had ever brought him to such perfection, whereupon her friend cheerfully answered that she did it with a croquet mallet. Their hatchet was borrowed.

Household Hints.

SYRUP OF COFFEE.—This preparation is of great use to those who have long journeys to make. Take half a pound of the best ground coffee, put it into a saucepan containing three pints of water, and boil it down to one pint. Cool the liquor, put it into another saucepan well scoured, and boil it again. As it boils, add white sugar enough to give the consistency of syrup. Take it from the fire, and when it is cold put it into a bottle, and seal. When traveling, if you wish for a cup of good coffee, you have only to put a tablespoonful of the syrup into an ordinary cup, then pour boiling water upon it, and it is ready for use. If desired strong add another tablespoonful.

SALMON AND POTATOES.—I make a very nice breakfast dish as follows: I take a can of California salmon and drain it; I boil half a dozen potatoes and mash them thoroughly, mix salmon and potatoes all together with a little salt, and place the mixture in a baking dish, scoring it nicely with a knife; to the juice of the fish I add a little chopped parsley, a very little mace, and a small lump of butter, which I pour over the top; bake it quickly until it is a golden brown; serve hot.—*Cultivator.*

EGGS, POINT SHIRLEY STYLE.—Separate the yolks and whites of three eggs. Beat the yolks two minutes; then add three tablespoons of milk and one-half teaspoon of salt; beat a little more. Melt half a tablespoon of butter in a spider; pour in the yolks, and when they thicken slightly, pour the whites in without beating. Let them be until they look like the white of a boiled egg, then gently mix them with the yolks with a fork. Serve in a hot dish, with or without buttered toast underneath.

STEWED KIDNEY.—Remove the fat and scald the kidney, drain and pour cold water on it to destroy the strong odor. Cut in pieces, season with black and red pepper, dust well with flour; put in frying-pan, in which a slice of onion has browned, a large piece of butter (remove the onion), and fry until brown; then put it into a saucepan, entirely cover with hot water and let it simmer slowly for several hours. No one could desire a better breakfast dish. Add a little wine for a supper dish.

POTATO CHEESE.—In Saxony the farmers manufacture very good cheese from small parcels of milk by the addition of potatoes. The potatoes are cooked, then washed, and to 8 lbs. of potatoes, two quarts of thick, sour milk are added. Salt and knead like bread dough. In five days it receives another kneading, and is separated into balls of 4 lbs. each, pressed with the hands as compactly as possible into small baskets, and dried in summer in the shade and in winter by the fire. When dry, the cheese is put into tin cans, sealed up, and set by for use in a cool, dry place.

Health Column.

Salves and Plasters.

The tinsmith or plumber who goes through a year's work at his trade without a severe cut or burn is fortunate, but he considers himself equally fortunate if, in the case of a severe injury, he escapes from the dangers of salves and plasters. In regard to their injurious effect upon the skin, Dr. Van der Wrede, whose skill in medicine is quite equal to his knowledge of science, says:

"Plasters and salves are more dangerous even than oil silk or rubber overshoes, as they are usually applied to wounds and sores, and in many cases produce more harm than they do good as they usually protract the cure, and often prevent it entirely. The cause is simply that plasters and salves are mostly waterproof, and therefore interfere with the natural function of the skin; if either of them is placed on a sound portion of the skin, and kept there for a few days the skin becomes sore. Their application is often the cause of the difficulty in healing wounds. Scores of cases have come under our notice where our advice to dispense with the use of so-called healing salves caused a finger which had been sore for months and kept sore by the continual application of different kinds of salves, to heal rapidly as soon as the use of salves was discontinued.

"It is the same with plaster; we have seen it over and over again, that a cut wound which had been covered with a plaster to shut off the air, as a foolish prejudice teaches, had a most protracted and painful course, while a similar wound, simply treated by bringing the edges together and covered with a piece of linen to keep it clean healed in a few days. This keeping clean does not mean to keep off dust and foreign substances, but to clean off the dried blood which may cover the cut. It is even often advisable to put some blood over the edges of the wound after they have been brought together with a few stitches or narrow cross strips of plaster, which, however, must never be allowed to cover the wound. It should not be lost sight of that the skin is made for contact with the air, and that this contact is necessary, not only to keep the skin in healthy condition, but also when repairs are going on; therefore no water-proof plaster should interfere. But blood is soluble in water and absorbs air, and it has a great healing power; in fact, there is no healing salve so efficient as the blood which often covers a wound, and which, therefore, must not be interfered with, by any means.

Under a dried crust of the blood repair goes on actively, as blood contains all the elements required for such repair, and renewal of tissues wants the nourishing ingredients which are found in the blood.

From long experience of both methods of treatment, we can heartily indorse all that the doctor says. We have frequently treated severe burns by pasting a sheet of white tissue paper over them, using pure gum-Arabic freshly dissolved in water. The object of having the gum fresh was to make sure that it had not soured or fermented. Burns which have begun to fester from the use of oils or ointments will frequently yield at once to such treatment, the swelling and inflammation quickly subsiding, healing beginning and the pain ceasing.

AN IMPROVED GLUE DRESSING FOR WOUNDS. Cabinet makers and wood workers generally are familiar with the uses of glue in dressing tool cuts and other slight wounds incident to their calling. The glue pot is always handy in their shops, and a glued rag answers as well as the best adhesive plaster. In a recent paper before the Philadelphia Academy of Surgery, Dr. Hewson recommends the addition of acetic acid to the glue, and a little attar of roses to cover the odor of the glue and the acid. This compound spread on paper or muslin makes, he says, a good substitute for adhesive plaster for surgical use. It is easily and quickly prepared, simply by putting into a vessel of boiling water, a bottle containing one part of glue to four, by measure, of the acid, and letting the bottle remain in this bath until the glue is fully dissolved and mixed with the acid. Common glue may be used and officinal acetic acid, to be had at any drug store. The mixture should be kept in a wide-mouthed bottle, well stoppered by a long cork, which can always be removed by heating the neck of the bottle. Care should be taken to keep the mouth of the bottle clean by wiping it well with a cloth dipped in hot water. A bottle of this cheap and easily prepared dressing would be a good thing to have at home as well as at a workshop.

A SPINAL ROOT OF THE OPTIC NERVE.—Stilling, of Strasburg, showed preparations to the International Ophthalmological Congress at Mailand, in September last, which he believes demonstrate the existence of a spinal root of the optic nerve, which brings the retina into direct connection with the medulla. This root passes from the external corpus geniculatum, in a winding course, deep between the bundles of the crus cerebri, and can be traced into the pons; and it appears to course down in the direction of the medulla, although its further progress cannot be demonstrated. The existence of this branch is interesting on account of the light it throws on certain physiological relations between the medulla and the retina, and may constitute the hitherto undiscovered link between certain diseases of the spinal cord and of the optic nerve.

Worth Knowing.

SPONTANEOUS COMBUSTION OF SOFT C[illegible]. The Boston Manufacturers' Fire Insurance [illegible] states that at present rates of prices semi-bituminous and soft coals are coming into more general use than they have been, especially culm or fine coal. Members are warned that, with few exceptions, such coals are very liable to spontaneous combustion, if stored when the least wet or damp in closed sheds where there is little or no circulation of air. If such coal is not protected from being wet, it is said to deteriorate. The company objects to the storage of semi-bituminous or bituminous coal in or under any building that would expose a risk taken by this company to danger if it took fire. It is suggested that a roof may be sufficient to protect soft coal from being much wet, and that, under a roof not confined at the sides, there would probably be such a free circulation of air as to prevent spontaneous combustion.

THE UTILIZING OF THE TIDES.—A Philadelphia engineer has invented, it is claimed, a machine by which the power of the tides can be utilized. Numerous plans have been proposed for the accomplishment of this most desirable end, but only under exceptional conditions have they been practical or economical. If the new device can harness the tide in an open channel, so as to convert any considerable portion of the vast power into working force, the inventor will rank among the great benefactors of humanity. Emerson says somewhere: Hitch your wagon to a star. A device for utilizing mechanically the free tides, as they sweep along our shores, would come next to that, since it would enable us, through converters and carriers of electricity, to hitch our wagons to the sun and moon.—*Sci. Am.*

DIGESTIVE PRINCIPLE OF FIG JUICE.—M. Bouchut, who has been investigating the digestive principle of the papaw tree, has extended his researches to the common fig, and the result of preliminary experiments, carried out upon the milky juice collected from a fig tree in April last, seems to show that this juice contains a powerful ferment capable of digesting albuminoid matters. As much as 90 grammes of fibrine, added in eight successive portions at intervals of one or two days, to five grammes of the milky juice, and kept at a temperature of 50° C. was for the greater part digested, leaving a small amount of a white homogeneous residue, and the solution having the odor of good broth.

CLEANING VELVET BY THE WET METHOD.—Two ox galls are placed with some honey and soap in soft water and boiled while well agitating. The velvet is laid on a flat, clean, wet table, and well wetted with the above mixture by means of a sponge. It is then wound on a mangle and rolled until the dirt has disappeared; then it is rinsed in clean water, again rolled on and hung up to dry. The half dry velvet is wetted on the back with isinglass previously soaked and boiled with water, the piece is then put between cloths and rolled until dry. It should be finally rubbed with a piece of cloth.

SOLID MUCILAGE.—Mucilage in a convenient solid form, and which will readily dissolve in water, for fastening paper prints, etc., may be made as follows: Boil one pound of the best white glue, and strain very clear; boil, also, four ounces of isinglass, and mix the two together; place them in a water bath—a glue pot will do—with one-half lb. of white sugar, and evaporate until the liquid is quite thick, when it is to be poured into molds, dried, and cut into pieces of convenient size.

PAINT FOR BASEMENT WALLS.—A dry coating for basement walls may be made as follows: Take 50 lbs. of pitch, 30 lbs. of resin, 6 lbs. of English red and 12 lbs. of brick-dust. Boil these ingredients, mix them and stir thoroughly, then add about one-fourth the volume of oil of turpentine, or enough to make it flow easily, so that a thin coating may be laid on with a whitewash or paint brush. Walls thus coated are proof against dampness.

EFFECTS OF ELECTRIC LIGHT.—It is said that if a person of fair complexion exposes himself to the electric light for some time in examining the action of lamps, the hands and cheeks will show all the symptoms of "sunburn," even in midwinter, and he will develop freckles on his countenance as quickly as when he goes about unprotected by a sun umbrella in midsummer.

TO INFLATE SMALL BALLOONS.—Gas for inflating small balloons may be made by placing a quantity of zinc scraps in a bottle, pour over them a mixture of sulphuric acid and water, and hydrogen gas will be rapidly evolved. Convey this gas through a wash-bottle to your balloon. This experiment should not be performed in the vicinity of a light or fire.

SEA SICKNESS.—Mr. F. W. Cory, in the *Lancet*, states that the best remedy he has found for sea sickness is a combination of small doses of bromide of potassium and hydrate of chloral taken with citrate of magnesia during effervescence.

COLD FEET.—Persons who are troubled with cold feet will find it greatly to both comfort and health to sprinkle powdered mustard or pepper in their stockings.

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Bridgeport, 107.

This Lodge is located at North San Juan, Nevada county. The membership at present is 45, and increase of two during the term. C. E. Molloy, D. D. G. M. W., writes us that the members take great interest in the Order.

Crescent, 166.

EDITORS WATCHMAN:—We were organized as a Lodge, March 24th, 1880, with 20 charter members, since that time six have been added. Most of our members are farmers, many living some distance from the Lodge. We have never lacked for a quorum, always meeting each week. We consider our Lodge under as good working order as any in this district, and shall be glad to prove it to all good brothers who will come and sit with us on Thursday evening. Yours, in C. H. and P., J. A. SAFFORD, Cacheville, Yolo Co.

Main Top, 156.

The officers of this Lodge, located at Michigan Bluff, were duly installed, Jan. 3d, by J. C. Harver, D. D. G. M. W., of Forest Hill. Edgar Sutliffe, Recorder, writes us that they hold regular weekly meetings, on each Monday evening. The membership at present is 25 M. W. in good standing. Chas. Campbell has been elected Representative to the Grand Lodge.

Smartsville, 119.

EDITORS WATCHMAN:—Smartsville Lodge, No. 119, installed the officers elect on Tuesday evening, Jan. 11th, 1881. After the installation the wives and lady friends of the members sat down to a collation, which was well appreciated. After partaking of the collation Prof. Davis furnished music for dancing and singing, and the members and their friends passed a very pleasant evening. It is the wish of those that attended that these occurrences will often happen. These social gatherings are productive of much good, as our better halves will encourage more prompt attendance from their mates, and take an interest in the welfare of the Lodge. Every wife of an A. O. U. W. should encourage her husband to attend the meetings regularly and see that his assessments are promptly paid—in that depends her legacy of $2,000.—C. C. DUHAIN, P. M. W.

San Francisco Lodge Locals.

Burns, 68.

There was an unusually large attendance at the meeting on the 26th inst. After the conferring of the M. W. degree on two, a fine literary programme was satisfactorily rendered. It was opened by a song (trio), Bros. Doane, Fairwether and Pohlman; solo and encore, F. P. Desmond; recitation, M. J. McGrath; song, A. J. Fairwether; song, Gus. Pohlman, and for an encore recited a humorous piece. W. W. Hanscom, D. D. G. M., being present, was asked to address the Lodge, which he did in a pleasing and acceptable manner. Bro. H. J. Tinkham recited a very short but loud speech. Solo, D. S. Tyson, followed by a song from Robert Wilson. A few appropriate remarks were made by Bro. Doherty, M. W.; after which the trio, Doane, Fairwether and Pohlman, closed the pleasant exercises with a song. Fraternal feeling, hearty approbation and unbounded joy seemed to prevail throughout the evening, and all agreed, both members and visitors, that they had enjoyed a fine treat.

Fidelity, 136.

On the occasion of the visit of the Grand officers to this Lodge, a full attendance greeted them. The kind and heartfelt reception given to the Grand officers at the previous Lodges already visited and repeated by the large and enthusiastic brethren of Fidelity, gave an inspiration to our honored guests that drew from them eloquence that was worthy of the occasion. The recognized and unprecedented success of this Lodge stands as an enduring monument to the pioneers who have worked so faithfully to make her what she is—the pride of our city.

Friendship, 179.

This young Lodge, under the guidance of her young officers, with the genial Bro. David Hart as M. W., gave the work almost letter perfect. Bro. Taylor paid them a very high compliment for the precise and correct manner in which the degrees were conferred. Pleasant and short speeches were given by Bros. Taylor, Pratt, Loud, Jacobs, Falkenstein, Breed, and others. It was the unanimous expressed opinion that with her present cabinet and enthusiastic and carefully selected membership, she will be one of the brightest gems in our Order.

Magnolia, 41, and Memorial, 174

On Jan. 17th, Clay W. Taylor, G. M. W.; Wm. H. Barnes, G. F.; and E. F. Loud, D. G. M., called on the brethren of Magnolia, 41. There were five petitions received for the degrees, and the M. W. degree conferred on one. A goodly number of their own members were in attendance, besides visiting brethren from the city and country Lodges. Among other things, the Grand Master said: "Long years of experience have proven life insurance unsatisfactory, and the toiling thousands, feeling the necessity of better protection, have banded together for mutual security. Our capital stock is the honor of a great brotherhood. It is not lost in bad investments or mismanagement. We are carrying to-day nearly $200,000,000 in insurance, and paying out $1,000,000 annually. When I, as an humble member of this grand organization, can reach out the fraternal hand of fellowship on an equality to a member of this Order, it is something to be proud of. I am proud of California and equally proud of the Ancient Order of United Workmen." E. F. Loud, D. G. M. W., made some terse and sensible remarks, which were well received. Wm. H. Barnes, G. F., advanced some new ideas connected with fraternal societies. Among the many, we here give a few. The Lodge-room is a school, and one of the chief educators in our land. Like water that reaches its highest level, so the members of the Lodge-room rise to the highest intellectual standard of its pure and educated members. The herculean labors of our G. M. W. and his assistants are deserving of a warm recognition at our hands. His executive ability in introducing a new work with such uniformity and exactness deserve our warmest thanks. The Lodge was closed, and the Grand officers, adding to their number the brethren of Magnolia, called in a body on Memorial, 174. Bros. Loud, Barnes, Taylor, Hoeber and Coon delivered short speeches. Bro. Smith made a fine hit on the names of the Grand officers in his speech.

Myrtle, 42.

The meeting of this Lodge on Jan. 15th, was one of more than ordinary interest. The M. W. degree was conferred on one. The usual business was dispatched quickly, after which Wm. H. Barnes, G. F., delivered a short speech, followed by the usual literary exercises. Song, Bro. Bogart; reading, Bro Morris; recitation, Bro. ———; reading, Bro. Morris. The programme was short but very entertaining. This Lodge is extensively humorous and often partakes of practical jokes on each other. On this evening, Bro. Barry, P. M. W., managed to get a fine gold-headed cane belonging to some one else, and presented it with due dignity to Bro. Morris, the efficient Financier, in a speech recounting his valuable services. Bro. Morris received the cane, but immediately discovering some other name engraved thereon, dryly remarked that he would take it and as he had possession of it would keep it. The brethren of Myrtle are a jolly crowd and always have something on hand to please and make their meetings interesting.

Noe Valley, 185.

This young Lodge had one of those social reunions so common in our Order, on Tuesday evening, Jan. 25th. The business of the Lodge occupied but a very short time, and then the doors were thrown open and wives, daughters and children filled their cosy hall. The meeting was called to order by Bro. J. D. Thompson, who welcomed the audience and introduced Wm. H. Barnes, G. F., who on this occasion outdid himself and made a fraternal speech which more than pleased. "A Vision", J. D. Thompson, M. W., of Noe Valley; song, Misses Danenfelser, who sang very sweetly and were loudly applauded; reading, A. H. Watson; song, Misses Madson, a very pleasing effort; recitation, Miss Minnie Axford, who acquitted herself with credit and received a hearty encore; piano duet, Sarah Welbon and Lora Jordan, a very acceptable performance; recitation, Miss Edith Moses; piano duet, Mrs. Robinson and Miss Minnie Axford; recitation, Miss Nellie Sawyer; piano solo, Miss Sarah Welbon, "The Thunder Storm", an artistic effort that was well received and secured an encore; original composition, Miss Dudley, a creditable essay; song and encore, Wm. F. Ganzert, Miss Coon playing the accompaniment; declamation, C. B. Thompson; instrumental duet, cornet, Messrs. Westenhaur and Carran; piano solo, Mrs. Dr. McDermot, an artistic performance that was highly applauded and received an encore; piano duet, Misses Canham; guitar solo and encore, Mr. A. Spencer. The programme was closed with the "Fairy Serenade" by the silent club, which was quite numerous, and all made plenty of noise. The exercises were of a very interesting character, principally local talent of Bro. Workmen, their wives and daughters. After the programme, Bro. A. D. Jordan, master of ceremonies, announced that a collation was ready in the banquet room to which all were invited. The hall was cleared and feasting and dancing were indulged in to a late hour. This, the first social party given by this young Lodge was a complete success, and, no doubt, will add many members to the roll.

Olympic, 127.

Those members of Olympic Lodge, 127, who were present on the evening of January 18th, were entertained, and, no doubt, strengthened in the desire to further the cause of the A. O. U. W. On this evening, Grand Master Taylor, W. H. Barnes, G. F.; E. F. Loud, D. G. M. and C. C. Terrill, P. M. W. of Valley, visited the Lodge. It was the first time that our Grand Master has called upon 127. His remarks on this occasion were forcibly and earnestly expressed. He said that our Order has not only the encouragement and aid of older fraternal societies, but there are also many joining its ranks who never before thought it worth while to belong to a secret society. After briefly outlining some general truths in connection with the Order, and having, as he said, spoken the time agreed upon when the Grand officers started out, Bro. Taylor brought his remarks to a close. He was followed by Grand Foreman Barnes, who, in his usual terse and vigorous manner, held the Lodge in close attention for the time he spoke. Deputy Loud then came with one of his happy speeches, interspersed with bright and humorous flashes of wit. The visit was brought to a close by C. C. Terrill, P. M. W., of Valley, making some well considered remarks. The session of the Lodge on this evening was very interesting, the members taking different sides of subjects and discussing them with an ability that we have never before witnessed. One of the beauties of the discussions in this Lodge, is the grace and the perfect exhibition of good breeding and fraternal regard with which they are conducted. And now a word to the careless and negligent in the matter of Lodge attendance and payment of dues and assessments. If it is possible for members to attend the meetings they should do so. We can conceive of no more pleasant place to spend an evening, and besides, each and every member of a Lodge should strive to make his Lodge the one *par excellence*. We intend this more particularly for those who hardly ever are seen in the Lodge-room. Let them come and unite with their brothers to make the meetings attractive and not stop away and say: What is the use of going to the Lodge; nothing is doing there. Let them grace with their presence the Lodge-room. Let them do something to make each meeting one of interest. Then their presence is not only an encouragement to the officers, but individual members with musical and other talents will be more apt to lend their aid in making the meeting attractive. A member should consider it a disgrace to allow his name to be read as suspended, because he was careless in the performance of his duties. They also forget that the subordinate Lodges are the life of the Order, and whatever tends to conserve the interests of the Lodge inures to the benefit of the Order. These remarks are a little outside the limits of a Lodge local. They will apply to every Lodge in the State, and are written especially for the stay-at-homes.

San Francisco, 4.

The Grand officers, in their perambulations, called on the pioneer Lodge, San Francisco, 4, on Jan. 19th. The visitors consisted of Clay W. Taylor, G. M. W.; H. G. Pratt, Grand Recorder; E. F. Loud, D. G. M. Bro. Taylor was in speaking mood, and made one of his short, pithy speeches that was well received. Bros. Pratt and Loud followed, but, as they said, Bro. Taylor had spoken what they wanted to say, they asked to be excused, and immediately hied for the young Lodge, Friendship, 179, where they witnessed the conferring of the J. W. and M. W. degree.

Spartan. 36.

The members of Spartan, 36, are having an unusual degree of prosperity under the guidance of a very efficient corps of officers, with the young brother, W. S. Hout, as M. W. On Jan. 21st, the J. W. degree was conferred on two in a manner that was very gratifying to both members and visitors. Under head "Good of the Order," W. W. Hanscom, D. D. G. M. W., made a congratulatory and what might be termed a farewell speech. Bro. Danforth, P. M. W., in turn paid Bro. Hanscom a fine tribute of praise for his fidelity and arduous labors in behalf of Spartan Lodge. Bro. Robt. Ferral, Superior Judge, made a humorous speech that was well received, followed by W. S. Hout, M. W., in which he said that we will have four representatives at the next Grand Lodge instead of two, as at present.

Sts. John Lodge.

After having visited Washington, 60, the Grand officers called on the brethren of Sts. John. On arriving at the hall they were received with due honors, and in a graceful manner welcomed by Bro. Jephson, M. W. Bro. Taylor was the first to speak. In the course of his remarks, he said: "We hear that in the capital our enemies are trying to enact unfriendly legislation. He was pleased to say, however, that you will find in all places of trust some Workmen who have the same objects in view that we have, and who will watch our interests with a jealous eye. Whilst we have had success in the past, let us watch well that we may have greater triumphs in the future. It will be one of the most pleasant thoughts of my life to know that I had retired from the high position of Grand Master of the A. O. U. W., with only one regret, that I was unable, owing to arduous professional duties, to visit all Lodges in our Grand jurisdiction more than I have." Bros. Loud, Hilton, Reading and Knorp made very acceptable and congratulatory speeches. After this the usual recess and hand-shaking was indulged in. It was a royal reception, and one that will long be remembered by the brethren of Sts. John.

Triumph, 180.

A number of the officers of the Grand Lodge called on this young Lodge on the 18th inst., consisting of Clay W. Taylor, G. M. W.; W. H. Barnes, G. F.; E. F. Loud, D. G. M. W., and a number of brethren from city Lodges. The J. W. degree was conferred on four, after which Bro. Taylor made a few remarks, in which he paid a well-deserved compliment to the officers of the Lodge for their work, saying it was done well, and that the men who stood around the altar and the brethren surrounding them, made him believe that they had selected the right name for their Lodge, *Triumph*. Bro. Barnes made a short speech, that was cordially received, excusing himself from extended remarks, as they wished to visit one more Lodge. Bro. Loud made a few complimentary remarks, saying that he was proud he had the honor of forming this thrifty Lodge. C. C. Terrill, P. M. W., then followed in a few well-timed words. The Grand officers then visited Olympic, 127.

Unity, 27.

This Lodge had a large attendance upon the occasion of the visit of the Grand officers. Bro. Taylor, in a short but grand speech, said: The Order we represent challenges the admiration of our beloved country. Our Order has sprung into existence from a duty we owe to those we love the best. Let us keep up the good work by each one bringing in a friend to swell our ranks. It is a significant fact that in every town in this State you will find the leading men of the State (the real workers in life) in the ranks of the Workmen. I am proud of our brotherhood, our work and our official advocate the WATCHMAN. The pages of this journal are replete with bright thoughts, working nobly for the interests of our cause, and, as compared with any journal east of the Rocky mountains, is ahead of all. Bro. Barnes made one of his grand speeches, followed by Bros. Loud, Reading, Terrill, Martin and Baird. The thanks of Unity Lodge was unanimously voted to the Grand officers for their visit.

Grand Officers' Visit to Washington, 60.

A delegation of Grand officers, consisting of Clay W. Taylor, G. M. W.; E. F. Loud, D. G. M. W.; Prince E. Hilton, D. D. G. M. W.; and E. M. Reading, P. M. W., visited this Lodge. The officers were received with due honors. Bro. Taylor said, among other things: I am glad to meet with men who are trying to carry out the principles of our Order. It is hardly to be presumed that Father Upchurch dreamed of such an organization as this when, with a few mechanics and laborers, he first organized this grand Order. There is no conflict between us and older and more time-honored organizations; on the contrary, we are co-workers and co-helpers in the cause of humanity. I believe we are the grandest part of this great organization. With the "work" in San Francisco I am pleased. I have witnessed the "work," and it is almost letter perfect. To our Grand officers, who have labored so faithfully to accomplish this result, we return our thanks. Bro. Loud made a few remarks. Bro. Hilton being introduced as the faithful guardian of Washington Lodge, excused himself on this occasion. Bro. Reading being called, made a congratulatory speech, taking in all, from the Grand Master to his cabinet, and in a feeling manner detailing some of the many deeds of charity accomplished by the General Relief Committee. A short recess was taken and a personal welcome given to the Grand officers. Having in view a call on one more Lodge, the officers immediately proceeded to call on Sts. John Lodge.

Valley, No. 30.

At the last meeting of Valley, No, 30, a committee of seven was appointed to consider the advisability of celebrating their third anniversary. We have no doubt that the committee will see the propriety of this custom among our Lodges and will answer for a celebration worthy of the occasion. The J. W. degree was conferred on 52, among whom was a number of prominent citizens; after which the M. W. degree was given to one. It was a pleasing sight to see such an accession to our ranks of young, active business men at one meeting and speaks volumes for the stability of our Order. Fifty-two members received the J. W. degree in Valley, on Jan. 26th, whose the average age was 34 12-13th years.

Oakland Lodge Locals.

Keystone, 64.

This Lodge intends to make its meetings more attractive to the members. A standing committee has been appointed by the Master Workman, consisting of Bros. F. E. Benner, Dr. A. Fine and F. M. Carey, to prepare entertainments, musical and literary, for the Lodge, so that each meeting will be interesting to the members.

Oak Leaf, 35.

The meeting of Oak Leaf, on Jan. 24th, was one of more than ordinary interest. The usual business was transacted with dispatch; a part being the resignation of D. S. Hirshberg, as Representative, and the election of Dr. Miller in his place. There was a full Lodge meeting, it being made larger by a good delegation from Keystone. A short recess was called and personal acquaintance made with each other, and the Grand officers present, consisting of Clay W. Taylor, G. M. W.; Wm. H. Barnes, G. F.; H. G. Pratt, G. R.; and C. H. Haile, G. Receiver. Bro. Taylor said: Twelve years ago twelve men met one night and agreed to meet again for a noble purpose one week from that time. At their second meeting but seven were ready and willing, with grand old Father Upchurch as chairman, to pledge protection to each other and their families. We are now an army of nearly 100,000 men, as good and true as any other organization in the land. We seem to be of California, the most energetic and progressive of any part of the Grand jurisdiction. Our hands and hearts have ever been in the front in all appeals for help, our advocate is ahead of all others, and I would rather have the honor of being Grand Master of California than that of any other jurisdiction. Bro. Barnes made a grand speech that was listened to with close attention and received signal applause. Bro. Pratt was introduced as the founder of the Order in California, but who, in a few words, significantly said: A few years hence I was a teacher, now I am will to sit at the feet of this Grand organization and learn. Bro. Haile made a few remarks that were well received. Bro. Lenoir, of Keystone, by request gave the Lodge some instrumental music, after which acceptable speeches were made by Bros. Dunton, Hirsberg and Miller. It was a real royal greeting, and the Grand officers reluctantly said goodbye before the Lodge closed, so as to reach the last train.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

CALIFORNIA.

OFFICERS OF GRAND LODGE.

M. T. BREWER, P. G. M. W.....Sacramento

Financial Statement of the Grand Recorder's Office for 1880.

Below will be found the financial statement and summary of the Grand Recorder from Feb. 1, 1880, to Jan. 1, 1881:

Cash in hands of Grand Receiver Feb. 1, 1880	$5,438.40
Received from Feb. 1, 1880, to Jan. 1, 1881	157,043.10
Total Jan. 1, 1881	$162,481.50
Disbursements to Jan. 1, 1881	159,078.63
Balance in hands of Grand Receiver Jan. 1, 1881	$3,402.87

SUMMARY.

Balance on hand, Benef. Fund, Feb. 1, 1880	$1,162.00
Total am't rec'd in Benef. Fund to Jan. 1, 1881	146,105.00
Total am't rec'd in Gen. Fund to Jan. 1, 1881	10,938.10
Bal. on hand Gen. Fund, Feb. 1, 1880	4,276.40
Total Feb. 1, 1880	$162,481.50
Paid out of Benef. Fund	$146,000.00
Paid out of Gen. Fund	13,078.63
Total disbursements	$159,078.63
Balance on hand	$3,402.87

BENEFICIARY FUND.

Total am't rec'd in Benef. Fund	$146,105.00
Balance on hand Feb. 1, 1880	1,162.00
Total	$147,267.00
Paid out	146,000.00
Balance Benef. Fund Jan. 1, 1881	$1,267.00

GENERAL FUND.

Total amount received	$10,938.10
Balance on hand Feb. 1, 1880	4,276.40
Total	$15,214.50
Paid out	13,078.63
Balance Gen. Fund Jan. 1, 1881	$2,135.87

BOOKBINDERY.—Among the many evidences of real prosperity in this State is the establishment of manufactories for various articles that heretofore have been almost exclusively imported from foreign countries or the East. Chas. E. Rankin, 540 and 542 Clay St., by labor-saving machines of his own invention, and by persistant effort continuously for 11 years, has succeeded in driving imported ledgers almost out of our market. This enterprising house confines itself exclusively to the manufacturing of the smallest household pass-book to the finest ledger that can be imported. He has doubled his capacity in room and machinery lately, and now occupies two large rooms and employs from 25 to 30 hands, exclusively white labor. Carrying as he does a very heavy stock, he is able to supply the trade with any amount of books called for.

AS AN evidence of the universal hold on the hearts of the leading business men of our city, we refer with pride to the firm of Coffin, Sanderson & Cook, commission stock brokers, 312 Pine street. Each member of the firm belongs to the same Lodge, and several of the employees. This firm buy and sell on commission all kinds of local and mining stocks.

Workmen's Guarantee Fund Association.

W. H. JORDAN, Past Grand Master A. O. U. W. of California, President.

This Association is duly incorporated under the laws of the State, and has for its object the additional protection of $1,000 to the families of deceased members of the A. O. U. W. Admission fee $3, annual dues $2, and $1 assessment on the death of each member. It will cost, including dues and assessments, about $8 a year.

Every member of the A. O. U. W. in good standing should give this additional $1,000 to his family, as the cost is within the reach of all.

The following endorsement is from the Grand Master of the A. O. U. W.:

OFFICE OF GRAND MASTER WORKMAN
A. O. U. W. OF CALIFORNIA,
SHASTA, CAL., Oct. 2, 1880.

To the Officers and Members of the Workmen's Guarantee Fund Association:—It affords me pleasure to say that the aims and objects of the "Workmen's Guarantee Fund Association" meet with my most hearty approval and endorsement. As an auxiliary to the A. O. U. W. of California, it is calculated to do great good, and I commend it to the favorable consideration of the members of our noble fraternity.

Yours, fraternally,
CLAY W. TAYLOR, G. M. W. of California.

Call or send for Constitution.

E. M. READING, Secretary.

Office—No. 38 St. Ann's Bldg, Powell, cor. Eddy st., S. F.

"Hew to the Line, Let the Chips Fall Where They May."

Within this brief maxim of the sturdy lumberman, lies many a gem of truth which rightly pondered will convey to the mind a most useful lesson.

Notice the wood-man as he prepares his material for use, does he first begin to hew, taking a piece here and a piece there as inclination may suggest? Ah, no, before the material is touched the plan is carefully laid out, each detail considered, the necessary proportions accurately ascertained, and at last, with care, is drawn the line by which it is to be hewn. It is impossible for the wood-carver to hew successfuly without a line, and it is absolutely essential that he be guided by that line, or in the end the result of his labor will be but an irregular useless block—his time and his material both wasted. So, with us, we are all hewers, compelled to form our characters in life, and, to a great extent, we shape them for success or woe.

Ere we begin to hew we must carefully mark out a line and ever be guided by that line, or every stroke of the axe will but aid in bringing about our own disastrous, nay disgraceful, failure.

That line of life, and the only one which can bring true success must be firm principle, founded on a sense of our duty toward God, and of honor, justice and right toward our fellow beings, without this our lives are worse than worthless. While it is a fact that there are many who ever,

> "With smooth dissimulation skilled to grace,
> A demon's purpose with an angel's face,"

Lay aside all true honor and nobility, merely to enable them the more deeply to injure the innocent and true; who ruthlessly tread upon the most sacred rights of others, and smiling care not; yet seemingly they are blest, all around them appears fair. But is it so? No. They do not hew to the line of right, and tho' for a while success may seem to be theirs, sooner or later retribution will come; it is God's law and it cannot be evaded.

Give a man the wealth of Golconda, the strength of a Hercules, the beauty of an Apollo, the genius of a Shakespeare, the clear reasoning power of a Bacon or a Newton and the eloquence of a Demosthenes, yet if he be void of true principle and hews not to the line of right, of truth, he is but a curse to himself and to others. His wealth, beauty, strength, genius, intellect and eloquence are but so many instruments of evil in his hands; they render him only the more powerful (for there is in the gifts a fearful power for untold good or sin immeasurable,) and in the end deeds traced upon the pages of his life will show a woeful record of ruin.

Look for the moment at the man "born to titles, riches and fame," who yet, by his own mighty genius,

> "Rose and soared untrodden heights and seemed at home,
> Where angels bashful looked.
> * * * * * *
> Who through learning and through fancy took
> His flight sublime and on the loftiest top
> Of fame's high mountain sat."

Yet it cannot be denied that, in a sense, his life was a terrible failure, still productive of evil incalculable. Had that genius been but joined to a sincere love of truth, of goodness, what honor he might have given to himself, what glory to his creator!

How much anxiety would be spared us if we would only mark out duty as the line of our lives, and carefully, constantly, and with determination hew to that line, never pausing to watch and grieve over the falling of the chips upon some false pleasure or idol of our own making. While it is true that in all lives come moments when we discover that,

> "Life at best is quickly done,
> That hopes fulfilled and wishes won,
> Are dearly got,
> And shadows chased in headlong haste
> Delight us not."

But even then we are spared sorrows, very crown of sorrow, remorse, if in looking backward we can feel that we have sincerely endeavored to hew to the line of duty, in all guided and prompted by an humble love of Him, who can and does make of our severest trials, our greatest, brightest blessings.—*Julia M. Goodlett, San Bernardino.*

Landscape Gardening.—Landscape gardening, as much one of the fine arts as music and painting, comes with the enchanted wand and turns barren hills, rude rocks, muddy ditches, and hills and dales into such picturesque aspects as to fascinate our senses, and take us captive as far as delighted appreciation goes. Prospect Park, Brooklyn; Central Park, New York; the Public Garden, Boston, are all beautiful examples of this. By the skill of the landscape gardener the most commonplace spots become poetical; fairy-like vistas, glassy lakes, shady groves, broad drives, enchanting dells, all come at the call of the master hand. The basis of the landscape gardener's profession is to evolve beauty out of chaos, use out of the seemingly useless; in short, to reproduce nature in her most attractive forms where barren wastes have heretofore existed. These are the aims, the successes of the landscape gardener, and his best field of operations is the popular parks contiguous to our large cities.

Are all the victuals mixed when the sailors have a mess?

Population, 50,152,559.

The Census Bureau has figured so far upon the returns of population as to reach the conclusion that the total, exclusive of Alaska and that region west of Arkansas known as the Indian Territory, is 50,152,559. But while these figures are official they are not final, and may be changed hereafter in the revisory calculations, though it is not likely that such possible changes will go above the units, tens or hundreds columns. For all practical purposes the total population of the United States and Territories, exclusive of Alaska and the Indian Territory, may be stated at 50,152 000. The increase since 1870 has been 11,266,024, or nearly 9⅓%. The present population of the Pacific States and Territories, namely, California, Oregon, Nevada, Washington, Idaho, Arizona and Utah, is officially stated as follows:

California	864,686
Oregon	174,767
Nevada	62,265
Washington	75,120
Idaho	32,611
Arizona	40,441
Utah	143,907
Total	1,393,797

The increase of this division of the country since 1870 has been 451,866, or 48%. The increase in Nevada was but 6%, which is the lowest, while in Washington Territory it was 100⅓%, which is the highest rate. The per cent. of increase in the Pacific division is greater than in any other. In the Eastern division, including New York, New England, New Jersey and Pennsylvania, the per cent is but 18. In the Western division, including Missouri and the Territories of Dakota, Wyoming and Montana, 34%. In the southern division, excluding Missouri and including all the other old slave States, 34%. In the district of Columbia, 35%. It is now conceded that the apparent large increase in the Southern States is due to the fact that this census was taken there with more regard to exactness than any preceding one, while that of 1870 was done in a slovenly and careless manner, not reaching a large mass of the population. There is but one city in the United States or on the American continent that contains over 1,000,000 population—New York. There are three others that contain over half a million; three others above 300,000; three others above 200,000, including San Francisco, and ten others above 100,000 The following is a carefully revised list of the cities that overgo 30,000 inhabi ants each, California having two of them. It will be a good thing to keep for future reference:

New York	1,206,590	Columbus, O.	51,665
Philadelphia	846,984	Paterson	50,887
Brooklyn	566,689	Toledo	50,143
Chicago	503 304	Charleston	49 999
Boston	362 535	Fall River	49,006
St. Louis	350,522	Minneapolis	46 887
Baltimore	332.190	Scranton	45 850
Cincinnati	255 708	Nashville	43,461
San Francisco	233,956	Reading	43,280
New Orleans	2 6,140	Hartford	42,553
Cleveland	160,142	Wilmington	42,499
Pittsburg	156,381	Camden	41,658
Buffalo	155,137	St. Paul	41,498
Washington	147,307	Lawrence, Mass.	39.178
Newark	136,400	Dayton	38 677
Louisville	123 645	Lynn	38,284
Jersey City	120,728	Denver	35,630
Detroit	116,342	Oakland, Cal.	34,556
Milwaukee	115,578	Atlanta	34,398
Providence	104,850	Utica	33,913
Albany	90,903	Portland, Me.	33,810
Rochester	89,366	Memphis	33 593
Allegheny, Pa.	78,681	Springfield, Mass.	33,340
Indianapolis	75,074	Manchester, N. H.	32 630
Richmond	63,803	St. Joseph, Mo.	32 484
New Haven	62,882	Grand Rapids	32,016
Lowell	59,485	Wheeling	31 266
Worcester	58,295	Mobile, Ala.	31,295
Troy	56,747	Hoboken	30 999
Kansas City	55 813	Harrisburg	30 762
Cam ridge, Mass.	52,740	Savannah	30 681
Syracuse	51,791	Omaha	30,518

Sensible Dressing.—There is a class of wo men one meets with every day, whose dressing is above reproach. They go out to walk, not to show their clothes, but to add to their fine stock of health. They look as if they could sit a horse well, and as if they used often the luxury of a bath. They wear thick-soled shoes, with low, broad heels, shapely and well-fitting. Their walking and church suits are of cloth, plainly made, but of exquisite fit. Their gloves and bonnet strings are above reproach. The hair, well cared for, is prettily waved or curled about the forhead, and worn low, to show the shape of the head—a style that artists love. Unless nature has been very niggardly no false hair is allowable. The bonnet is close and very becoming, and the face is protected by a veil. An ample parasol or umbrella is ready as protection against sun and rain. What fault can the most censorious man find with a costume like this?

Sanitary Works.—During the last five years no less in amount than $75,000,000 has been expended in works of a sanitary nature by the various urban sanitary authorities of England and Wales. The steadily decreasing death rate of the period implies that the large sum has been, on the whole, judiciously laid out.

The vintage of the past year was the largest ever made in this State, being about 13,000,000 gallons against less than 6,000,000 gallons in 1879. Besides this, there will be some 5,000 gallons of brandy. Prices are expected to be better than last year, and altogether it has been a year that vintners will be able to look back to as the turning point in the history of California viticulture.

The Glue Pot.

That indespensable and of all others the most important article to every well-regulated factory and cabinet shop, as well as many other kindred branches of trade. How common is it for the young artisan or apprentice to fall into the error of thinking that glue is king-cure-all, regardless of the application! In the first place, the article used should, by all means, be a good one, of which we presume every practical mechanic is a judge. It should then be dissolved in a proper manner and to the proper consistency or body, according to the work to which the application is to be made. Now comes the point at which there is the great majority of the failures; and the difficulty is not so much with the glue or application as it is in the preparation for the same. In other words, be sure that you are ready by having tried the work together, before you take the glue brush in hand. And if the work is mortise and tenon, you have made a failure that is not easily remedied if you have made the tenon too small either in thickness or width to fill perfectly the space in the mortise. To guard against this error, know what you are doing.

When you are cutting the mortise and tenon let it be either by hand or machinery; and when the glue brush is taken in hand, these general rules should always be observed, no matter what the character of the work. See that the temperature of the room is warm. If in cool weather, use artificial heat to bring the thermometer to 70° or 80°, if you can conveniently do so. But this depends entirely on the nature of the work. As to how much time must of necessity be consumed between the first spread or application and the final set, that time should always be brought down to the shortest period, if the nature of the work is such that it must of necessity take time to get the work together.

The great objection of chilled glue should be avoided by getting the wood to be glued first warmed and having your glue boiling hot. Dissolved glue contains a large percentage of water. The glue joint dries by the wood absorbing the water from the glue, and hence must of necessity expand the fibers of the wood coming in close contact with it, and if dressed off in this expanded condition, that part must dry out, although it takes time to do it, as the moisture cannot escape except through the pores of the wood. And upon the same receiving a high polish in the finishing room, you will see a sunken place 20 ft. off right over the tenons that were dressed off in the wet or uncontracted state. This same rule is applicable to joints in the edges of boards that are glued together. The tongue and groove joint becomes more expanded than the square joint, and hence takes longer to dry out, from the simple fact that it takes in more glue.—*Cabinetmaker.*

Truckee and Quincy Railroad.

Short narrow-gauge lines will sooner or later tap the rich interior valleys, long isolated from a market, and connect them with the main railroads of the coast. On Saturday, January 1st, a large meeting was held at Sierraville, by the people of Sierra and Mohawk valleys to consider the advisability of building a narrow-gauge railroad from Truckee, Nevada county, through the valleys named, and to Quincy, Plumas county. Committees were appointed, and after full discussion of the subject, it was decided it was a needed and promising enterprise. It appears, from the Truckee *Republican's* report on the subject, that another meeting was held on January 3d, at which more complete statistics were offered. The proposed road extends through a section which is free from snow and landslides. No snow-sheds will be needed, nor are there such natural obstacles as would require heavy grades, deep cuts or expensive bridges. The resources to support the road are the heavy forests of Prosser creek, Sage Hen and Little Truckee, probably the best track of sugar pine in the State; the mines, present and prospective, of Independence, Mohawk valley, Plumas Buttes and other districts; and lastly, the grain, stock and other interests of large and beautiful mountain valleys, as yet but partially developed. Estimates of the freight at present to these mines and valleys place it at 40,000 to 50,000 tons annually. The prospects appear so good that a preliminary organization has been made, and stock is being subscribed in Truckee and in other towns, which will receive benefits from the success of the enterprise.

A glance at the map shows that the distance in a direct line between the terminal points of the proposed railroad is not more than 60 miles. The country to be opened up by such a line is one of the pleasantest and most heathful parts of the North Sierra region. There is no more beautiful region for tourists, hunters, botanists and lovers of the picturesque. The county of Plumas was settled at an early date, and its growth, though slow, has been steady and positive. For some kinds of fruits and for most kinds of berries, for vegetables, cereals and forage plants these mountain table-lands are unsurpassed. It is said that there are desirable openings for many more settlers on Government lands.

Three temples are being built in Utah by the Mormons—one at Salt Lake, one at Logan and one at Manti. Their costs will aggregate many millions.

The Lick Telescope.

Some active steps are being at last taken in the direction of the Lick telescope, which is to be put up on Mt. Hamilton. The firm of Alvan Clark & Sons, of Cambridgeport, Mass., have contracted with Richard S. Floyd, William Sherman, Edwin B. Mastick, Charles M. Plum and George Schoenwald, Trustees of the Lick estate, for the construction, for the Mt. Hamilton observatory of San Jose, of an achromatic astronomical object glass with 36 inches clear aperture, to be completed before November 1st, 1883. The sum of $12,000 was paid at the time of signing the contract, and the further sum of $38,000 will be paid upon the completion of the work. The terms of the contract are substantially as follows: The firm agree to make, figure, complete and deliver at their workshop the said object glass; the duties, if any, shall be paid by the Trustees; the definition of the glass shall not be inferior to that of the telescope constructed for the United States Naval observatory in Washington; the glass shall be figured perfectly for one position, to be designated by the Trustees, and work well 20° on either side thereof; the Trustees shall give to the objective such focal length between 50 and 60 ft, as they may determine to be best; they may also designate what two rays shall be brought to one focus by the combined action of the lenses; the firm agree to procure satisfactory discs, if not, the contract to be void; the objective shall be perfected within two years after satisfactory rough discs are obtained by the firm, who shall also construct a rough, reversible, equatorial mounting for the objective, including a suitable tube; the objective, upon completion, shall be inspected by an expert agent appointed by the Trustees, but the firm, if dissatisfied with his decision, may have recourse to arbitration; the Trustees shall pay the firm the cost of the rough mounting for the objective to an amount not exceeding $1,000, the mounting to continue the property of the firm; if, within five years after the acceptance of the objective, either of the glasses shall be found to have so deteriorated in figure as to injure its performance the firm, if alive and in sufficient health, or either of them, shall proceed to California and correct such defect, the necessary expenses of the trip, and the firm's subsistence while here, being paid in advance by the Trustees.

Trying Lard.—Several years ago we were very glad to call in the assistance of a near and obliging neighbor to help about the "butchering," or, more particularly, about taking off the lard, and trying it out. We were in the habit of soaking it for two or three days, according to the old fashion of our great grandmothers. But Mrs. B.——was an English woman, and had learned something in the way of trying out lard, that at least was new to us; and I will give it for the benefit of others, as it is in the season of butchering. She was very careful not to have the entrails opened, and thus the fat was kept perfectly clean. If by chance an accident happened, the opening was immediately tied with a bit of twine, all "muss" cleared away as quickly as possible, and any particles of fat had become soiled, were put in a dish to be washed and tried by themselves. The rest was put into a kettle and set upon the stove over a slow fire. Not one drop of water or a pinch of salt was allowed to come in contact with the fat. As soon as it began to fry, it was stirred from the bottom, set into the stove, and allowed to cook as briskly as possible, being occasionally stirred to keep from burning; when done the lard was drained and squeezed from the scraps, poured into a jar, and when cold covered with a plate or paper and set away. "This," she said, "will be just as sweet and dry a year from now as it is to-day, if you do not happen to use it all up." We have always followed her fashion of trying lard, and none has ever become rancid or strong.—*Cor. Rural New Yorker.*

The Indians on the McCloud river, are so astonished at a telephone set up in their neighborhood, by the United States Fish Com., that they call it the *Kleschteen*, or speaking spirit. This telephone was constructed to connect the salmon hatching stations at Baird, on the aforesaid river, with the establishment for breeding the California trout, five miles higher up the stream. It is in perfect working order.

Wells, Fargo & Co., have discontinued their express offices at Georgetown, Greenwood, Todd's Valley, Forest Hill, and Michigan Bluff in this State. The company suffered much from robberies in those neighborhoods, and it did not pay to run an express under such adverse circumstances.

There has been in circulation during the last week at Washington, Alameda county, a petition to the Legislature for a "Local Option" law. A large number of signers were obtained. The movement was initiated by the Grand Lodge of Good Templars.

"My dear, what shall we name our baby?" said Mr. Smith, the other day. "Why, hus I've settled on Peter." "Peter! I never knew a man with the simple name of Peter who could earn his salt!" "Well, then call him Salt Peter."

Jupiter and His Spots.

The most attractive object in the evening sky just at this time is the giant planet Jupiter. The markings upon his belts have for some time been attracting the universal attention of astronomers and amateur observers. Always enigmatical, this planet has, since the appearance of the great red spot in its southern hemisphere, become still more perplexing to the astronomer. It was at first supposed that this prominent object would form a ready means of determining the true period of the planet's revolution, but that result has not been realized. On the contrary, if anything, it has rendered that problem still more doubtful.

Soon after the "great" spot was discovered, two or three other smaller, but still plainly discernible and permanent spots were observed near by the large one. Close and continued observations of these several spots during the past summer, according to the published reports of Prof. Barnard, of Nashville, Tennessee, have revealed the most singular fact yet developed, that these spots are not identical in their revolutions, as would be the case if they were absolutely fixed to the central nucleus of the planet. On the 25th of last July, the center of one of the small spots preceded the center of the large spot by one hour and 35 minutes. On the 22d of November the center of the small spot preceded the center of the large one by three hours and 17 minutes. The large spot had thus apparently moved backward one hour and 42 minutes between July 25th and November 22d, showing a daily difference of rotation of 0.439 minutes per day. At this rate the small spot would gain an entire revolution in about 23 months. There is quite a difference in the motion of all the spots to be seen on the planet's disk.

In a letter to *Science*, dated November 29th, Prof. Barnard writes in regard to this planet as follows: "The region occupied by the equatorial belt is subject to constant and quite rapid change, being filled at times with the most delicate soft, plumy forms. Brilliant white spots are not unfrequent in this zone. . . . All the objects in the equatorial zone move with a very great velocity in the direction of rotation, but invariably in a contrary direction to that pursued by the (great) red spot, which is really the only object on the planet which has a backward motion. Indeed, it would not be a bad comparison to compare the red spot to a mighty city built on the shore of a vast and swiftly flowing river, which is constantly being filled with drift, and an occasional glistening mass of ice tearing its way past the city with a velocity of not less than 6,000 miles a day. In such a comparison the city would be as great an area as three-fourths of our entire earth, and the river fully 16,000 miles in breadth."

Jupiter passed its perihelion on the 25th of September last. That great planet then reached its nearest point to the sun, and was also, at the same time, within a few days of its nearest point to the earth; so that the rubicon of its perihelion and its nearest approach to the earth and sun has already passed. At its perihelion, Jupiter is 46,000,000, miles nearer the sun than at its aphelion. The difference between the two intervals of distance is about half the entire average distance of the earth from the sun. Yet Jupiter, at its nearest approach, is 450,000,000 miles from the great central luminary. Nearly 12 years must elapse before Jupiter will be as favorably situated for observation as he is at this time.

With the exception of Saturn, nothing in the heavens affords a more interesting subject for study than Jupiter and his moons. It is delightful to watch those four little diamond-points as they move in rapid succession around the parent body, passing now as dark spots across his disk, then behind and eclipsed by it. A glimpse of its moons may be had even through a good opera-glass, and in an exceptionally clear atmosphere, at a considerable elevation above the sea, they have been seen by the unassisted eye. The large spot may be seen with a five-inch telescope. When this spot is just beginning to appear at the eastern portion of Jupiter's disk, so rapid is the rotation of that planet that in a little over two hours it will have reached the center, and in less than five it will again be out of sight, having passed around its western limb. The size of this spot varies somewhat in length, but is quite constant in breadth. Its average length is about 23,000 miles, by a breadth, in its widest portion, of 6,900 miles—equal in area to about three-quarters of the entire surface of the earth. Its color is a light red. Jupiter turns on its axis in a little less than 10 hours, so than an observer on its equator would be hurled around at a rate of 500 miles a minute instead of the comparatively slow progress of 17 miles that marks the rate of the earth's revolution at its equator.—*Californian for February.*

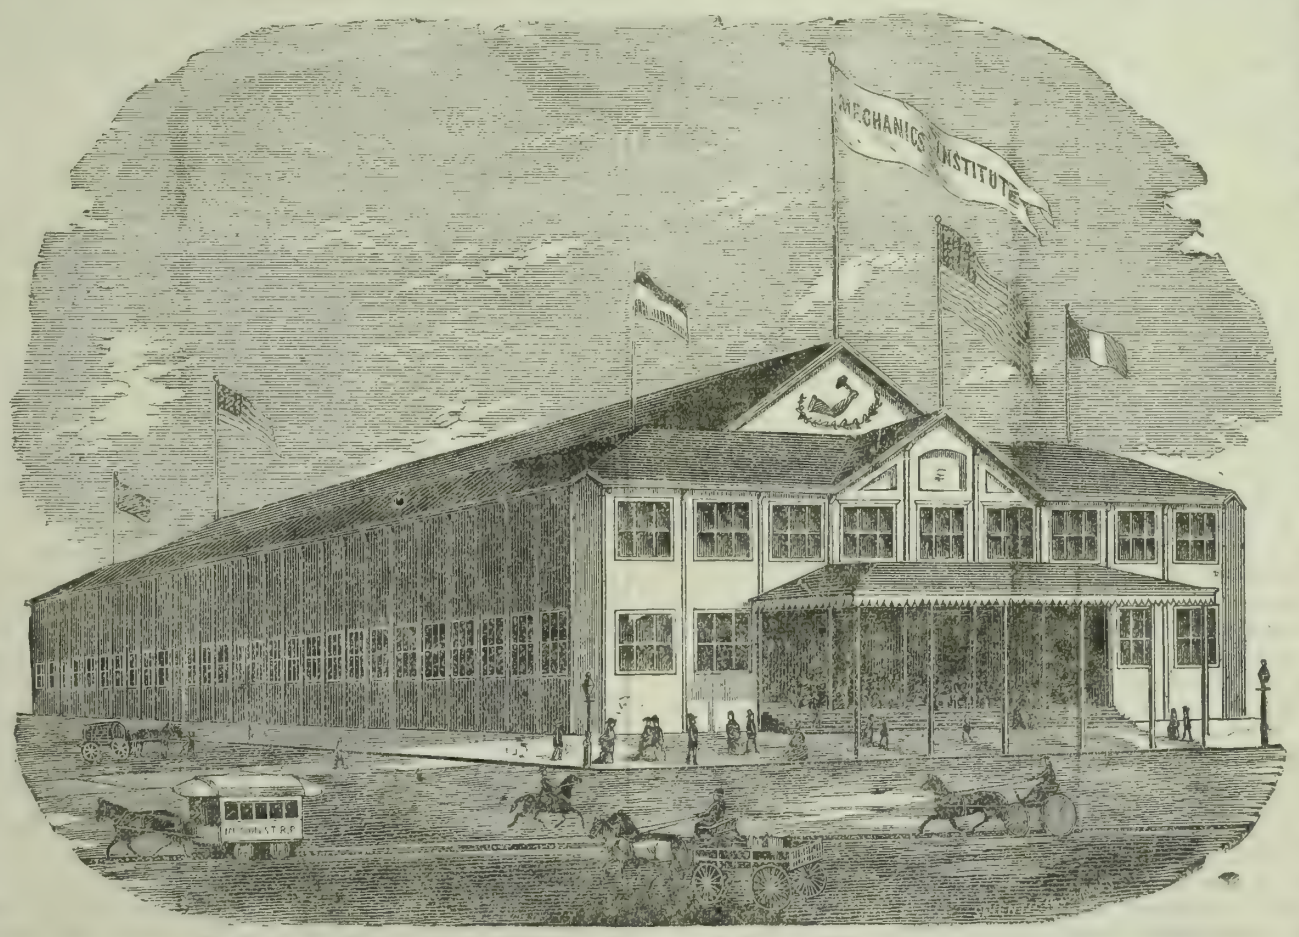
STRONG OR WEAK MEN.—We mistake strong feeling to be strong character. A man who bears all before him—before whose frown domestics tremble and whose bursts of fury make the children of the house quake—because he has his will obeyed, and his own way in all things, we call him a strong man. The truth is, that is a weak man; it is his passions that are strong; he, mastered by them, is weak. You must measure the strength of a man by the power of the feelings he subdues, not by the power of those which subdue him. And hence composure is very often the highest result of strength. Did we ever see a man receive a flat grand insult, and only grow a little pale and then reply quietly? That was a man spiritually strong. Or did we never see a man in anguish, stand as if carved out of solid rock, mastering himself? Or one bearing a hopeless daily trial, remain silent and never tell the world what it was that cankered his home peace? That is strength. He who, with strong passions, remains chaste—he who, keenly sensitive, with manly power and indignation in him, can be provoked, and yet can restrain himself and forgive—these are strong men, spiritual heroes.—*Robertson.*

AN intelligent farmer living in Des Moines county, has invented a henophone, modeled on the principle of a telephone, by which one old reliable hen, occupying a central office in the hennery, sits on all the nests about the establishment, leaving other fowls free to lay eggs scratch and cackle. As fast as a new nest contains the full complement of eggs, it is connected with the central office by a copper wire, and the business is settled. The only trouble with the machine is that it sits so hard that it hatched out the porcelain nest eggs along with the others, so that one chick in every nest is born with glass eyes, and the farmer has to buy and train a dog to lead it around. This makes it expensive.—*Burlington Hawkeye.*

IT is said that the hogs in Iowa have such long noses that the settlers employ them to plow the fields. The practice is to bury a corn cob on one side of the lot and place the hog opposite to it on the other side, when the porker, scenting it, immediately digs his snout into the soil, and pressing forward turns a furrow equal to that made by the best plow right up to the cob. If a stump should lie in a direct road, the Iowa hog does not hesitate or work around it, but splits it open with his snout and goes on. This is following the nose to some purpose.

COFFEE FUMES.—In some recent experiments at Paris the fumes of burning coffee were shown to have a disinfecting power quite remarkable.

A KANGAROO is a curious chap; when it's wide awake it's leaping.



Grand Lodge Reception.

We repeat in this issue the different committees who have charge of the arrangements for the proper reception of the Grand Lodge. The reception will be held at the Mechanics' Pavilion, shown herewith, on Thursday, Feb. 3, 1881. The building can be reached either by the Mission or Market St. cars. The following are the several committees:

GENERAL COMMITTEE.

San Francisco, No. 4	F. Hall, P. M. W.
Golden Gate, No. 8	Harry J. Lask, P. M. W.
Harmony, No. 9	W. Decker.
Yerba Buena, No. 14	D. C. Mitchell.
Bernal, No. 19	George Stewart.
Unity, No. 27	G. Winehill, P. M. W.
Valley, No. 30	C. O. Burton.
Spartan, No. 36	I. E. Alexander.
Magnolia, No. 41	M. Warschauer.
Myrtle, No. 42	C. S. Haley, P. M. W.
Franklin, No. 44	W. W. Hanscom, D. D. G. M.
Hercules, No. 53	A. F. Bell.
Washington, No. 60	P. Peck, P. M. W.
Burns, No. 68	L. G. Schord, P. M. W.
Sts. John, No. 73	J. E. Purdy.
Excelsior, No. 126	W. S. Pierce.
Olympic, No. 127	E. H. Morgan, P. M. W.
Fidelity, No. 136	T. A. Farless, P. M. W.
Bay View, No. 159	G. T. Shaw, P. M. W.
Memorial, No. 174	C. W. Nevin, P. M. W.
Friendship, No. 179	J. R. Pickens, P. M. W.
Triumph, No. 180	W. I. McKay, P. M. W.
Noe Valley, No. 185	A. D. Jordan

President	W. W. Hanscom.
Vice President	Harry J. Lask.
Secretary	Marks Warschauer.
Treasurer	G. Winehill.

THE MECHANICS' PAVILION—GRAND LODGE RECEPTION BUILDING.

EXECUTIVE COMMITTEE.

W. W. Hanscom, C. O. Burton,
J. E. Purdy, J. R. Pickens,
L. G. Schord.

SUB-COMMITTEES.

On Finance and Auditing—E. H. Morgan (Chairman), P. Peck and T. A. Farless.

On Building and Decorations—C. O. Burton (Chairman), W. W. Hanscom, I. E. Alexander, W. I. McKay and G. T. Shaw.

On Printing—A. F. Bell (Chairman), Charles W. Nevin and J. R. Pickens.

On Literary and Musical Exercises and Music—W. S. Pierce (Chairman), Harry J. Lask and J. E. Purdy.

On Collation—M. Warschauer (Chairman), G. Winehill; G. T. Shaw, George Stewart and L. G. Schord.

Floor Committee—Director, Harry J. Lask; Chief Aids, W. Decker and W. S. Pierce. One representative from each Lodge to be selected as Aids.

On Hat Room—C. W. Nevin (Chairman), C. S. Haley and F. Hall.

On Invitation—P. Peck (Chairman), E. H. Morgan and G. Winehill.

On Reception—The entire General Committee and one from each Lodge as Assistants.

1881.—That is a very peculiar number. The sum of its digits is 9x9. It is divisible by 9 without a remainder. This remaining quotient consists of two simple factors, 11 and 19. It reads just alike both ways. If 18 be set under 81 and the two added, the sum is 99. If the 18 be reversed and then added to 81, the sum is 162, the sum of the digits of which is 9. If the 81 be reversed and added to 18, the sum is 36, which is also divisible by 9, and the sum of its digits is also 9.

HARRIET BEECHER STOWE'S "Uncle Tom" is lecturing in Chicago.

THERE are 3,296 more males than females in Sonoma county.

Points in Physiognomy.

Large eyes tell of ardor and activity; ones of sluggishness, calculation and perhaps cunning. A fullness, or prominence of the eyes indicates a talent for talking and writing with great fluency of language, and especially on generalities. The little knot of wrinkles that radiate from the corner of the eyes in the middle-aged, testify to thorough honesty and truthfulness. The feature may often be noticed in business men of known probity.

The various color of eyes have each their admirers. The light tints signify delicacy, amiability and refinement; the dark eyes power and strong passions, though the sluggish temperament often does not call these into activity. Blue speaks of tenderness and extreme sensibility; brown goes with a frank, womanly nature; hazel is a sign of talent, and of a better head than heart. Give no confidence to a woman whose small, black eyes flash like a bead, for she is prone to selfishness and tattling.

Noses are as diverse in crosses as can well be, though for convenience they are grouped into five well-known classes. The Roman for the positive and aggressive man, the harsh-faced conqueror who cares nothing for the slaying of multitudes to achieve his own fortunes. Its peculiarity is the production of a ridge near the upper end. The Greek is the classic nose, denoting artistic tastes and keen refinement. It has throughout a regular and delicate outline. The Jewish or hawklike nose is known to all. It fits the sharp trader, the speculator and the money dealers. The celestial, or turned-up nose, is merely the snub, lengthened a little. It is found in inquisitive children, and often among the fair sex.

The mouth is the most tell-tale feature of the whole countenance. Have the lips retained the fair curves of childish purity, or has an indulgence in drinking or other dissipation made the lips coarse and flabby? Here, as elsewhere, a delicate shape means a fine susceptibility, while a coarser form reveals a rude nature. Quite a number of little muscles cluster about the corners of the mouth, and their involuntary motions often let out a secret that the lips and eyes have concealed. A steady friend is not to be looked for in one whose lips are perfectly smooth, but, instead, where the red is crossed with upright wrinkles. Hospitality displays several slightly curved wrinkles, outward and downward from the corners of the mouth. Large and full red lips stand for a loving and faithful disposition.

Less attention is usually given to studying the chin than it deserves, as it is often concealed by a beard. It is intimately connected with the cerebellum or basis of the brain, which is the organ of vital power—so much so that if one be poorly developed the other will be also. The deeper and wider the chin and lower jaw, the more will be the unconquerable firmness even to audacity, and the larger will be the corresponding development of the cerebellum.—*Golden Days.*

MUSIC HEALTHFUL.—Music, like painting and statuary, refines, elevates and ennobles. Song is the language of gladness, and it is the utterance of devotion. But, coming lower down, it is physically beneficial. It rouses the circulation, wakes up the bodily energies, and diffuses life and animation around. Does a lazy man sing? Does a milk-and-water-character ever strike a stirring note? Never! Song is the outlet of mental and physical activity, and increases both by its exercise. No child has completed a religious education who has not been taught to sing the songs of Zion. No part of our religious worship is sweeter than this. In David's day it was a practice and a study.

JOY IN ADVERSITY.—All birds, when they are caught and put in a cage, fly wildly up and down, and beat themselves against their little prison, but within two or three days sit quietly upon their perch, and sing their usual melody. So it fares with us, when God first brings us into strait; we wildly flutter up and down, beat and tire ourselves with striving to get free, but at length custom and experience will make our narrow confinement spacious enough for us, and though our feet should be in the stocks, yet shall we, with the apostles, be enabled even there to sing praise unto God.—*Hopkins.*

PACIFIC STATES WATCHMAN.

Consolidated with Pacific Workman.]

A. O. U. W. Home Paper.

(Formerly the Golden Gate Sentinel.)

Issued on the 1st and 15th of each month.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞ For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Recommended to the support of the Fraternity at large—by resolution of the Grand Lodge, A. O. U. W., of California, at Sacramento, Feb. 6th, 1880.

San Francisco, - February 1, 1881

Make Haste Slowly.

The Grand Lodge at this session will number not far from 275 members. Many of them will participate in the deliberations of the body for the first time. That as a rule they are men of ability may be safely assumed, for we believe no fraternal society in the State ranks higher in this regard than the A. O. U. W. But ability is not all that is necessary in a legislator. Experience is, perhaps, the more important qualification. Most of our Past Masters have had some experience in the Order, and a few a good deal. The most experienced are the most conservative, and the least experienced the most radical. This is always so, and results from the fact that a fault is always more readily seen than a virtue. It is a safe proposition that no law can be made absolutely perfect, or to express the idea in a form more easy of comprehension, no law can be made so perfect that it will not work injustice in some individual cases. Even the laws of nature do not work even and exact justice in each individual case, and man may not hope to improve upon the Creator in this regard. General results can only be relied on to attest the excellence or prove the opposite of any law.

"A rogue ne'er felt the halter draw
With good opinion of the law."

No good citizen would think of condemning the law because the lines above quoted are true; and no one should condemn any statute or regulation because in some isolated case a hardship has resulted from its enforcement. Men are apt to forget this, and condemn what is good, because it is not so absolutely perfect that no possible evil or hardship can come from it, and straightway believe that a sovereign remedy lies in some amendment or substitute which they could supply if only an opportunity were presented. Sometimes they are in a measure correct, but in ninety-nine cases out of a hundred they are wrong, and the remedy proposed, if taken, would prove worse than the disease. This we know is a hard lesson to learn, and unfortunately intelligence does not seem to aid one in its mastery, but yet it is so true that the wonder is that any one can be found to dispute or ignore it.

We are led to these remarks because of the fact that a host of new members are preparing to fire into the Grand Lodge a perfect storm of amendments to our constitution and laws. Take the advice of the Watchman, brethren, and fire them into the bay instead. Our laws and our Order are a success. The chances are at least as ninety and nine are to one that, should your schemes be engrafted on our system, the certain result would be a failure more pronounced than our success has been.

We want no sweeping changes and very few of any kind. We know that many a good brother will feel that he should bear home to his Lodge some evidence of distinguished service in behalf of his constituents; let it be in this, that he held fast to that which is good, and stoutly opposed that which, at best, would be but an experiment. Beyond question the A. O. U.W. is by far the most perfect of any society of its class. It is the first great cause of all the rest. They are the result of attempts at improvement. When time shall prove them such, we may safely learn of them, but not before.

Representatives to the Grand Lodge, A. O. U. W.

The following Past Master Workmen have been elected Representatives to the Grand Lodge to meet in this city the first Tuesday in February.

California Lodge, No. 1—Oakland—Geo. Hadsell, Geo. E. Bugbee.
Oakland Lodge, No. 2—S. H. Mitchell, M. E. Ryan.
Brooklyn Lodge, No. 3—L. J. Rector.
San Francisco Lodge, No. 4—W. P. English, F. Hall.
Alameda Lodge, No. 5—Wm. Sanderson.
Occidental Lodge, No. 6—Oakland—Wm. Pirrie, E. J. Thomas.
Pacific Lodge, No. 7, Oakland—Henry Vrooman, Will H. Burrall, John Williams, S. M. Cushing.
Golden Gate Lodge, No. 8, S. F.—Harry J. Lask, E. Lewis.
Harmony Lodge, No. 9, S. F.—Z. T. Whitten, L. J. Henry, Wm. Thackeray.
Berkeley Lodge, No. 10—F. H. Payne.
Temple Lodge, No. 11, North Temescal, H. C. Babcock.
San Leandro Lodge, No. 12—Geo. A. Brown.
Fortuna Lodge, No. 13, Napa—A. D. Stockford, J. W. Hostetler.
Yerba Buena Lodge, No. 14, S. F.—C. A. Garthorne, J. G. Severance.
Eureka Lodge, No. 15, St. Helena—S. P. Conner.
Protection Lodge, No. 16—Santa Clara—A. Marsh.
Enterprise Lodge, No. 17, San Jose—George Featherston, L. Finigan, Geo. Lendrum.
Haywards Lodge, No. 18—Ed. O. Webb.
Bernal Lodge, No. 19, S. F.—R. P. Sanchez.
Saucelito Lodge, No. 20—T. P. Powers.
Union Lodge, No. 21, Sacramento—T. W. Sheehan, E. J. Gregory, Jos. Davies, J. N. Young, John L. Jackson.
Yolo Lodge, No. 22, Woodland—S. T. Pendegast.
Stockton Lodge, No. 23—J. R. Williams, J. V. Bell, W. M. Trivett.
Redwood Lodge, No. 25—D. F. Hawkes.
Gilroy Lodge, No. 26—H. M. Briggs.
Unity Lodge, No. 27, S. F.—J. T. Hollings, P. Abrahamson, G. Winehill.
Santa Rosa Lodge, No. 28—S.T. Coulter:
Petaluma Lodge, No 29—S. J. Hopkins, L. Ellsworth.
Valley Lodge, No. 30, S. F.—W. G. Buchanan, J. J. Hayes, H. Hoeber, E. Hunt, A. Heussler, W. B. Lyon, E. F. Loud, D. McLeod, J. P. McMurray, T. H. Macdonald, C. C. Terrill, F. Fillmore.
Healdsburg Lodge, No. 30—L. A. Jordan.
Cloverdale Lodge, No. 32, J. F. Hoadley.
Ukiah Lodge, No. 33—J. T. Rogers.
Lakeport Lodge, No. 34—R. W. Crump.
Oak Leaf Lodge, No. 35, Oakland—E. J. Webster, C. K. Robinson, C. H. Dunton, J. A. C. Macdonald, Dr. Miller.
Spartan Lodge, No. 36, S. F.—E. Danforth, J. Whitaker.
Antioch Lodge, No. 37—E. L. Wemple.
Marysville Lodge, No. 38—J. H. Flint, G. W. Pine.
Sutter Lodge, No. 39, Yuba City—M. C. Barney.
Oroville Lodge, No. 40—E. Higgins.
Magnolia Lodge, No. 41, S. F.—Jacob Davis, Caleb Brind.
Myrtle Lodge, No. 42, S. F.—Oscar T. Shuck, J. H. Barry.
Mt. Hamilton Lodge, No. 43—San Jose—J. B. Church, J. B. Hamilton, M. S. Levy.
Franklin Lodge, No. 44, S. F.—J. F. Brown, J. A. Fairweather.
Watsonville Lodge, No. 45—S. T. Dodson.
Santa Cruz Lodge, No. 46—Oscar L. Gordon.
Sausal Lodge, No. 47, Salinas,—H. S. Ball.
Vacaville Lodge, No. 48—Edw. Wm. Day.
Suisun Lodge, No. 49—G. A. Gillespie.
Dixon Lodge, No. 50—A. J. Buckles.
Grass Valley Lodge, No. 51—Thos. Dunkley.
Nevada City Lodge, No. 52—Chas. E. Mulloy.
Hercules Lodge, No. 53, S. F.—P. E. Hilton, T. W. Cunningham, P. Veasey.
Wheatland Lodge, No. 54—H. C. Niemeyer.
Los Angeles Lodge, No. 55—C. F. Smurr, Jas Velsier.
Mission Lodge, No. 56, Mission San Jose—Sol. Ehrman.
Live Oak Lodge, No. 57—H. Luther.
Chico Lodge, No. 58—J. F. Watkins, Dr. G. W. Davies.
Mountain View Lodge, No. 59—Wm. F. Foss.
Washington Lodge, No. 60—Henry Wolfsohn, M. S. Meyer, Philip Peck.
Industry Lodge, No. 63, Pleasanton—Herman Detjens.
Keystone Lodge, No. 64, Oakland—P. H. McGrew, Wm. M. McCloud.
Winters Lodge, No. 65—M. O. Harling.
Colusa Lodge, No. 66—Oscar Robinson.

Presentation.—It gives us pleasure to note the presentation of a fine and elegant gold badge to Emanuel Lewis, on which was inscribed: "Presented to E. Lewis, Father of Golden Gate Lodge, by the members; Jan. 27, 1880." The presentation and speech was made by W. H. Voorhees in a finely prepared address, which we hope to publish in our next issue. Our worthy brother, who is recognized as the founder of the Order in San Francisco, was so completely taken by surprise that he could hardly express his gratitude on this occasion. Bros. J. Meredith Davies, P. M. W., and T. W. Cunningham, P. M. W., were present and under the happy circumstances surrounding, made short speeches, which were very acceptable and appropriate to the occasion. Bro. Lewis, as soon as his duties as Representative to the Grand Lodge are ended, will take an extended trip through Arizona. Anyone wishing the Watchman can order it through him.

The following are the number of deaths and the States in which they occurred of those jurisdictions under the control of the Supreme Lodge: Georgia, 2; New Jersey, 1; Ohio, 3; Mississippi, 2; Washington Territory, 1; Kentucky, 4; Nevada, 1; Maryland, 1; Texas, 2; West Virginia, 1; Massachusetts, 1; Kansas, 1.

Bro. J. P. Zipf Recorder of Manzanita Lodge, 154, Forest Hill, writes that his Lodge commences the new year with good prospects, several applications being in view. They expect this year to show a good record, considering the surroundings.

As a rule, we do not think very highly of fraternity papers. They are run too exclusively for the benefit of "our Order," to interest us. But the Pacific States Watchman, the A. O. U. W. organ, is conducted in a very liberal manner and is a good family journal.—*Alameda County Reporter.*

Bro. D. Cohen, late Financier of Harmony No. 9, was presented by the M. W., a set of engrossed resolutions, on January 22d. Said resolutions recited his patience, efficiency and fidelity as a Financier, and the confidence and the esteem of Harmony Lodge. Bro. Cohen received his souvenir with evident satisfaction, and feelingly replied.

Peter Abrahamson, P. M. W., and for a long time Receiver of Unity, 27, was presented a P. M. W. gold badge, on Tuesday evening, Jan. 25th. Bro. I. D. Martin, in one of his serio-comic speeches, took our venerable Receiver by surprise and completely confused him, as was evident from his inability to reply.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Every Lodge should have a Digest. One dollar and a half cannot be invested to better advantage.

Such Lodges as have not remittance report blanks or book should lose no time in procuring them from this office. The reports are indispensable for correctness.

The *Pacific Overseer* reports that Bro. J. K. Price, D. G. M. W., now at work in Oregon, has accomplished more than all their District Deputies together. He is a stirring Workman.

If every Recorder in this jurisdiction would read the Watchman carefully, he would find in many cases that his duties would be more fully understood, and much annoyance on all hands saved.

I have been too busy of late to make reply in detail to the many expressions of fraternal regard received from the brethren, but must respond to all at once here and now, with a hearty God bless you!

Our registry list now contains almost 12,500 names, and still the roll is swelling in numbers, nearly 300 having been added in January ultimo. The A. O. U. W. maintains its position as the most popular Order of its character.

The session of the Grand Lodge will cause a little tardiness, no doubt, in answering communications for a little time. It is and has been the rule of the office never to leave a letter over night unanswered, but under the circumstances, no doubt, a violation will be deemed excusable.

California is beyond doubt the most prosperous jurisdiction in the United States. It has suffered from none of the causes that so frequently afflict new organizations. It was started under good auspices, and has continually improved upon its original prospect. Of course the writer hereof is proud of the fact.

I am gratified that so many Lodges have re-elected their old Recorders and Financiers. Those officers, if efficient and trustworthy, should never be changed, so long as they can and will serve in their respective capacities. It is good policy, also, to pay them what the Lodge can afford, for better service is almost invariably secured by so doing.

A. O. U. W. in Nevada.

In a recent issue we referred to the formation of three new Lodges by J. W. Kinsley, our Grand Lecturer, who has been appointed Deputy Supreme Master Workman for Nevada.

The especial object of Bro. Kinsley's visit to Nevada was to organize a sufficient number of Lodges to authorize the formation of a Grand Lodge for that State. Nos. 2, 3, 4 and 5 were instituted by Deputy Royal I. Auld, in 1878; No. 1, by another Deputy in the same year. Bro. Kinsley has now completed the work by the institution of Nos. 6, 7, 8, 9, 10 and 11. River, No. 6, was instituted at Dayton, Dec. 21st; Security, No. 7, at Virginia, Dec. 30th; Lucille, No. 8, at Sutro, Jan 5th; St. James; No. 9, at Winnemucca, Jan. 15th; Victory, No. 10, at Battle Mountain, Jan. 18th, and Hope, No. 11, at Austin, Jan. 21st.

The necessary action is now being taken by the brethren of Nevada, and we expect soon to be able to extend the right hand of fellowship to their new Grand Lodge.

An Event.—It is confidently expected that on Wednesday evening, Feb. 2d, at B. B. hall, 80 or more candidates will receive the M. W. degree in Valley Lodge, No. 30. There will be probably 1,500 brothers present as witnesses to the fact. It is stated that this large number of men will compare favorably with our present membership, and honor our brotherhood.

Gets the Worth of his Money.—N. G. B., North Temescal, writes in reference to our last number: "One subscriber exclaimed upon receiving his first copy, 'Is this just one paper, or are there two together?' When I assured him it was just one, he said: 'Well, that is the cheapest paper I ever saw. One gets the worth of his money when he takes that paper.'"

Points of Interest in the City.

While it must be confessed that San Francisco is not a picturesque city, generally speaking, there are portions of it which impress the visitor favorably, and the views from the summits of the hills would be considered fine by even traveled men. The grand, wide-spreading bay of San Francisco, extending north and south as far as the eye can reach, bounded and encircled by the rolling ranges of hills, which elsewhere might be considered mountains, presents an inland water view which has few equals. The great city itself spread out before the observer will, to the stranger, be an object of interest worthy of a few hours' study.

Until within a few years few people went to the hill-tops for the view, for the only means of getting up was by special vehicle or by walking. Now the wire-rope railroads have made the highest summits accessible. One seats himself on the open "dummy" and is smoothly carried up and down the hill at regular speed, and may avail himself of the opportunity to have a general look at the whole city. Clay street, California street, Sutter street, and Geary street hills are now all within easy reach, all these thoroughfares being provided with cable roads. A ride over each of these roads will repay the visitor, if only to see how they are operated. From the elevations gained, however, commanding views of different sections of the city are seen.

To the casual visitor, there are many places of interest to note, and see. First of all is the Golden Gate Park which may be reached by means of the Geary street cable road and connecting steam dummies. There are walks and drives, fountains, conservatories, rare plants, and all the accessories that go to make up a public park on a large scale. Woodwards Gardens, with its extensive, instructive and well-arranged museum, its beautiful aquarium, collection of wild animals, fine conservatory and all its varied attractions is of course, one of the city sights. A ride to the Cliff House and a drive along the beach and a visit to the Government life saving station will easily fill up an afternoons' time. Our municipal elephant, the New City Hall, somewhat unsightly in its unfinished appearance, is nevertheless worthy of a visit as being the largest and most costly structure on the coast. The Market street cars pass the city Hall, which is opposite Eighth street. The U. S. Mint, on the corner of Mission and Fifth streets, a fine specimen of Doric architecture, is one of the finest buildings in the city. Visitors are admitted under certain restrictions and at certain hours. The State Mining Bureau, at 313 Pine, above Sansome, has a fine collection of minerals and many interesting objects, showing the various products of the State. This is open from 10 to 4 daily.

Some people call San Francisco the City of Hotels, and the name is appropriate if elegance of outfit and extensiveness of structure of some of our hostelries is considered. The Palace hotel looms above all other buildings, and is a landmark at a distance as is St. Peter's at Rome. It has 755 rooms above the ground floor. The Grand hotel, now connected with it, has 400 rooms. The Baldwin, on Market and Powell Sts., with its 495 rooms, is a most elegant structure, beautifully furnished, and will be interesting to visit. There are numerous theaters all extensively advertised, so no one will fail to find them.

The Free library is in the California Theater building, on Bush above Kearny, and is open to anyone. The Mercantile library is on Bush below Montgomery, and the Mechanics' Institute is on Post above Montgomery.

The Grand Recorder of the A. O. U. W. has his offices in St. Ann's building, opposite the Baldwin, on the corner of Eddy and Market. Shiels' building, on Stockton and O'Farrell, is noted as a center where many of the Lodges meet. The Mechanics' pavilion, where the Industrial fairs are annually held, is on Eighth St., between Mission and Market, opposite the New City Hall.

A ride to North Beach will give one a fine bay view, and an opportunity to see the progress of work on the sea wall now being built by the State Harbor Commissioners. From this wall one can look out to sea through the Golden Gate; see Fort Point, with its fortifications; Black Point, Headquarters of the General commanding the department of the Pacific; Alcatraz and Angel islands both fortified and garrisoned; the Saucelito shores with its yacht and club houses, etc.

In the lower part of the city, near the Post Office, is the Appraisers building, the largest structure on the coast belonging to the Government. It is four stories high, 265x120 ft., and cost over $800,000. Here are the offices of the Collector and Internal Revenue; special agents of the Treasury; U. S. Coast survey; U. S Revenue Marine; Navy Paymaster; U. S. Steamboat Inspector; U. S. Boiler Inspector; U. S. Marshal; District Attorney; U. S. and District Courts, etc.

The Land office, U. S. Treasurer and Surveyor Generals offices are on Commercial St., above Montgomery.

The Fire Patrol drill is one of the sights of the city. The building is on Stevenson, corner Ecker. Each day promptly at 12, M., the drill is gone through, and any one can see it by calling there. Among other buildings in the city worthy of a visit are the Pioneers' hall, on Montgomery, near Jackson, and the hall of the Academy of Sciences, corner of Dupont and California. The U. S. Signal Service Observer has his office in the Merchants' Exchange. The rolling mills at the Potrero; the foundries down in the lower part of town, China town, etc., are also places which will interest visitors. We have mentioned only the more prominent points and objects in the city, space forbidding extended remarks. A trip to Oakland and to the Alameda baths will also repay strangers who have the time to spare.

Grand Recorder's Financial Statement for December.

We condense from Grand Recorder Pratt's Financial Statement for December the following leading figures:

DISBURSEMENTS.

Balance in hands of G. Rvr., Dec. 1, 1880, Benef. Fund	$ 264.00	
Received during Dec., Benef. Fund	19,003.00	
Total		$19,267.00
Paid Emma A. De Haven, Benef. Fund, Warrant No. 58	2,000.00	
Paid Eliza Werry, Benef. Fund, Warrant No. 59	2,000.00	
Paid Elizabeth Reider, Benef. Fund, Warrant No. 60	2,000.00	
Paid Annie N. Gethings, Benef. Fund, Warrant No. 61	2,000.00

Bal. Gen'l Fund		$2,135.87

The change authorized in our regalia has been adopted by most of the Lodges. As the secret work is now uniform throughout our jurisdiction it seems to us that our regalia should be uniform also. There is a general dislike to the old regalia, and we can imagine a number of conditions we might be placed in, that would make us as an Order, appear ridiculous. We need hardly cite them; but suppose at the meeting of the Grand Lodge, two sets of regalias for the same officers were used, or be attended a funeral as Workmen with different dress, it would certainly call for some severe strictures from the spectators and be humiliating to our brethren in such an extraordinary march. We hope our brethren will consider this matter at once and adopt a uniform regalia, by substituting the badge for the apron and cumbersome collar.

The A. O. U. W. in Arizona.—We note in the *Arizona Citizen* of January 15th, published at Tucson, that a Lodge of Workmen has been instituted at that place. An organization was effected by the election of Moye Wicks as P. M. W.; Henry Buchman, F.; J. M. Berger, Rvr; B. Heineman, Rdr; and A. Miltonberger, Fin. The new Lodge, composed of Tucson's best citizens, starts under most favorable auspices, and it deserves unqualified success. The Tucson Lodge will work under the immediate jurisdiction of the Supreme Lodge.

The Ancient Order of United Workmen has a larger representation of the industrial classes of society—mechanical manual and professional—than any other organization of a similar kind. Having this fact in view, the Watchman will try and interest its numerous readers from time to time which cuts of the notable buildings of our city and State and the industrial pursuits of our Bro. Workmen.

A 24-Page Edition.

It is our intention to give as full a report possible of the proceedings of the Grand Lodge session. It will be presented in such a manner as to be of material aid to Representatives when making their report to the Lodges.

Besides as full a report of the proceedings of the Grand Lodge, as will be of interest to the members, we will give a comprehensive summary of the reports of the Grand Lodge officers.

This 24-page sheet will be of much interest to the brethren, as the reports of officers, proceedings of the Grand Lodge and other matters of interest connected with the Order, will show in concise form the progress of the A. O. U. W. for the year.

General Relief Committee.

We gather from the minutes of the Secretary, Bro. E. M. Reading, a few facts connected with this feature of our Order, which, together with the Treasurer's report, Bro. G. Winehill, we herewith give. As the report says, we have found employment for 31 of our brethren, relieved the pecuniary distress of five brothers and their families, attended to the sick and dying, and assisted one brother from another State through a long sickness and at last performed the last sad rites of sepulcher. At their last meeting it was unanimously resolved to present the Grand Lodge with a memorial for their action in the premises. The Treasurer's report is herewith given:

San Francisco, Cal., Jan. 8, 1881.

To the Officers and Members of the General Relief Committe, A. O. U. W.—Dear Sirs and Brothers: Here with I beg leave to present my report of receipts and expenditures for the terms ending July 31 and Dec. 31, 1880.

Cash received Jan. 10, 1880	$102.44	
Cash paid on warrants 1 to 8, inclusive	81.50	
Balance cash on hand July 31, 1880		$20.94
Cash received from pic-nic	497.50	
Cash paid (expenses of pic-nic)	206.30	
Net proceeds of pic-nic		291.20
Total cash on hand and received during term ending Dec. 31, 1880		$312.14
Cash paid for relief during term ending Dec. 31, 1880		162.00
Cash on hand Dec. 31, 1880		$150.14
To be received from Concordia, of St. Paul		110.00
From San Francisco		15.00
Total		$275.14

Respectfully submitted,
G. Winehill, Treasurer.

The officers for this year are: B. J. Triest (Washington, No. 60), President; W. H. Voorhees (Golden Gate, No. 8), Vice-President; E. M. Reading (Franklin, No. 44), Secretary; G. Winehill (Unity, No. 27), Treasurer.

There has been some criticism given this committee in the last year. Knowing the arduous duties they have performed without recompense, we here commend their work to brother Workmen as a bright page in our history.

The total membership of the Order, November 1st, per Supreme Recorder's report, is 89,847.

Finance Committee Report Workmen's Guarantee Fund Ass'n.

From the report of the Financial Committee of the Workmen's Guarantee Fund Association, for the year ending Jan. 11, 1881, we take the following itemized account of the receipts and expenditures.

RECEIPTS.

Received for initiations and dues	$3,715.50
For assessment No. 1	216.00
For assessment No. 2	318 00
For assessment No. 3	412.00
Total am't rec. fr. Feb. 1, '80, to Jan. 11, '81	$4,661.50

EXPENDITURES.

Furniture for office	$102.00
Postage stamps	126.00
Secretary's salary	1,500.00
Secretary's expenses (traveling)	197.50
Paid to Mrs. Marvin (death assessment No. 1)	233.00
Paid to Mrs. J. C. Robinson (death assessment No. 2)	336 00
Paid to Mrs. L. R. Stover (death assessment No. 3)	446.00
Office rent to Feb. 1, 1881	180,00
Commissions (to agents)	326.00
Stationery and printing	306.75
Incidental expenses	231.05
Total	$3,984.50

PALMER'S,
No. 730 Market Street, S. F

For fine goods at the very lowest prices go to Palmer's, 730 Market street.

FURNITURE.

New and second-hand at auction prices, at H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

Temporary Deafness.

According to Dr. H. Augustus Wilson, a very common cause of deafness is the hardening of wax in the ear and the unscientific plan that people adopt for its removal. They generally succeed in making a bad matter worse. The ear is not so exquisitively sensitive to the presence of foreign matter as the eye, and hence those who work at the ear with hairpins and toothpicks are likely to injure themselves irreparably. Only the softest materials and the gentlest pressure should be used in cleaning the ear. In a recent clinical lecture, Dr. Wilson gave, in popular form, some very useful and practical information touching the removal of ear wax. If the ticking of a watch can be heard at a distance of 28 inches the hearing is good. Each ear should be tested by the watch separately. Noises in the head, sometimes ringing, frequently are due to hardened wax in the ear. Sudden deafness is sometimes caused as follows: A small mass of wax, from ill-health or uncleanliness, becomes hard. A continued secretion of wax then blocks up the ear tube still more. An injudicious attempt is then made to remove the wax by introducing, perhaps, a match end, a pin head, or a pen holder, which instead of removing pushes down the wax and packs it against the tympanum; or by a sudden draught or the act of swallowing the wax is suddenly pressed upon the membrane, and loss of hearing immediately ensues, because the membrane can no longer vibrate. The removal of the wax is in some cases, especially those of long standing, somewat difficult; but with gentle treatment and patience may finaly be accomplished and the hearing fully restored. The best ordinary means for removing wax, when not badly compacted, are half a drachm of sodium carbonate dissolved in an ounce of water, applied lightly, by means of a bit of absorbent cotton or sponge attached to a suitable handle. When the wax is much compacted it may be softened by means of water, quite warm, and a syringe.—*Sci. Am.*

DEALER IN FISH.

Stall No. 62 Center Market. Goods delivered free.

California to Arizona by Wagon.

We have received several letters from Californians inquiring as to the best and most direct wagon route from California to this place. As it would take us some time to answer each separate correspondent, and give a satisfactory reply, we have concluded to embody the information in an article for publication, and take Stockton, near the center of California, for the starting point. The information is correct in every particular, as we condense it from the diary of Mr. W. T. Woods, who, with his family, made the trip from Marysville last spring, an account of which appeared in these columns:

From Stockton you go to French Camp, thence to Barneysville, on the Stanislaus river, thence to Modesto, where you cross the Tuolumne river and continue to Ceres; then to Turlock, on the railroad; thence to Hoptown, on the Merced river, about 75 miles from Stockton; thence to Cox's ferry, and cross the Merced river, and thence to Merced City; from thence to Cottonwood creek, Berenda station, Fresno river, which you cross and continue to Borden, on the San Joaquin river, and thence to Fresno City, and from thence to Fowlers; thence to Kings river and Visalia, where you take the Farmersville road and go to Pottersville, about 200 miles from Stockton. Thence to Mandala Plana, on the Tulare river; thence to Deer creek and cross White river; where you cross a 30-mile desert to Kern valley; thence to Bakersfield and Sumner, the railroad station; thence via Tehachapi route to Caliente; thence to the old and new towns of Tehachapi, and thence to Cameron; and thence to Mohave and Buckhorn springs, and on to the Mohave river. From the Mohave river to Point of Rocks; thence to Cottonwood and Grapevine, which is about 425 miles from Stockton. From thence down the river to Fish Pond; thence to Camp Cody; thence to the Caves, on the Mohave river; thence to Soda lake; thence to Merrill springs; thence to Government Holes; thence to Pahute springs; thence up to the summit and down, passing through Lincoln county, Nevada, and to the Colorado river, opposite Fort Mohave, where you cross the river and continue up to Alexandria, via Hardyville; from thence through Union canyon to the Toll gate, which is some 625 miles from the place of starting. From thence you go to Beal springs; thence to Hualapai springs; thence to the Tanks, where you have the Prescott road, and turn down the Sandy, pass by the "Stinking wells," and on down the Sandy to Omarra ranch and the Santa Margarita; thence to Grapevine, and thence to Date creek. From this place to Wickenburg, and thence to Seymour; next to Agua Fria, and thence to Phœnix, which is about 850 miles from Stockton, and it will take from 35 to 40 days to make the trip, where you will find the editor of the *Expositor* and many others who will be glad to show you our country and tell you of its wonderful mineral wealth.—*Territorial Expositor.*

Educational.

Barnard's Business College
Gives the privilege of attending for two or three days free of charge to examine the Course of Study and see the Methods of Instruction. Professor Barnard gives his personal attention to the work, and entrusts nothing to Assistants. He does not hold out any false inducements to draw a large crowd and then hire teachers to do the important part of the work. He admits only as many as he can attend to personally. It will well repay a visit to his College, at 120 Sutter street, to see the elegant specimens of Pen Flourishing executed by Professor Barker, Mathematics and English Grammar, Spelling and Composition receive special attention.
Professor Barnard's new Grammar, now in press, will be published in a few weeks.

W. B. Chamberlain, Jr. T. A. Robinson.

New Steamer Ferndale.

The farmers, mechanics, manufacturers and citizens in the vicinity of Eel river valley, Humboldt county, one of the most productive portions of California, have been practically cut off from the world owing to the bar at the mouth of Eel river. After waiting for capitalists to come forward, and relieve their necessities, and reap a rich harvest for their investment, the leading citizens united in one purpose, and enlisted the enterprising firm of Johnston & Veasey, commission merchants, 324 Davis street, to build a steamer that should combine strength for ocean travel, and of such light draft, and so constructed that she could surmount the difficulties of navigating this crooked, shallow river. Calling to their council men of experience and skill, such as J. Ross, they decided to construct a vessel different in design from any that had ever been built. In so doing they encountered the ridicule of the fossils and wiseacres, and as the enterprise assumed shape, the hostility of rival towns and steamship corporations. This opposition has been kept up, even to published falsehoods in the daily papers representing the time between Humboldt bay and the city as 90 hours, when in fact it was less than 36 hours. She is a double propeller, with double compound engines, draws eight ft. when loaded with 325 tons, and a very steady rider in a rough sea. She is now on her seventh trip for passengers and freight. The cost of this steamer was $50,000. Her Captain, Bro. J. Ross, and agents, Bros. P. Veasey and L. W. Johnson, constituting the firm of Veasey & Johnson, 324 Davis St., are live, energetic men, and deserving of the highest praise for their tenacity in carrying to a successful termination this gigantic undertaking.

THE MAILS.—The general delivery of the San Francisco Post Office is open from 8 to 8 daily; the registry, stamp and box windows closing at 4. The money order department is open from 9 to 3. The Overland mail closes at 9 A. M., and arrives at 11:50 A. M., and this includes routes to Sacramento, Marysville, Placerville, etc. Stockton, Lathrop, Milton, etc., mails close at 7 A. M. and 3:30 P. M.; and arrive at 12:45 and 5:50 P. M. Suisun, Benicia, etc., close at 9 and 3:45 and arrive at 12 M. and 7:50. Tulare, Merced, Los Angeles, San Diego, Arizona, etc., close at 3:30 and arrive at 12:50 P. M. Virginia, Carson, Truckee, Grass Valley. etc., close at 9 A. M. and 11 P. M.; arrive at 11:50 A. M. and 7:50 P. M. River routes close at 3:30 and close at 12 P. M. Cloverdale, Santa Rosa, Petaluma, etc., close at 2 P. M. and arrive at 11 A. M. Napa, Vallejo and Napa and Lake counties close at 7 A. M. and 3:30 P. M., and arrive at 10:30 A. M. and 7:50 P. M. San Mateo, San Jose, Gilroy, etc., close at 2:40 P. M., and arrive at 11:50 and 6:30 P. M.

OUR organization represents all classes of industrial pursuits and varied nationalities. Numbering 100,000 in the United States, it seems very natural that many of our Bro. Workmen from the East should be attracted to our genial climate to build homes and establish new industries. Of the many who have done this, we mention Bro. J. F. Plumbe, who is now a member (and has been for eight years) of Dubuque Lodge, No. 9, in the city of Dubuque, Iowa. He has opened an extensive manufactory at 25 Second St., for making all kinds of buggy tops, from the adjustable umbrella sunshade for all classes of vehicles, to the most aristocratic turnout. Having an extensive stock of carriage, buggy and wagon tops, boots, lap-robes and cushions, he is prepared to make a liberal discount to the trade. See his advertisement.

WE HOPE to personally meet the Brethren from all quarters while in attendance at the Grand Lodge. We also invite them to call at the office of the WATCHMAN, No. 202 Sansome St. For the accommodation of those who wish to pay subscriptions for themselves or friends, the business manager, A. T. Dewey, and our reporting agent, J. C. Hoag, will be at the Grand Lodge Hall during this session.

BRO. WM. R. COX, Recorder of Vallejo, No. 75, called on us, Jan. 20th. The entertainment given a few weeks since has given the Lodge an impetus, and will add a number to their already select roll.

FOR the accommodation of visitors attending the Grand Lodge Reception at the Mechanics' Pavilion the following railroads will run all night: Mission street, Market and Valencia street, Hayes Valley, Sutter street and Larkin street.

THREE assessments in the Supreme Lodge jurisdiction for November.

THROUGH the columns of the WATCHMAN we desire to inform its many readers that we have established a wholesale and retail hardware business at No. 28 New Montgomery St., under the Palace Hotel. Builders' materials, carpenters' tools, brushes, fine cutlery, parlor riffles, airguns and everything in our line at the lowest rates. Cal and examine our stock and prices.—FRANK P. LUTSON & Co.

[Frank P. Lutson was formerly with the late H. Rosekrans.]

FIRST PASSION'S SLAVE MATINEE, Saturday, 2 P. M.

The Sun Recording Its Own Brilliancy.

An instrument for recording the intensity and duration of sunshine was devised as early as 1856, by Mr. J. F. Campbell, of England; but it has never, until quite recently, been made thoroughly practical and reliable. Still, even in its imperfect form, it has been made to do duty for several years at Greenwich and Kew, and several private observatories in England. The instrument consists of an ordinary "burning-glass," or lens, the focus of which is made to keep its place on a constantly moving strip of paper. The manifest difficulty of properly adjusting the complicated movements involved in such a work has only quite recently been fully overcome by the genius and patience of Prof. Stokes of England, whose improved instrument has recently been set up in some 30 stations in the British Isles. We are not advised as to whether the instrument has been introduced into this country; but if it will do what it is credited with, it must soon become a part of the ordinary equipment of every meteorological station in the world; for by it we may, in time, obtain a sufficient record of a meteorological element of primary importance in its relations to agriculture and to the public health, but which has heretofore been very imperfectly registered.

OUR SCATTERED CALIFORNIA INDIANS.—The census has issued the following statement of the number of Indians not under tribal organization in California: Alameda county, 103; Amador, 272; Butte, 522; Calaveras, 167; Colusa, 353; Contra Costa, 45; Del Norte, 411; El Dorado, 151; Fresno, 747; Humboldt, 1,566; Inyo, 631; Kern, 321; Lake, 785; Lassen, 324; Los Angeles, 278; Marin, 149; Mariposa, 151; Mendocino, 1,170; Merced, 7; Modoc, 404; Mono, 350; Monterey, 204; Napa, 64; Nevada, 98; Placer, 91; Plumas, 508; Sacramento, 13; San Benito, 77; San Bernardino, 605; San Diego, 1,629; San Francisco, 44; San Joaquin, 44; San Mateo, 80; Santa Barbara, 86; Santa Clara, 67; Santa Cruz, 125; Shasta, 870; Sierra, 12; Siskiyou, 384; Solano, 21; Sonoma, 331; Stanislaus, 27; Sutter, 10; Tehama, 137; Trinity, 161; Tulare, 18; Tuolumne, 143; Ventura, 87; Yolo, 46; Yuba, 60.

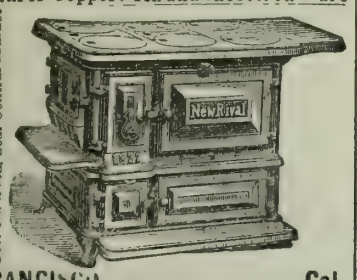
The Coloring Matter of Flowers.



Hitherto it has generally been supposed that the various colors observable in flowers and leaves were due to different kinds of matter which enter into the composition of the leaves and petals—each color being a different chemical combination, and so constituted that the substance of no one color could in any natural way be made to take up another color. Recently however, Prof. Schnetzler read an interesting paper upon this subject before the Vadois Society of Natural Sciences, in which that gentleman details a series of experiments recently made by him, which present this interesting subject in an entirely new light. The professor showed by experiment that when the color of a flowe has been extracted by mascerating the flower in alcohol, one may, by adding different acids or alkalies, obtain from that one color all the various other colors which plants exhibit. Take, for example, a peony: when mascerated in alcohol, a violet-red liquid is obtained. Now, if some oxalate of potassa be added to the fluid, it becomes pure red; if soda be added, it will appear violet, blue or green, according to the proportion of soda employed. If a green color is produced, it will appear red by transmitted light, just as a solution of chlorophyl does.

It was held by the professor that these changes of color might quite as well be obtained naturally in the plant by giving it the proper plant nourishment, since in all plants acid or alkaline matters always exist. It was furthermore stated that the change from green to red in "autumn leaves" is due to the action of the tannin, which is developed in the leaves. Hence, without affirming it absolutely, the professor believes that there is in plants and flowers only one coloring matter—chlorophyl—which, being modified by certain agents, furnishes all the various tints that flowers and leaves exhibit. As for white flowers, said the professor, it is well known that their cells are filled with a colorless fluid, opacity being due to the air contained in their numerous cells. This may be proved by placing the petals of such flowers under the receiver of an air-pump, when they are seen to lose their opacity, and become transparent as the air escapes. If the deductions which the professor makes from his experiments are correct, a wide and most interesting field of experiment is hereby opened up to the scientific florist.—*Californian for February.*

Stoves and Hardware.

Drawing Lots for Life.

The perils of the sea have touched the heart and roused the sympathy of all the world for those who are called upon to undergo them. In our early days we used to read the dreadful stories of suffering, of starvation, of thirst and of death from an utter lack of the needful things of life, and even in our childish philosophy we used to think those most kindly dealt with who sank with the ship, and were spared the days and weeks of agony.

We who live upon the solid land, who feel its enduring support beneath our feet, and go upon it as we will, to seek that which our life and comfort demand, are too apt to forget the intense suffering of those whose ill fortune it is to be cast abroad upon the barren waste of the ocean, chained to a raft which saves from drowning, and yet saves but to submit to a worse fate, which saves life only to steal it away by most excruciating torture. We think of these things occasionally, but they seem so far away that our own feeling of security drives away a realization of the woes which our fellow men are called upon to suffer. Sometimes there comes an account of unusual suffering, and we pause a moment to render thanks to Him who casts our lot in pleasant places. Only the other day we read a heart-rending story of actual suffering at sea, the impression of which we cannot dismiss from the mind. It was the ordinary story of wreck through adverse elements, with which all accounts begin. There was the band of survivors upon the hastily constructed raft, floating about for a time with full courage that each succeeding morning would disclose some friendly sail upon the surface of the waters, and that surely another day would find them on the way to life and friends. Thus days passed, until the food and water were exhausted, and starvation came to pinch the frames from which hope had well nigh gone out in despair. Then came that most dire recourse for the saving of life, the sacrifice of one for the maintenance of the many. Who of us can realize the desperation which leads to such an act? Who can appreciate the depth of suffering which nerves the man to draw the knife across the throat of him whom the lot marks for death? We imagine that deep as our feeling may be, we do not reach even the surface of the woe which fills the hearts of men in such an event. It cannot be otherwise. No one knows suffering save those who have suffered. The story to which we have alluded tells how the despairing outcasts set apart one after another of their number for the common sustenance, until at length there were but two surviving. These two were finally rescued, but one life thus sustained in agony was so frail that, after a few hours of safety, it too passed away. Who can measure the length and breadth and depth of the grief and torture which that life endured ere it bade farewell to the wasted body which held it a prisoner for so many dreadful days.

Our illustration will call to mind vividly the scenes which we have been noting. A large group of survivors have found support upon the raft, but their food is gone and the recourse is being had to the human sacrifice. The lot is being drawn. Note the fixed and anxious eyes which are fastened upon each man as he desperately plunges his hand into the fatal bag. It is a time like that which tries men's souls.

DRAWING THE LOT FOR LIFE AND DEATH.

It will do us good in our fancied security to think at times of the burdens which life sometimes entails. It will lead us to stop in our headlong and confident rushing after the affairs of this world to think of the higher life which is promised beyond. It will make us more charitable, more gentle and more kind to those around us, for who can tell how soon we may all be brothers in suffering. It will lead to refinement of disposition, to softening of the heart for all mankind. It will expand our views of the aims of living. As we dwell in thought upon the suffering of those whose right to joy and comfort is as good as ours, may not the thought lead to better life and to the reign of those finer sentiments of the heart which are crowning glories of a genuine humanity.

WE thank the brothers of Tulare Lodge, 78, for their kind interest. The Lodge meets on Saturday nights. The names of officers elected were printed in our issue of January 15th.

A DISPENSATION has been granted Suisun Lodge, 49, to meet on 1st and 4th Tuesdays of each month, instead of weekly.

GENERAL RELIEF COMMITTEE. — We are pleased to note that under the present administration this feature of our Order has crystallized into a regular organized system. The President, B. J. Triest, of Washington, 60, has a committee of five, which is known as the Employment Committee. This committee is authorized to make arrangements with employment offices to procure positions for all Bro. Workmen free of charge. There is also a Finance Committee. Each member of the Order is requested to interest himself in this work. Any request signed by three Workmen, from any part of this jurisdiction, will receive attention, and the brother will be assisted and employment given, if possible, at once. We hear of several instances where the committee has done good service. One, in particular, where a family was saved from ejectment from their humble home. Another, where a brother from Oregon has been furnished means to go into the interior to fill a position.

WE think it would be a good plan for some one in each Lodge to occasionally write an article describing their Lodge's progress and prospects for our "Lodge Local" department. Then let the paper be circulated among those likely to join. There are a great many men, we think, in each community in this State, who would likely become members if their attention was called to the Order and to what it is doing. This can best be done through the medium of the WATCHMAN. Let the hint be taken by the brothers.

R. C. HUNTER, representative to the Grand Lodge from Butte, 114, Meridian, writes us that the reason he was unable to attend the G. L. session was on account of the flood which occurred on the day he was to leave, all communication being cut off. The Lodge has passed a resolution paying for their Lodge card for 1881. We return thanks to the brother for his interest in our affairs, and will be glad to print the Lodge local which he promises.

"It Will Do Somebody Some Good."

The charitable and beneficial features of our Order have become so indelibly fixed in the minds of our membership from individual cases of want that have directly come under their own observation, that it is not uncommon to hear this expression when paying, or about to pay, the monthly assessments, "It will do somebody some good." Our payments of beneficiary certificates have been prompt and without any expense to the parties who have held them; frequently in less than 30 days from the death of a brother. This money, in several instances, was all the estate left to the widow and orphans, which saved homes and brightened desolate firesides. Not a month has passed but some extreme case of this kind has come to the notice of brethren in all parts of our jurisdiction.

Having these facts in view, it may not seem unwarranted for us to say that the majority of Workmen do not pay their monthly assessment as a tax grudgingly or unwillingly, but in a spirit of charity and benevolence, with this thought, "We do not know how soon our loved ones may ask in our name for this gracious boon."

As a rule, the beneficiary certificates are made payable to women — wife, mother, sister, or sweetheart — and we are cognizant of the fact that they, having seen these harbingers of protection sent out by our Order, have become interested, and frequently come to the Lodge-room to pay their husbands assessments. We can add, "It does do somebody some good," and chiefly dear woman. Let our brethren remember that every dollar paid into the beneficiary fund is not squandered or diverted from its sacred purpose, and that every dollar paid into the beneficiary fund will do somebody some good.

WE are pleased to record the fact that the expenses of the reception entertainment, at the Mechanics' Pavilion did not amount to as much as was at first expected. By order of the Reception Committee, G. Winehill, Treasurer, has refunded to each representative an amount that will equal 17 cents to each member in San Francisco. The cost of the reception was 23 cents to each member. As all the bills are paid these figures can be accepted as final. It is a very gratifying exhibit, and shows the prudence, economy and good management of the committee, bearing in mind the magnitude of the entertainment which was given. It was thought that the 40 cents per capita would not be sufficient to defray the expenses and that a second call would have to be made. That this has not been done, and the expenses are less by 17 cents than the amount originally fixed on, shows that everything was done for the best interest of the Order. We congratulate the committee.

Home Miscellany.

Drifted Out To Sea.

Two little ones, grown tired of play,
Roamed by the sea one summer day,
Watching the great waves come and go,
Prattling, as children will, you know,
Of dolls and marbles, kites and strings,
Sometimes hinting of graver things.

At last they spied within their reach
An old boat cast upon the beach,
Helter skelter, with merry din,
Over its sides they clambered in—
Ben, with his tangled nut-brown hair,
Bess, with her sweet face flushed and fair.

Rolling in from the briny deep,
Nearer, nearer the great waves creep,
Higher, higher upon the sands,
Reaching out with their giant hands,
Grasping the boat in boisterous glee,
Tossing it up and out to sea.

The sun went down 'mid clouds of gold;
Night came, with footsteps damp and cold;
Day dawned, the hours crept slowly by;
And now, across the sunny sky,
A black cloud stretches far away,
And shuts the golden gates of day.

A storm comes on, with flash and roar,
While all the sky is clouded o'er;
The great waves, rolling from the west,
Bring night and darkness on their breast;
Still floats the boat through driving storm,
Protected by God's powerful arm.

The home-bound vessel, *Seabird*, lies
In ready trim 'twixt sea and skies;
Her captain paces restless now,
A troubled look upon his brow,
While all his nerves with terror thrill
At shadows of some coming ill.

The mate comes up to where he stands,
And grasps his arms with eager hands;
"A boat has just swept by," says he,
"Bearing two children out to sea,
'Tis dangerous now to put about,
Yet they cannot be saved without."

"Naught but their safety will suffice;
They must be saved," the captain cries,
"By every thought that's just and right,
By lips I hoped to kiss to-night,
I'll peril vessel, life and men,
And God will not forsake me then."

With anxious faces, one and all,
Each man responded to the call;
And when at last through driving storm,
They lifted up each little form,
The captain started with a groan,
"My God!" he cried, "they are my own!"

—*Rose Hartwick Thorpe.*

Mrs. Wilkin's Duty.

"She always tried to do it," she said, but like kitchen work of poor housekeepers, it was never done up. Tim insisted that there was more than belonged to one family; "Aunt 'Liz'beth took in a good deal for other folks;" and once he slyly chalked a sign upon the front door, "Duty Done Here." But then Tim had arrived at that peculiar age when a boy has no rights, and is needed to run of errands, and it is probble that duty—his aunt's, not his own—interfered with his comfort even more than that of older people.

Mrs. Wilkin kept no dog, but her duty sniffed an opportunity and pounced out of its hiding-place, when there came a timid little knock at the dining-room door in the early morning, and its answering revealed a small, quiet-faced, brown-robed figure—face and dress both past the freshness of their youth—carrying a basket.

"Good morning, Mrs. Wilkin."

"Come in?" questioned Mrs. Wilkin, with only half an invitation in her voice.

The acceptance was a half one likewise.

"I called to see if you didn't want to buy some knitted articles, or to engage some work of that sort," she began, in a gentle, deprecating voice.

"Well, I don't," interposed Mrs. Wilkin very positively. "I do all such work myself."

"I didn't know. Many ladies haven't time, and I'm glad to do it."

"I suppose so, but I consider it my duty to do all I can myself, and set other folks the example, whether they follow it or not," said Mrs. Wilkin, with a slight gesture like emptying her hands of responsibility. "If I was goin' to give out work at all, it would be some hard jobs that it would be a help to be rid of; not the pick and choice little easy things that I call rest and not work; but then I ain't as particular as some, and so I do all kinds myself."

A faint flush crossed the visitor's thin face. She was not quite sure that she had been called indolent and advised to go to work and earn an honest living; the words only had an uncomfortable sound; so her lips kept their timid, gentle smile, though they trembled a little.

"Wasn't you rather hard on her, 'Liz'beth?" asked Mr. Wilkin, with a regretful glance toward the door as it closed.

Mrs. Wilkin returned to her seat at the breakfast table, and surveyed him over the shining tin coffee-pot.

"Hard on her? I only told her what I do, and if that pricks her conscience and makes her uncomfortable, it's not my fault. She's one of the weak kind that can't be stirred up, and haven't spunk enough to say their souls are their own. I wonder what such folks are good for; they'll never make the world any better, that's sure."

"But then everybody ain't alike, 'Liz'beth," interposed Mr. Wilkin.

"Needn't tell me that! it's plain enough," snapped Mrs. Wilkin. "Just look at this neighborhood—peaceable, orderly place two years ago; and now there's a mill started and all sorts of vagabonds brought here to work it."

"I don't see as the mill folks have done any mischief yet, 'Liz'beth."

"Of course you don't see, and nobody else sees; but I know there's something goin' on, when the lower part of the mill—that old empty store-room back where it can't be seen from the street—is lighted up two or three nights every week," said Mrs. Wilkin triumphantly.

A suppressed giggle made Tim suddenly cough and put down his coffee cup.

"Timothy!" exclaimed his aunt, severely. "If you can't drink coffee without doin' it so fast that you choke yourself, you'll have to go without it. I'll do my best to bring you up right, whatever comes of it."

Bringing up Tim in the way he should go was one of Mrs. Wilkin's strong points. He was the son of her niece; and Belinda had married in opposition to her aunt's advice.

"Having the boy to raise makes me more careful about the morals of the whole place," she said, returning to her original subject; "and as for being no thieves 'round here, I've thought for some time that the meat went pretty fast from our smoke-house."

"Don't—now, 'Liz'beth, I—I'm sure no one's stole any," said Mr. Wilkin, with a startled, uneasy look. "You—you couldn't have counted the hams and everything."

"No, I don't count, but I can miss'em for all that," affirmed Mrs. Wilkin decidedly. "I know there's more go than we use."

"Anyway, it's no difference. I wouldn't, 'Liz'beth—there's plenty, you see, more than we want," advised Mr. Wilkin, urgently but rather incoherently. Then he caught up his hat and started for the barn.

Mrs. Wilkin looked after him with pitying disapproval.

"When you've more than you want yourself, leave it handy for somebody to steal! Well, that's a new commandment, I do declare!" she said.

"Not so dreadful new, neither, Aunt 'Liz'beth," interposed Tim, stoutly. "'Cause the Bible folks was told to be sure and leave some of their harvest so the poor could come and get it. I read it myself; only it wasn't called stealing then, and was to be left handier than all stowed away in smoke-houses."

"Timothy!" began Mrs. Wilkin. But Tim suddenly remembered that the chickens were waiting for their breakfast.

"Yes'm, I'm goin' to feed'm right away," he observed, seizing a basket of corn and darting through the door by which his uncle had departed.

In truth it was not altogether easy to mold Tim into the desired shape; there was too much individuality about him. Encasing him in Mrs. Wilkin's code of manners was putting too large a boy into too small a jacket; he was always bursting out at the elbows or tearing off the buttons.

That evening the mysterious lights appeared again in the store-room of the mill. Mrs. Wilkin determined to take a more thorough observation than the kitchen window allowed, and, throwing a shawl over her head, she picked her way carefully down the icy steps and crossed the yard to the gate.

But before she discovered any one entering there she heard sounds in another direction—steps in the yard behind her. Yes, some one tried the smoke-house door and entered. Breathlessly Mrs. Wilkin waited until the figure reappeared. It was easily recognized. Mr. Wilkin, beyond all question, stealing meat from his own stores!

The revelation was astounding. In her astonishment Mrs. Wilkin incautiously loosened her hold on the gate-post, took a step forward, and her feet slipped upon the treacherous ground. She sat down violently, and in an instant was speeding rapidly down the hill toward her original point of investigation. For once the path of duty was smooth before her—entirely too smooth, and icy. She could not check or guide her progress; her feet struck with force against the mysterious door, pushed it open, and she slid into a hall.

Thieves, gamblers, or whoever they were, she must not be discovered, and springing to her feet, she slipped behind some boxes piled near her. The noise attracted attention, and in a moment the store-room door was opened and a boy looked out.

"Guess it's only the door blew open; don't catch good," he reported.

"Lock it then, James, and bring in the key," said a voice from within; and to Mrs. Wilkin's consternation the order was obeyed, and she was a prisoner.

The boy left the other door slightly ajar as he re-entered. A gleam of light shone into the hall, and there were sounds from the room beyond, a scratching of pens, and a woman's voice; it sounded wonderfully like that of the little knitting-woman, directing and encouraging.

"Well done, Susan."

"Now don't be disheartened, Will."

There were a few simple mathematical problems, and then a reading, and the words, spelled out with difficulty by some, were Bible words.

"Charity suffereth long and is kind," "Vaunteth not itself," "Seeketh her own," "Thinketh no evil," "Beareth all things, believeth all things, hopeth all things."

Then those wonderful words read so slowly and emphatically, seemed suddenly to assume a new and deeper meaning than Mrs. Wilkin had ever thought of their possessing—some things do show so much more clearly in the dark than in the light.

As the timid little woman, who would have been frightened at her own voice in any other audience as large, explained in her simple, gentle way, the passage read, it occurred to the listener outside that some one was keeping a "sharp watch" on these mill people, after all, and that this might be a better way of doing it than would be practiced by any police force. It was a very informal school. One girl had brought her best dress that the teacher might show her how to mend a rent in it, and another was trying to knit a pair of mittens for her brother. Every winter has its thaws. Mrs. Wilkin had a heart down under all the crust of opinions that she had christened duty; she became interested despite of her uncomfortable situation.

The position was unpleasant. But when the lesson hour ended they departed slowly, by twos and threes, the open door flinging a flood of light out into the hall. At last only one lingered, and Mrs. Wilkin listened intently as she caught his voice.

"Now, Tim," said the little knitting-woman, "I like to have you come, you know that, and I'll help you all I can, but you really must tell your aunt about it."

"Well, you see, I don't know what she'll say," began Tim, irresolutely.

"But that should not hinder you from doing your duty."

"Don't know about that," said Tim, still doubtful. "You see, Aunt 'Liz'beth's got an awful 'mount of duty of her own, and it's such a partic'lar kind that other folk can't get much chance to do theirs only when hers is knappin'. Why, Uncle Reub gives my mother lots of meat, but he just slips it off and don't tell."

"Well, if you don't know what is right for you, I do know what is right for me," said the little teacher with a quiet laugh; "and I can't let you come again until you tell your aunt how you spend your evenings."

Mrs. Wilkin nodded a vigorous approval, but it was evident that Tim departed in a state of dissatisfaction.

There was a sound of a crutch tapping on the floor, and Mrs. Wilkin remembered that a little lame brother had sometimes gone about with the knitting-woman. The two were left alone in the room, and went around shaking out the fire, and putting up the books and papers.

"Only ten cents a week for each one—that's so little," said the boyish tones, musingly.

"Yes, but it isn't so very much that I can teach them," answered the little woman, humbly. "And then it's all they can afford to pay, poor things! And you know we began more for their sakes than our own, though we do need money. Courage, though, Johnny! it all counts, and you shall have your overcoat pretty soon now. Besides, this is work that blesses both ways—in what we give as well as what we get."

If she could only pass that open door! Mrs. Wilkin was growing benumbed by standing so long in the cold. Finally the light was extinguished, and the two came out. Just then, fortunately, Johnny remembered that they had left a book behind them, and as the unconscious jailers turned back, the prisoner seized her opportunity and escaped.

She was sitting alone by the fire when Tim, who had made his homeward route sufficiently circuitous to include a call on his mother, returned. He sat down near her, twisted his fingers uneasily, and Mrs. Wilkin guessed what was coming.

"There's been an evein' school started here, Aunt 'Liz'beth."

"So I understand," responded Mrs. Wilkin, coolly.

"Why, I thought"—began Tim, with wide open eyes of surprise, and then checked himself with a sudden reflection that it might not be wise to recall the conversation of the morning. "I'd like to go to it—that is, I have been once or twice," he said. "Fact is, Aunt 'Liz'beth, when we lived down the river, before you took me, there wasn't any school for me to go to, and so I'm behind other fellers. Miss Kelsy, she makes 'rithmetic so plain, and helps me with writin', and so—"

"You might do worse," said Mrs. Wilkin, briefly. "Go if you want to. Only one thing, Timothy Stone, I won't have any ten-cent business about it! Honesty is honesty, and it's worth more'n ten cents a week to teach *you* any thing, as *I* know."

"She wouldn't take any more pay, 'cause she'd want to serve all alike, but oh, Aunt 'Liz'beth, if I just could give her and Johnny something nice for Christmas!"

"Humph! I'll think about it," answered Mrs. Wilkin, not disapprovingly.

"'Liz'beth," began Mr. Wilkin, nervously the next morning, "I wouldn't say nothin' to anybody about thieves, or watchin' them mill folks, if I was you."

"I don't mean to," replied his wife, with an odd pucker about her lips.

"Well, I'm glad of it—I really am," said Mr. Wilkin, in a tone of great relief.

"Reuben," she said quietly, "if you see any thieves 'round our smoke-house, just tell'em there's a couple of chickens hanging near the door, that I dressed a purpose. It's natural Belinda'd like a change of meat as well as other folks."

It is claimed by some medical men that smoking weakens the eyesight. Maybe it does, but just see how it strengthens the breath.

When a young lady asked to look at a parasol, the clerk said: "Will you please give the shade you want?" "I expect the parasol to give the shade I want," quoth the young lady.

Simplicity in Dress.

In the month of January, 1875, I wrote an essay on the way "Ladies dress and spend their time, a good reason why gentlemen of culture do not marry." I now continue the subject, showing the reformation pertaining to the various modes of dress during the last six years. At that time the ladies appeared on the street in their long trains, gathering mud and dust, and being caught by the uneven sidewalk until their skirts were lengthened out by the facing and braid, which hung in festoons, presenting a disgusting picture to all those who chanced to be close observers. At that time I resolved to adopt a more reasonable and sensible costume, namely, the walking dress, of a convenient length, clearing the ground and presenting a neat and tidy appearance to the eye of the most fastidious. And in so doing I found myself the cynosure of all eyes, attracting as much notice as a long train does at the present day, which, as everyone knows, is considered decidedly outre.

There is also a marked reform in the dressing of the hair, false braids and puffs being now a thing of the past, excepting on state occasions, which demands full dress. The hair, if properly cared for and neatly and tastefully arranged, will be ornamental of itself. "Simplicity is the soul of good breeding." The multiplicity of mammoth braids (artificial) is superfluous. In the first place it is ruinous to the hair. Have you not observed how few there are who have a good, heavy growth, and why? First, the children must have their nice locks crimped, wearing it closely braided for 12 hours, at least; and while the little innocents are folded in the arms of Morpheus, the head, which should be kept cool and free, becomes heated and irritated, and the consequence is, the would-be luxurious growth becomes harsh and broken, and when they reach womanhood, to be fashionable, they must resort to false braids, and "restoratives," which has a tendency to heat the scalp, until what little natural hair they have falls off, and it is fortunate, indeed, if the brain does not become diseased, as it has in many instances, producing insanity.

Truely, a great change has come over us; but there is yet an opportunity for greater results; for there are still many in the toils or web of fashion, whose minds are fully occupied and worried with the one absorbing idea of what to wear. To eclipse or outshine one's neighbor is the ruling passion. Wives and mothers, what kind of a resting place for your husbands and children do you make while thus obeying implicitly fashion's mandates? Is it any wonder that the single men of the present day with moderate income hesitate to take to themselves one of these gaily apparelled butterflies that throng our public promenades? Does he not worship afar off, fearing to lay his heart's treasures upon such a gilded altar? Rather let our own sex, old and young, strive to appear so modestly and neatly attired, that no man shall fear to embark on the matrimonial sea, lest a domestic hurricane ensue, because he cannot launch out in all the extravagances of wealth

A woman's realm should be "Home, Sweet Home."

> "Home is the sphere of harmony and peace,
> The spot where angels find a resting place,
> When, bearing blessings, they descend to earth."

Yes, home is one of the dearest words in the English language. Home, where the true wife awaits her husband's coming with outstretched arms, and smiling face upturned, ready for his welcoming kiss. Where the little fire burns brighter and the simple food tastes sweeter for his presence. Home, where love, truth and affection reigns supreme. Where no demon of envy or jealousy finds entrance. With a feeling of quiet content, he heeds not the raging tempest without, for his bark has glided safely through wind and wave, upon calm waters.

> "So calm, the waters scarcely seem to stray;
> And yet, they glide like happiness, away.

—*Mrs. Angie E. Marjeson, San Francisco.*

Suggestions Concerning Long Life.—If any one could furnish the world with a medicine which would insure a long life, there is no end to the demand he would have for his drug. The *Herald of Health* thinks he would need many factories to make it, and many banks to hold the money he would receive. Fortunately, there is no such medicine, and so the world will have to get along in some other way. Some time ago the French government sent a circular letter to all the districts of that country to collect information as to those conditions of life which seemed to favor longevity. The replies were very interesting, but on the whole rather monotonous; and the general result was that longevity is promoted by great sobriety, regular labor, especially in the open air, short of excessive fatigue, easy hours, a well-off condition, a philosophical mind in meeting troubles, not too much intellect, and a domestic life. The value of marriage was universally admitted, and long-lived parents were also found an important factor. A healthy climate and good water were mentioned. All this agrees with common sense, unless the idea that the intellect is a hinderance to longevity be considered unreasonable, and we know that some of the most intellectual men have lived to great age.

"In the sentence, 'John strikes William,'" remarked a school teacher, "what is the object of strikes?" "Higher wages and less work," promptly replied the intelligent youth.

For our Boys and Girls.

Our Puzzle Box.

Botanical Enigma.

I am composed of twelve letters.
My 7, 2, 3, 6 is a pretty flower found in a variety of colors in every flower garden
My 5, 1, 8, 3, 8, is the species of plants with which we oftenest meet in nature.
My 5, 4, 7, 12 is the minute particle whose development produces the mighty oak or the tiniest violet.
My 1, 8, 10, 9 is one of the greatest necessities to the life of the entire vegetable kingdom.
My 11 is in chrysanthemum.
My whole is a very fragrant plant.

CEPHA.

Eminent Europeans.

1. A deep cavity.
2. A very cunning wild animal.
3. To construct, a cobbler's tool, and an affirmation.
4. An ancient weapon, a negation, and a portion.
5. A prefix, a beam of light, a cloth measure, and a personal pronoun.
6. A point of the compass
7. The side of a building, and a card.
8. A Spanish title, an article, and an agricultural implement.
9. A vertical beam or support, and a contraction often applied to certain passenger conveyances.

JENNIE.

Decapitations.

1. Behead a vessel and leave to engrave.
2. Behead a hook and leave a piece.
3. Behead strategy and leave custom.
4. Behead to reduce and leave to lessen.

OLD JOE.

Square Puzzle.

* * * * *
* * * * * *
* * * * * *
* * * * * *
* * * * * *
* * * * * *

1. A crime.
2. A vowel and before.
3. Compensation.
4. A receptacle.
5. Before and a vowel.
6. Often the cause of my first.

The square reads across and downward the same, and from right to left and upward the same. O. G.

Easy Problem.

A and B can do a piece of work in sixteen days. They work together for four days, when A being called away on other business, B is left to finish it, which he does in thirty-six days more. In what time would each do it working separately.

Answers to Last Puzzles.

NUMERICAL ENIGMA.—Sir William Blackstone.

CURTAILMENTS.—1. Pan, pa. 2. Beer, bee. 3. Boat, boa. 4. Mate, mat. 5. Seed, see. 6. Bate, bat. 7. Brown, brow. 8. Mars, mar. 9. Seal, sea. 10. Pale, pal.

ARITHMOREMS.—1. Hancock. 2. Adams. 3. Monroe. 4. Madison. 5. Tyler. 6. Lincoln. 7. Buchanan. 8. Jackson. 9. Fillmore. 10. Van Buren.

HIDDEN CITIES.—1. Edenton. 2. Easton. 3. Canton.

CHARADES.—1. Pump-kin. 2. Par-snip. 3. Car-rot. 4. Par-sley (slay).

Tom's Lesson.

"Go and get it! Go and get it, I say!"

Poor little Dash crept close to his young master's feet, looking up in his face with earnest, pleading eye, as if he would say:

"Please, please don't! I cannot do what you want."

Tom was trying to make Dash swim after a stick which he had just thrown into the river. Now Dash was not a water dog, having no more love for it than a cat, and foolish Tom was bent on making him one. He kicked the poor little animal away and repeated his order; then, angry that it was not obeyed, seized him and threw him into the water. The dog was sorely frightened, but by hard struggiing reached the bank, and crawled to his master's feet, with a pitiful whine, wet, panting, trembling. The cruel boy caught him up with rough words, and was just going to throw him in again, when a pair of strong arms seized him, and a man's voice said:

"Here, you young scamp! Now we'll see how you like to swim!"

It was Tom's turn to be frightened. He turned pale, trembled and caught his breath as the stranger lifted him in his stout arms as easily as he had poor Dash. He began to beg.

"Oh, sir, pray don't! I cannot swim, indeed I cannot! Oh, don't throw me into the water! I will never, never do so again."

The man paused, but did not let go his hold.

"Neither can your dog swim," said he; "but you meant to make him do it, just to amuse yourself. Why can I not make you do it to amuse me? I am as much larger and stronger than you as you are larger and stronger than that poor, panting, trembling dog."

Tom still begged and promised, and the stranger at last released him, saying:

"Now, my boy, let me give you a kind word of advice. Never treat another, whether human being or dumb animal, as you would not like to be treated yourself. Never try to make anybody or anything do what God, when he created it, did not make it to do, or to be what he did not mean it to be. If you keep these rules, you will be a better, wiser, happier boy. Good-by."

And Tom knew in his heart that the man was right, and the lesson, though it seemed severe, given in real kindness.

TEACHER: "Suppose that you have two sticks of candy and your big brother gives you two more, how many have you then?" Little boy (shaking his head): "You don't know him; he ain't that kind of a boy."

Humorous.

Chips.

AN epitaph for a faithful car conductor—He took his last fare well.

A BOSTON artist painted an orange peel on the side walk so naturally that six fat men slipped down on it.

ONE point of difference between a timid child and a shipwrecked sailor is that one clings to its ma and the other to its spar.

A MICHIGAN stump-speaker boldly announced, the other day, that "the country is drifting into arnica."

CLASS IN HISTORY—Professor: "What important personage was confined on the island of St. Helena?" Mr. H.: "Robinson Crusoe."

A CRY FROM THE HEART.—Little Dunce (looking up suddenly from her history book)—"Oh, mummy darling, I do so wish I'd lived under James the Second!" Mamma—"Why?" Little Dunce—"Because I see here that education was very much neglected in his reign!"

"Spell 'Court,'" the teacher cried,
Unto the boy up head;
"C-o-r-t," shot it out;
"Next," sharply then he said.
"C-o-u-r-t, court," spelled Jack;
"Define the word, now, please."
"Define, what's that?" "Why tell me what
'Court' means, you little tease!"
"It means that when the feller comes
He motions with his head,
And says: Jemima, can't you send
That little imp to bed?"

Household Hints.

WHITE SOUP.—This soup is usually made from the white meat of chicken, or from veal; but an excellent white soup of vegetables may be made from the following receipt: Take six potatoes, four onions, four ounces crushed tapioca, a pint and a half of milk, butter, pepper, salt. This will make two quarts of soup. Cut up the potatoes and onions and put them into two quarts of boiling water; boil for three-quarters of an hour; rub the vegetables through a sieve; put back the potato-paste into the water again, add butter pepper and salt to paste; then boil the four onnces of tapioca for fifteen minutes in the soup, add the milk, and when fully heated through, serve. A little sweet marjoram or sweet basil, with a dash of nutmeg, adds to the delicate flavor of this nourishing soup.

SOFT-SOAP.—Put one and one-half pails of lye that will bear up an egg into your soap barrel and to it add eight pounds of melted grease, free from sediment. Thin with weak lye as it is obtained from the leach. Stir occasionally. It should thicken and be ready for use in two or three days, providing the weather is warm or the barrel stands in a warm place. This method makes very good soap, and it is a saving of time, strength and fuel, which is sufficient to justify one in throwing away the scraps, which may not be quite so thoroughly "tried out," as in the old method. As to the scraps, the best use they can be put to, is to throw them to the hens,—they will repay you.

MOUNTAIN CAKE.—To the yolks of five eggs, well beaten, add one cup of sugar, one half cup of butter, one half cup of sweet milk, one teaspoonful ground cinnamon, one grated nutmeg, then the whites of two eggs, well beaten, one and a half cups of flour, having in it one measure of baking powder, bake in jelly cake pans, when cold spread each layer with an icing made of the whites of three eggs, beated stiff, and one and a half cups powdered sugar.

STEWED CHICKEN.—Put in a saucepan a piece of butter the size of a walnut, dredge in a little flour, set on the stove and stir till smooth and a little on the fry; add a very little water, let it cook a trifle more, then put in your chicken that of course has been washed and cut up, stir it all round slowly, then dredge in a little more flour and pour in a liitle more water, cover up and stew, occasionally adding more water as required, but not too much at one time. Let it be well done before dishing.

RUSKS.—One quart of light bread sponge, two cups of sugar, one-half cup of shortening, and a beaten egg. Make into a soft dough. When very light, roll out an inch thick and cut into rounds. Let rise again and bake in a moderate oven—a heat that will not form a hard crust at top or bottom. These are very nice with coffee or tea. When stale, split them, toast slightly, butter, and eat at once.

TO JUG BEEFSTEAK.—Cut a piece of beefsteak in nice square pieces, roll them round your finger; take a deep stone jar, pile the rolls one above the other, add two whole onions, one glass of port wine, pepper and salt to taste, a few pepper corns, but no water; cover close, put the jar in boiling water, and steam till tender. This dish resembles jugged hare.

VEAL SAUSAGE.—Take fat bacon and veal in equal quantities, with a handful of sage, a little salt, pepper, and if at hand an anchovy. Let all be chopped and beaten well together, floured, rolled and fried. Veal sausage are better used for persons whose digestion is not very strong than those made of pork.

Health Column.

Strong Drink and the Liver.

The *Family Physician* tells us that when alcohol is introduced into the stomach in the ordinary way, it nearly all passes through the liver. Undiluted spirits are much more injurious than when mixed with water, and produce greater irritation. Alcohol consumed as wine or beer is far less destructive to the liver then when taken in the form of ardent spirits. A hot climate intensifies all the vicious effects of alcohol. The symptoms of cirrhosis of the liver are in the early stages often obscure, but later they are sufficiently well marked. At first the liver gets slightly enlarged, and the patient suffers from pain in the right side, indigestion, wind and costive bowels. He is occasionally feverish, his skin is hot and dry, and he has a peculiar, unhealthy, sallow look, which he probably fails to notice, but which is sufficiently obvious to his friends. The necessity for making a change in his habits is forced upon his attention, and for a week or two he is under the doctor's orders, and not feeling able to drink any more, he consents to follow a restricted diet, and to take a course of purgatives.

Soon the most prominent symptoms are relieved, he fancies himself well again, and quickly returns to his old habits. Gradually, however, he notices that he is getting thinner and weaker, and occasionally he has a good deal of pain in the side. He is nervous and out of sorts. He has no longer the pluck he used to have; first his friends notice it, and then he gradually becomes aware of it himself. He finds that he is not "fit for business," and he is afraid to see people. The patient has occasional attacks of diarrhea, his appetite fails, and the emaciation and debility increase. He tries all kinds of treatment, but never sticks to one for long at a time. He would give up the drink if he could, but he can't. His self-reliance is gone, the alcohol has stolen away his will, and he is utterly incapable of giving up the dangerous fascination. He will take an oath to-day that he will never touch another drop of spirit, and will probably break it to-morrow. Sometimes he wishes that some would lock him up in an asylum, or that by some chance or other he would have six months' imprisonment, but he never feels able to put himself under restraint. After a time the liver gets smaller, and this, instead of being a good sign, is a bad one, for it is contracting. He would willingly enough consent to knock off drink now, but it is too late; the mischief is done, the liver is in a state of cirrhosis, and no medicine can restore it to its natural condition. Is there any remedy for this horrible complaint? Yes, one, teetolism—absolute abstinance from alcoholic liquors of all kinds. This remedy must be applied early. If he waits until his liver has undergone serious organic change, it is too late. No half measures will suffice; he must give up drink of all kinds. If he does this he will recover; but if he goes on in his old plan an early and painful death is the inevitable consequence.

Glycerine for Acidity of the Stomach.

A late number of the Boston *Journal of Chemistry* reprinted from the London *Lancet* Dr. Ringer's article upon the use of glycerine in flatulence, acidity and pyrosis. Dr. J. A. Lewis, referring to the same article, in a communication to the Louisville *Medical News*, says:

"I desire to add my testimony to its value, so far as regards acidity and flatulence. For this form of indigestion, so common, and for the relief of which so many persons resort to the daily use of soda, glycerine is a remedial agent of no mean value. I have used it for several months with my patients troubled in this way, and in a majority of cases the results have been gratifying.

I had no knowledge of its use for dyspeptic troubles, and was led to the use of it much in the same way as reported by Mr. Ringer. I knew of its property of preventing fermentation, and especially of its use by druggists in preserving their syrups from acidity. I was led to a trial of it upon this principle, and soon became satisfied of its real value. I have always prescribed it in large doses, never less than two teaspoonfuls to a tablespoonful for an adult, to be taken in a wine glass of water immediately after eating. It does no good after fermentation of the food has taken place in the stomach.

It is no specific, no cure-all, but certainly does afford alleviation, if not a cure, in many of these cases, and is worthy of a place among the remedies in use for this very common ill of the flesh.

KEROSENE AND SALT FOR DIPHTHERIA.—A correspondent of the New York *Sun* says: "In 1862, on a plantation in south Alabama, where there was great difficulty in securing good medical advice, I saw a whole plantation of blacks, as well as the white members of a large family, successfully treated for diphtheria with kerosene oil and salt, used thus: Every patient was given a lump of rock salt about the size of a boy's marble, and instructed to keep it in his or her mouth, swallowing the salty saliva. At the same time the throat was rubbed with kerosene oil, and a flannel saturated with kerosene kept around the neck until the symptoms were abated or entirely gone. If necessary, mild cathartics were given. Not a case was lost, and there were fully 150 in all on the plantation."

Worth Knowing.

PRESERVING MEAT FOR FOOD IN CARCASS. Prof. Wickersheimer, a German chemist who has recently sold to the Prussian government a process for preserving organic substances, has since patented a process for preserving meat for eating purposes. A solution (heated to 50° C.) of 36 grams potash, 15 grams common salt and 60 grams alum, in 3 liters of water, is mixed with a second solution of 9 grams salicylic acid in 45 grams methylic alcohol, to which 250 grams glycerine is added. With this liquid the animal to be preserved is injected. In the case of small animals, 100 grams of the liquid for every one kilo. body weight, is recommended; in larger, the proportion may be reduced to 40 grams. Fishes, birds, and such small animals are not previously killed, but the injection made direct into the heart with a syringe having a sharp canula. Large animals are injected immediately after slaughtering, the liquid being introduced by one of the large cervical arteries. For cattle and swine, two or three grams saltpeter are added to the liquid. The flesh of animals so treated keeps (it is said) two or three weeks perfectly good and inodorous. If the preservation is to be for a longer time, the proportions of methylic alcohol, salicylic acid and glycerine are somewhat increased.

HARD SOAP BY A COLD PROCESS.—Mr. R. F. Fairthorn, Ph. D., has contributed the following recipe to the *Druggists Circular*: A good hard soap can be easily produced if four lbs. of olive or sweet almond oil mixed with two lbs. of soda lye, of the strength of 36° Baume, are stirred until of the consistence of thick paste, when it should be poured into molds, covered by several folds of muslin and kept in a warm room for 20 hours. By this treatment the process of saponification, or union of the acids in the oils with the alkali, is complete. When these materials are first mixed the temperature of the mass rises, and in order to effect the entire union of ingredients so as to form the compound called soap, it is necessary that the heat thus generated should be maintained for some time, hence the necessity for covering the molds and keeping them in a warm room. He has found that it is desirable to use oil that is slightly rancid, or, if free from rancidity, to add about 10% of oil that has become so. Oil that is perfectly sweet requires two or three days to effect saponification.

TO CURE A SHEEP SKIN.—To clean the woo on a sheep's skin and to cure the skin.—Nail on a board stretched, wool out, and scour with good soap suds and fuller's earth until properly cleansed. Then rinse thoroughly in hot water, and comb. Nail, wool down, stretched taut on a board, rub in plenty of salt, stand in warm place, and finally scrape off the softened inner membrane with a blunt knife. Then rub in plenty of moist alum powder, and let it stand several days or a week in a dry place. Soften, if desired, by rubbing with hot flour paste and the yolks of a few eggs, or with plenty of oil.

INSOLUBILITY OF RUBBER.—The most delicate of fabrics made of vulcanized rubber may be brought in contact, or immersed with impunity in such chemical liquids as sulphuric or nitric ether, oil of turpentine, or any of the essential oils. They may also be boiled in potash, lime and soapsuds, by which, indeed, they are improved. In fact, vulcanized rubber articles either remain uninjured or are improved by exposure to agents that destroy other fabrics, and even wood, leather, iron, copper and brass.

LOOM FOR TENDER YARNS.—A Swiss loom maker, Hennegger, has invented a loom in which the shuttle is not thrown, but is handed over from side to side by hooks, much in the same manner as the silk loom handles. A loom on this principle was shown weaving in the Paris exhibition. The shuttle is handed by a peculiar mechanism, so that no strain is exerted upon the filling, and no friction upon the warp, as the shuttle does not run on the warp as in the ordinary loom.

PALMETTO PARCHMENT.—People of the Southern States discovered that smooth, strong and pliable parchment can be manufactured from the palmetto of Florida and other Southern States. The parchment can be washed, rubbed and handled just like cloth, and the writing will not be effaced. It can be cheaply manufactured, and is likely to come into general use for conveyances, land office receipts, etc. As much as 60% of the weight of the palmetto can be utilized in paper making.

SCOURING WOOLEN TISSUES.—A French firm have patented a process for scouring woolen tissues and yarn, using pure carbonate of soda, free from causticity and iron. They have also patented the bicarbonate of soda for the scouring and fulling process. Woolen fabrics are first scoured with a cold solution of carbonate of soda; they are then washed, and afterwards fulled with a soap made of carbonate of soda, mixed profusely with olein.

A VARNISH of cement, which goes by the name of Chinese varnish, and renders card-board or thick paper as hard and horney as papier mache, is easily prepared from blood, lime, and alum. Three parts of fresh blood, well beaten up to prevent the formation of fiber, is mixed with four parts of slacked lime, and a little alum, the thick-flowing mixture that results being at once ready for application to paper or card.

BUTTE LODGE, No. 114.—Meridian.—W. C. Smith, M. W.; Levi Shutzenberger, F.; J. Birks, O.; A. Hearn, Rdr; Geo. Robinson, Fin; J. Thornbro, Rvr.; J. Hill. G.; H. P. Jones, I. W.; J. Phillips, O. W. Reported by R. C. HUNTER, P. M. W.

RIVERSIDE LODGE, No. 120.—C. E. Birge, P. M. W.; Jules L. Barbey, M. W.; L. Mc Swain, F.; G. W. Flood, O.; A. McFarland, Rdr; J. Taylor (re-elected). Rvr; O. Tower, Fin.; H. C. Kelsea, G.; J. Wetzel, I. W.; W. L. Farley, O. W. Reported by J. L. BARBEY, M. W.

TURLOCK LODGE, No. 182.—W. L. Fulkerth, P. M. W.; W. J. Brown, M. W.; J. A. Bradford, F.; C. F. Lauder, O.; Jas. A. Davidson, Rdr; Dr. Chas. Phipps, Fin.; Geo. Osborn, Rvr; J. L. Brown, G.; Jas. Baker, I. W.; L. W. Baker, O. W.; Dr. Chas. Phipps, Med. Ex. Reported by W. J. BROWN, M. W.

DEATH OF BARNEY EILERMAN.—Col. B. Eilerman died in Marysville, January 22d, after a brief illness. He was elected as representative to the last Grand Lodge in 1881; he was appointed as one of the Committee on Appeals, and also as D. D. G. M. W. for the Yuba district. He was a native of Germany, aged 49 years. He had been a resident of Marysville for 25 years, and at different times held prominent offices of honor and trust. On September 9, 1864, he was commissioned as Lieutenant-Colonel of the 4th Infantry Regiment, California State Militia, which office he held until the reorganization of the militia under the name of the National Guard of California. On October 11, 1867, he was elected Second Lieutenant of the Marysville Light Artillery, which office he held until the muster out of the company, January 7, 1869. On the organization of the 4th Infantry Regiment, N. G. C., March 15, 1869, he was elected Lieutenant-Colonel, and held the office until August 15, 1874, when he resigned. At the time of his death he held the office of Justice of the Peace in Marysville. He was until recently Deputy County Clerk of Yuba county. His funeral was attended by the members of the I. O. O. F., and Marysville Lodge, No. 38, A. O. U. W. He was a gentleman in the truest sense of the word, and a brother in heart and deed in all his private and public life.

DEATH OF ROBERT ROSEVEARE.—The recent death of Bro. Robt. Roseveare, of Red Bluff, Tehama county, has called forth sentiments of universal regret in the community of which he was a member. The deceased was widely known, his letters to the press, written under the *nom de plume* of "Felix," giving a history of the progress and resources of his county, being widely noticed. He was only sick one week, that dread disease, pneumonia, having performed its work within this period. He was born in Cornwall, England, Dec. 2, 1844. He leaves a wife and four children to mourn the loss of a devoted husband and affectionate father. The deceased was a member of Red Bluff Lodge, No. 76, I. O. O. F., and Red Bluff Lodge, No. 69, A. O. U. W., having represented the former in the Grand Lodge of the State one session. The remains were followed to the grave by the members of the two Orders and a large number of friends. It was one of the largest corteges ever witnessed in Red Bluff. We tender our condolence to the bereaved family, and mourn with his many friends the loss of a respected brother.

WEST OAKLAND THEATER.—The farce of *Mr. and Mrs. Peter White*, was performed to a fair audience, last evening, at Hansen's Hall, Oakland Point. Mr. M. O. Higgins, as "Major Pepper," was an excellent piece of character acting, and was well supported by Mr. W. W. Harrison, Mr. E. Von Adeling, Jr., Miss Maud Butler, Mr. W. H. Wood, Miss Keith, Miss Wood and Mrs. Call. The musical programme preceding the play, was rendered by professionals, and was alone worth the price of admission. Prof. Dorrego gave some excellent specimens of his skill on the guitar.—*Oakland Tribune.*

This new enterprise is under the management of W. H. Wood, P. M. W., of California Lodge, No. 1, A. O. U. W., who designs that the performances shall be of an elevating character, and for the low price of 25 cents, for the benefit of a large and deserving class of citizens.

A CAREFULLY prepared article by Bro. Albert S. Adler, Medical Examiner, of Friendship Lodge, has been laid on our table. It first appeared in the San Francisco *Western Lancet* for February, 1881, and is now reprinted in pamphlet form. The subject is "Doctrine of Bilaterial Functions after Experiences of Metaloscopy."

OUR Chico agent, Bro. J. J. Hassell, is authorized to receive both new and old subscriptions for the WATCHMAN. Any favors shown him will be duly appreciated.

PREMIUM FOR SUBSCRIPTIONS.—We will send the WATCHMAN free to any brother who will send us five or more cash, in advance, subscriptions, at the rate of $2 a year.

Resolutions of Respect.

HALL OF HARMONY LODGE, No. 9, A. O. U. W.,
San Francisco, Cal., Feb. 15, 1881.

[IN MEMORIAM.]

The undersigned, appointed to draft resolutions in memory of our late Brother, HARRY D. NEAL, respectfully submit the following:

WHEREAS, Our Brother, HARRY D. NEAL, has been taken from us by the decree of the Supreme Master Workman of the Universe, after a brief illness; therefore, be it

Resolved, That in his death, Harmony Lodge, No. 9, Ancient Order of United Workmen, has lost one of its brightest and most useful members—a fond and devoted son and brother.

Resolved, That we most sincerely mourn and feel for the great loss sustained by his mother and sisters, and tender our heartfelt sympathies to them in this their sore trial. And pray that our Heavenly Father may give them consolation, and that He may shed abundant blessings on them.

And thou hast vanished from thine own,
To that which looks like rest;
True, Brother, only to be known
By those who love thee best.

And be it further

Resolved, That these resolutions be spread in full upon the minutes of the Lodge; that a copy, under the seal of the Lodge, be sent to the relatives of our deceased Brother, Harry D. Neal; and that the PACIFIC STATES WATCHMAN be requested to publish the same.

CHARLES W. KRAMER,
FREDERICK BLIGHT,
WILLIAM THACKERAY. } Com.

Fraternal.

I. O. O. F.

THE first quarterly social of the Odd Fellows' Literary and Social Club of San Francisco was held at Ixora hall, on Wednesday evening, Feb. 16, 1881. The following literary programme was given: Overture, Orchestra; opening address, W. B. Lyon, President; piano solo, Mrs. M. E. Joost; vocal duet, W. E. Lutz and C. T. Pidwell; reading, E. B. Read; vocal solo, Mrs. Safa Tate Cowan; recitation, Prof. E. Knowlton; vocal solo, B. Leonard; violin solo, Emil Lobe; "Modern Discourse," by an Embryo Artist; grand chorus, "One More River to Cross." Accompanist, Mrs. M. E. Joost. A large number of the performers being well-known amateurs, it was expected that a choice literary and musical entertainment would be the result. Nor were the audience disappointed, as the frequent encores and demonstrative applause showed. At about 10 o'clock the hall was put in shape for dancing and kept up until quite late. We noticed a large number of our Workmen present, among whom was Wm. H. Barnes, G. M. W., and other leading spirits in our Order. It was a thoroughly enjoyable affair from the commencement to the close. These social and literary entertainments given from time to time by the fraternal organizations are the leading attractions of our city. The Committee of Arrangements, for their success, are deserving of some recognition at our hands, and we herewith give them: Executive Committee—B. Leonard, of No. 155; W. B. Lyon, of No. 7; M. D. Merrick, of No. 179; Geo. A. Case, of No. 71; W. F. Norcross, of No. 123; John Edwards, of No. 131; C. J. Ellis, of No. 205. Reception Committee—J. B. Leaman, John H. Gilmore, John A. Sampson, John J. Taylor, Geo. A. Carnes, D. T. Van Orden, J. K. Furth, Jas. M. Trout. Floor Manager—Preston Woods. Floor Committee—Jos. Greenberg, J. H. Applegate, Jr., W. T. Galloway, J. W. Russell, Chas. H. Mann, John Thompson, E. W. Blaney, Geo. W. Timmerman.

ARKANSAS has a Grand Lecturer at an annual expense of $1,000. His duty compels him to visit each Lodge in the State.

TAL. P. SHAFFNER, of Kentucky, is the largest man in the Sovereign Grand Lodge. He is some six ft. three inches in hight, and weighs over 300 lbs. It is said that Kentucky never sends a representative that weighs less than 200 lbs.

Knights of Pythias.

THE Knights of Pythias held their 13th annual session in this city Feb. 8th. The following Grand Lodge officers were present: P. G. Chancellor, E. T. Blackmer; Grand Chancellor, S. L. Terry; Vice Grand Chancellor, G. B. Katzenstein; G. K. of R. and S., A. G. Booth; Grand Banker, J. J. Vasconcelos; Grand Prelate, Adam Smith; G. M. at A., H. Harbourne; G. I. G., John Gunn, Jr.; G. O. G. pro tem., F. Newhoff; Sup. Rep., F. P. Dann. Forty-nine Past Chancellors were introduced, obligated and instructed in the Grand Lodge Rank.

THE reports of A. G. Booth, G. K. R. S., is very good, and reflects credit on this officer. The following are some of the principal items: Three new Lodges have been instituted since the last session, and one has surrendered its charter. The Bureau of Relief paid out $307.56; receipts, $170.68, which, with former balance of $244.42, aggregates $415.10, present cash balance, $107.54. A number of valuable tables accompany this report, showing the condition of the Order, from which the following items are taken: Number of Lodges, 50; membership, 2,572—a gain of 418; deaths for year, 32; receipts, $54,679.65; relief paid, $16.623.86; cash on hand and invested, $52,431.16— an increase of $11,175.68 for the year. The receipts of the Grand Lodge have been $3,806.57, and the disbursements $3,702.54, which with the amount of $2,073.18 on hand at the beginning of the year, gives a cash balance of $2,177.21, besides $212.40 owned by subordinates. Assets, including supplies on hand, $2,614.26. The G. K. R. S. says: "Though the growth of our Order has not been so rapid as many might desire, yet has it been sure, solid and lasting, and I congratulate the brotherhood upon its prosperity and the bright and cheering prospects for the future."

THE report of the Grand Chancellor congratulates the Order upon its prosperity, embraces the facts that are given in the report of the G. K. R. S., alludes to the decisions, questions, etc., settled during the year, also gives an account of his offical visitations. Several suggestions are also made, and words of encouragement spoken. It is an interesting document, and will be read with interest by the fraternity at large.

THE visit of delegations from the Grand and subordinate Lodges of Nevada was a notable event of the session. They were met and escorted together with the Oakland Knights, to the Palace Hotel, by the San Francisco Commanderies. The line was formed with the San Franciscans in the advance, Nevada Knights following, and the Oakland Knights bringing up the rear. Following these was a long line of carriages, with the ladies of the party. The procession filled up the principal streets to the Palace, where speeches of welcome were delivered. Prominent among the Knights were R. E. Wilson, President of the Reception Committee; Grand Chancellor Cooper, of Nevada; Grand Chancellor S. L. Terry, of California; Past Grand Chancellor E. T. Blackmer, of California. Grand Chancellor Terry welcomed the visitors in an eloquent address, and was responded to by Past Grand Chancellor Morrison, of Nevada, who expressed the thanks of the visiting Knights at the mark of good fellowship conferred upon them.

THE following were elected as officers of the Grand Lodge for the ensuing year: Grand Chancellor, John H. Harney of No. 4; Vice Grand Chancellor, Henry Bearwold of No. 30; Grand Prelate, G. W. Peckham of No. 2; Grand Keeper of Records and Seals, A. G. Booth of No. 16; Grand Master of Exchequer, George Cantus of No. 8; Supreme Representative, Past Grand Chancellor Eli T. Blackmer of No. 28; Trustees of the Grand Lodge, C. S. Haley of No. 16, J. H. Winter of No. 8, J. H. Gyselaar of No. 15.

THE Grand Lodge refused to create Past Chancellors for meritorious services, and decided that a subordinate Lodge could make a donation to a suspended member.

SEC. 5, Art. XI., Subordinate Lodge Constitution, was amended so that nominations for officers can be made on the night preceding and on the night of the election.

SEC. 4, Art. V., subordinate Lodge Constitution, was amended by striking out the words "for the space of six months." This allows the payment of full benefits to sick members at any time after joining the Order.

HEREAFTER Past Chancellor cannot install officers of subordinate Lodges unless they are commissioned as D. D. G. C.'s.

IT was ordered that Lodges shall not use any part of their general funds to pay the expenses of any picnic committee.

WHEN officers are elected in subordinate Lodges blanks cannot be counted or used to in any way defeat the will of those voting for any nominee.

THE Grand Lodge sustained the decision of the Committee on Appeals and Grievances, to the effect that a subordinate Lodge cannot issue a Past Chancelor's certificate to any P. C. who may not be clear upon the books.

THE report of the Bureau of Relief was adopted, which showed that no per capita tax will be required for its support for the coming year.

AN appropriation was made toward the payment of expenses of receiving the members from Nevada.

SAN JOSE has been chosen as the place of meeting for the next annual session of the Grand Lodge.

THE petition from Liberty Lodge, No. 35, for a dispensation to admit members at reduced rates was referred to the incoming Grand Chancellor.

SEC. 1 and 2, Art. V, Grand Lodge Constitution, were amended so that the annual sessions of the Grand Lodge shall hereafter be held on the second Tuesday in April, instead of February.

IT was held that when a Chancellor Commander had served until the last night of the term, and on that night his Lodge surrenders its charter, he is entitled to the honors of the office.

THE Supreme Representatives were instructed to secure proper legislation relating to pages and esquires who have not completed full membership.

THE invitation ball of the Knights of Pythias of California in honor of the visiting brethren of Nevada, held at the Mechanics' Pavilion, was a very enjoyable event. Fully 10,000 people were present, nearly one-half of whom remained to dance the medley at 3:30 in the morning. The floor was canvased, and the Fourth Artillery band furnished the music. At the north end of this large room, "Nevada K. of P.—Welcome," blazed in gas jets over a star of the same flaming character. The grand march commenced at 9:20, some 1,500 couple doing the walk-around. The floor manager, John H. Harny, with his assistants, S. B. Carlton, Isaac Lang and C. C. Gilmore, are deserving of credit for the excellent manner in which the march was conducted.

Knights of Honor.

OCCIDENTAL LODGE, No. 1,990, K. of H., will give a masquerade ball at B. B. building Saturday evening, March 19th. Tickets to the main floor, admitting gentleman and ladies, $1; gallery, 50 cents. Supper will be served at 50 cents. This will be an invitation party, only those being admitted who can pass the scrutiny of an experienced committee.

IT is held by the Supreme Dictator that when an amendment to the by-laws is submitted to a Lodge, it is only necessary to have it read at two meetings before being acted upon. This interpretation of the law seems to be in effect that at the second meeting the matter can be disposed of immediately after the reading, without leaving it lay over until the next meeting.

THE Committee on Appeals and Grievances of this jurisdiction have fully settled the question as to whether names should be written in full or only the initials in notifying sister Lodges of applications for membership, by holding that the name must be written out in full.

THE K. of H. Lodges of this city are preparing to give the Grand Lodge, on its assemblage in April, a reception similar to the one given by the Workmen. It is proposed that it shall take place at Union hall, and shall consist of addresses, music (vocal and instrumental), and literary, to close with dancing. We may expect a very enjoyable affair.

Selections.

THE Improved Order of Red Men gave a social entertainment on Washington's birthday, which can be set down as a success. The proceeds are to be applied to the cemetery fund of the Order. The programme of exercises consisted of, first, overture, orchestra; opening address, Past Sachem Geo. Turner; ballad, "Soft Shades of Evening," Miss Ida Stenhouse; The Trials of a Twin, Miss May Lyman; zither solo, Mr. A. Hirsch; recitation, "The Face Against the Pane," Miss Sarah Hosmer; ballad, "The Highland Maid's Lament" (words by Hector A. Stuart; music by Joseph Roeckel), Ellen Coursen; reading (humorous), Mr. Herbert Nourse; song, "Waiting" (Millard), Mrs. F. Yslas. Then a short intermission followed, when the second part was given, as follows: Teutonic speech, Mr. F. J. Johnson; piano solo, Miss Hattie Rademaker; "The Moral Reform Society," Rinaldo Livingstone; vocal variations, "Carnival of Venice," Ellen Coursen; parody on "Maud Muller," Miss Alice Livingstone; duet (piano), Misses Mariam and Lena Lichtenstein; recitation (comic), Mr. Jabez Swan. The Musical Director, Joseph Roeckel, is deserving of credit for the able manner in which everything was carried out. After the entertainment Terpsichore visited the scene, and her votaries held the floor until a late hour.

THE monthly social given by the Canadian Association on Tuesday evening, Feb. 22d, at B. B. hall, was quite an enjoyable entertainment. The usual literary and musical exercises were not on the programme on this evening, but an extended order of dances, among which was the Valentine quadrille, which afforded no little amusement. Owing to a small hitch in the musical department, the exercises were delayed a short time. This delay was fully made up in the spirited dancing. The hall was well filled, there being quite a number of spectators in the galleries. It was understood that the next monthly social will combine literary, musical, and dancing. The several committees were very attentive to their guests, and, as usual, made this monthly reunion pleasant for all in attendance. That they may be held in remembrance for future occasions of this kind, we herewith give them: Executive Committe—W. H. Hutchinson, J. W. Harris, D. G. Fraser, C. E. Hunt, M. J. Sullivan, H. G. Trueman and W. B. Blair; Floor Manager, Alfred Barker; Floor Committee—W. G. Buchanan, C. Aunis, James McKay, W. B. Blair and S. Beattie; Reception Committee—W. J. McCormick, D. McLeod, M. K. Buchanan, W. J. Gilliland and George E. Dickson.

THE annual ball of the San Francisco Turn Verein was held at Turners' hall, on Turk St., on Monday evening, Feb. 21st. It proved to be a grand success, over 200 merry-makers representing every kind of mask and costume that could be improvised. The hall was elaborately decorated with pictures, new devices, shields, streamers, flags, ludicrous articles and grotesque figures. The company, both maskers and spectators, represented the old and young, from the age of three years upward. The time was divided between dancing, gymnastic exercises, tableaux and vocal music. Each one seemed to be in the fullest enjoyment of the many and varied exercises of the evening. This very enjoyable affair was kept up unto a late hour, all agreeing that this society, composed largely of our German fellow-citizens, knows how to provide innocent amusement for themselves and friends, and to carry out an entertainment of this kind that cannot be excelled by any other class. We noticed quite a number of Brother Workmen prominent actors and participants in the chief exercises.

Masonic.

In our issue of January 15th we gave a full description and an engraving of the new Masonic Temple in Oakland, so it will not be necessary here to again describe the architectural features of the structure. In connection with the dedicatory services on Washington's birthday, we have thought it best to reproduce the engraving, with some few alterations. The building is an encouragement for finer and more substantial architecture in a city like Oakland, and such works reflect credit, not only on Masonry, but upon all other substantial Orders who are doing similar fraternal and good work. The interior finish and arrangements are doubtless in many respects superior to that of any other Masonic hall on this coast.

It was fortunate that the day selected for the dedication was so fine. It was peerless in every respect. At 12 o'clock, the several Masonic bodies met in the hall, which was beautifully and appropriately decorated for the occasion, the pillars being entwined with delicate trailings of smilax, ferns and honeysuckles, adorned with the freshness and purity of the calla lily. Evergreen wreaths were pendant around the main hall, and rich bouquets adorned the niches.

After the arrangements were completed, a procession was formed in the following order: Grand Marshal, Capt. W. F. Fletcher; aids, A. Shorey and A. S. Baker. Oakland Commandery of the Royal Arch Chapters, Lodges and visiting Masons, which proceeded to the Creek landing, where the San Francisco delegation was received with Masonic honors, and the procession formed in the following order: Eighth Infantry Band; Oakland Commandery, No. 11, K. T., escort; Solomon Lathrop, E. C.; A. C. Waitt, Gen.; R. C. Gaskill, C. G.; California Commandery, No. 1; R. H. Lloyd, E. C.; H. H. Blake, Gen.; Wm. Harney, C. G.; Henry Edwards, S. W.; visiting Knights Templars, including visiting Knights from Petaluma, Vallejo and Sacramento. Royal Arch Masons, a delegation from Petaluma and one from Vallejo. Fourth Artillery Band. Grand Consistory of California, Commander-in-Chief, C. F. Brown; Lieutenant, S. M. Buck, of Humboldt county; Second-Lieutenant-Commander, Stephen Wing. Grand Lodge of California, Right Worshipful Grand Master, Hon. S. C. Denson, of Sacramento; S. J. W., John Q. Adams; J. G. W., Chas. L. Thomas; D. McClure, Grand Chaplain; Grand Lecturer, John W. Shaffer; Grand Marshal, Franklin H. Hay. Consistories of A. and A., S. R., Yerba Buena Chapter of Rose Crone, No. 18, Yerba Buena Lodge of Perfection, No. 14, Master Masons and visiting brethren. Oakland City Band. Oakland Chapter, No. 26, R. A. M., Jas. T. Gardner, H. P.; I. D. Rittenberg, K.; Jas. Lentell, S.; Jno. C. March, C. H. Alameda Chapter, No. 36, R. A. M., Geo. E. Whitney, H. P.; W. A. Walter, S.; E. E. Potter, K.; Chas. Davis, S. C. Live Oak lodge, No. 61, F. & A. M., J. C. Martin, W. M.; John A. Mattingley, S. W.; R. J. Beebee, J. W.; Geo. Goodman, Marshal. Oakland Lodge, No. 188, F. & A. M., N. W. Spaulding, W. M.; N. B. Hoyt, J. W.; T. J. O'Keefe, S. W.; Edw. Chille, Marshal. Brooklyn Lodge, No. 225, F. & A. M., J. A. Webster, W. M.; J. V. Webster, J. W.; E. Bangle, S. W.; R. W. Martin, Marshal. Alcatraz Lodge, No. 244, F. & A. M., G. Hadsell, W. M.; J. Hollywood, S. W.; J. D. Isaacs, J. W.; J. M. Wallace, Marshal. Oak Grove Lodge, No. 215, F. & A. M., J. H. Eickhoff, W. M.; J. W. Mastick, S. W.; H. V. Herbert, J. W. Alameda Lodge, No. 167, F. & A. M., John Lowrie, W. M.; John M. Moore, P. M.; S. I. Marston, P. M., who also represented Howard Chapter, No. 14, San Jose.

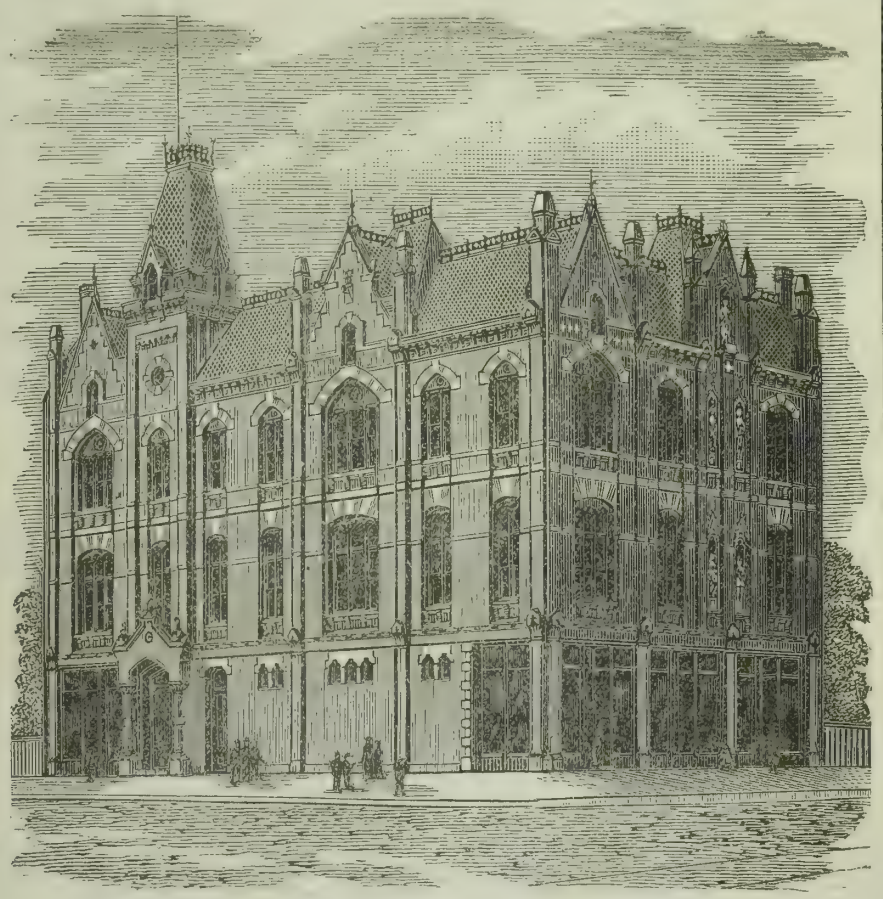
After the procession had marched through some of the streets of Oakland, the interesting ceremonies of dedication were then performed within the hall, according to the ancient ritual, as follows: The draped casket was then placed in the center of the hall. The Grand Master having taken the chair, the officers of the Lodge took their places. The three lights were arranged to form a triangular figure, and the gold and silver urns containing the corn, wine and oil, were placed on the draped casket, at the head of which stood the altar with the open Bible, on which were placed the square and compass. Besides it upon the dais was placed the Constitution, resting upon a crimson velvet cushion. The introductory ode was then sung by the choir. Brother W. E. Boone, the grand architect of the work, then advanced to the dais, and addressing the Grand Master, said:

Right Worshipful Sire:—Having been entrusted with the superintendence and management of the workmen employed in the construction of this edifice; and having, according to the best of my ability, accomplished the task assigned me, I now return my thanks for the honor of this appointment, and beg leave to surrender up the implements which were committed to my care when the foundation of this fabric was laid; humbly hoping that the exertions which have been made on this occasion will be crowned with your approbation, and that of the most worshipful Grand Lodge.

The Right Worshipful Grand Master, upon receiving the report of the grand architect, said:

Brother Architects:—The skill and fidelity displayed in the execution of the trust reposed in you at the commencement of this undertaking, have secured the entire approbation of the Grand Lodge; and they sincerely pray that this edifice may continue a lasting monument of the taste, spirit and liberality of its founders. An ode was then sung by the choir.

N. W. Spaulding, on behalf of the Oakland Masonic Temple Association and the Fraternity of the city, having been delegated to make the presentation of the building to the Grand Master for inspection and acceptance, advanced and said:



Right Worshipful:—The Masonic Fraternity of Oakland, being animated with a desire of promoting the honor and interest of the craft, at great pains and expense, erected a Masonic hall for their convenience and accommodation. They are now desirous that the same should be examined by the most worshipful Grand Lodge; and if it should meet their approbation, that it should be solemnly dedicated to Masonic purposes, agreeably to the ancient form.

The Building Being Presented

In regular form, the plans and specifications having been examined and approved by the Deputy Grand Master, that officer advanced to the front of the altar, and made the following address:

Right Worshipful:—The hall in which we are now assembled, and the plan upon which it has been constructed, having met with your approbation, it is the desire of the Fraternity that it should now be dedicated according to ancient form and usage.

The right worshipful Grand Master, being satisfied that the ancient regulations were fully

THE NEW MASONIC TEMPLE, OAKLAND.

complied with, proceeded according to the ritual of the order to dedicate the temple.

The solemn procession was formed, and, while the usual ode was rendered by the choir, took the line of march in the regular order. Upon ariving at the altar, the drapery was removed from the casket and the first procession having been formed around it, the Grand Junior Warden presented the urn of corn to the Grand Master, who, striking three times with his gavel, poured it out upon the casket, at the same time saying, "In the name of the Great Jehovah, to whom be all honor and glory, I do solemnly dedicate this hall to Freemasonry." The grand honors were then given. The second procession then marched around the casket, and the Grand Senior Warden presented the urn of wine to the Grand Master, who sprinkled the wine upon the casket, at the same time saying, "In the name of holy St. John, I do solemnly dedicate this hall to virtue." The grand honors were then twice repeated. The third procession then moved around the casket and the Deputy Grand Master presented the pitcher of oil to the Grand Master, who sprinkled it upon the casket, saying, "In the name of the whole fraternity, I do solemnly dedicate this hall to Universal Benovelence." The grand honors were then three times repeated. A solemn invocation was made to heaven by the Grand Chaplain, and an anthem sung, after which the casket was covered, the Grand Master retired to his chair, the ceremonies being concluded.

The Oration.

From a platform erected by the side of the temple, Marcus D. Boruck delivered the oration of the day. The subject was "Charity." A brief epitome of the discourse is as follows:

In the fashioning of this world's affairs, soft, white hands have had and have much to do—quite as much if not more than the grown, nervous hand full of virile strength and grip. The crook of some fine lady's finger has often been as potent to shape history as the wave of a generalissimo's mailed hand, and the meaning pressure of rosy, jeweled fingers has brought about as great results as the sign manual of a king. So, too, through the inventions of a genius little less than Godlike may mark an epoch in the progress and ameliorate the condition of half the human family, though kaiser bonds may be formed to keep a continent in order, though the war cloud hanging over Europe and Asia may be as blood red as an Arabian sunset, though standing armies be maintained, and deadly machines of infernal ingenuity be constructed for the preservation of peace, the white hands of charity are not idle or paralyzed, but make their gentle influence felt in every latitude. To succor the one and relieve the other, to help here and sooth there, to give a home to the fatherless and comfort to the bereft, is the noble work of the charitable societies, the chief of which we are now remembering. Charitable societies are the hallowed proxies of God on earth, and in helping them we are brought nearer the beatific Principal. When entering upon a preliminary consideration of this address, it seemed to me that a definition of charity was necessary to a proper appreciation of my subject. That appeared so easy an affair that I boldly started in—"Charity is—" and then found myself at a sudden stand-still. I saw that I was not exactly sure after all of what I understood charity really to be. I found myself an humble illustration of that sad condition which, in language more forcible than kind, says "fools rush in where angels fear to tread." A contradiction baffled me at the very outset. I knew people—a few—who were called warm hearted, charitable people, and then I remember the proverbial simile, "as cold as charity"—warm and cold—I was as perplexed as the Satyr who, wandering into the herder's hut, saw him cool his porridge and warm his nipped fingers with the same breath. I turned to a vocabulary of synonyms and there found benevolence, kindness, good will, liberality, beneficence, generosity. That charity was the equivalent in something of all these I knew; but I was sure, too, that charity and benevolence, for instance, though by many held to be the same qualities, are quite different in essence. The benevolent man is not always the charitable man, because the one simply means to do good, the other does it.

The benevolently charitable—or charitably benevolent—are, then, they who furnish the happiest combination of qualities. It is quite possible for a man to acquire the reputation of being benevolent, and yet not in one whit to deserve such a reputation; but for one to be spoken of as charitable, means that he must have done some good actions in the way of practically relieving the wants of his fellows.

To practically consider charity, therefore, I must also consider its abuses. As Rev. Mr. Ames remarked, in a paper read before the Philadelphia Social Science Association, on "Wisdom in Charity"—"The open hand must be guided by the open eye." Pithily, that presents the whole case.

But the strongest writer on all the subject is Mr. Lecky, the author of the "History of European Morals." In that work he ascribes one of the causes of the decline and fall of the Roman Empire to the long continued policy of distributing supplies among the poorer classes.

John Todd says: "Man is naturally indolent; as lazy as he can be;" and I expect the author of the Student's Manuel was pretty near the mark. I have little hesitation in saying that in San Francisco and in this city, equally with any others in the United States, of the same size, if we could weed out from the receivers of charity all who ought to take care of themselves, the number would probably be reduced two-thirds.

Judicious relief with wise sympathy is wanted. Let the women manage our charities more than they do. Mr. Lecky's indorsement comes in here, for he says: "Woman illustrate with perfect accuracy the principle of enlightened charity by the simple force of common sense, with a scrupulous and minute attention to the condition and character of those she serves." This is exactly it. Quickness to penetrate the disguise of both pretense and reserve, and the ability to read the real situation is what is wanted. And women, I contend, are the true Masons of the world. They are Masons by nature; they are the perfect Ashlars. But as it is not merely a matter of intuition but requires experience, close observation, reflection of facts, consultation and conference, so we want the joint and balanced agency of women and men—the discernment of the one and the faculty of the other.

And now, it strikes me that I should say something of woman—our mothers and our wives—yes, woman, for I entertain a thorough and perfect contempt for the man who starts back in horror and affright at the idea of *admitting*, even much less coming within that magic circle, which is governed by the power and influence of woman. In affairs of state, as well as those of everyday life, give me the sound judgment, just discrimination and fair conclusion of a clear-headed, honest, intelligent woman any time, in making up my determination and rule of action. Woman! "Poor thing of usages! Coerced, compelled; victorious when wrong, and master oft when right." In ancient Rome, mothers were highly esteemed, and married men had the privilege of taking the precedence of bachelors, whatever might be their property or connections; and candidates for public offices, in consequence of having a more numerous family, were frequently chosen in preference to their opponents. The consul who had the most numerous offspring was the first who received the honors of place; the Senator who had the most children had his name written first in the list of Senators, and was the first in delivering an opinion in the Senate. In fact, if an inhabitant in Rome had three children, he was exempt from all troublesome offices. What a blessing it would be if the world in this progressive day gave so much attention as well as conferred so much honor on the mother and wife. "No man who has not been married can have a just appreciation of a mother's love or a wife's devotion, because both depend upon feelings and habits of mind acquired after entering into that happy state. No true Mason will gainsay this. To be a good Mason, in fact, is to be a dutiful son of a venerable mother, and the fond husband of a loving wife. Man, say I, has no recourse equal to the wife of his bosom when troubles are heaped upon him. To her he can fly to, to narrate his bitter disappointments and troubles through life, and from her he derives hope, inspiration and consolation. The cold and bitter world may frown down upon his efforts; but the loving wife is eagerly watching and praying for his success. She, in the silence of her chamber and the solitude of the soul, pours out her supplications to heaven for his winning. Her eyes gaze down into the innermost recesses of his heart and detect every thought that racks his brain or beclouds his understanding, and like the Angel of Light that she is, lifts the dark mists from off his mental vision.

In these elder years of the world, Charity appears as frequently as the want of it. The world, like the devil, is not nearly so bad as it is often painted. Much good is still done, and that without show, and cheerfully. There are few stories of want and sorrow that do not find ready ears and helping hands. Faith, Hope and Charity—and the greatest of these is still Charity. It will be well for us all if we give our adherence to and services in this belief, according to Pope, for he says with his usual plainness: "I as little fear that God will damn a man that has Charity, as I hope the Priests can save one who has not."

Grand Officers.

The following is a list of the Grand Officers of the Grand Lodge of Masons of California present at the dedicating exercises: Samuel C. Denson, Grand Master; Clay W. Taylor, Deputy Grand Master; John Q. Adams, Senior Grand Warden; George T. Bromley, Grand Secretary; Mose Heller, Grand Treasurer; John W. Shaeffer, Grand Lecturer; Walter D. Abell, Assistant Grand Secretary; Marcus D. Boruck, Grand Orator; Franklin H. Day, Grand Marshal; Geo. Johnson, Assistant Grand Marshal; William B. Shoemaker, Grand Standard Bearer; David McClure, Grand Chaplain; Joseph McMath, Senior Grand Deacon; David Schindles, Junior Grand Deacon. There were also representative Masons from different parts of the State and Nevada, prominent among them Col. J. D. Stevenson, P. G. N., who is 81 years of age, H. H. Hubbard and T. H. Caswell, of the 33d degree, Inspectors General acting, Isaac S. Titas, P. G. M., Jacob H. Neff and others. The exercises were closed by a grand ball in the evening which was a pronounced success. The whole affair will doubtless be long remembered by the participants as one of the happiest events in their lives.

The Railroads of the World.

From a volume published by the French minister of public works, entitled the "Album of Graphic Statistics," the *Saturday Review* has compiled an interesting article in regard to the railroads of the world. Taking the kilometer for the standard, it may be roughly estimated at three-fifths of a mile, or exactly .621 of a mile. In 1830 the total lengths of railroads in Europe were 316 kilometers, of which 279 were in England, and 37 in France. In the United States, there were 65 kilometers. In 1850, Europe had 23,083 kilometers, of which 10,656 were in the United kingdom. Germany had 5,823, and France only 3,080. In the same year, the United States had 14,443 kilometers. In 1870, there were 104,120 kilometers, of which the United kingdom had 24,999, very nearly one-fourth of the whole. But Germany, during the 20 years, had more than trebled her railroads, and possessed 18,560 kilometers. France had not been asleep, however, and had 17,924 kilometers.

In 1876, the United States had 84,637 kilometers, or about four-fifths of the mileage of Europe. In 1878, the increase in Europe was 50% over the railway system of 1870. Germany had then, it seems, the greatest lengths of lines in Europe—some 31,556 kilometers, while France had only 24,424 kilometers. The Germans, then, had much greater facilities in sending troops forward than had the French. This want of railroads in France may account for Mr. de Freycinet's railroad policy. Two years ago, according to the French authority, we had 131,682 kilometers of road. In comparing the length of railroads with population, Sweden is the best provided of any of the European states, having 1.03 kilometers for every 10,000 inhabitants.

Taking the mean in Europe, it is 5.3 kilometers for every 10,000 inhabitants. The United States is prodigal with her railroads, having 39.9 kilometers to every 10,000 people, six times more than the European mean, for the reason that we build roads to attract population, thus "reversing ordinary European ideas that railways should attend traffic, not go before it." For comparison of kilometers to area of kilometers of surface, Belgium has 13.5 kilometers of road, Germany 5.8, France 4.6, the mean of Europe being 1.7, and, strange to say, the United States mean is about the same as the European one.

From the statistics, the English reviewer seems to think that outside of England, Holland and some few minor European countries, railroad construction has hardly commenced, and that if the world is only at peace for a short period, railroad building will shortly take a fresh start of activity, and once more give rise to a brisk demand for iron and steel.

Water Power and Steam.—The partial or entire discarding of water power by a large number of Northern and Eastern manufacturers is one of the industrial features of the hour. Favorable sites where a fall of water could be secured, led to the foundation of the most important of the New England industrial centers, but as time has gone on the power available has been found insufficient in itself and steam manufactories have sprung up in the vicinity. This has been the case at Paterson, N. J., Lowell, and numerous other localities we could enumerate. Manufacturing operations have now attained a magnitude that renders absolute dependence on a supply of water subject to the drouth of summer or congealing in winter out of the question, being a source of constant loss. Hence, steam is everywhere in the ascendant, either as a supplemental or exclusive agent of power. Steam, unlike water power, has no assignable limits, and the means of further economizing its application are assidulously sought out with its more exclusive use; yet water power will always be a factor of value, and the great West still offers magnificent sites to which manufacturers are flocking to undergo the same experience of the more populated Northern and Eastern States.

Egyptian Obelisks.—There are 30 of them at the present time scattered over Europe. Rome has 11, four of which are higher than our New York obelisk. The highest of the Roman obelisks, which is also the highest in Europe, stands before the church of St. John Lateran. The obelisk in the piazza of St. Peter's is 82 ft. 9 inches high. Both of these were mounted on high pedestals. The pedestal of the St. John Lateran obelisk is 44 ft. high, making the entire hight of obelisk and pedestal 150 ft. The pedestal of the St. Peter's obelisk is a trifle less than 50 ft. high, making the whole hight of the monument 132 ft. 2 inches.

Rubber Sap a Beverage.—The rubber tree belongs to the genus Euphorhicea, which are members of the Massoranduba of Brazil, the cow tree of Demerara and the butter tree of Africa. The negroes and Indians are fond of drinking this sap, it being the custom of the latter at the beginning of their feasts to make a present of a bottle of it to their guests.

Extensive Ship Building.—Ship building on the Clyde was unusually active last year. Two hundred and forty-one vessels of all kinds were launched, of a total, officially, 239,000 tons, an excess of 71,000 tons over 1879. Their marketable value represents an outlay of about $30,000,000.

Fool Boys.

The Callow Youngsters who Puff Cigarettes

Physicians and moralists alike are pained by the spectacle, growing more common every day, of pale-faced lads, ranging in age from 16 to 20 years, who are puffing their little lives away in cigarette smoking. Day and night they throng the streets, where the peculiarly offensive odor generated by cigarettes made of cheap paper and bad tobacco renders their smoking as obnoxious to others as it is hurtful to themselves. Every evening before the doors of the theaters, they raise a cloud of foul smoke that is equally injurious to their own rickety constitutions and to the noses of their victims. Doubtless, also, they carry their pernicious habit into their homes—when they are old enough to do so without risk of the spanking they deserve—thus still further doing harm to themselves and making other people uncomfortable.

The cheap cigarette is a modern invention, and a peculiarly vicious one. Twenty years ago, when the cigarettes all came from Cuba and were wrapped in rice paper, smoking them did no great harm. Moreover, being made of Honradez, or some brand of equally strong tobacco, only a boy of stout stomach could smoke more than two or three of them at a time. But to meet the boyish demand cigarettes are sold nowadays both cheap and weak. They are made of mild, often bad tobacco, and for the most part they are wrapped in ordinary white paper. Rice paper wrappings necessarily increase the cost, and the boy who wishes to prove by the ordeal of smoke that he is not a boy but a man, much prefers the article that he can get the most of for his money. Moreover, the boy does not know the difference apparent to the sight between rice paper and ordinary paper, any more than he knows that while rice paper burns away with scarcely any smoke at all, common paper burns with a foul smoke that cuts like a saw into the chest and throat. So he spends his money on cheap cigarettes and makes everybody around him uncomfortable while he smokes himself away into an untimely grave.

Of course, the boys do not intend to sin against themselves and their neighbors. They do not realize what a bad smell their nasty little cigarettes make, and they are very far from knowing what serious injury the smoke from them inflicts upon their throats and bronchial tubes and lungs. They smoke in innocency, not knowing what they do, but most earnestly believing that their smoking makes men of them. Down in the depths of their hearts the most of them have no sincere affection for smoking; and in the depths of their stomachs, they not unfrequently entertain a feeling of positive aversion toward it. But they hang on to their pestilent habit with a persistency that, in a better cause, would be worthy of all praise, stifling the dictates of conscience and asserting a bad mastery over the rebellions of the flesh. And, if reasoned with, they answer in the words of dear John Leech's bad boy, "But what is a fellow to do, when all the men of his own age smoke?"

Luminous Paint.

According to the London *Building News*, luminous paint is getting into quite extensive use in England. Mention is made of offices coated with the paint, which give great satisfaction to the occupants. The effect is that of a subdued light, every object in the room being clearly visible, so that in a room so treated one could enter without a light, and find any desired article. The luminous paint is excited by the ordinary daylight, and its effect is said to continue for about 13 hours, so that it is well adapted for painting bedroom ceilings, passages that are dark at night, and other places where lamps are objectionable, or considered necessary. For staircases and passages, a mere band of the paint will serve as a guide, and costs but a trifle. For outdoor purposes the oil paint is used, but for ceilings and walls, the luminous paint, mixed with water and special size, can be used the same as ordinary whitewash, and presents a similar appearance in the daylight. By the recent discovery that it can be applied as ordinary whitewash considerably expands the field of its usefulness. Sheets of glass coated with the paint are in use in some of the vessels of the navy, at the Waltham powder factory, at Young's paraffine works, and in the spirit vaults of several London docks; and now that, by increased production and the use of water as the medium, its cost is reduced by one-half, it will probably be extensively used for painting walls and ceilings. The ordinary form of oil paint has already been applied in many ways to statues and busts, to toys, to clock faces, to name plates and numbers on house doors, and to notice boards, such as "mind the step," "to let," etc. The paint emits light without combustion, and, therefore, does not vitiate the atmosphere. Several experimental carriages are now running on different railways, the paint being used instead of lamps, which are necessary all day on account of the line passing through occasional tunnels.

A Powerful Quintet.—Says Senator Beck: "Scott, Garrett, Huntingdon, Gould and Vanderbilt, the five railroad magnates, can sit down, and in a five minutes' chat fix a tax of $200,000,000 upon the commerce of this country by raising freight two cents a bushel, and do it according to law."

The Influence of a Tuning-Fork on the Garden Spider.

Having made some observations on the garden spider which are I believe new, I send a short account of them in the hope that they may be of interest to the readers of *Nature*.

Last autumn, while watching some spiders spinning their beautiful geometrical webs, it occurred to me to try what effect a tuning-fork would have upon them. On sounding an A fork and lightly touching with it any leaf or other support of the web or any portion of the web itself, I found that the spider, if at the center of the web, rapidly slew round so as to face the direction of the fork, feeling with its fore feet along which radial thread the vibration travels. Having become satisfied on this point, it next darts along that thread till it reaches either the fork itself or a junction of two or more threads, the right one of which it instantly determines as before. If the fork is not removed when the spider has arrived it seems to have the same charm as any fly; for the spider seizes it, embraces it, and runs about on the legs of the fork as often as it is made to sound, never seeming to learn by experience that other things may buzz besides its natural food.

If the spider is not at the centre of the web at the time that the fork is applied, it cannot tell which way to go until it has been to the centre to ascertain which radial thread is v brating, unless of course it should happen to be on that particular thread or one stretched supporting thread in contact with the fork.

If when a spider has been enticed to the edge of the web, the fork is withdrawn and then gradually brought near, the spider is aware of its presence and of its direction, and reaches out as far as possible in the direction of the fork, but if a sounding fork is gradually brought near a spider that has not been disturbed, but which is waiting as usual in the middle of the web, then instead of reaching out towards the fork the spider instantly drops—at the end of a thread of course. If under these conditions the fork is made to touch any part of the web, the spider is aware of the fact and climbs the thread and reaches the fork with marvelous rapidity. The spider never leaves the centre of the web without a thread along which to travel back. If after enticing a spider out we cut this thread with a pair of scissors, the spider seems to be unable to get back without doing considerable damage to the web, generally gumming together the sticky parallel threads in groups of three and four.

By means of a tuning-fork a spider may be made to eat what it would otherwise avoid. I took a fly that had been drowned in paraffine and put it into a spider's web and then attracted the spider by touching the fly with a fork. When the spider had come to the conclusion that it was not suitable food and was leaving it, I touched the fly again. This had the same effect as before, and as often as the spider began to leave the fly I again touched it, and by this means compelled the spider to eat a large portion of the fly.

The few house-spiders that I have found do not seem to appreciate the tuning-fork, but retreat into their hiding-places as when frightened; yet the supposed fondness of spiders for music must surely have some connection with these observations, and when they come out to listen, is it not that they cannot tell which way to proceed?

The few observations that I have made are necessarily imperfect, but I send them, as they afford a method which might lead a naturalist to notice habits otherwise difficult to observe, and so to arrive at conclusions which I in my ignorance of natural history must leave to others.—*C. V. Boys, in Nature.*

A Horse Shoe in a Tree.—A sycamore tree was recently blown down near the residence of Geo. Douglas, in Hartford, Connecticut. On cutting it up for fire wood, there was found embedded in the trunk, 59 inches in diameter, an old horseshoe with nails on one side only. It was 22 inches from the bark, or outer edge of the tree, the wood of which is perfectly sound. The tree is known to be more than 130 years old, and it is estimated that the shoe has been embedded in it 110 years. In ye olden times, it was a customary thing to nail old horseshoes to trees for hitching horses to, and it is supposed that this one was nailed there for that purpose, and that as the tree grew, it incased the shoe in it. Mr. Douglas' house formerly belonged to the Mather family. A brick building used to stand in the corner of the lot, where the Mathers had their office, and the probability is that the tree was used as a hitching post.

An Electric Watch.—A watchmaker at Copenhagen, of the name of Sonderberg, is reported to have made a watch which requires no winding up, inasmuch as it performs that work itself by means of an electric current. An electric magnet fixed inside the watch keeps the spring perpetually in a state of tension. All that is required to keep the watch running is to preserve the battery in proper working order, for which purpose one or two inspections in a twelve-month are said to be sufficient.

Cure for Stammering.—"A simple, easy, and effectual cure of stammering" is said to be, simply at every syllable pronounced to tap at the same time with the finger; by so doing "the most inveterate stammerer will be surprised to find that he can pronounce quite fluently."

A New Theory of the Constitution of the Sun.

Some recent studies of solar spectra in connection with sun spots and other features of the sun's envelope have led Mr. Charles S. Hastings, of the Johns Hopkins University, to form a somewhat novel theory of the sun's constitution and the conditions producing the more notable phenomena familiar to solar students.

Mr. Hastings finds, contrary to the received opinion, that the spectra of the center and the outer edge of the sun's disk are not precisely alike, though the differences are so minute as to escape all but the most perfect instruments and all methods which do not place them in close juxtaposition. Certain of the Fraunhofer lines, thickest and darkest in the spectrum, notably those of hydrogen, magnesium and sodium, which appear with a haze on either side in the spectrum of the center of the solar disk, are sharp and distinct in the spectrum of the limb. Certain very fine lines are stronger at the limb, while other very fine lines are stronger at the center. The ordinarily accepted theory of the solar constitution and the origin of the Fraunhofer lines fails to explain these phenomena.

The probable reasons for this failure Mr. Hastings discusses at considerable length in the January issue of the *American Journal of Science*, and then proceeds to frame a theory of the sun's constitution, which, he thinks, will satisfactorily explain all the observed phenomena, and which may be briefly summarized as follows:

His theory differs from that of Faye chiefly in localizing the phenomena of precipitation instead of regarding it as proper to all portions of the photosphere, and in supposing the precipitation confined to one or two elements. He attributes the granular appearance of the solar surface to ascending currents directed generally from the center of the sun. About these currents are necessarily currents in an opposite direction, which serve to maintain a general equilibrium in the distribution of mass. The ascending currents start from a level where the temperature is probably above the vaporizing temperature of every substance. As they move upward the vapors are cooled, mainly by expansion, until a certain element (probably the carbon group) is precipitated. This precipitation, restricted from the nature of the action, forms the granules. The precipitated material rapidly cools, on account of its great radiating power, and forms a fog or smoke, which settles through the spaces between the granules till revolatilized below. It is this smoke which produces the general absorption at the sun's limb, and the "rice grain" structure of the photosphere. The reasons for supposing the precipitated element to be of the carbon group (carbon or silicon) is simply that no other substances present the properties indicated by the cloud masses of the photosphere. It is pretty clear that the substance has a boiling point above that of iron, for iron vapor at a lower temperature exists in its immediate neighborhood. The element is not a rare one, and its molecular weight cannot be great, for though precipitated below the upper natural limit of its vapor there are few elements found in abundance above it, and those in general of low vapor density. It is possible that the light coming from the sun is radiated from solid or liquid particles of carbon just at the point of vaporization; but Mr. Hastings is rather inclined to suspect that the photospheric material is silicon. There is also good reason to suppose he thinks, that carbon is precipitated at a higher level, possibly along with the less common element boron.

The clouds of carbon or other smoke would naturally be drifted into spaces of downward flowing currents, thus forming sun spots, the characteristics of which are readily accounted for by the necessary behavior of smoke clouds sinking into regions of higher temperature. This explanation of sun spots and their allied phenomena is certainly plausible, and we shall look with interest for what older students of the sun shall have to say about it.

Chinese and Negroes.—The *Herald*, in reviewing the late census statistics, finds that while the increase of the black population of the 15 Southern States, during the decade preceding 1870, was only 5½%, the increase during the last 10 years was more than 35%. Regarding the increase in different States, the *Herald* says: "In Nevada they have increased, since 1870, from 3,152 to 5,420; in Colorado, from 7 to 610, of whom about one-third are in Denver; in Washington Territory, from 234 to 3,182; in Wyoming, from 143 to 914; and in Dakota, from none to 238. In Idaho and Montana there has been a marked falling away of Chinese, the decrease being from 4,274 to 3,378 in the former Territory, and 1,949 to 1,737 in the latter. New York city, which had just a round dozen in 1870, now musters 747, while Philadelphia, which started 10 years ago with precisely the same number as New York, can only show 80. Kings county enumerates 118, which may be taken as the approximate number of Chinese laundries in Brooklyn. Even New Jersey has 176 Mongolians within its borders, while Massachusetts has 237, and Connecticut 124. It is probable that New Orleans has attracted 473 to Louisiana, but St. Louis has drawn less than a hundred to Missouri.

Adulteration of Food or Drugs.

In the last issue of the WATCHMAN, in an article on the above subject, we proposed to give in full the bill on this subject presented to Congress by the National Board of Trade. The bill is as follows:

Be it enacted, That no person or corporation shall knowingly transport, or cause to be transported, from the State, district, or Territory in which he resides or does business, into any other State or Territory, or from any foreign country, or other State or Territory, into the State or Territory in which he resides or does business, for sale or barter, or to be offered for sale or barter, any article of food or drugs adulterated within the meaning of this act, and any person violating the above provision shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not more than $50 for each offense.

SEC. 2. That no person shall, within the District of Columbia or any of the Territories, or in any fort, arsenal, dock-yard, or reservation, or other place under the jurisdiction of the United States, manufacture, offer for sale, or sell any article of food or drugs which is adulterated within the meaning of this act, and any person violating this provision, shall be deemed guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine not exceeding $50.

SEC. 3. If, on examination of any food or drugs imported from any foreign country, it is found to be adulterated within the meaning of this act, a return to that effect shall be made upon the invoice, and articles so noted shall not be permitted to pass the custom-house or be delivered to the consignees, unless on re-examination, as provided for in this act, it shall be found that the said articles are not adulterated.

SEC. 4. The owner or consignee shall have the privilege of calling, at his own expense, for a re-examination, and on depositing with the collector of customs such sum as he may deem sufficient to defray such expense, it shall be the duty of the collector of customs to procure a certificate, under oath from a public analyst, of a careful analysis of the articles in question; and in case the report by certificate of the analyst shall declare the report of the officer who examined the goods to be erroneous, and the said articles to be unadulterated, the said articles shall be returned to the owner or consignee, and passed without reservation on payment of the duties, if any. But in case the officer's return shall be sustained by the analyst, the said articles shall remain in charge of the collector of customs, to be disposed of in accordance with regulations to be prepared by the National Board of Health and approved by the Secretary of the Treasury: *Provided*, That the owner or consignee, on payment of charges of storage and other expenses necessarily incurred by the United States, and on giving bond, with sureties satisfactory to the collector, agreeing to remove said articles from the United States, shall have the privilege of re-exporting them at any time within the period of six months after the date of the report of the inspector or public analyst.

SEC. 5. In order to carry into effect the provisions of this act, the Secretary of the Treasury is hereby authorized to appoint from names submitted to him for that purpose by the National Board of Health one or more suitably qualified persons as special inspectors and as public analysts for adulterated food and drugs at such ports of entry as the Secretary of the Treasury may deem expedient, and it shall be the duty of the National Board of Health to prepare instructions governing the work of such inspectors and analysts, which, when approved by the Secretary of the Treasury, shall govern their action, and that of collectors of customs, in preventing importation from foreign countries of food or drugs adulterated within the meaning of this act.

SEC. 6. The National Board of Health shall make, or cause to be made, examination of specimens of food and drugs collected under its direction in various parts of the country, and shall publish in its weekly bulletin the results of such analyses. If it shall appear from such examination that any of the provisions of this act have been violated, the Secretary of the Board shall at once report the facts to the proper United States District Attorney, with a copy of the results of the analyses duly authenticated by the analyst under oath.

SEC. 7. It shall be the duty of every district attorney to whom the Secretary of the National Board of Health, or any collector of customs, shall report any violation of this act, to cause proper proceedings to be commenced and prosecuted without delay for the fines and penalties in such case provided, unless, upon inquiry and examination, he shall decide that such proceedings cannot probably be sustained, in which case he shall report the facts to the National Board of Health. And for the expenses incurred and services rendered in all such cases, the District Attorney shall receive and be paid from the Treasury such sum as the Secretary of the Treasury shall deem just and reasonable, upon the certificate of the judge before whom such cases are tried or disposed.

SEC. 8. An article shall be deemed to be adulterated within the meaning of this act—

A.—IN THE CASE OF DRUGS.

1. If, when sold under or by a name recognized in the United States Pharmacopœia, it differs from the standard of strength, quality or purity laid down therein.

2. If when sold under or by a name not recognized in the United States Pharmacopœia, but which is found in some other pharmacopœia or standard work on Materia Medica, it differs materially from the standard of strength, quality or purity laid down in such work.

3. If its strength or purity fall below the professed standard under which it is sold.

B.—IN THE CASE OF FOOD OR DRINK.

1. If any substance or substances has or have been mixed with it so as to reduce or lower or injuriously affect its quality or strength.

2. If any inferior or cheaper substance or substances have been substituted wholly or in part for the article.

3. If any valuable constituent of the articles has been wholly or in part abstracted.

4. If it be an imitation of or be sold under the name of another article.

5. If it consist wholly or in part of a diseased or decomposed, or putrid or rotten, animal or vegetable substance, whether manufactured or not, or in the case of milk, if it is the produce of a diseased animal.

6. If it be colored or coated, or polished or powdered, whereby damage is concealed, or it is made to appear better than it really is, or of greater value.

7. If it contains any added poisonous ingredient, or any ingredient which may render such article injurious to the health of a person consuming it: *Provided*, That the National Board of Health may, with the approval of the Secretary or the Treasury, from time to time declare certain articles or preparations to be exempt from the provisions of this act: *And provided further*, That the provisions of this act shall not apply to mixtures or compounds *recognized* as ordinary articles of food, provided that the same are not injurious to health and that the articles are distinctly labelled as a mixture, stating the components of the mixture.

SEC. 9. It shall be the duty of the National Board of Health to prepare and publish from time to time, lists of the articles, mixtures or compounds declared to be exempt from the provisions of this act in accordance with the preceding section. The National Board of Health shall also from time to time fix the limits of variability permissible in any article or compound.

SEC. 10. The term "food" as used in this act shall include every article used for food or drink by man.

The term "drug" as used in this act shall include all medicines for internal or external use.

SEC. 11. All the regulations and declarations of the National Board of Health, made under this act from time to time and promulgated, shall be printed in the Statutes-at-Large.

SEC. 12. This act shall take effect ninety days after it shall have become a law.

The Opening of Spring.

Fitting to the approach of spring beauties is the simple sketch which we give upon this page. It is merely a little picture of children and flowers cast amid the surroundings of a homely farm landscape. And how proper and natural is the association. How the imprisoned city youth will envy these little ones with their freedom of earth and sky and air. The more we see of city children the more we are impressed with the fact that they are sadly out of place. But they come, and they must struggle on toward manhood and womanhood, unconscious perhaps of how much of the world's beauty they lose. Do as well as they may, it is the youth of the country who are the hope of the republic, and who will be the heroes and the heroines of the coming generation. Give them the freedom of the wood lot and the lane. Dame Nature is the kindest nurse and she can bring the fullest strength to their limbs, and joy to their hearts.

A RURAL SCENE IN SPRING TIME.

A NEW ILLUMINANT.—Herr Kordig, a Hungarian, has lately been performing some very curious experiments at scientific meetings in Paris with a new volatile combustible essence, which is offered for lighting purposes. Having arranged on the table several lamps in which the essence burns with a beautiful bright flame, Herr Kordig pours a quantity of the liquid on his hat and lights it, whereupon a long flame springs up to the ceiling. To the surprise of the audience, he puts his hat on his head and waits till the flame goes out. The hat is then shown to be intact. He pours some of the liquid on the floor and on a handkerchief and lights it. The floor and the handkerchief are noways damaged. Some drops may be put in the hollow of one's hand and burnt without producing appreciable pain. These extraordinary facts are easily explained. Herr Kordig's mineral essence boils at about 35° C., and the tension of its vapor is considerable, so that it, is not the liquid that burns, but its vapor. He states that the liquid is a very volatile essence of naphtha, with a certain mixture of ether of its composition added. The new essence is said to be obtained quite simply from natural oil beds recently discovered in Hungary.

Subjects for Consideration.

I've been wondering lately, and here are a few thoughts that need answering, it seems to me. Who will do it? I wonder why parents feel it a duty to educate their daughters for wives, and not their sons for husbands? I wonder why the mother only is considered the proper one to mold the character of her children? I wonder why men who believe it right for themselves to chew, smoke, swear, talk and act immorally, are sure to censure like conduct in their children? I wonder why women will continue to marry men of bad habits, or let their daughters associate with such men? I wonder why that class of men who are the most degraded are loudest in the pretention of ability to represent by vote the purer portion of humanity? I wonder why rich corporations and men of means have the power under our Government system to oppress, fine and imprison poorer men, whose greatest crime is the love of home, and the courage to protect it? I wonder why men and women of good sense and education can calmly allow the evil of intemperance to destroy the purity of our homes, the morality of our youth, double our taxes, and consent to the making an evil right, in a point of law, by licensing the same? I wonder why a woman will insist on wearing corsets and tight shoes, trailing dresses and insufficient underwear, when every physician will tell her she is killing herself, and destroying any beauty she may possess, besides being ridiculed and made fun of by men in general? I wonder why editors *will* publish any thing a lady contributor may send them whether readable or not? I wonder why printers have the name of being more dissipated than any other tradesmen? I wonder why *loafers*, or *gentlemen of leisure* always *will* congregate on the street corners to gossip or compare stock reports, and thus incommode the busy portion of humanity? I wonder why the Government (which is the people), will continue to pay the bankers interest on money, which it might as well issue without paying interest, and at the same time save the people farther unjust extortions of soulless usurers? I wonder if politics, now so exclusive and corrupt, is made corrupt by its exclusiveness? I wonder how long farmers will continue to take a just pride in the *purity* and *healthy* breed of their stock, without applying the same intelligence and high physical laws to their own families? I wonder why mothers dress their little girls in dainty white underwear, while their boys are clothed in warm woolen the year around? I wonder why a woman should be confined to one trade, that of housekeeping because of sex, while a man may choose his according to taste or circumstances? I wonder how a deadly poison may be at the same time "killative" and curative? I wonder when the beautiful spirit of charity will extend to those who differ from us in *opinion* as well as in purse. I wonder why the people of towns who desire to obtain the produce of farmers as cheaply as possible, compel them to first dispose of their produce to middle men, who usually charge consumers double prices, or else to take out expensive licenses as *common peddlers* before they can sell directly to consumers; also, I wonder why the Grangers do not take this matter in hand, and prove such unjust local laws unconstitutional?—*Jewell.*

THE CURRENT OF RIVERS.—A very slight declivity suffices to give the running motion to water. Three inches per mile in a smooth, straight channel gives the velocity of about three miles an hour. The Ganges, which gathers the waters of the Himalaya mountains, the loftiest in the world, is, at 100 miles from its mouth, only 300 ft. above the level of the sea, and to fall 300 ft., in its long course, the water requires more than a month. The great river Magdalena, in South America, running for 1,000 miles between two ridges of the Andes, falls only 500 ft. in all that distance. Above the distance of 1,000 miles, it is seen descending in rapids and cataracts from the mountains. The gigantic Rio de la Plata has so gentle a descent into the ocean that, in Paraguay, 1,500 miles from its mouth, large ships are seen which have sailed against the current all the way by the force of the wind alone—that is to say, which, on the beautiful inclined plane of the stream, have been gradually lifted by the soft wind, and even against the current, to an elevation greater than our loftiest spires.

IMPROVED CAUSTIC.—It sometimes becomes necessary to remove certain morbid growths in the throat and elsewhere, and for this purpose a stick of fused nitrate of silver secured in a quill is generally employed. Unfortunately it not unfrequently happens that the caustic breaks off and slips down the throat. To prevent this, a Russian surgeon melts together five parts of nitrate of silver and one part nitrate of lead. This composition does not break easily, and can be sharpened like a lead pencil. It should be fastened in a quill made of metallic aluminum, which is not corroded by the caustic as metallic silver is.

ANAHEIM is out of debt, has several hundred dollars in the treasury, and the delinquent taxes amounted to less than $20.

CLOTH car wheels are the latest. They are the invention of a Frenchman, who is said to be very scientific.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.

Subscription (in Advance), $2 a Year.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and WATCHMAN together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

San Francisco, - March 1, 1881.

Grand Recorder's Statement for January.

We condense from Grand Recorder Pratt's Financial Statement for January the following leading figures:

DISBURSEMENTS.

Balance in hands of G. Rvr., Jan. 1, 1881, Benef. Fund	$ 1,267.00	
Received during Jan., Benef. Fund	12,607.00

We Feel Proud.

The WATCHMAN is proud of the A. O. U. W. as a grand national oganization that has already accomplished far more good than its founder ever dared to hope. Especially is it proud of the organization in this State, where so many homes have, by its beneficence and strength, been preserved and blessed as by no other society, ancient or modern, and where such an array of great and good men have joined hands around a common altar for a common purpose, and that purpose one than which there can be none better or nobler. It is proud that in this work it has been able to do its full share with the prospect of accomplishing much more as the years go by. It is pleasant to feel that one's efforts in a righteous cause are appreciated, and that success attends on the march of progress.

It seems but a yesterday that the A. O. U. W. was only a speck in the fraternal horizon of the Pacific coast. To-day its glory overspreads mountain and plain, from British America on the north to Mexico on the south, from the Pacific shores on the west far into the Sierras on the east, and still its glory grows brighter and brighter. The increase of the Order in this jurisdiction shows no abatement. More than three hundred Master Workmen were added to our rolls in February—three hundred as good and true men as ever plighted faith around the altar of fraternity. We expect the future to be but a repetition of the past. Why should it be otherwise? The zeal of the laborers has not waned. The evidences of beneficence are multiplying on every hand. The necessities to be provided for are none the less imperative. Wives and children are none the less dear, and the protection of the Order none the less sure. Then, too, how happily the plan of the Workmen accords with the spirit of the age, not only in its designs, but in the manner of carrying out those designs. No other order of like aims can approach the A. O. U. W. in this regard. As it is the oldest, so it is in advance in the wisdom and perfection of its laws. Every day's experience makes this fact the more apparent, and so it is that a great public want is filled and a great public good accomplished. It is no wonder, then, that the Order grows and constantly attracts to it all the better portion of our people.

More than eleven thousand men stand in our ranks in this jurisdiction. The year to come will add more than two thousand to this number—probably three thousand. We predict with confidence, knowing the men whose hands are at the helm, and the men who stand behind to sustain their efforts. It has been our ambition to see the A. O. U. W. take first rank as a fraternal society. We believe it deserving of such a place, and we believe that in time our ambition will be fully gratified.

GEORGE KEMME, a member of Olympic Lodge, 127, died in this city after an illness of two days. The cause of death w as the bursting of a blood vessel in the stomach. He was buried from Druid's hall, being a member of the Druids. He was also a member of the K. of H. It seems but yesterday since we wended our way from the Lodge-room to the northern part of the city with the deceased. The departed brother is respected by his associates as an honest and true man, those who have known him for years testifying to his worth and sterling integrity. As a member of the A. O. U. W. he was faithful in his duties. It is only a few weeks since he was appointed by Master Workman Rossbach to fill the Overseer's chair for the evening, and he looked then as if he would outlive any member of the Lodge. His sudden taking off is a forcible illustration of the proverb, "in the midst of life we are in death." *Requiescat in pace.*

Substantial Compliments.

To A. T. Dewey, P. M. W., Manager Watchman Publishing Company, S. F.—DEAR SIR AND BROTHER: Inclosed please find P. O. order for $3, to pay for the publication of our Lodge card in the PACIFIC STATES WATCHMAN for the year ending Jan. 1, 1881. I will state that no better exponent of the principles of this or any other Order than the PACIFIC STATES WATCHMAN has ever come under my observation. Fraternally yours, GEORGE H. BUCK, Recorder Redwood Lodge, No. 25, A. O. U. W., Redwood City, Cal., Feb. 11, 1881.

REMARKS.—The above is a sample of many encouraging letters now received by us. As we advanced over $1,000 to secure success for the A. O. U. W. literary undertakings of our worthy and zealous predecessors, we are gratified in more than ordinary measure at receiving such encouragement and return for our early investment and faithful labors.—PUBS.

Decisions of Clay W. Taylor, P. G. M. W.

We will continue to print from time to time some of the decisions in appeal cases, which were rendered by Bro. Taylor during his term as Grand Master of this State:

Intoxicating Liquor at Picnics.

My attention was called to the fact that a number of Lodges of A. O. U. W. proposed holding a picnic at a park, the use of which, together with a band of music, was to be furnished free of charge, provided the proprietor was allowed to keep open his bar for the sale of intoxicating liquors, the same being screened from public view by placing a curtain in front of it, thus separating it from the remainder of the park; and I was asked to give the matter respectful consideration, and, if possible, render such a decision as would hereafter prevent members of our Order from engaging in such entertainments. The communication was from one of our oldest and most respected Lodges.

On a careful examination of the law, I was unable to find anything upon the subject more explicit or exacting than the Sections 10 and 11 of Art. I. of Laws of the Grand Lodge, the first of which prohibits Lodges being holden in a room where ardent spirits are sold, and the next prohibits the supplying of intoxicating liquors at any banquets or entertainments given in the name of the Order.

In the case presented it was not difficult to determine that the picnic was a banquet or entertainment given in the name of the Order, but intoxicating liquors were not to be supplied or furnished at the banquet or entertainment by the Order, or any one for it. None were to be used at or set upon its tables. And I therefore felt compelled to decide that the provisions of the law were not broad enough to prohibit the holding of a picnic at places or on grounds adjacent to public saloons and bars where liquors were sold, for while the Grand Lodge had enacted that *Lodges* should not be holden in a room where ardent spirits were sold, it seemingly avoided enacting that *banquets* and *entertainments* should not be holden at or near such places.

The sentiments of the brethren who presented the matter were such as will always promote the welfare and prosperity of our beloved fraternity, and had I been satisfied that I had authority under the law, there would have been no hesitancy in enforcing its provisions.

Blackballing.

A case was presented where an applicant, having been rejected by ballot, addressed a communication to the Lodge, making charges against a member, and accusing him of being the cause of the rejection. Thereupon the Lodge appointed a committee to investigate the matter, and after investigating, the committee were about to prefer charges against the brother, but being in doubt, applied for authority "to sift the matter thoroughly."

I at once instructed them that it was improper to permit inquiry in open Lodge, or in any other manner, as to who cast black balls, or their reasons therefor; that the secrecy of the ballot box should be maintained and protected, and that no member should be called to account for casting a black ball, whether he had been a member of an investigating committee or not, and directed them to so report to their Lodge.

LET those husbands who do not belong to the A. O. U. W. think for one moment of the fate that may befall their little ones if they should die and leave them unprotected. Here is an Order that pays $2,000 to each beneficiary without legal quibble or other annoyance. It preserves the home intact that has been made desolate; it keeps the family together, and does not let its members be scattered far and near. Think of this, you who may be called at any moment from the family fireside. Do not let the cares of business stand in the way of your application to join a Workman Lodge. Act quickly. It is a vital matter to your wife and children, and your first consideration should be for their welfare.

BRO. S. M. PERRY writes us that there has been quite an A. O. U. W. revival in Los Angeles during the past month. A new Lodge with over 60 charter members has been instituted. On February 2d, 17 applications for the degrees were read in No. 55. He further says that the good work still goes on, and the members of old 55 intend to have 200 members at the close of the year. We wish our southern friends the fullest measure of success.

OFFICERS receiving the paper with this notice marked are requested to procure subscribers for the WATCHMAN in Lodges where we have no active agent at the rate of $2, and we will allow liberal commissions for the service rendered. Act at once, or send to this office for free copies for distribution and further particulars.

A MUSICAL and literary entertainment will be given by Hearts of Oak Lodge, 61, West Berkeley, the latter part of March.

From Grand Master Workman.

Circular to Subordinate Lodges.

OFFICE OF GRAND MASTER WORKMAN,
A. O. U. W. STATE OF CALIFORNIA,
525 Montgomery Street, San Francisco.

To Officers and Members of all Subordinate Lodges in the jurisdiction of California. SIRS AND BROTHERS:—I desire to call your particular attention to the following points of legislation recently adopted.

1. Remittances.—Lodges are imparatively required, when transmitting money to the Grand Recorder, to state upon the blanks furnished them by that officer, what said moneys are for, and enclose said information with said money. No Lodge, hereafter, will receive credit until said blank, properly filled out, has been received by the Grand Recorder.

2. Rituals.—No more than five rituals are to be in the possession of any one subordinate Lodge; and a receipt stating the number of rituals in your Lodge is to be forwarded immediately to the Grand Recorder by the present M. W. Hereafter, each M. W. shall, at the end of his term, require a receipt for the rituals of the Lodge, from his successor (stating the number of said rituals), which receipt shall be handed to the installing officer, to be forwarded to the Grand Recorder.

3. Individuals having rituals, etc.—No individual member is allowed to own or possess a copy of the ritual. Any brother having a copy of said ritual in his possession (unless he is M. W. of a Lodge), is hereby required to return the same to the M. W. of his Lodge, to be by said M. W. returned to the office of the Grand Recorder. A failure to comply with this order shall constitute an offence, and render the non-complaint liable to charges.

4. Ordering rituals.—Rituals will only be sold to Lodges, and must be ordered under the seal of the Lodge, and accompanied by a certificate stating the number of rituals already in possession of said Lodge.

5. Price of degrees, etc.—The fees for admission must not be less than the following: Proposition fee $3; J. W. degree, $5; M. W. degree, $5; beneficiary certificate, $1; beneficiary fund, $1. Total, $15.

6. "Work."—Officers elect are required to perfect themselves in the "work" before they can be installed. Lodges desiring special visits for purpose of instruction in the work, will address this office.

7. M. W. degree.—The M. W. degree cannot be conferred on any J. W. until the beneficiary certificate for said brother has been received by the Lodge, or notice given from the Grand Recorder's office, that a beneficiary certificate for said brother will be issued.

8. Assessment notices.—The mode and manner of sending out assessment notices is left to the good judgment and discretion of each subordinate Lodge.

9. New Lodges.—When a new Lodge is proposed to be formed, the petitioners for said new Lodge must obtain a recommendation of a majority of the Lodges of the district in which it proposes to locate. Each Lodge in the district must be petitioned, and no action shall be taken by any Lodge until two weeks after the receipt of said petition, when said Lodge can act, and give its recommendation or otherwise.

10. Intemperance.—The Grand Lodge has again emphatically reiterated its declaration that "habitual drinkers" and "drunkards" "are not fit subjects for admission to the Order;" and the opinion has also been as plainly expressed, that if such parties have through any means obtained admission, they are not fit subjects for membership in our Order! We cannot afford to jeopardize our funds or stain the good name of our Fraternity by retaining in membership any man who publicly or privately disgraces himself, his family, and this Order, by drunkenness. Officers and members of each and every Lodge should hold to prompt and strict account any brother guilty of this or any other offense against good order, good morals, and the reputation of the A. O. U. W.

11. Illegal use of title.—The Supreme Master Workman, having declared that the use of the initials "A. O. U. W." and the conferring of so-called degrees under that title by an organization known as "Select Knights," are illegal and unauthorized, and the G. L. of California having coincided with this opinion, therefore all members in this jurisdiction are requested to refrain from giving countenance to said so-called "Select Knights."

12. Questions, etc.—Lodges will submit questions, queries, etc., or points of law, custom, usage, etc., to the Deputy of their district for decision. If the decision is not agreed with, an appeal can be taken to the G. M. W.; but said questions must first be proposed to the D. D. G. M. W.

13. Sessions.—The next session of the Grand Lodge will be held in San Francisco, commencing on the first Tuesday in April, 1882.

14. Medical Examiners.—Lodges must not receive nor act upon reports from any Medical Examiner who has not qualified according to Sec. 3, Article 7, of Subordinate Lodge Constitution. Wishing you prosperity, I am, Fraternally yours, in C. H. and P.,

WM. H. BARNES, G. M. W.

TUCSON.—Bro. Geo. B. Shearer, printer and member of Keystone, 64, is on the disabled list, with prospects of early recovery, we are glad to say. He reports the new Lodge at Tucson as based on good material and prospering grandly.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

EVERY Lodge should possess one or more copies of the "Digest of Laws and Decisions." Price, $1.50.

BLANKS have been prepared for orders for the semi-annual pass-word, and can be had by ordering from this office.

OVER 12,800 beneficiary certificates have been issued from this office. February added 350, exclusive of re-issues, which were about 30. This is certainly a good start for the new term.

ONCE more let me ask that remittances by money order be made payable at "Station B, San Francisco." This is a money order office, entirely distinct from the main office in this regard. It is convenient to the office of the Grand Recorder, while the main office is more than a mile away.

BENEFICIARIES receiving the warrants of the Grand Lodge should not suffer heavy charges for collection. Usually this business can be best and safest done through Wells, Fargo & Co., but often it is quite as well to present the warrant in person to the Grand Receiver in Alameda.

THE published proceedings of the late session of the Grand Lodge have been sent out to all the country Lodges and representatives, and to a portion in the city. Those in the city who have not already received them, will please call at the office. In many cases we have not the address of representatives, and cannot send the documents out with any certainty of their reaching the proper destination.

RECORDERS frequently report members as "expelled" when they are merely "suspended from the Order." Usually we are able to determine what is really meant, but sometimes we are not, and so reports have to be returned for correction. A little study of the laws on the part of Recorders would obviate all these difficulties. Remember, expulsion only comes by operation of our penal laws.

A MEMBER coming from another beneficiary jurisdiction into this, must pay all assessments levied here after he becomes a member. He is freed from all current liabilities in the jurisdiction he leaves, and must assume a similar responsibility here. A member entitled to all the benefits of the Order cannot evade assessments simply by transferring membership back and forth from one jurisdiction to another. Some of our members have got this erroneous idea that members joining this jurisdiction from Oregon or Nevada, for instance, are not liable on assessments made on deaths that occurred prior to their admission here. The law is plain. It requires that assessments shall be levied on all Master Workmen in good standing who received the M. W. degree prior to the date of the death on which the assessment is levied.

Our Grand Officers.

In our last issue we gave a portrait, together with some personal matters that have occurred in the busy life of Wm. H. Barnes, G. M. W. We also gave some items of information concerning Bro. Beatty, G. F.; Bro. Rogers, G. O., and Bro. Gregory, G. G. We herewith continue our remarks, giving such facts in the history of each officer as will give the members of our Order an idea of the manner of men that constitute the Grand Lodge of this State. As our last notice gave information about the new officers, it is our present purpose to give those officers who have been advanced to higher positions or retained in old ones an introduction to the Order through the WATCHMAN.

E. F. Loud, Deputy Grand Master.

It requires no word of ours to strengthen the high esteem in which our Deputy Grand Master is held by the brethren of this jurisdiction. It will be sufficient to relate a few facts which we have gleaned concerning the personal history of our worthy brother. He was born in Abington, Plymouth county, Mass., March 12, 1847. He started for California via. Cape Horn, in 1860, and after a time spent at sea arrived in this State March, 1862. After his arrival here he followed mining till Feb. 4, 1863, when he enlisted in the California Batallion, Capt. Adams commanding. Upon going East was attached to the 2d Regt. Massachusetts Cavalry, and served in the Army of the Potomac, and under Gen. Sheridan in the Shenandoah valley till the close of the war. On returning to this State he received an appointment in the Custom House, where he remained till 1870. Bro. Loud then went to Oregon, where he followed various occupations. He remained among the Web-foot people until February, 1872, when he returned to California, and has since been employed as foreman by Einstein Bros., wholesale dealers and manufacturers of boots and shoes. In January, 1872, our worthy deputy resigned his bachelor existence, and assumed the duties which pertain to the married state. Two children delight in calling Bro. Loud father. His connection with the A. O. U. W. dates from April, 1878, when he was one of the charter members of Valley, 30. He has served his Lodge as Overseer, Foreman and Master. At the session of the Grand Lodge in 1880, he was appointed Deputy Grand Master, and re-appointed at the late session held in this city. We will close our brief sketch by quoting the words of a brother in Santa Barbara, who met Deputy Loud at the I. O. O. F. session: "I had the pleasure of an introduction to E. F. Loud, D. G. M., and for a short acquaintance I can say he was one of the best men I ever saw."

William Wiltse, Jr., Grand Watchman.

At the late session of the Grand Lodge, in this city, Bro. Wiltse, was re-elected to the position of Grand Watchman. He was born in Prattsville, Green county, N. Y., and is at present 44 years old. He was married in 1879, one child being the result of the union. He was elected Master of El Dorado Lodge, No. 118, when it was organized, Aug. 29, 1879. He also received the appointment of D. D. G. M. from Wm. H. Jordan, then G. M. W., and served until the end of the term. His first appearance in the Grand Lodge was in 1880, when he represented his Lodge. Besides his connection with the A. O. U. W. he has been prominently associated with the Patrons of Husbandry, the great Granger movement which is doing so much to elevate the farmers of the country. He has been Master of Placerville Grange for three years, and also their representative to the State Grange for the same period. The war of the rebellion brought Bro. Wiltse to the front as a defender of his country, he having served as Second Lieutenant in the Eight California volunteers. Upon returning home the military spirit still clung to him, and he filled the position of Captain in a militia company for eight years. Present occupation, farmer and produce dealer.

Resolutions of Respect by the Grand Lodge.

Grand Lodge, Ancient Order of United Workmen of California—Your Committee upon the Honored Dead would respectfully report that since the last session of this Grand Lodge the following named honored members of our Order have been chosen to seats in the Grand Lodge above, Eternal in the Heavens:

Lodge No. 38—B. EILERMAN.
Lodge No. 83—H. LOHSE.
Lodge No. 95—H. G. OLIVER.
Lodge No. 108—G. W. BRUBAKER.
Lodge No. 27—CHAS. L. DE WOLF.

Truly may it be said "that death is in the world, and the spoiler is among the works of the Almighty."

We have deposited the remains of our departed brothers in the solitude of the tomb, and have buried their imperfections beneath the clods which rest upon their bosoms.

Yet while their bodies are crumbling into dust, and their souls have returned to God who gave them, their example as true and honest Workmen, their noble deeds in the cause of humanity, their unswerving fidelity to the principles of our Order, will stand as an imperishable and eternal monument to remain as a beacon light for all the world.

It is mete and proper that this Grand Body should formally place upon record its deep sense of its bereavement, and would therefore recommend the adoption of the following resolutions:

Resolved, That in the death of the above-named brothers our Order mourns the loss of five of its noblest members and most faithful workers.

Resolved, That to the bereaved families and friends of our departed brothers we tender the heartfelt sympathy and condolence of this Grand Lodge, and of the brotherhood throughout this jurisdiction.

Resolved, That we, the surviving members of this Grand Lodge will strive in our life and conduct to emulate their many virtues, in order that we, like them, may

"So live that when the summons comes to join
The innumerable caravan which moves
To that mysterious realm where each shall take
His chamber in the silent halls of death,
We will go, not like the quarry slave at night
Scourged to his dungeon, but, sustained and soothed
By an unfaltering trust, approach our grave
Like one who wraps the drapery of his couch
About him, and lies down to pleasant dreams."

Resolved, That the Memorial page in our Journal be set apart and a tablet thereon inscribed to the memory of our departed brothers.

W. B. LYON,
WILLIAM H. JORDAN, } Com.
JAMES H. BARRY.

[In connection with the above resolutions, it was recommended by the Grand Lodge that the Grand Recorder receive voluntary donations for the purpose of procuring some appropriate and enduring memento for the widow of our deceased Brother, H. G. Oliver, Deputy Grand Master Workman.—EDS. WATCHMAN.]

KEYSTONE.—Reports from the Grand Lodge were promptly delivered by McCloud, Alden and Dewey. Bro. Eadon, M. W., invited the brethren to visit his (Temple) Lodge at Temescal, and a committee was appointed to arrange for Keystone's accepting the same in due time. At the last meeting interesting remarks were delivered by Bro. J. Q. Adams, of Yerba Buena Lodge, S. F. The brother was in attendance at the Masonic Hall dedication, Oakland, as S. W. of the Grand Lodge, F. & A. M.

NEWS from Turlock Lodge, No. 182, Stanislaus county, is to the effect that great interest is felt in the Order, and that the members show it by their attendance at each meeting. We hope that some of the brothers will keep us posted as to matters in connection with 182, by an occasional Lodge local.

LAKEPORT LODGE, No. 34, was instituted in May, 1878, and now numbers about 36 members. The family of one brother has reaped the benefits of membership, Mrs. Utting having received the $2,000 beneficiary in about 30 days after the death was reported. The families of Messrs. Ross and Mewhinney, whose tragic death has cast a gloom over the town and community, will soon receive the benefit of their foresight, both having been members in good standing. The initiation fee in Lakeport Lodge is $12, and the cost for the past year just $20, two assessments having been paid out of the general fund.

SIX deaths in the Supreme Lodge jurisdiction to be paid for in February, of which Ohio furnishes 3; Kentucky, 2, and Mississippi, 1.

Workmen Guarantee Fund Association.

INCORPORATED JANUARY 22d, 1880.

W. H. JORDAN, - - - - - PRESIDENT.
Past Grand Master A. O. U. W. of California.

ADMISSION FEE, $3.00. ANNUAL DUES, $2.00.

ENDORSED and has the BEST WISHES of the SUPREME MASTER WORKMAN OF THE UNITED STATES, as per letter on file.

ENDORSED and Recommended by Past Grand Master Clay W. Taylor, in the following letter:

OFFICE OF GRAND MASTER WORKMAN, A. O. U. W. OF CALIFORNIA,
SHASTA, CALIFORNIA, October 2d, 1880.

To the Officers and Members of the Workmen Guarantee Fund Association:

It affords me pleasure to say that the aims and objects of the "Workmen Guarantee Fund Association" meet with my most hearty approval and endorsement. As an auxiliary to the A. O. U. W of California, it is calculated to do great good, and I commend it to the favorable consideration of the members of our noble fraternity. Yours, fraternally,
CLAY W. TAYLOR, G. M. W. of California.

ENDORSED and Recommended by H. G. Pratt, Grand Recorder, one of the Directors of the Association.

ENDORSED and Recommended by C. H. Haile, Grand Receiver, also, one of the Directors of the Association.

ENDORSED and Recommended by Jordan, Brewer and Taylor, the Supreme Representatives of California to the Supreme Lodge of the United States, who are Officers and Members of the Association.

ENDORSED and Recommended by 128 Past Master Workmen who are Members of the Association and Representing 91 Lodges throughout the State.

ENDORSED by the Membership of nearly 900 of the most Influential and prominent members of the A. O. U. W. in Cal.

The principal object of this Association is to afford an additional protection of $1,000 to the families of deceased members of the Ancient Order of United Workmen, at the lowest possible cost. To become a member the applicant must be a Master Workman Degree member of the A. O. U. W., in good and regular standing in his Lodge. The admission fee includes the first assessment of one dollar, as provided by the Constitution, and which assessment is placed to the credit of the Guarantee Fund and cannot be diverted for any other purpose than the payment of death losses. This fund is kept guarded, and disbursed on the same principle as the Beneficiary Fund of the Ancient Order of United Workmen. Five dollars (which includes admission fee and dues for one year) must accompany the application, and if forwarded by Express or Post Office order, all expenses for such transmission must be paid by the applicant.

No Director of this Association receives any remunerafion for services rendered. There is no sinking fund, consequently the members have the benefit of every dollar received. There are no Lodge dues to pay or Lodge meetings to attend; there is no re-medical examination to be made only in exceptional cases, when, in the judgment of the Executive Committee, it is necessary.

The Directors are men of well known business integrity, and are among the most prominent members of the Order, each being a Past Master Workmen. The average costs of this additional protection, including assessments, will be about $8.00 per year, or less than 20 cents a week.

The sum for which this $1,000 can be secured, and the assurance that every obligation will be promptly and faithfully discharged, is the inducement offered to every member of the A. O. U. W. in good standing to apply at once for admission.

OFFICERS.

PRESIDENT, - - WM. H. JORDAN.	SECRETARY, - - - E. M. READING.
VICE-PRESIDENT, - - - P. VEASEY.	TREASURER, - - - - R. H. ORTON.

NEVADA.—Senator Jones naturally does not like the statement going the rounds of the press about the decadence of Nevada. He denies the assertions, and says: Nevada is in a prosperous condition. There is an impression in the East that our State government is so expensive that we think of abridging it and becoming a Territory again. This is not the case. Our people do not know that they have a government—that they have not felt it burdensome at all. Our system of taxation is such that the poor people do not feel the taxes. We are taxed according to our income. A mine is taxed for what it produces, so that it pays taxes on a part of its expenses, and comparatively speaking, the burden is not felt. In the East, taxes cannot be levied in that way, because there are too many rich men. In Nevada there are only a few rich men, and they cannot do much. Consequently, when a lode gives out like the Comstock, the revenue of the government falls off. Now, what, under such circumstances, does the Legislature do? It goes to work and cuts down salaries and expenses right and left, to make the liabilities less than the receipts. We have no debt, and our miners are doing well, there being no State or Territory in the Union where mining is carried on so scientifically and systematically as it is in Nevada. The idea that we desired to be annexed to California, or return to a Territorial government, is absurd.

SICK HEADACHE.—This complaint is the result of eating too much and exercising too little. Nine times in ten the cause is in the fact that the stomach was not able to digest the food last introduced into it, either from its having been unsuitable, or excessive in quantity. A diet of bread and butter, with ripe fruit or berries, with moderate and continuous exercise in the open air sufficient to keep up a gentle perspiration, would cure almost every case in a short time. Two teaspoonfuls of powdered charcoal in a half-glass of water, and drank, often gives instant relief. Sick headache with some persons comes on at regular intervals, and is a signal of distress which the stomach puts out to inform us that there is an over-alkaline condition of its fluids; that it needs a natural acid to restore the battery to its normal working condition. When the first symptoms of headache appear, take a teaspoonful of lemon juice clear, fifteen minutes before each meal, and the same dose at bedtime. Follow this up until all symptoms are past, taking no other remedies, and you will soon be able to go free from this unwelcome nuisance. Many will object to this because the remedy is too simple; but many cures have been effected in this way.

BANK COMMISSIONER COLEMAN has prepared an interesting comparative statement of the condition of the savings banks of the State, which shows that the deposits in institutions of that kind increased $1,512,080 during the six months ending December 31, 1880.

SPONTANEOUS COMBUSTION OF WOOD.—The *American Journal of Science* gives a remarkable instance of the spontaneous combustion of wood. A Mr. Adam Reigart, two years previous to the occurrence, received a piece of wood, supposed to be cedar, detached from a large piece dug up 39 ft. below the surface, near Lancaster, Penn. The piece weighed a few ounces, and it was broken in two and laid upon a white pine shelf in Mr. Reigart's counting room. About four days before the discovery of the fire he had occasion to wipe the dust from the shelf and from the piece of cedar, with a wet cloth. Three days after it was discovered that the piece of wood had ignited and combustion was proceeding so rapidly that in a few minutes the shelf would have been on fire. Probably another prolific source of our forest fires is to be sought in the liability of decayed wood, not only to spontaneous combustion, but from the direct rays of the sun. At Winchester, Conn., some years since some workmen, about 2 P. M., on August 5, discovered smoke arising from a barren upland. The sun was excessively hot at the time. When they went to seek the origin of the smoke they found that the remains of an old decayed hemlock log had burst into a blaze, and were burning fiercely.

RECORDER (to witness with bandaged head): "Did he have any provocation when he struck you?" Witness: "He may have had something of the kind concayled on the person, but it was a brick he struck me wid."

DANGER IN THE SLEEPING-ROOM.—In fighting that terrible enemy, sewer gas, it will not do to depend on the plumber. In sleeping-rooms the syphonage of the trap is the opening of the gate of death; and yet, strange to say, thousands of people hear nightly this death-rattle in their rooms, and do not know what it means. Now, if one can't have effective plumbing, the next best thing is to know what to do about it. As syphonage implies the breaking of the water-seal that acts as a barrier against the free admission of sewer gas, it is, first of all, important to know what traps are defective. When one hears a low, gurgling sound in the wash-basin, the time for action has come. Any noise beneath the wash-basin, at any hour of the day or night, when the water is not turned on, means death. The gurgling sound is caused by a draft of air down the escape-pipe, which breaks the water-seal. Of course the services of the best plumber should be had at once; but in the meantime fight the enemy. First turn on water and fill the trap. Then put in the plug, fill the basin half full of water, and with wax or soap seal up the overflow holes. Lower a window and let in the outer air. Until the sound of syphonage ceases, and you are absolutely certain that the trap can be relied on, stand guard over it. Keep the overflow holes sealed and the plug in, no matter at what risk of flooding lower rooms, in case some one is thoughtless enough to leave water turned on. If every family would act on these hints we would have less diphtheria.

EXPERIENCE WITH IMPERIAL EGG FOOD.—A. J. Lineback, of Calistoga, writes: I have used a six-lb. box of imperial egg food. I have about 250 hens, and when I began to feed it they were looking badly, and their combs were pale. Now their combs are a bright red, the fowls look hearty and healthy and have commenced to lay. I think it is an excellent preparation.

WE will sell for the next 60 days at our wholesale and retail hardware store, No. 28 New Montgomery St., under the Palace hotel, builders' materials, carpenters' tools, brushes, fine cutlery, parlor rifles, air guns and everything in our line at lower rates than ever. Call and examine my new stock and be convinced. Frank P. Latson, proprietor, was formerly with the late H. Rosekrans.

THE official summary of the Supreme Recorder for December gives the total membership of the A. O. U. W. at 91,402; total beneficiary money received, $114,672; disbursed, $115,885.

THE RECORDERS of all Subordinate Lodges are requested to correspond and act as agents in securing subscriptions for the WATCHMAN. We will pay liberal rates for services rendered. Remember, Brothers, that you can accomplish a mutual benefit to the Order and ourselves.

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Alameda Lodges.

A correspondent writes us as follows of the Alameda city Lodges. We hope to hear from him often:

We have in our small, but flourishing town of Alameda three Lodges of the A. O. U. W., composed of the best material in this grand jurisdiction. West End Lodge, No. 175, meets every Monday night in Holtz's Hall, on Webster St., and is composed of the best material in that end of town, and whose gentlemanly bearing and affableness toward visitors cannot but be appreciated by all Brothers who choose to visit them. Then we have Ashler Lodge, No. 165, that meets every Tuesday night in Odd Fellows' Hall, on Park St. This Lodge is commonly designated the high toned Lodge, but I can assure all members of the Order, who choose to visit Ashler, that that idea will soon vanish. It would be one of the impossibilities of this world for any one to entertain such a thought after visiting Ashler and enjoying the cordial reception which those genial gentlemen, composing the officers and members, earnestly desire to accord to all visitors favoring them with a call. And, by the way, this Lodge has taken a new departure in the order of business which I think would be well for all Lodges to adopt. After the usual routine of business has been transacted and good of the order passed, they open under what they call "High Jenks," which consists of music, singing, recitations and a general good time, cordially inviting all visitors to join with them, which cannot help but create a general good feeling throughout the entire Lodge and make all feel glad to think that he belongs to so noble an Order as the A. O. U. W., whose membership is composed of such material as there is in Ashler Lodge. And last, but not least, comes Alameda, No. 5, that meets on Wednesday night, in the same Hall as Ashler, and if it were possible for me to add anything to the eulogistic remarks on the two former Lodges I would willingly give them here in favor of Alameda No. 5, but I find it impos-

sible at this time. But I cannot refrain from informing you of something, I am exceedingly happy to say, I was an eye-witness to in Alameda, No. 5, on Wednesday night, the 16th inst., at their Lodge-room, and that was conferring the M. W. degree on a candidate, and in justice to the officers and for the good of the Order I hope you will give their names. Jno. Yablonsky, M. W.; Chs. Peterson, For; S. J. A. Forbes, Jr., O.; R. J. Cox, G. The degree was conferred by these officers for the first time without the use of the Ritual, and without a single break either in the written or unwritten work, and without any exceptions whatever the best I have ever seen it done; and I am one of the oldest members in this jurisdiction, and I have only heard one Brother outside of Bro. Yablonsky give the unwritten work so letter perfect, and that was D. G. M. W. Loud, who is the brightest on this coast, and should the foregoing meet his eye it would be good news to him, as I have yet to see the Brother so earnestly at work in his official capacity as Bro. Loud. There were three or four visitors present at the time, P. M. W., who expressed the unequalified opinion of the matter as being the best they had ever seen, and I think this Lodge is favorably thought of by the Grand Lodge, as I find C. H. Haile, the G. Receiver, the genial Recorder of Alameda, No. 5, and also the D. Deputy of this district, W. Sanderson, as Financier. By the way, this may account a little for the officers being so perfect in their work. In my next I will have visited San Leandro, No. 12, and Haywards, No. 18, both of which Lodges are very deserving of a very favorable recognition.

Bay City, 111.

EDITORS WATCHMAN:—The brethren at Eureka, Humboldt bay, had a pleasant reunion on the night of the 9th. After Lodge work was over, the doors were thrown open, and members and their wives and friends, to the number of over 100, joined in singing the opening ode. Then followed a two hours' programme of vocal and instrumental music, recitations, etc., in which some of the best musical talent of the place participated. At half past nine o'clock refreshments were served in the ante-rooms. The occasion was a very happy one, and judging from the general expression since Wednesday night, those who were present most thoroughly enjoyed the first Workmen's reunion in Eureka. It is very evident that occasional gatherings of this kind will not only bring the members of the Order and their families into closer relationship, but will more thoroughly disseminate a correct idea of the intent and workings of our cherished institution. As the times and general business outlook brighten, we expect a steady and healthy increase in the membership of Bay City Lodge, No. 111.—G.

Diamond Lodge.

No. 5, D. of H., was instituted at Hollister Friday evening, Feb. 18th, by W. H. Barnes, G. M. W., with 62 charter members. The following officers were installed: Mrs. W. F. Dalzell, P. W. S.; Mrs. R. M. Shackelford, W. S. of H.; Mrs. B. S. Rector, S. of H.; Mrs. J. C. Cochrane, S. of C.; Mrs. W. F. Ellis, Sec'y; Mrs. J. J. Burnett, Treasurer; Mrs. A. J. Craw, U. S.; J. C. Cochrane, I. W.; F. Sperber, O. W. The Lodge begins life under most favorable auspices.

San Francisco Lodge Locals.

Friendship, 179.

As indicated in our last issue, this young scion of our Order, under its present administration, is in a prosperous condition. The meeting on Feb. 16th was a very interesting one. There were four applications for the degrees, two received the J. W. and one the M. W. degree. The officers are well up in their duties, and on this evening gave the secret work nearly letter perfect. The unanimity and good feeling exhibited among the members is a noticeable feature in this Lodge. Their meetings are well attended and usually there are a large number of visitors. They now number 53 M. W., and expect to double their membership during this term.

Golden Gate, 8.

There is a marked increase of members in all the Lodges of this city. Golden Gate, which has supplied the material for many of our city Lodges until her numbers were depleted, has taken, as it were, a new lease. On Feb. 17th, there were four petitions for the degrees, and the M. W. degree was conferred on three. On this evening there was a goodly number present and an evident desire, as expressed by the members, to increase their numbers. Under the present administration we predict a large accession to their roll.

Harmony, 9.

Our brethren in Harmony are in the front in noble deeds and prosperity. On Feb. 18th, two petitions were received and the M. W. given to three. We think they can challange comparison with any of our Lodges in the manner in which degrees are conferred. In memory to their late Bro. Henry D. Neal, the Lodge was draped in mourning and resolutions of respect ordered published in the WATCHMAN. The report of the Reception Committee was presented by Bro. Decker. The amount of $30.90 due this Lodge was, on motion of L. J. Henry, P. M. W., and by a unanimous vote of the Lodge, donated to the General Relief Committee—a worthy example that we hope will be followed by every Lodge in the city. It was agreed to have a semi-annual entertainment in March, consisting of a literary musical and social, to end with a dance. Knowing the committee appointed we predict a very enjoyable affair. The M. W., Bro. J. J. Vanderlit, has proved himself thus far one of the best presiding officers who has had the honor of holding the gavel in this Lodge. After making several donations to distressed brethren there was an exchange of views given under the head "Good of the Order," and as a result we may expect a large increase in membership under this administration.

Noe Valley, 185.

Quite a pleasant time was had in Noe Valley Lodge on the evening of Feb. 22d. It was the usual monthly literary and social entertainment of the Lodge. The programme was opened by J. M. Davies, P. G. M. W. of Iowa. Bro. Davies spoke in his usual happy manner. Among other things, he said no secret society or kindred organization has paid as much since its formation as the A. O. U. W. Last year there was paid to the widows and orphans $1,010,000, and not a 10-cent piece had clung to any one's fingers in so doing. Then came a declamation by J. D. Thompson, M. W., on "Taste," which was tastefully delivered. Miss Mamie Souther, a bright little girl of about eight years, followed with a song, which was finely rendered, the audience testifying to their delight by loud applause, and demanding an encore. Master J. V. White, in a recitation, gave evidence of future promise. A piano solo, by Mrs. Dr. McDermott, was given with great delicacy and precision of touch, and secured an encore. Miss Minnie Axford, a young lady of 10 years, recited "King Leopold and the Stone" very well indeed. A song, "The Vesper Bell," was then given by Mr. J. C. Scott. Recitation, "I am not Mad," by Addie Harris, a bright miss of 10 years, was extremely well done. E. H. Watson then sang a song, and for an encore recited the "Seven Ages of Man." He was followed in a recitation entitled "All is for the Best," by Miss Edith Moses, aged seven years. A duet on the piano, by Misses Sara Welbon and Flora Jordan, was very highly applauded, and secured an encore. Recitation, Miss Mathilda Danenfeltzer. Song, Master Walter Axford, five years old, which was highly applauded and encored. Song, by the two young Misses Madsen, accompanied by Master Joseph Madsen on the accordeon. Recitation, Miss Mamie Madsen. This was followed by something novel, being a song by the three young Misses Danenfeltzer, assisted by their grandmother, and accompanied on the piano by Miss Sara Welbon. The effort was highly applauded, and received an encore. Reading, "Patience Mary Jones," D. V. Thompson. An imitation of a German song, entitled "Mr. Casey, Don't you Want to Buy a Purp?" by Mr. O. Bailey, was excessively funny, and as an encore he gave "Tim Finegan," and was called out again. Solo on the accordeon, Mr. E. Stanley. Recitation, "Lend a Hand to Another," Nellie Sawyer, a Miss of six years. Song, "Baby at Our House," by little Miss Florence Judson. Then came the finest thing of the evening, a song by Charles Madsen and the two young Misses Madsen. After the exercises, dancing was indulged in. The brethren of Noe Valley are to be congratulated upon the variety and excellence of their entertainments. The performers all done exceedingly well, and no doubt the next social will enhance the prestige which this and the previous one has conferred on this Lodge.

Olympic, 127.

This Lodge though not possessing as large a membership as some of our city Lodges, is nevertheless composed of as fine material as any subordinate in the city. The first thought with each and every member in proposing candidates for membership is, does he come up to the qualifications necessary to make a true Workman. This care is carried to such an extent that we believe that there has been but one rejection for membership since the Lodge was instituted. The result of this is perceptible in the material of the Lodge—not only in the physical appearance, but in the mental capacity and hearty good feeling which the brothers in their intercourse with each other exhibit. In order to show the classes from which the Lodge draws its members, we will briefly enumerate the callings in which the different officers are engaged. The wholesale provision trade finds in Master Workman Rossbach a representative; wholesale grocery, Bro. Morgan, sitting P. M. W.; cigar manufacturer, Bro. Dixon, P. M. W., and Bro. Dunlap, P. M. W. is also engaged in the trade; journalism, Bro. Fish, For.; merchant tailor, Bro. Holland, Rvr; insurance, Col. Orton, the efficient Recorder of the Lodge. We have often thought that if Olympic Lodge should resolve itself into a military company and place the gallant Colonel at its head, what a sensation would be caused at review times by their military appearance, and the intelligence with which they went through the manual of arms. We have endeavored to show the business pursuits of the members for the purpose of letting those who wish to join a Workman Lodge have some idea of the company they will associate with. A congeniality of interests and tastes is a prime factor in the successful administration of any Lodge affairs. The membership of Olympic is composed of some of our leading professional and business men, the officers perform their duties with promptness and dispatch; and, taking everything together, we can say if anybody wants to join a crack Lodge, let them send in their application to Olympic, 127.

Sts. John, 73.

The steady increase in membership in our city Lodges is not made an exception in Sts. John. On every evening one or more are initiated or receive the M. W. degree. As a rule, there is not as large an attendance in proportion to membership as most of the other Lodges of our city. On Feb. 17th, there was a goodly number present, and the work was given in the M. W. degree in an unexceptionable manner. This Lodge has now over 150 members, and the interest evinced by the officers and members warrants us in expecting a notable increase the present term. While the attendance at their meetings is not as large as it ought to be, yet there is one redeeming feature connected therewith, viz., no brother has ever been suspended for nonpayment of dues or otherwise.

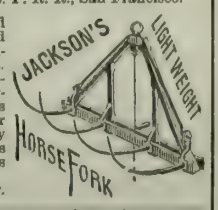
Triumph, 180.

There is no abatement in the interest taken and progress made in this young Lodge. On Tuesday evening, February 15th, one petition for the degrees was read, and the M. W. was conferred on two. The work was well done, and the new officers are deserving of credit for the proficiency in their several duties. On this evening there was a good attendance, although a rainy night. One of the grandest features of our Order was practically exemplified. Bro. Campbell, of this Lodge, a husband and father, was taken sick with a mild type of dementia, and is now at the Napa Insane Asylum. His family are looked after, assessments paid by this Lodge, and visits regularly made to Napa by the members. Everything is done that can be done to ameliorate his condition.

Oakland.

The following are some of the best business firms of Oakland. Readers wishing anything that they advertise, would do well to call u on them.

LUTZ & BERG,
Window Cornices,
MANTEL MIRRORS, PORTRAIT FRAMES,
OIL PAINTINGS AND ENGRAVINGS.
1058 Broadway, Oakland.
Reguilding Equal to New. Ceiling Moldings put up.



PLOMTEAUX & RALLS,
Dentists.
408 Thirteenth St., be Broadway and Franklin, Oakland.

INGERSOLL,
Photographer,
STUDIO: 1069 BROADWAY, Cor. 12th, OAKLAND.
All styles of Pictures known to the Art executed in the best style. Children's Portraits a specialty.

J. MEYERS,
Boy's Clothing Ready Made and Merchant Tailoring.
1065 Broadway, Between 11th and 12th St
OAKLAND, CAL.

A. CORNWALL,
DENTIST,
1069 Broadway, Oakland, Cal.

C. J. Periam,

LOCK EXPERT AND MACHINIST.

All kinds of Safe and Bank Locks Opened, Cleaned and Repaired. Combination Locks a Specialty. No. 318 MISSION STREET, S. F.

The Isthmus Ship Railway.

Capt. Eads is a good persuader. His remarkable scheme of a ship railway across the Isthmus of Tehuantepec is taking a tangible shape. The Mexican Government has made a very liberal concession, giving him the right to construct a railway on such line as he may select, the work to be commenced within two years and completed within 12 years. He is allowed to charge $5 per cubic meter of the displacement of each vessel transported; also $15 for each passenger on the ship, and 1% on the value of coins or precious stones carried. The Government also gives him a subsidy equal to 1,000,000 acres of public lands, and makes other liberal concessions. While this will go but a little way toward the estimated cost of $75,000,000, it will doubtless assist Capt. Eads in raising money in the United States. He desires to have our Government guarantee 6% dividends on $50,000,000 of the stock of the company in consideration of free transportation of Government ships, officers and soldiers, and the benefit which the proposed road will be to our commerce. This, however, will be difficult to obtain. The projected road is, if built, to be about 112 miles in length, while the proposed Panama canal will be 45 miles long; but the Tehuantepec route will save about 1,500 miles between New York and San Francisco over the Panama route, while the distance from the mouths of the Mississippi to California by Tehuantepec is 2,300 miles less than by Panama. The Panama canal and the ship railway are fairly in the lists as competitors, while the Nicaragua canal scheme is also being urged, and if all are completed, it will be all the better for the country.

TEMPERED GLASS.—Tempered glass can be tempered in great pieces, gifted with a power of resistance, of which its specific lightness, compared with heavy metals, would not have given the least presumption. It can now be employed, notably in carpentry, for posts, joists, ties and buttresses. It combines the advantages of strength and of incorruptibility, in contact with all atmospheric agents, as well as with chemical factors, and consequently is of perpetual duration. Besides these advantages another is the smallness in the price of acquisition. This material is now as cheap as iron of the same weight, and as a large sale is counted on, it will not be long before the reduction of price will be below the cost of wood. No doubt many industries will profit from this new progress in the fabrication of glass, and it will be greatly appreciated in the household. One will see the time when the metals and wood will be replaced by glass, in a great number of implements, utensils, and objects of diverse nature, such as stop-cocks, gutter-spouts, buckets, and even barrels.

The Color Relation of Metals.

In a paper on the color relation of metals, and notably on those of copper, nickel, cobalt, iron, manganese and chromium, lately read before the Chemical Society, Mr. T. Bayley records some remarkable relations between solutions of these metals. It appears that iron, cobalt and copper form a natural color group, for, if solutions of their sulphates are mixed together in the proportions of twenty parts of copper, seven of iron and six of cobalt, the resulting liquid is free from color, but is gray and partially opaque. It follows from this that a mixture of any two of these elements is complementary to the third, if the above portions are maintained. Thus, a solution of cobalt (pink) is complementary to a mixture of iron and copper (bluish green), a solution of iron (yellow) to a mixture of copper and cobalt (violet), and a solution of copper (blue) to a mixture of iron and cobalt (red). But, as Mr. Bayley shows, a solution of copper is exactly complementary to the red reflection from copper, and a polished plate of this metal, viewed through a solution of copper salt of a certain thickness, is silver white. As a further consequence, it follows that a mixture of iron (seven parts) and cobalt (six parts) is identical in color with a plate of copper. The resemblance is so striking that a silver or platinum vessel covered to the proper depth with such a solution is indistinguishable from copper. There is a curious fact regarding nickel also worthy of attention. This metal forms solutions which can be exactly simulated by a mixture of iron and copper solutions; but this mixture contains more iron than that which is complementary to cobalt. Nickel solutions are almost complementary to cobalt solutions, but they transmit an excess of yellow light. Now, the atomic weight of nickel is very nearly the mean of the atomic weight of iron or copper, but it is a little lower—that is, nearer to iron. There is thus a perfect analogy between the atomic weights and the color properties in this case. This analogy is even more general, for Mr. Bayley states that in the case of iron, cobalt and copper, the mean wave length of the light absorbed is proportional to the atomic weight. The specific chromatic power of the metals varies, being least for copper. The specific chromatic power increases with the affinity of the metal for oxygen. Chromium forms three kinds of salts—pink salts, identical in color with the cobalt salts; blue salts, identical in color with copper salts; and green salts, complementary to the red salts. Manganese, in like manner, forms more than one kind of salt. The red salts of manganese are identical in color with the cobalt salts and with the red chromium salts. The salts of chromium and manganese, according to the author, are with difficulty attainable in a state of chromatic purity. He thinks these properties of the metals lead up to some very interesting considerations.

Niagara in Winter.

The view of Niagara which we herewith present is a most accurate and excellent one, and represents the falls as they appear on a pleasant winter's day. A writer in the current number of *Scribner's* deals with the music of Niagara. There is a sound of grandeur to the fall of the waters. The reverberations, broken, modified and reflected by the ice masses which hem them about, rings out on the frosty air with a musical clamor, at times soft-keyed and melodious, like the distant sound of heavy bells. If there is music at Niagara, it is surely during the winter season.

It is stated by those who have visited this mighty cataract, that the present winter has been the severest in the vicinity of Niagara for 33 years. The falls have been seen with ice bridges, mounds and figures, but never anything like it presented the present season. The reason for this has been that the wind has been always up stream and the spray has been spattered here and there over tree, house and boulder. The trees and shrubs are so thickly coated with ice as to present a statuesque appearance. All the graces, nymphs and heroes of antiquity are here reproduced on ice. It needs but little play of the imagination to pick out the figures. The river shore appears like a pastoral scene filled with flocks. Round-backed and fleecy, those ice sheep rest upon the margin of the swift-moving stream, and here and there among them ice figures of men in morions and attendants with crook and stave. At other places on the river are glaciers, round like haystacks, others irregular and riven. Some are white and snow covered, others are of crystalline ice and congealed snow, with masses of dependent icicles. The ice that comes over the falls is broken into bits, and sweeps down the river in diminutive drifts and panoramic lines, much like foam flecks that fill the surface on a still day in summer.

It is not every year that Niagara presents such a weird and picturesque appearance as it did the last winter. The season has been one of exceptional severity eastward of the Rocky mountains. If Niagara were located in California it would lose much of attractiveness in winter, as our genial climate affords poor chance for the formation of ice into fantastic figures, such as we have described. While we have not a Niagara to draw the tourist hither, Nature has showered her benefactions in other ways, and within the borders of our State are many rare and beautiful sights that well repay a visit.

A WINTER'S VIEW OF NIAGARA FALLS.

THERE is considerable interest manifested in the Degree of Honor in this State. The Lodges recently instituted at Hollister and San Jose had a combined membership of over 150. It is the intention to also institute a new Lodge in Oregon.

ST. JOHN LODGE, No. 73, will meet hereafter in Shiels' building, 32 O'Farrell, Charity hall.

WE have an item in another part of the paper stating that the Lodges of Butte county are preparing for their annual May-day picnic. We hope Lodges in all parts of the country will unite, and follow this example. If the Lodge is not large enough to give one on its own account, it can unite with neighboring Lodges, and some central point in the county chosen for the purpose of a grand re-union. The members with their wives and families are thus brought into personal relations with each other, and a feeling is generated which will greatly inure to the benefit of the Order. The Order is also brought more prominently before the general public, and the result will be an increased membership in the Lodges. California is at her loveliest in the spring-time, and we therefore urge upon the brothers in the towns and cities to make arrangements for the enjoyment of nature's gifts.

WE received a pleasant visit from Bros. H. N. Tracy and J. W. Dench, of El Dorado Lodge, No. 118, Placerville. They report their Lodge in a flourishing condition, with a gradual increase in the membership from the leading citizens of the town. They now number 40, with several applications.

"If You Help Me, Why Shouldn't I Help You?"

In an argument between two Workmen recently, on the perpetuity and probable future of our Order, one of them impulsively remarked: "If you help me, why shouldn't I help you?" That this is the main spring or corner stone of our noble structure, so to speak, will hardly admit of serious denial by anyone who understands our principles. To elevate each other socially and morally, and provide for our loved ones a sure and safe retreat when death has taken the husband or father to the other side, is a help that impresses us with a deep significance. While charity is a practical watch-word in our Order, it is not that pinched construction of giving alms stintingly as to a beggar, but on that higher and broader plane of "helping a brother to help himself;" and the widow or orphan as the recipients of our princely benefactions receive rolls of $20 pieces as a [illegible] paid with- [illegible] tion of even ask- [illegible]

Impractical humanitarians may criticize our partiality in confining charities to our own membership as being selfish and exclusive. We accept the soft impeachment, and commend our action as worthy of imitation. Throughout this great commonwealth, ramifying town, city and country, the men who are worthy and well qualified may enter the portals of our doors and enjoy our protection. The debased sluggard, improvident wretch, or thoughtless ninny, is not in a condition to enjoy this progressive policy. Reciprocity being a cardinal feature of our Order, our obligations mean substantial and princely benefits to our family, and a corresponding responsibility to every brother Workman's family. The bright page in our history will grow brighter and the perpetuity of our Order be assured on this principle—"If you help me, why shouldn't I help you?"

F. G. BEATTY, G. F., was in this city this week on business.

Home Miscellany.

"The Name of Mother."

There are words that speak of a quenchless love
Which burns in the hearts we cherish,
And accents that tell of a friendship that proved,
And will never blight or perish.
There are soft words murmured by dear, dear lips,
Far richer than any other;
But the sweetest words that the ear hath heard,
Is the blessed name of Mother.

Oh, magical word! may it never die
From the lips that love to speak it,
Nor melt away from the trusting hearts
That ever would break to keep it.
Was there ever a name that lived like this?
Will there ever be such another?
The angels have reared in Heaven a shrine
For the holy name of Mother.

One Stormy Night.

A stormy night, indeed,
"High up on the lonely mountains;"

the rain came down in streams, as if the sky were a great sieve, and not a ray of light found its way through the black clouds. The giant fir trees bent and swayed in the fierce wind, and sent their wild, wailing voices down through gulch and canyon to mingle with the roar of creek and cataract, or fell before the rocks that crashed down the mountains' sides. The terrified cattle lowed and cried in their corrals, huddling together for warmth and sympathy. Indoors, people drew near together, crowding around the hearth-fires that blazed in a fitful, almost uncanny way.

In a wayside inn on the mountain road, a little company sat thus gathered about an immense fire-place that glowed and flamed like a bonfire, and, not content with cheering the great room, sent its beacon light out at the windows to defy the night and the storm.

There was Mike Malone, the landlord, and Kitty, his fat, funny wife; little Maria, the Spanish girl whom Mike and Kitty had "rared;" Jake, the stable man, and last, because most important, "Bat," the French Canadian woodcutter. There was nothing in the young fellow's appearance to suggest the winged horror whose name he bore. It was merely a soubriquet for Baptiste. Jake seldom availed himself of the abbreviation, but slowly and emphatically styled him "Canuck," usually prefixing a descriptive that had more force than elegance.

It was ill-natured, to say the least, for Bat was one of the kindest fellows in the world, "and the ways of him," as Kitty said "was wan sthrame o' sunshine; but sure," she added, "Jake is that jealous that he can't thrate him dacent, though I'd sooner see Maree quiet in her grave nor married to the likes av him. Av she's in love wid the Frinchman? There ye have me now. She's that quare and shy, Maree is, that ye niver can tell her mind till she plazes to let ye know, and on this subject she hasn't plased yit."

And that was quite true, for when Bat's blue eyes, sparkling with fun and deep with the light of love, beamed upon the little dark-eyed beauty, her long lashes swept her cheeks; sometimes not until the quick eyes of Jake had seen the outspringing of an answering love, though not all Bat's gallant wooing could bring a word of it to her lips—silent, cautious little Maria, who doubted the gay manners of this rollicking knight of the ax.

"Did ever yees listen to the loike o' that?" exclaimed Mike, at a sudden crashing sound.

Kitty and Bat crossed themselves fervently, but Jake, with unmoved, sullen face, sat and glowered at the fire. Suddenly Maria sprang up, excitedly:

"It is a voice!" she cried.

"Indade, thin, it's the voice of manny wathers," laughed Kitty, though rather nervously.

"It is a human voice; it is calling for help."

"By golly, it's de debble den," said Bat. "Dat's nobody helse'll be on de road such a night like dat. I'll bet he's call for Jake," he added roguishly.

A deeper glower was Jake's only reply, but soon, lifting his head, he said:

"She's right, Maree is; ther is some one callin'."

"Out wid yees, men, till the riscue!" cried Kitty, seizing Mike's hat and coat and thrusting them upon him.

"Sure ye're spakin'," said Mike, ruefully preparing to leave the cheery hearth.

Bat, aroused by the light in Maria's flashing eyes, sprang up with enthusiasm, for, low be it spoken, his was not a grand heroic soul. His brave deeds were mostly born of impulse and nourished by the approbation of others.

Jake sullenly joined them, but before they reached the door it opened, and full in the fire-light appeared a tall form, and handsome, yellow-bearded face—a striking picture, with the dark night for a background.

"By me sowl, it's the Docther. In the name o' the owld divil, who brings ye out in the loike o' this?"

"I don't go abroad in the devil's name, Mike," laughed the Doctor, making his way to the fire, and taking the chair that Kitty had hastened to place for him.

"No more ye don't Docther; it's Hiven's own sarvent ye are," she said earnestly. Bestir yerself, Mike, and bring him somethin' hot to drink, for indade, Docther, ye're the color of a ghost."

"I've had a pretty tough time to get here, and a few minutes ago I was more likely to arrive at the bottom of the gulch, where my poor horse is now."

The Doctor's voice trembled, and his eyes were wet with not unmanly tears, for, as the little company well knew, the horse was a pet and a beauty.

"Ah, woe's the night!" wailed Kitty. "Ye'll niver find a betther baste nor a handsomer wan—and so proud he samed to bear ye, the poor faithful crature!"

"Yes, we've pulled through many a tough place together, and he never flinched nor failed me. The almost human cry he gave when he went down that horrible place will ring in my ears as long as I live," said the Doctor, shuddering. "But who's going to show me the way to Fraser's? There's a trail over the mountain, isn't there?"

"Begarry, there was wan," said Mike, with great hesitation, "but a very divil of a way ye'll foind it now—the traas do be crackin' and fallin' and the rocks a-rowlin' down in jest an infarnal manner. It's as much as yer loife is worth to ye to get there."

"And who's ailin' over there, annyway?" asked Kitty.

"I think it's the baby. Some one left word at my office that they feared one of Fraser's children was dying."

"Durned if I'll risk my neck fur one of Fraser's kids," said Jake, emphatically, going back to his seat by the fire.

"No great risk, thin," retorted Kitty. "Thim as is born to be hanged 'll niver be dhrowned."

"An' sure," said Mike, glancing at Kitty, "I'm thinking we're as safe outside as in afther this. We're in for it, annyhow; but danged if I'm anxious to drag my owld rheumaticky legs over anny trail to-night."

The Doctor looked at Bat. Maria, too, had looked at him, and that look had fired his soul with the courage of an old warrior, whatever the risk or the terror.

"Le ciel est le prix," thought Bat, thrilling beneath that look.

"Well, a guess a know dat way pretty well, an' if hany ting is happen I got de Doctor, ain't it?" said Bat, gaily brushing back his brown curls, and drawing over them the veritable blue *togue* that he had worn in the backwoods of Canada.

Then, in his droll way, he took solemn leave of Kitty and Mike, imploring them, if anything should prevent his return, to be good to Jake. Over Maria's little brown hand he lingered long enough to say unheard by all but her:

"I come again to thee—je t'aime."

And in a language understood by all, the dark eyes answered:

"I love thee."

And in a language known and taught by the Father of Evil, sullen Jake replied to his laughing, "Good-bye, my Jake—pray for me," with a look of hatred and a sullen, "Go to hell!"

"Behind you, my dear," answered Bat, with a profound bow.

Out into the black and terrible night went the two men—one obeying the mandate of his noble profession, filled with the sympathy it had taught him to give to sorrow and suffering everywhere; the other, his heart glowing with chivalric passion, to prove himself a hero in the eyes of her he loved—followed by the voluble thanks of Mike and Kitty, by the half proud, half anxious, and altogether loving, gaze of Maria, and also by the malignant glare of Jake's evil eyes.

"And Satan came also," thought the Doctor, observing the look.

Maria, too, turned in time to see the expression. It was just as Mike was telling them to look out for the bridge over Fraser's creek.

Then the door closed, and while the wind and the rain beat furiously against it, and Mike and Kitty speculated anxiously upon the chances of their safe arrival at Fraser's, Maria studied Jake's face as he gazed intently in the fire, where, from a pine knot, the lurid jets of flame darted out and leaped wildly up the black vault, as if eager to join their kindred spirits in the storm.

Suddenly Jake arose, and, muttering something in the way of a good-night, slouched out of the room. Maria, too, went softly out, retiring to her own apartment.

Meanwhile, safely on their way, through wind and rain and thick darkness, over fallen trees and raging waters, went the two men, Bat's jubilant heart overflowing in droll speeches, and songs that he sang at the top of his voice to scare away evil spirits, he said—and the doctor said he should think it would. But it did not, for behind them crept one whose intent was blacker than the night, more cruel than the angry streams.

Yet on they went along the narrow path, with the overhanging rocks on their right, and on their left, the fearful precipice; yet gaily onward, with cautious steps, until they reached the cottage, whose light shown out like a star in the black night.

"By golly, we've got here, don't it?" said Bat, drawing a long breath, as they paused at the door.

Is there anything, I wonder, that stirs a physician's heart more deeply than that look of mingled thankfulness and mute appeal, that greets him on his first arrival where life and death are struggling together?

"God bless you!" cried Fraser, who, alone with his wife, was watching the little one that lay flushed with fever, and moaning with pain. "God bless you, Doctor—we didn't think you could get here."

"There's a special providence for doctors, you know," he answered, smiling.

The mere sound of his pleasant voice seemed to give them courage, and the mother, with a gleam of hope in her eyes, and a deep sigh of relief, laid her baby in his arms, that clasped and bore the tiny burden with the tenderness of a woman. When a man has a gentle heart, tender not merely toward his own, but with a sympathy that reaches to all helpless, suffering creatures, how great it is!

"I was t'inkin'," said Bat, gravely, "bo't dat providence you been spikin' abo't, why it ain't take care of Doctor's horses de same time."

After the Doctor and Bat had crossed Fraser's creek, the stealthy figure that had followed them thus far, with something in his hand, stopped, cowering under a fir tree, till the gleam of their lantern was like a firefly in the distance; then he approached the bridge, and, with eyes grown accustomed to the darkness, examined the end that lay upon the bank. He could see sufficiently well for his purpose, which was soon apparent, for, taking up his pick, he commenced digging into the bank and displacing the rocks, working with a fiendish energy.

"Curse him," he said between his teeth, "I fix him so that no doctor can't save him!"

And so, with muttered curses, with the hoarse, bellowing torrent beneath, and the shrieking pines above, the work was done, and the timber left in such position that one attempting to cross upon it would cause its fall. It was horrible to think of—plunged into that hell of waters and whirling debris, to be dashed against the sharp rocks or carried swiftly down the dark ravine to a death as sure and cruel if not as sudden.

"There, you infernal Canuck," said the man, "you bet you've done your last love-makin'. I'll take that little business off your hands," he added, with an ugly laugh.

"But first you'd better repair that bridge."

It was Maria, with her lantern suddenly turned full upon him.

He uttered one fearful oath, and shrank trembling like a coward that he was before the girl's gleaming eyes, as she held her light aloft.

"I know what you have been doing, and what it is for. Now, go to work and make it safe again."

"I'll be damned if I do," growled Jake.

The only answer was the click of a revolver that the little firm hand held steadily enough. She knew how to use it; Jake was well aware of that. More than once he had seen her bring down her game, with a skill that many an old hunter might envy.

"If this fails, I have something else at my belt. Do as I tell you, or I will kill you as I would a wild beast that threatened me."

"She'd do it, the little Spanish devil."

"I'm tempted to do it now"—click. "Oh, how quickly I could send you down there where you meant to send *him*. I can hardly keep from doing it, I hate you so; but I'd scorn to have such dirty blood on my hands. Now, go to work."

Stung through and through with her contempt, cowed and unnerved by the threats that he knew were not idle ones, Jake set about the work, and it was soon completed.

"Now go home!" she said sternly.

There was no choice but to obey, and, still under cover of the girl's revolver, he went before her like a sulky convict driven to his cell.

"I'll release you in the morning," she said, as she drove him into a snug out-building, and, fastening the door securely, left him to his meditations.

The rain had ceased. Up through the green canyons floated the mists of the morning. Tinged with rosy light, they sailed away through the blue ether. Up rose the sun, shining grandly on the mountains, and through those floods of gold came the Doctor, and Bat caroling his gay song, proud as a troubadour home from the war, going to kneel at his lady's feet.

"By golly, we're save dat baby," he cried, springing through the open door. "And how is Jake? A bet he's ben most sick of lonesome widout me. Eh, where is he, dat Ja-k-e?" he shouted.

But Jake did not appear.

"And then, Marie, my little one," he murmured in his own language, that she had learned in childhood, "hast thou no smile for me? Those beautiful eyes, have they nothing to say to me this morning? They were so eloquent last night, my heart was aching with joy. Look at me Marie—but thou art pale. Wert thou troubled for me, my little love?"

Swiftly the color rose to cheek and brow, slowly the long lashes were uplifted, and from dewy eyes and parted, rosy lips smiled the glad welcome home. Jake, just then appearing at the door, saw it all, and with a stifled groan of jealous passion and defeat, he turned and fled, half blind with rage, he knew not where—to get away from that maddening sight, that was all his thought—away to the caves of the mountains where he could crouch like a wounded wolf and howl out his despair.

Crash! down through the treacherous bridge of poles and bark! Down, down the shuddering depths he whirled, and the stream, scorning to bear such a burden, hurled him aside upon the jagged rocks, where the long ferns trailed their broken plumes and the ivy wound its poisonous bands.

"They'll never find me," he thought, "but it's right—its just. It's what I was goin' to do to him, curse—no, I can't die cursin'," and, with bleeding, untaught lips, he tried to pray. "O Lord, I dont know how!" he whispered faintly. "But didn't he say forgive? What was it mother used to make me say? 'If I should die—my soul to take—Jesus'—sake.'"

His head drooped lower, his lips were still. The water swept across his breast, the long ferns, waving, brushed his bleeding hands, and through the laurel branches the sunshine fell upon his ghastly face.

"Jake, my poor feller, look—hope you heyes—you ain't dead, don't it? *Sapre*, wake up, *mon ga*," cried Bat in an agony of terror and compassion, as with trembling hands he dashed the water in his face and rubbed his hands, and from Jakes' pocket flask poured whisky down his throat. At last Jake slowly unclosed his eyes and feebly moved his lips.

"Dat's right, by golly, swear if you want to, but keep your heyes hopen; dat'll scare de debble when dey're shut. Now, how you tink I'll got you hout of dis? Here, embrace me, *mon cher;* put you harms ron ma neck, *comme ca—ho donc!* You are more heavy dan a blackoak log, but keep to me—now, hup we go. Dere," laying his burden safely on the bank, "you better bath yourself in de stable next time, young feller."

But Jake had fainted again, and Bat ran to the house for help.

"Yes, I meant to kill you, Bat, as true as you live," said Jake, in his first penitence. "I'm sorry now, for you're a brick, and you deserve the girl; but I couldn't stay round, and see her smilin' like that on no man, not if he'd saved my life a hundred times; I might be tempted agin; it's in my nater, Bat. I'm a mean cuss, that's a fact; but as soon as I'm on my pins agin, I'll git."

And he did. And Maria and Bat were married one day when Father Sheridan came to celebrate mass in the little mountain chapel. The pines and the waterfalls played the wedding march; and if the trees could not quite banish the mourning from their voices—there is a little that is sad in everything; but the happy lovers heard only sounds of joy.

The Doctor was there to kiss the bride, Baby Fraser, cooing and crowing and waving her dimpled hands, and Mike and Kitty, all tearful and smiling and eloquent with Irish words of blessing and endearment.

But to this day, Bat cannot comprehend Jake's malice, and says with puzzled look, "I'll never tought he'll done dat proppus."—*Julia H. S. Bugeia in February Californian.*

The Value of What is Left.

There always is something left. The tornado passes, and it is said only desolation remains. But it is not true. There are fragments left; there are foundations left; there are walls left; the solid earth remains; there are living people left; there remain all the conditions out of which the wrecked village may be rebuilded and repeopled. Reverses strip us of capital, of estate, of home. We say, "there is nothing left." But it is not true; there is always something. We have some clothing, we have some bread; we have some friends; we have some health and strength and individual capacity; we have indestructible resources within us; there are some opportunities left; there are infinite possibilities left. Above is the immutable heaven, beneath the stable globe; the divine providence is not missing, the divine love is not diminished. Out of the ruins of every autumn are made ready the sproutings of very spring. The winter lies cold and black between; and from December to March, "The winter alone is king," we say, but it is not true. There is no king but God; there is no sovereignty but His; there is no power that does not serve Him, absolutely and utterly. He it is who divides the year into its four various parts, and sets these parts together mosaic-wise, to make perfect beauty. He it is who rejoices not less in all the beauties of the black and bleak and freezing weather, than in the beauties of the spring and summer and autumn weather, which are easier to us. If we were but strong enough, we could stand up beside Him, and rejoice in all that rejoices Him. Winter is fearful only to those whom it can pinch and cripple and crush. He who can defy its rigors hears only music in all its blasts, sees only beauty in all its snows; toys with its terrors as a mother tigress with her cubs, and fears not because there is no reason to fear.

ADVICE TO PARENTS.—Be ever gentle with the children God has given to you; watch them constantly; reprove them earnestly but not in anger. In the forcible language of Scripture, "Be not bitter against them." "Yes, they are good boys," I once heard a kind father say. "I talk to them pretty much, but I do not like to beat my children — the world will beat them." It is a beautiful thought though not elegantly expressed. Yes, there is not one child in the circle round the table, healthy and happy as they look now, on whose head, if long spared, the storm will not beat. Adversity may wither them, sickness fade, a cold world frown on them; but, amid all, let memory carry them back to a home where a law of kindness reigned, where the mother's reproving eye was moistened with a tear, and the father frowned "more in sorrow than in anger." —*Mason.*

A GARCON and a Provencal bragged to each other of the fertility of their respective countries. "At Bordeaux," said one, "if you happen to drop a match in a field, the next year you will have there a pine forest." "At Marseilles," cried the other, "if you drop a suspender buckle, eight days after, you will have there a pair of ready made trousers."

For our Boys and Girls.

Our Puzzle Box.

Cross-Word Enigma.

My first is in man, but not in boy;
My second is in sadness, but not in joy;
My third is in bought, but not in sold;
My fourth is in young; but not in old;
My fifth is in tobacco, but not in snuff;
My sixth is in white, but not in buff;
My seventh is in apple, but not in plum;
My eighth is in brandy, but not in rum;
My ninth is in pudding, but not in pie;
My tenth is in bee, but not in fly;
My eleventh is in crazy, but not in sane;
My twelfth is in hazy, but not in rain;
My thirteenth is in hate, but not in love;
My fourteenth is in Robin, but not in dove;
My whole was a king of ancient time.

DICK N. S.

Initial Changes.

Change the initial of a vehicle as many times and form in succession :

1. An ancient weapon of war.
2. A quadruped.
3. A center of trade.
4. A portion
5. Slightly acid.
6. A fleshy protuberance.

O. G.

Decapitations.

1. Behead a young lady and leave to assist.
2. Behead earth and leave circular.
3. Behead a bird and leave a riot.
4. Behead an article of furniture and leave to fasten.

AUNT HANNAH.

Arithmorems.

1. 1 1 1 1 co—names what southern city, the capital of a great nation?
2. 6 0 0 0—names what fish?
3. 5 5 1 rean—names what country?
4. 1 0 5 0 iton—names what great poet?
5. 1 1 5 0 sauey—names what great English historian?
6. 1 5 0 0 aas—names what American taking an important part in the early history of the Republic?
7. 1 0 0 4 sssspp—names what great western river?
8. 5 1 on—names what African beast?
9. 5 1 unet—names what bird!

Be Kind to your Sister.

I would to Heaven that *every* young man who has a sister, might read this article, and be led to self-examination by it; and if he find that this applies to him, may he let it apply no longer. Yes, if the coat fit him, wear it only long enough to try it on; then cast it forever from him!

The neglect and abuse that sisters, uncomplainingly, receive from brothers cause many a dart of pain to pierce their gentle hearts. And this, too, from brothers who, in reality, love them dearly. It is not the lack of affection, but rather the lack of appreciation, and the possession of too much self-esteem, that cause them to heap such indignities on their devoted sisters. They think it nothing, and would feel highly insulted if any one should intimate they were in anyway ungentlemanly. Yet, the sister's confiding heart has received a cruel stab, and the delicate tendrils, which love is ever ready to extend and entwine about its object, are weakened.

By far too many "big brothers" treat their sisters with less civility than a true gentleman would a servant. A "big brother" rushes in from his work, or more likely from loafing around some street corner, blacksmith shop, or saloon, and in a petulant voice, commands Mary to get, and brush his "other" coat; he orders Annie to "hurry up" and get him a clean handkerchief, and calls her a little "fool," or "laziness," because she neglected to scent it. Everything must be dropped at once, that his "bigness" may be fixed up. In compliance with a growl, Mary nearly presses the blood out of her fingers buttoning his collar or cuffs. If she venture to ask him where he is going in such a hurry, he will reply with the latest slang phrase, with which his industrious loafing has yielded an abundant supply, or tell her that it is none of her business. Possibly he will condescend to intimate, with an air of great importance and mystery, that he "may" call on Miss D——.

Accustomed to bossing them about for years, and because they are his *sisters, he forgets they are ladies.* With rose water on his hair, and fire-water in his head; with the scent of cologne in his clothes, and tobacco in his breath; with censure on his lips, and selfishness in his heart, he slams the door and leaves a feeling of general discord behind him; still he has sense enough to know, that should he treat his "girl" half as uncivilly, he would stand no chance at all to win her favor.

It is a little singular what a remarkable change will take place by the time he reaches the next house. Instead of an arrogant, domineering autocrat, we see a fawning, servile, sycophant, eager to please every whim, and anxious to prove his devotion, he is on the alert to anticipate every want. Should Miss D—— need some water drawn, he perceives the desire. Indeed, so eager is he to wait upon her, that he will take the bucket from her after she has started to the well. At home how different, should a sister want a bucket of water she can go and get it. She may put out a big washing or do two days ironing in one, she may be so completely exhausted as to feel like dropping down, and his "bigness" takes his ease, and even bears asking three to six times, then he will do it in such a hateful manner that next time the kind patient sister will do it herself rather than ask him.

At Miss D.'s he will spring with the greatest alacrity to bring in an armful of wood. At home he will demurely sit in the house and smoke his cigarette, while a sister not only gets, but perhaps, chops the wood. This is no over-drawn picture nor fiction of fancy, but a picture of real life as I myself a hundred times have seen.

I pity the girl who, during an interval of emotional insanity, allows herself to become the wife of such a "brother." Girls, look well to your future happiness, and do not tolerate even the company of the boor who talks so nicely to you but so roughly to a sister; who will break his neck to do you a favor, but turn a cold shoulder to his sister if she asks him to do her one.

The indisposition on the part of "big brothers" to accompany their sisters to church and places of amusement is a prolific source of much sorrow at one time or other—either immediately or in after life. A young lady just verging into womanhood has not the experience and wisdom of the world that is essential to her development into a useful citizen and a valuable member of society. The time has come when she must take her place in society. That she fill the place with credit to herself and honor to her associate, she must gain the practical knowledge of others without becoming a victim to that knowledge. Now, who of all the world is the person most suitable to be her companion in this field of new experiences, to enter into the spirit of her innocent fun, to appreciate what she appreciates, to stimulate her womanhood and protect her honor? The very walls of a harmonious home answer an affectionate "big brother." But this elevating privilege he persistently refuses.

Frank is sweetly asked to go with this friend of his childhood, to some private social or public entertainment. Does he accept? No, but meanly excuses himself by saying he promised to go "up town" with Tom. To the novice, "up town" is a very innocent blind, and may mean a harmless walk to Parson Brown's, but to the experienced it means a saloon, the jingle of decanters, the rattle of dice, the click of billiards, "five cent ante" at poker, to see who pay for the drinks—returning home at two o'clock in the morning congratulating each other on the "way up" "the glorious" time they have had.

Were it somebody else's sister that had asked him he would have accepted and "up town" would have been laid over till the next night. By being thus slighted the sister's loving heart is grieved, her sensitive feelings are wounded. Stinging with mortification, she declares she will never ask him again nor go when he asks her. And frequently a coldness that chills and forever blights the beautiful flowers of affection is the result—though more often in the bounty of her sisterly love she overlooks his slights and gladly goes with him the first time he condescends to ask her. The "big brother" jeers at her discomfiture and goes on his lark. She is consumed with eagerness to go as Tilla, and Maddie, and all the rest of the girls are going. What is the poor child to do? Her only alternative is to sit "moping" at home or accept the company of some person who is not worthy such artless confidence and trusting purity.

By thus refusing such angelic company the brother not only greatly injures a trusting sister but does a great wrong to himself. In her company his rowdyism is restrained and his manhood stimulated. But he chooses companions bent only on having a good time. Each flatters the other, and thus gratify their love of praise, and this makes each more determined to do some meaner thing to gain greater compliments from their companions. Thus a big brother drifts farther and farther away from the refining influence of a sister's purity and the holiness of family restraint, but nearer and nearer to those haunts where debauchery runs riot and pollution verges into crime.

Young man look well to yourself. Do nothing you would be ashamed to have your sisters and mothers do. The control of the nation will soon be in your hands, offices honorable and lucrative will be open to you. A man who abuses a sister in private will abuse the people if in power. One who neglects a sister in the parlors of home will neglect his constituents in the halls of State. If, while a boy at home, a brother did not respect the feelings of a sister, when a man in office he will not respect the rights of a people.—*H. H. Eldridge.*

A MAN who was running for office resigned hurriedly, when he discovered his mother-in-law was making a scrap-book of all the hard things the opposition papers were saying of him.

A GALVESTON man, who has a mule for sale, hearing that a friend in Houston wanted to buy a mule, telegraphed him: "Dear friend: If you are looking for a No. 1 mule, don't forget me."

"HE is a very unfortunate man," said Dr. Spooner, speaking of a gentleman whose ill-luck is proverbial, "and I really believe if he should fall on his back, that he would break his nose."

ORTHOGRAPHIC—It is a poor speller that does not have an i to business

Health Column.

When to Eat.

Felix L. Oswald is contributing to *Popular Science Monthly* a series of very interesting articles on diet, in which he furnishes some pretty strong arguments against many of the very generally received opinions which have heretofore been entertained in regard to this important subject, by even the most advanced of the medical profession. From the last issue we clip the following:

"Never eat till you have leisure to digest, for digestion requires leisure; we cannot assimilate our food while the functional energy of our system is engrossed by other occupations. After a hearty feed, animals retire to a quiet hiding-place; and the 'after-dinner laziness,' the plea of our system for rest, should admonish us to imitate their example. The idea that exercise after dinner promotes digestion is a mischievous fallacy; Jules Virey settled that question by a cruel but conclusive experiment. He selected two curs of the same size, age, and general *physique*, made them keep a fast-day and treated them the next morning to a square meal of potato chips and cubes of fat mutton, but, as soon as one of them had eaten his fill, he made the other stop too, to make sure that they had both consumed the same quantity. Dog No. 1 was then confined in a comfortable kennel, while No. 2 had to run after the doctor's coach, not at a breathless rate of speed, but at a fair, brisk trot, for two hours and a half. As soon as they got home, the coach-dog and his comrade were slain and dissected; the kennel-dog had completely digested his meal, while the chips and cubes in the coach-dog's stomach had not changed their form at all; the process of assimilation had not even begun! Railroad laborers, who bolt their dinner during a short interval of hard work, might as well pass their recess in a hammock; instead of strengthening them, their dinner will only oppress them, till it is digested, together with their supper, in the cool of the evening. In a manner essentially similar, mental activity tends to hinder the digestive process for a considerable time; and I believe, more especially, the digestion of the very substances that are often selected as brain-food *par excellence.* Even after a fashionable dinner of six or seven courses (*curses,* Dr. Abernethy used to call them), two hours of absolute rest will set our wits a-work again; but if that time be passed behind a double-entry ledger, a feeling of lassitude, often combined with an almost resistless somnolence, will advise the brain-worker that his vital energy is needed for other purposes. 'I could eat with more comfort if it wasn't for the consciousness of having to hurry back to my drudgery,' I heard a poor class-teacher say, and the same consciousness embitters the noonday-meal of millions of school children and overworked clerks."

The writer holds that the principal meal should be the last, and that it should be taken from 4 to 5 o'clock P. M., after the day's work is done. We might then have "pleasant conversation, and four blessed hours for digestion," before retiring for the night.

"It is an important rule that we should digest our food thoroughly before we replenish the stomach." He thinks that two meals a day are better than three. We can accustom ourselves to swollow three, or even six; but we cannot compel nature to digest them between meals taken so frequently.

The Greeks and Romans, during their prime as nations, contented themselves with one meal a day. The Gonaque Hottentots are in no way incommoded by a five days' fast, and live to old age on an average of four meals a week. Two meals, or one full one and two half ones, should be enough for any man; the last at night. Such a custom will best enable nature to do her work most perfectly. Eating, like everything else, depends on training—habit—and in no other respect is the human system so plastic as to the influence of habit.

NEW TREATMENT FOR VARICOSE VEINS.—According to the London *Lancet,* Dr. Linon, of Verviers, has used per-chloride of iron locally with great success during the last three years in the treatment of varices. The strength of the solution is about two and a half drams to eight ounces of water. Compresses of flannel are steeped in the water, then wrung out, and applied by means of a flannel bandage, which is only moderately tightened. This application is to be kept on 24 hours, and on removing it the surgeon is much surprised to find that the venous dilations have almost entirely disappeared. The applications are to be renewed for seven or eight days successively, after which time the bandage is to be kept on, without any further wetting, until it gets loose. It is then to be wetted again with the solution, and applied until the varices have disappeared, which generally takes place after eight days or a fortnight, according to the size of the swelling. This simple method has removed, in a few days, enormous varices, which were accompanied by violent pain, with black spots on the surface, and have restored the use of the limbs. By the unsuccessful application of dry bandages only, Dr. Linon has been able to show that it is not compression, but really the local action of the iron which is efficacious.

Worth Knowing.

Curiosities of the Census.

The prying genius of the census taken often brings to light some very curious things. The Brooklyn (N. Y.), census superintendent discovered, among other things, that

Jamaica Rum was Made From Old Shoes

In that city. He was much puzzled, in his official duties, upon discovering that there was some use made of old shoes, which was not known to any of the deputies in his employ, and could not be discovered. It was found that old shoes were collected in large quantities by rag-pickers and junkmen, and sold to certain mysterious persons, for what purpose no one could divine. It was well known that Prussian blue is made of old leather, but the persons engaged in that business were perfectly willing to have their works inspected. After much inquiry and investigation, it was found that the old shoes were made into Jamaica rum. When they came from the rag-pickers, the good pieces were cut out and sold to small cobblers for patching purposes. The rest was distilled with spirits, colored with burned sugar and sold as Jamaica rum, and the most singular fact about the business is that it is bought, not by saloon-keepers, but by druggists who pride themselves on the purity of their articles.

Tomato Catsup from Canning Waste.

Many industries were found in which, though the value of the product was considerable, no value was attributed to the raw material. One man who made tomato catsup acknowledged to making $18,000 worth of catsup every year, but said that the raw material cost nothing. When pressed for an explanation, he said he sent to the factories where tomatoes are canned, big tubs, into which the peelings and trimmings of the tomatoes were thrown by the man who prepared them for canning. This material he got for the trouble of carrying it away. He ground it up, flavored it, and sold it as catsup to the extent of $18,000 a year.

RESTORING THE DEAD.—Prof. Fort has presented the question of premature interments to the French Academy in a paper on artificial respiration. One fact he mentions is, that he was enabled to restore life to a child three years old, by practicing artificial respiration on it some four hours, commencing three hours and a half after apparent death. A similar case is reported by Dr. Fournol, of Billancourt, who reanimated a nearly drowned person after four hours of artificial respiration. This person had been in the water ten minutes, and the doctor arrived one hour after asphyxia. Prof. Fort advocates also the utility of artificial respiration in order to eliminate the poison from the lungs and glands. The length of time it is desirable to practice artificial respiration in any case of apparent death from asphyxia may be said to be several hours.

Household Hints.

MINCED FOWL.—Take the remains of a cold roast fowl and cut off the white meat, which mince finely without any skin or bone; but put the bone and skin into a stewpan, with an onion, a blade of mace, and a handful of sweet herbs tied up. Add nearly a pint of water. Let it stew for an hour, and then strain and pour off the gravy, putting in a teaspoonful of Worcestershire sauce. Take two hard-boiled eggs and chop them small; mix them with the fowl, and salt, pepper, and mace according to taste; put in the gravy, also half a teaspoonful of lemon juice, two tablespoonfuls of flour, made into a smooth paste with a little cold water, and let the whole just boil. Serve with sippets of toasted bread. Some persons prefer cayenne to other pepper.

STAMPSCOTT BUNS.—Buns are easily made, and are excellent when this receipe is followed: Take one cup of yeast, one cup of sugar, one of butter, three cups of sweet milk; mix at night, omitting the butter and sugar; make a very soft sponge, let it stand till morning and then add the butter and a pinch of soda and the sugar; let it rise again until it is very light, then knead lightly and put into the tins. When light enough bake in a moderate oven till the top is a dark brown; while hot rub over the top with a little bit of butter, this makes the crust tender and smooth. If you choose you can add English currants, and when brought to the table warm they are said to resemble the wonderful tea-cakes of Mrs. Southey, which Shelley, having once tasted them, wished his wife to serve for supper ever after.

MANCHESTER PUDDING.—Line a pie-dish with a good short crust, and then a layer of jam; take a teacupful of warm milk, and mix with three ounces bread crumbs, three ounces of butter, three ounces of white sugar, the rind and juice of one small lemon, the yolks of three and the white of one egg. Stir all three together till it becomes a kind of custard, then pour the mixture into the pie-dish, and bake an hour and a quarter; serve very hot, with the whites of two eggs whipped up on the top.

SALAD OF LIMA BEANS.—Put some Lima beans, potatoes and beets (all boiled tender) on ice, and a short time before serving cut the potatoes and beets into rather thin slices, add the beans and dress with oil, pepper, salt and vinegar. Garnish with a few water-cresses.

Fraternal.

Masonic.

NEW YORK, Minnesota, Ohio, Maryland, Tennessee and Indiana have all ratified the General Grand Council of Royal and select Masons.

THE original warrant of Albion Lodge, No. 2, R. Q., City of Quebec, was presented to the Grand Lodge at its recent session at Montreal. It bears date June 12, A. D. 1752.

IT is stated that the Viscount of Rio Branco, Grand Master of the Brazilian Freemasons and Prime Minister at the time of the government severities against the Bishops, who renounced Masonry, was buried with the rites of the Church in consideration of having, before he expired, affirmed his belief in the entire teachings of the Church.

ORIGINALLY Freemasonry had no systematic degrees. It consisted simply of the initiation of the neophyte into its system and whosoever was initiated was a Mason, and as good as any other Mason. But in due time degrees arose. First, the Entered Apprentice was separated from the Master's degree (which is the essence of Masonry), then afterwards the Fellow Craft was introduced. Finally, during the course of the last century, the whole series of York, and the Scottish grades blossomed out into the beautiful and elaborate system which has become so popular in the world, and especially in America.

GR. MASTER WILLIAMS, of Delaware, says: "To me the Fraternity has ever been one of the green spots in life's desert, upon which I have delighted to look. Kingdoms, empires and republics have risen, flourished and decayed with age, since the advent of the Order of Ancient Free and Accepted Masons. While the innumerable institutions founded at different ages of the world for the amelioration of the mental, moral and physical condition of man have passed away, Masonry has silently pursued her course—a passive witness of political and religious conflicts that scattered ruin and desolation over the fairest fortunes of this fair globe. Her mission is one of peace; and although criticism, slander and envy have under every conceivable pretext, persecuted her under the banner of love, she has, in her silent march, protected by the sword of truth, maintained the conflict and has spread a zone of philanthropy about a world. My Brethren, let us cherish our Fraternity, guard it against all evil influences, and let us live up to the true principles of our Masonic profession, looking with confidence to the great light that has guided us through past ages."

THE trouble between the Grand Lodges of Masons in New York and Connecticut came up at the annual meeting of the Grand Lodge of Connecticut, at New Haven, on the 20th inst. Grand Master Barlow, in his report, lamented the severe and unjust edict of the New York Grand Lodge, by which 70,000 New York Masons and 15,000 Connecticut were placed at a perpetual distance, and all friendly relations severed. He went over the whole difficulty, and denied the charge made by the New York Grand Lodge that the Connecticut Grand Lodge had invaded the former's jurisdiction and terminated memberships in their Lodges without the New York Lodge agreeing. The only way out of the trouble suggested by the Grand Master was "to continue to hope and believe that a returning sense of justice and the hallowed remembrance of our former friendship may lead our sister Grand Lodge to quickly and cheerfully rescind said edict and accept our extended hand in friendship and brotherly love." A committee appointed a year ago to investigate the whole affair reported, but nothing was done beyond accepting the report and ordering it printed. Grand Chaplain John Anketell, of the Grand Council of R. and S. M., presented a memorial which suggested that the differences between the New York and Connecticut Grand Lodges be submitted to a board of arbitration, to be composed of the Grand Masters of the five adjacent jurisdictions of Canada, Massachusetts, New Jersey, Pennsylvania, and Rhode Island. The memorial was not adopted, and, after a long discussion, the Connecticut Grand Lodge left the whole matter substantially as it has been the past year.—*N. Y. Era.*

I. O. O. F.

THE number of persons who became Odd Fellows in 1880 is 34,834. Illinois gained 3,500, and Iowa 1,000.

ON Feb. 22d, Pima Lodge, No. 3, was instituted at Tucson, Arizona, by E. W. Champlin, S. D. G. Sire, assisted by A. Dere and E. W. Noyes, of California, and Wm. Giffin, with 20 charter members. Its first elective officers are: H. D. Corbett, N. G.; John Hart, V. G.; R. H. Choate, P. Sec'y; H. C. Kiesel, R. Sec'y; Wm. F. Scott, Treas. After institution and installation, six candidates were initiated and six applications received. No. 3 at the same time occupied the elegant hall which has just been completed for it in one of the wings of the Grand hotel. The Lodge-room has been fitted up in splendid style, and Pima Lodge, No. 3, commences life under the most favorable auspices. Many visiting brethren were present. During an informal meeting of the Lodge an elegant regalia was presented to Special Deputy Champlin, and an American flag with "I. O. O. F." upon it, presented to the Lodge by Mrs. R. H. Choate. A ball in the evening was one of the best attended and most successful reunions that has ever occurred in Tucson.

THE O. F. Hall Association are desirous of having the certificates of stock of the old Hall Association transferred, so that its affairs may be closed up, and the *new* speedily inaugurated in its stead. It is advised that the stock owned by encampments and Lodges stand in the name of an individual, as trustee, and all such bodies are, therefore, requested to legally notify the Secretary, Bro. C. T. Pidwell, of their desires. *Apropos* of this question: We would like to urge the speedy consideration of the building of a new and suitable hall for our Order in this city. It seems too bad that we should be divided up, and have to go outside for accommodation, when there is an abundance of means wherewith to supply entire convenience for all Odd Fellows at one locality. There never was a time in the history of San Francisco, or of the Order here, when a grand edifice dedicated to Odd Fellowship was in so much demand with such promise of liberal returns upon the investment. We sincerely hope the subject will be agitated in the proper spirit, to the end of speedy action in the procurement of a new hall.—*New Age.*

"THE primary object of Odd Fellowship is to ameliorate the condition of the human race. It seeks to attain this devout consummation by harmonizing man with his environments. It inculcates the practice of friendship, love and truth, as the most effectual means to solve this philosophic problem. But these words are mere abstractions—beautiful to contemplate, and grand in their potentiality, but they are beneficent only as they become a rule of action, and molder of human character. To make these virtues effective should be the ambition of every genuine Odd Fellow. This can be largely secured by the cultivation of the three flowers—Social Sunshine, Moral Appreciation and Mental Culture. The Lodge is the garden wherein these rare flowers should bloom like the 'rose of Sharon and the lily of the valley;' but alas! how often do they fall in their beauty, and wither beneath the chilling blasts of social frigidity?

"*Social Sunshine* is the life of the Lodge, and should be cultivated with assiduity; under its genial influences the associations of the Lodge become 'things of beauty and joys forever.' The only request of the old philosopher to Alexander was that the latter would stand out of his sunshine. No shadows should ever intercept the effulgent rays reflected from the active benevolence of Odd Fellowship. There are too many Alexanders in the Order. They cut off our sunlight. They have no words of cheer upon their lips, or sincerity in their hearts. They wrap themselves up in a pall, and cast a shadow wherever they go. Their grasp, as Sydney Smith said of Sir James McIntosh, belongs to the genius *mortmain*. This ought not to be. A true Odd Fellow carries his heart in his hand and imitates Tupper's nobleman.

> " 'For the finest in manners, as highest in rank
> It is *you* man, or you man, who stand
> Nature's own nobleman, friendly and frank,
> A man with his heart in his hand.'

"*Moral Appreciation* is the sinews of the Order. Odd Fellowship is a beautiful system of morality, wherein truth is illustrated by the symbols. In order that the symbolism may be perfect, and the impression produced lasting, there must be an adequate appreciation, not only of the truth symbolized, but also of the means of symbolism. The want of a true apprehension of the figures employed, and the morals which they are designed to convey, too often illustrate the adage—'There is but a step from the sublime to the ridiculous.' Members of the Order cannot be too earnestly enjoined to study the principles and tenants of the institution, that they may clearly perceive the moral significance thereof.

"*Mental Culture* is essential to the prosperity of Odd Fellowship. A higher plane of intellectuality cannot be too highly recommended to the fraternity. Why are the Lodges of California, Massachusetts, Ohio and Pennsylvania more prosperous than those of New York? Is it not because their general intelligence is higher? Are not their officers selected from the orators and statesmen of the land? It is no wonder that they succeed. There never was a period in the history of the Order when it needed intelligent men so much as it does now. The revised work marks a new epoch in Odd Fellowship. Diogenes went about with a lamp to find a man. The Order wants men of culture to fill its chairs and do its work. It is to be hoped that the brotherhood will see the necessity at this time of selecting the best men for office, that the new work may be successfully set in motion, and the prosperity and perpetuity of the Order assured.

"In true social sunshine the feelings of the heart are commingled with the pleasures of the mind. Mental culture is appreciated by enjoyment, approved by reflection, increased by repetition and elevated by moral appreciation."—*J. R. Tresidder, P. G., in The Guide.*

Knights of Pythias.

A NEW Lodge of K. of P. will be instituted at San Rafael Saturday, March 19th, with 50 charter members.

THE Knights of Pythias of this State have accepted the invitation given them by the Knights of Nevada, and will pay a visit to Virginia City some time in August.

THE annual report of the Knights of Pythias Library Association for the year ending Dec. 31, 1880, has been issued. From the report of James Patterson, Librarian, we learn that 750 members are drawing books, having taken out 10,026 volumes during the year, an increase of 3,787 books over the previous year, and 7,897 over the two preceding year's circulation. The report of the Secretary, V. C. Post, shows that the receipts have been $762.70; disbursments, per Treasurer's report, George Cantus, $681, leaving balance and cash on hand, $81.70. The library is in a very prosperons condition. A special notice has been issued by the Library Committee requesting a donation of one book from each and every member of the Order. For the convenience of those wishing to donate, the following names and officers are given: James Patterson, Librarian, 913 Market street; C. W. Nevin (printing office), 532 Commercial street; W. H. Bodfish (law office), 712 Montgomery street; Martin S. Meyer (Law office), 330 Pine street; E. P. Fellows (with Howe & Hall), 408 Davis street. The object is worthy and should meet the encouragement of all Knights.

MYRTLE LODGE, No. 16, K. of P. had one of their pleasant monthly socials on Tuesday evening, Feb. 22d. An unusually large number of the members and visiting brothers were present. The following programme was given: Opening remarks, C. W. Nevin, C. C.; organ solo, C. S. Hoffman; song, "Widow Dunn," Charles Simon; recitation, H. Schaffner; Souvenirs of Myrtle Lodge, C. C. Gilmore; comic song, Wm. Daniels; "The Fleas," S. L. Simon. Each participant in the exercises received a hearty applause. Besides the above, a new feature in fraternal societies was given. In was a debate held between Bros. A. Hoffman and C. S. Haley, on the following subject: "*Resolved*, That *Fashion* has caused more *evil* than *good* to Mankind," the affirmative being taken by A. Hoffman, and the negative by C. S. Haley. The affirmative side of the question was very ably and ingeniously discussed by A. Hoffman, and was answered and argued against by his opponent, C. S. Haley, in such a manner that the umpires, though admitting the ableness of the arguments on both sides, were compelled to decide in the negative. These socials are held once a month in Myrtle Lodge on the last Tuesday of each month, and all brothers are most cordially invited to be present. This feature of closing with a debate on some interesting subject, bids fair to bring forth the latent talent in the Lodge, of which there seems to be considerable. The next subject to be discussed will be: "*Resolved*, That Napoleon Bonaparte was a greater man than George Washington," affirmative, J. L. Fields; negative, W. R. Watson.

Knights of Honor.

THERE have been only 100 deaths in the German-working Lodges in the U. S. from the date of organization to Oct. 8, 1879.

JOHN S. BUGBEE, P. D., was presented with a handsome gold chain by his brethren of Tancred, 1,927. Dr. L. O. Rogers made the presentation speech.

THE K. of H. have taken steps in the same direction as the Workmen in the establishment of a labor bureau. Yerba Buena has taken the initiative and at its request a number of Dictators met at Mutual Hall, Shiels' building March 5th.

AN amendment to the by-laws has recently been adopted by Tancred, 1,927; Friendship, 1,731, and Anchor, 2,366. It is in effect that a member's assessments shall be paid from the general fund if the brother allows himself to become delinquent, and the sum of 25 cents extra to be charged. A second assessment shall be paid out of the general fund, and he is charged 50 cents extra. He is then notified, and allowed 30 days in which to perfect his standing in the Lodge. This amendment has received the sanction of the majority of the Committee on Laws and Supervision.

ONE of the Lodges in this jurisdiction recently voted to do away with its by-laws. Upon the matter being presented to the Committee on Laws and Supervision, they held that a Lodge could not strike out its by-laws. The Lodge adopted a set of resolutions for the government of the Lodge. The Committee held that this was not legal, as it had not been read at two stated meetings, and was also contrary to the spirit of the Subordinate Lodge Constitution. By-laws can be amended, but for a Lodge to expunge them altogether, and govern itself by a set of resolutions, which can at any time be changed to suit the majority of the Lodge, could not be allowed.

A SOUTHERN correspondent of the *K. of H. Reporter* writes as follows on the subject of death benefits. It is quite lengthy, but will bear perusal. He says: I am glad to notice that my allusion to the subject of death benefits, and your answer under the above caption, have attracted considerable attention. As the question relates to the rights of all who are availing themselves of the benefits of our Order, it is necessarily an important one, and will bear further discussion. Whether or not there is a commercial value in our benefit certificates, and whether they may be made payable *as we may direct*, or must be limited exclusively to our immediate families, are points that ought to be clearly understood.

I hold that according to our constitution and charter and the question propounded in our petitions for membership—"In case of your death, to whom do you wish the benefit paid?"—the member may name any party or parties he pleases. The main intention of the Order, is of course, conspicuous and fully recognized. To provide for the families or dependents of our deceased members is the central idea, but that this is its limit cannot be shown either by our law or our usage.

Our Order was evidently intended for the benefit of the poor man by providing for him an easy method of securing at least a small inheritance for his widow and orphaned children in case of his untimely death, but, instead of enlisting them exclusively, hundreds of others have been attracted by its practical and sensible methods, and have joined it either as a prudential investment or for a variety of other reasons. Scores of men who do not need the institution as the poor man needs it, have joined it for the purpose of enlarging an inheritance already secured or in prospect. Had the Order offered its benefits only to families unprovided for, it would never have secured the vast array of substantial and prosperous men who to-day constitute so large a portion of its membership. To many of these the benefit of $2,000 is a mere trifle, and to many more it will be but a small supplement to the liberal accumulations acquired by other means and from other sources. Neither would it have enlisted those who are without families or other dependents. The very fact that we have many such members is conclusive evidence that our Order has not restricted its benefits solely to men having dependent families. On the contrary, it attracts all classes of men who join us from a variety of motives, and expect to obtain benefits for various uses. To the poor man who has a dependent family it stands as a refuge and an ark of safety. For him a tangible method is provided of obtaining an inheritance for his family which would otherwise be lacking. In his case the benefit is a Godsend to a family who might otherwise be left in poverty and want. But pecuniary benefits are attractive alike to all, and hence many have gone into this co-operative alliance as a mere business enterprise, and meet their obligations precisely as they would invest in stocks and bonds or deposit money in a savings bank.

One brother that I know of, who is worth $40,000 or $50,000, gave as a reason for joining the Knights of Honor and two or three similar institutions, that he wanted to provide ready money enough to pay the lawyers for squandering the balance of his estate. He is a lawyer himself, and has a "fellow feeling" for his craft. There are others who are so lacking in this particular kind of good will towards that profession that they are depending upon the same kind of ready money to keep the encumbered estates out of the hands of the lawyers.

There are many young men in our Order who have no families or dependents, who must necessarily place their endowments elsewhere. Some of these have made their benefits payable to friends, and others have left them subject to further direction, or have named some benevolent institution or enterprise as the beneficiary.

There is still another class of members who have joined us simply from motives of philanthropy and benevolence. After our great trial in 1878, scores of men became Knights of Honor for the sole purpose of lending their influence and their aid to an institution that had shown itself so practical and strong in relieving want and suffering in times of great public calamity. Such men having no need of the benefits for their own families, might prefer to aid some eleemosynary institution by this method, or, it may be, aid in maintaining some other widows and orphans besides their own. If we are to be confined to our own families in naming the beneficiaries of our Order, such men would be deprived of the privilege of doing a vast amount of good to others, and would have no incentive to join us.

Since then our membership is made up of so many classes of men who have joined us from so many different motives, it must necessarily follow that their bequests will also be various and perhaps should be. I do not suppose, and I did not intend to say that our Order would be or has been used to any great extent for speculative purposes, but only that I do not think that its benefits can be restricted to the narrow limits of the home circle. All that I propose to claim is that our constitution and charter, as at present worded, do not restrict the member to the appointment of any particular beneficiary, and that the beneficiary may be either a member of his family or any one else that he may see fitto name.

That our work has this latitude has already been shown in a number of instances, some of which I alluded to in my former article A member in the State bequeathed the benefits not only to the K. of H. but of the A. O. U. W. to two of the churches of the town in which he died a comparative stranger. Another left the benefit to an intimate friend, another member in Louisville had a part of his benefit expended in buying jewelry for two young ladies of his acquaintance, and gave the balance to a Commandery of Knights Templar of which he was a member. These members, perhaps, had family relatives (I know that two of them had) who would have been glad to get the money, but they were paid *as per direction*, all the same, and I do not believe that they could have been used otherwise in the face of a law that reads: "The sum of $2,000 shall be paid to his family, *or as he may direct.*"

Whether or not our benefits ought to be so restricted, is a question that I will not now attempt to discuss, though I doubt not that you and others will take pleasure in doing so.

THE Knights and Ladies of Honor, Aurora Lodge, 202, held a public musical and literary

reception in Shiels' building, on March 7th. The Hall was well filled and the evening pleasantly spent. The following was the programme: Introductory remarks, by the Protector, Mrs. Rapp; piano solo, Mrs. Ryhiner; recitation (selection), James C. Pennie, Jr.; piano duet, Misses Henrietta and Josephine Shuck; reading, "The City of the Living," Mr. H. Coad; quartette, "Will you come to Meet me Darling?" Mrs. Crocker, Mrs. Day, Mr. Day and C. E. Baker; ballad, "Language of Flowers," Mrs. H. Glissman; reading, Mrs. H. K. Cummings; duet, "Go where the Nights are Sleeping," Mrs. Reese and Miss Watson; reading, "Persimmons and the Baby," Mrs. Helen Crocker; duet and encore, "How can I Leave Thee?" Mrs. Crocker and Mr. Baker; song and encore, "The Old Man," Prof. A. W. Bogart; solo, "O I have had Dreams," Mrs. Reese; closing anthem, "We are Parting Now," (by the audience).

YERBA BUENA LODGE, No. 1788, K. of H. invited its friends to the Lodge-room on February 28th. The programme consisted of literary and musical exercises, and as the following will show was quite varied in its character: *Part I.*—Piano solo, Miss Fairweather; song, "The White Squall," Mr. Fairweather; reading, Mr. Egleston; song, "The Newfoundland Dog," Mr. Bremner; duett, "Hear me Norma," Mesdames Wells and Hendry; reading, Mr. Bush; song, "Love's Request," Mr. Linklater; trio, "Mynheer Van Dunk," Messrs. Bremner, Fairweather and Bremner; reading, Mr. Hill; duett, Mrs. Wells and Mr. Bremner. *Part II.*—Organ symp'hy, Mr. Peirce; song, "The Lark now Leaves its watr'y Nest," Mr. Geo. St. J. Bremner; trio, "Scotch," Messrs. Bremner, Linklater and Bremner; song, "Non e ver," Mrs. Wells; reading, Mr. Ferguson; song, Mr. Cook; duett, "Love and War," Messrs Bremner; remarks, Mr. Thomas; song, (by request), Mr. Linklater; remarks, Mr. Thompson; solo, "Auld Lang Syne," Linklater and Bremner. The programme was carried out in fine style, and the whole affair reflected credit on the committee and upon the brethren of Yerba Buena.

American Legion of Honor.

COLEMAN COUNCIL, American Legion of Honor, was instituted at the Mission, March 3d, with 47 charter members.

FOUR new councils of the American Legion of Honor are in process of formation. Further information can be had of Bros. Haley and Rogers, 920 Market street.

SOME time ago, we heard that there was difficulty concerning the standing of Bro. Oliver in the American Legion of Honor. The following, taken from the *Journal* of the A. L. of H., will explain the matter fully:

DISTRESS CALL NO. 2.

H. G. Oliver, of Brooklyn, Cal., was a charter member of Union Council 168, A. L. of H., being admitted under the provisions of law 5 before his application had been approved by the Medical Examiner-in-Chief, after which his application was submitted to the Medical Examiner-in-Chief, who found it "irregular," and returned it. Owing to the carelessness of either the officers of the Council or the United States mail, the application was never returned to the Medical Examiner-in-Chief.

Under this state of circumstances, Companion Oliver was only an honorary member. He nevertheless held a commission as D. S. C., and instituted several Councils. A few months since he was taken sick and finally died. He undoubtedly believed that his family were entitled to $5,000. But under the peculiar circumstances the Supreme officers could not legally pay the benefit for the reason that he was not yet a beneficial member in good standing. Yet we must all admit that the Order is under moral and fraternal obligations to his family, who are now in needy circumstances.

With these facts before us, we felt called upon to make a distress call. All Councils and companions of the A. L. of H. are requested to contribute as liberally as circumstances will permit. The Secretaries of Councils will please read this notice in open Council, and give notice to the members of their several Councils as best they can. Contributions should be placed in the hands of the Treasurers of subordinate Councils, who should, in turn, forward them to Charles K. Darling, Supreme Treasurer, 15 Exchange street, Boston, Mass.; stating that the amount is a contribution to distress call No. 2.

Due credit will be given to each Council through the columns of the *Journal*. Hoping that the $5,000 may soon be placed in the hands of the deserving and distressed widow of our late companion, I remain truly and fraternally yours,

DARIUS WILSON,
Supreme Commander.

Order of Chosen Friends.

THE Order of Chosen Friends has organized a relief committee similar to that of the Workmen. It is expected, however, that it will be under the general jurisdiction of the Grand Lodge.

CONCORD COUNCIL, No. 2, Order of Chosen Friends, has addressed a communication to sister Lodges to petition the Supreme Council to grant them the privilege of forming a Grand State Council, as the membership of the Order is now over 2,000 in this State.

THE second entertainment and social of Golden Shore Council, Order of Chosen Friends, took place on Thursday evening, March 3d, in Laurel hall, Shiels' building, 32 O'Farrell street. The interest taken in it was evidenced from the fact that some 200 were not able to gain admission to their beautiful and spacious hall. On this occasion the committee of arrangements presented a programme of unusual merit to their numerous friends, and very fashionable audience. The following persons took part in the very excellent evening's entertainment: Opening address, Chief Councilor, J. H. Harney; piano solo, Samuel Fabian; song Miss Rebecca Levingston; recitation, S. S. Johnson; original poem by Mose Stern, composed expressly for this occasion on the Order of Chosen Friends, delivered by J. Rothchild; recitation, comic, Jabez Swan; song, Miss Eva Levingston; recitation, Miss Sarah Hosmer; instrumental trio, J. M. Rademaker, son and daughter; recitation, Maurice Mayer; song, Mrs. F. M. Ystas; Zither quartette, Sherrott, Feine, Jr., George and Doyle; song, Jos. F. Kingwell. The immensely large audience showed their appreciation of the very fine programme by encoring almost every number. The evening's entertainment concluded with a social dance wich lasted until about one o'clock in the morning. This Order is growing faster than any that has been started on this coast, and it is very evident from the interest taken in the Order, especially Golden Shore Council, that the next time they give their quarterly entertainment they will be compelled to secure a larger hall.—COM.

I. O. F.

Two new Courts will soon be established—one in this city and one in Petaluma. Court California, No. 1, meets at I. O. B. B. hall on the first and third Friday of each month.

NOTWITHSTANDING the fact that the Supreme Court at its session held in 1879 changed the name of the sovereign body from the "Most Worthy High Court of the World" to the "Supreme Court of the World" and its officers to correspond with the same, yet in many jurisdictions the law seems not generally understood. The following resolution embraces the enactment alluded to: "Titles of the Most Worthy High Court to be hereafter known and titled the "Supreme Court of the World," and the officers of the same to be hailed and known as Past Supreme Chief Ranger, Supreme Chief Ranger, Supreme Vice Chief Ranger, Supreme Secretary, Supreme Treasurer, etc. Titles of the Right Worthy High Courts to be hereafter known as High Courts, the officers of the same to be styled Past High Chief Ranger, High Chief Ranger, High Vice Chief Ranger, High Secretary, High Treasurer, etc. In the subordinate ritual, strike out the word worthy where it prefaces the title of officers. Under the law, the following is the proper titles of all officers: Past Supreme Chief Ranger, Supreme Chief Ranger, Supreme Vice Chief Ranger, etc., and no "worthy" or "of the world" is to be appended thereto. In the States where High Courts exist the proper title of the legislative body is "High Court of——," (naming State) dropping the "R. W." as heretotore. The officers of these bodies are High Chief Ranger, High Vice Chief Ranger, etc. In the subordinate courts, under this law, brethren in addressing the Chief Ranger must drop the word "worthy" in all cases.—*Forester*.

U. O. A. D.

THE February number of *Der Erz-Druide* is at hand, laden with interesting Druidic matter. H. Freudenthal concludes his notes on "Stonehenge." He says: It seems tolerably clear that the true ancient name of Stonehenge is preserved by the neighboring town of Amesbury or Ambresbury, as it was formerly and properly called, being evidently so named from the temple in its vicinity. The Welsh bard, Cuhelin, calls Stonehenge the great sanctuary of the Dominion. Anuerin, in his song entitled "Gododin," calls it "The great stone fence of the common sanctuary." There are so many proofs that Stonehenge being a Druidical temple, that it seems remarkable that any antiquarians are not satisfied that this was the case. The best writers on the subject have taken this view, and Dr. Thurman, an eminent living authority, is of the same opinion. The proofs may be considered of two kinds: 1. The historical evidence afforded by early histories and other compositions, whether oral or written; and especially by the songs of the ancient Welsh bards. 2. The evidence afforded by the names of places, which show a connection of the Druids with megalithic structures. As the evidence of the first class is sufficiently adduced by passages from histories and by a description of a historical event relating to Stonehenge, which I will give further on, it will be only necessary at present to bring forward instances of the second kind of evidence.

The name of Druid is preserved in the modern surname of Drew or Drewe, which is common in the west part of England. Dreux, a city in France, is said to have been a seminary of the Druids, who appear to have had establishments something like our universities or colleges, or those schools of the "sons of the prophets" spoken of in Holy Scripture as existing at Bethel, Jericho, etc. Stanton Drew, in Somersetshire, not far from Bristol, is understood to mean "the stone structure" of the Druids; Drewsteignton, in Devonshire, is supposed to mean the Druid's town on the Teign. I could recite many more of this class, but these will suffice.

Having endeavored to show that Stonehenge was a Druidical structure, I shall now give you a description of it. Stonehenge is considered to have been in existence as early as B. C. 300. The ancient stone temples in Britain were divided into three classes: 1. Those which were in the form of a serpent combined with a circle. 2. Those which were in the form of an alate circle, or circle with wings. 3. Those which were circular, without the addition of the serpent or wings. The temple at Abury was classed with the first kind, since it consisted originally of a double ring of stones still called the Hakpen (serpent's head), standing on Overton hill, from which a double row of stones, forming the neck of the serpent, is to be traced to a large circle of stones, containing within it two double circles of stones. From the large circle a double row of stones extends, forming the tail of the serpent. This form was, probably, a mythical and mystical representation of the deity, and did not denote the actual worship of the serpent itself. Dr. Stukeley gives the stone structure at Barrow, in Lincolnshire, by the Humber, as an instance of a temple in the form of an alate circle. Various combinations of the serpent, the wings and the circle, are found sculptured as emblems of the deity, on the imposts at Persepolis. Stonehenge is to be classed with the third kind. It may be considered as originally consisting mainly of two circles and two greater parts of ovals or ellipses, which may be thus described, beginning with the outermost circle:

1. A circle of about 300 ft. in circumference of 30 upright stones, averaging about 16 ft. in hight, and 18 ft. in circumference, with spaces between them of about 3½ ft., except at the entrance of the temple, where the space is wider. On these 30 uprights, 30 stones were placed horizontally, each having two mortised holes which fitted upon tenons that projected from the uprights. These horizontal stones touched each other, and so formed a continuous *corona* around the structure.

2. At a distance of rather more than 8 ft. from the outermost circle, another circle of 40 smaller stones without imposts, unwrought and rather irregular in shape. The two by the sides of the entrance were placed a little within the circle.

3. An oval, or, rather, the greater portion of an oval or ellipse, consisting of five great trilithons, or pairs of large upright stones, with imposts. As you stand with your back to the entrance, the first trilithon to the left is 16 ft. 3 inches high, the next on the same side, 17 ft. 2 inches, and the central one in front, 21 ft. 6 inches.

4. Within the outer oval another oval or ellipse, consisting of 19 stones. These stones were smoother, taller and more pyramidal in shape than those of the inner circle, and the one which is now touched by the great leaning stone is grooved. Within this smaller oval lies the flat *altar stone*, about 15 ft. in length, and about 20 inches or a cubit 20 4-5 inches thick, with its sides parallel to the great central trilithon and its ends toward the next great trilithons on either side.

The temple was surrounded by a vallum, or mound, with a trench on the outside. The circumference of the trench is 369 yards. The vallum is about 100 ft. from the outer circle of stones. At the edge of this trench, and in a line with the middle of the great center trilithon, altar stone and entrance, is the flat stone called the slaughter-stone, and in the same line at about 100 ft. more outside the vallum is the solitary upright, or, rather, inclining stone called the Bowing Stone, or Friar's Heel. There are also at the edge of the vallum, two stones, one on each side of the temple, and two depressions in the turf, which are also one on each side of the structure and at the edge of the vellum. It is most probable that the inner circle and oval were constructed at the same time as the outer ones, but that they more particularly represented the religion which was distinctively Cymric, while the outer circle and oval represented the religious worship which was derived from the Phœnicians.

Stonehenge, although consisting of two circles and two ovals, may be said really to consist of only two parts, a double circle and a double oval, the inner row of each was probably the most sacred; the outer row perhaps mainly serving as the screen or fence of the inner. We have the testimony of the Welsh bards to the fact that the oval was the sacred cell of Keridwen or Ked; and that in this cell a fire was constantly kept burning. The double circle was apparently sacred to the Cymric Deity named Hu, a name perhaps akin to the Hebrew pronoun Hu, signifying "He," or, "He himself." The oval or egg shape of the cell is probably emblematical of the great reproductive power in nature, and is typical of Ceridwen, the goddess of terrestrial reproduction; also, perhaps, of the moon, which is still thought by many to exercise great influence on the growth of plants, favorable or prejudicial, as she is growing or waning; and of the Ark, which contained the individuals, whereby the earth was to be replenished. If the inner oval consisted of 19 stones, as is generally supposed, it may have had some reference to the lunar cycle of 19 years, at the end of which time the new and full moons fall again on the same days of the month. That the number of uprights of the outer circle was 30, seems highly probable; for the diameter of the temple, *i. e.* 100 ft., gives, when multiplied by 3.14, 314 ft. for the circumference, a measurement closely corresponding with the product of 30 multiplied by 10½ ft. equals 315 ft.; the number 10½ being made up of 7 ft., which is the average breadth of one of the uprights, and 3½ ft., which is the average width of one of the intervals of the outer circle. It may also be conjectured that if the stones of the inner oval were 19 in number, and represented the lunar cycle of 19 years, the stones of the inner circle, if the corresponding idea was followed out, might have been 28 in number, and represented the solar cycle of 28 years; the nature of which cycle may be in part understood by observing that on whichever day of the week the 29th day of February falls in any leap year, it will not fall on that day of the week again, until after 28 years. Having described the temple in its supposed original state, its present condition will be best appreciated by showing how much of the original circles and ovals have been overthrown or subtracted.

Of the outer circle of 30 upright *Sarsen* stones there remain standing 17. Of the 30 imposts of this circle 6 remain in position, including the impost over the entrance, and one on each side of it, which altogether give a good idea of the original continuity of the imposts, which formed a kind of *corona* around the structure. There are 16 pieces of Sarsen stone lying on the ground, which apparently belonged to this outer circle.

Of the inner circle of syenite stones there are 7 standing, 2 being much diminished. Between the inner circle and the outer oval there are 9 pieces of syenite stone broken off or overthrown, of which most, if not all, seem to have belonged to the inner circle. Of the outer oval of great Sarsen stones there are 6 standing, and of the imposts two remain in position, viz., those of the 2 triliths on the right hand of one standing on the altar stone and facing the entrance. On the ground are 13 Sarsen stones, either whole or fragmentary, which belonged to this outer oval. With regard to this oval, it is remarkable that the fallen right-hand stone of the great middle trilith, on the left hand, as seen from the altar stone by one facing the entrance, instead of lying with their bases close to the cavities in which they stood, appear to have been jerked, or to have slid, a considerable distance backward; but the fallen stone of the great middle trilith most so. This, it seems, can only be accounted for by supposing that each of these stones in falling impinged upon one or two of the upright stones of the inner oval, which impact would cause the great falling stones partly to be jerked and partly to slide backward. Another singular circumstance is, that the stone of the middle trilith, which still remains standing, preserves its position, although it is inclined at a considerable angle from the perpendicular.

Of the inner ovel of syenite stones, 6 are standing. On the ground are 4 pieces of syenite stone which belonged to this oval. The altar stone is reckoned with these, but it is of a finer quality, being a fine calcareous sandstone.

We may get an idea of the magnitude of the temple, and the great labor it cost to build it, if we consider the size and weight of the stones. Dr. Maton weighed a cubic inch of the Sarsen stone and found it 1 oz. 6 pennyweights in weight. Thence he calculated the weight of the entire trilithon that fell in 1797 to be nearly 70 tons. The imposts being 11 tons, the supports would be nearly 30 tons each. We learn in Physics that the momentary draft power of a horse is 700 pounds as a mean, thus it would appear that it would take about 96 horses to lift momentarily from the earth, by means of ropes or chains passing over pulleys, a block of stone weighing 30 tons, and about a quarter or little more, of the same number to put it in motion on a smooth and level surface; we may conclude that some intermediate number would be required to draw it, and may, perhaps, assume that the mean number, 60, would be requisite to draw it over ground of average steepness and roughness. And since the power of a horse is about equal to that of 6 or 7 men, it would take from 360 to 420 men to draw it. On a good road, and on wheels, a horse could draw a load of from 25 to 30 cwt. As men would pull more uniformly and better in concert than horses, it is likely that the moving of the great Sarsen stone of Stonhenge was effected by men.

As to the implements with which the stones were worked, it is the opinion of an eminent authority on this subject, that stone implements are more capable of doing the work than bronze. The stones of which Stonehenge is constructed are exceedingly hard, and it may be questioned whether a bronze implement could have wrought them, while, at the same time, the comparative rudeness of the work would seem to prove that if they were wrought by iron implements it must have been when the metal was in a very unimproved state. Before I conclude I must explain the words Sarsen and Syenite.

It is conjectured that "Sarsen" means "Saracen," and that it is only the corrupted pronunciation of the word by the country people, who, it is said, imagined the Saracens venerated such stones. It is possible the name Sarsen may have been derived from "Sarse," a fine sieve, and hence Sarsen, finely sifted, and that the name was given them on account of their seeming to be composed of fine sand.

Syenite, so called from Syene, in Egypt, is described as a rock composed of quartz, hornblende and mica. It differs from granite only in containing hornblende instead of fieldspar. Mr. Higgins, the author of Celtic Druids, says that he broke off a small piece of one of the stones of the inner oval, which he got polished and submitted to one of the first geologists in London; who, on seeing it, without having the least suspicion whence it came from, said that it looked like an African stone, but if it were British, he thought it must have come from Anglesey. It is indeed not unlikely that most of the stones classed as Syenite were brought from the Isle of Anglesey, which was a noted Druidic station.

Official Recommendations.

From Grand Master Workman Wm. H. Jordan's Annual Address, 1880.]

During the past year I have received large assistance in my work from the PACIFIC STATES WATCHMAN and *Workman* [consolidated with the WATCHMAN.—EDS.], and common courtesy would require that in this communication I should recognize the aid thus received by favorably commending these journals to the consideration of our brotherhood. The value of assistance in communicating information to the membership and introducing our cause to the people of the State, it would be difficult to compute. On all occasions when I have desired the use of their columns for official communication they have been tendered me without cost, either to myself or this Grand Lodge, and I would suggest that as a recognition of these services you authorize the Grand Master and Grand Recorder, in future, to publish such of their official communications as they may desire in the columns of these periodicals, paying therefor a reasonable compensation. This should be done without creating any official organ or assuming any responsibility for other matter than that appearing over the signature of the Grand officers.

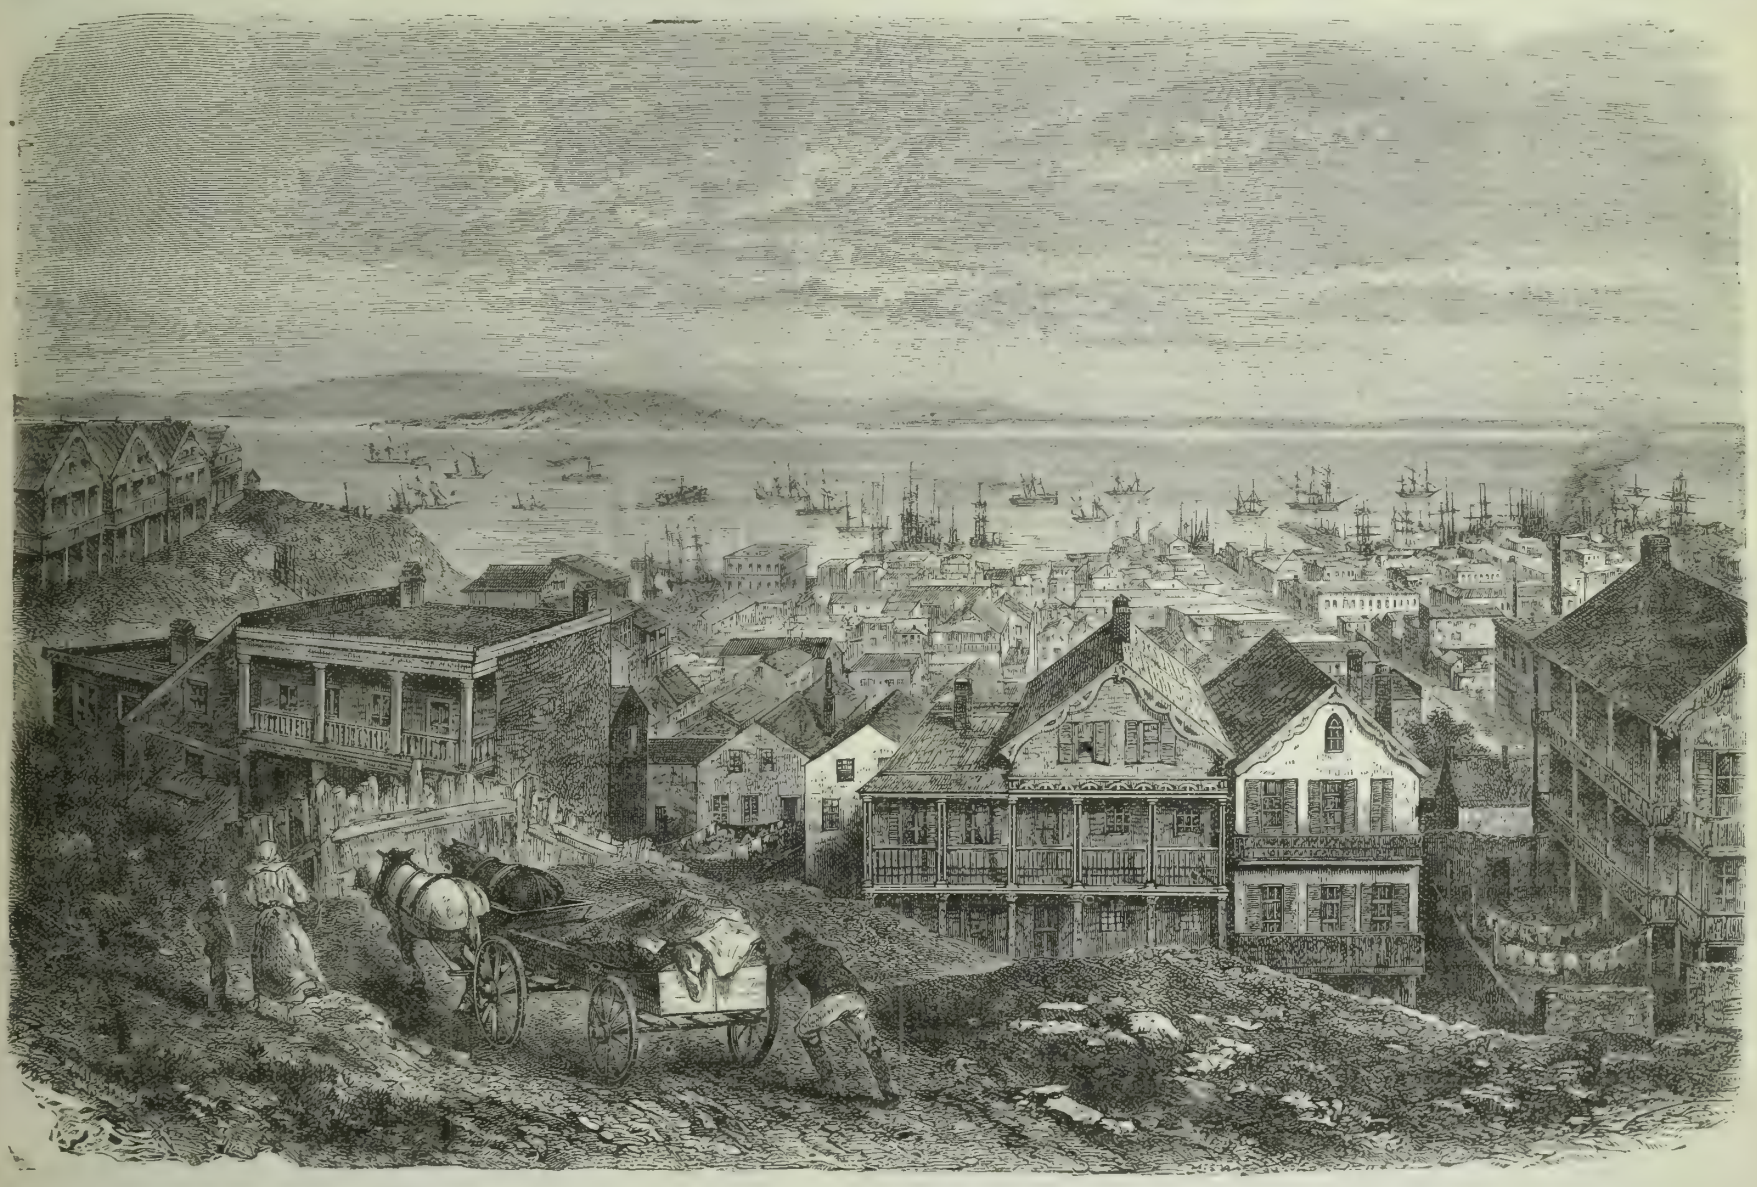
[From Grand Master Workman Clay W. Taylor's Annual Address, 1881.]

It is meet and proper that the untiring and never-ceasing efforts of the PACIFIC STATES WATCHMAN should not be overlooked or forgotten. Its proprietors have spared no time or expense in their devotion to the welfare of our fraternity, and the WATCHMAN is to-day one of the best fraternal journals in the land advocating the interests of the A. O. U. W. Its leading articles are copied in every journal connected with our Order, and for its faithful devotion to our interests, it merits, and should receive, our cordial support.

[From Grand Master Workman Wm. H. Barnes, 1881.]

With a full knowledge of the ability and enterprise of the conductors of the PACIFIC STATES WATCHMAN, with a realization of its value and usefulness, not only to our Order at large, but to individual members, I unhesitatingly recommend it to the practical and unanimous patronage of our Order in California.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.



THE RECORDERS of all Subordinate Lodges are requested to correspond and act as agents in securing subscriptions for the WATCHMAN. We will pay liberal rates for services rendered. Remember, Brothers, that you can accomplish a mutual benefit to the Order and ourselves.

EXPERIENCE WITH IMPERIAL EGG FOOD.—A. J. Lineback, of Calistoga, writes: I have used a six lb. box of imperial egg food. I have about 250 hens, and when I began to feed it they were looking badly, and their combs were pale. Now their combs are a bright red, the fowls look hearty and healthy and have commenced to lay. I think it is an excellent preparation.

WE will sell for the next 60 days at our wholesale and retail hardware store, No. 28 New Montgomery St., under the Palace hotel, builders' materials, carpenters' tools, brushes, fine cutlery, parlor rifles, air guns and everything in our line at lower rates than ever. Call and examine my new stock and be convinced. Frank P. Latson, proprietor, was formerly with the late H. Rosekrans.

A Glimpse of San Francisco Bay.

We give upon this page an engraving of such a glimpse of San Francisco bay as one might gain by standing on the crest of Telegraph hill and looking toward the city of Oakland. There is but a small portion of the bay included in the view, for San Francisco bay is a grand sheet of water, stretching from north to south about 60 miles, and having an area of 480 square miles. And yet our view includes some of the points of chief interest in connection with our commerce and passenger traffic. The outgoing and incoming ships which are seen are plying upon the channel which constitutes the harbor proper. Within the area embraced in the view the wheat fleet anchors, and across this water ply the steamers which go up and down the coast and across the Pacific ocean. The large island a little to the left of the center of the picture is Goat island, which won national fame by the congressional contention of which it was the bone, several years ago. Just to the right of Goat island and about a mile to the eastward are the wharves of the Central Pacific railway, where the hosts of travelers from the interior and the East take to the ferry boats to reach San Francisco. From these wharves also come to the city the thousands of people who find homes in Oakland and her sister cities on the east shore of the bay. At this point also is the solid pier, about two miles long, just finished, and upon which new ferry buildings will soon be erected, and this solid structure will soon bear the traffic which now goes over the old arrangement of piles and planks. Farther to the right lies the entrance to San Antonio creek, the avenue of travel lying between parallel sea walls a little more than two miles in length. This gives another means of access to Oakland and to Alameda, another beautiful city lying in the offing at the extreme right of the engraving. To the left of Goat island and nestling under the distant hills beyond the water, lies Berkeley with its State University and asylum for the deaf, dumb and blind. From the center of the engraving to the right the bay stretches southward about 30 miles between the counties of Alameda and San Mateo; and to the left, the bay extends northward nearly the same distance, its waters laving the shores of Marin, Sonoma, Napa, Solano and Contra Costa counties.

VIEW OF SAN FRANCISCO BAY LOOKING TOWARD OAKLAND FROM TELEGRAPH HILL.

A CHURCH in a country village recently circulated a paper among the congregation asking for contributions "for the purpose of paying the organist and a boy to blow the same."

WHICH would you rather have, a $5 gold piece or a $5 note? A $5 note, because you can double it when you put it in your pocket, and find i creases when you take it out again.

Home Manufactures and Interest.

We notice a disposition on the part of many newspapers to draw doleful conclusions because a certain capitalist, long a resident of this State, has bought property valued at $1,500,000 in New York city. They deplore the loss to the city of San Francisco and the State of California of so great a capitalist, and think that because he and a few others like him have left, the whole business of the coast is going to perdition.

It is now pretty generally agreed that the absence of this class of capitalists from business circles will not injure California—that they are nothing more than money lenders on a large scale. Their names are not connected with any great home industry or any manufacturing enterprise, as the founders or as the patrons. What money of theirs was put in such enterprises was independent of the enterprises themselves. They did not take the chances of failure or success. Their money is secured and is safe in any event. In fact, this class of men are those who lent their money—on good security—to men who had enterprise and no money, as they had money and no enterprise. So far and no farther did they aid the home industries of the city and State in which they made their magnificent fortunes.

We could not compete in manufacturing with other communities East, simply because there the capitalist was willing to take a return from the profit of the enterprise itself, while here the capitalist must get his enormous interest first, and would take no risks in the venture. In addition to fair profits, the industry, whatever it might be, has had to pay heavy rates of interest, and few enterprises of any magnitude could pay double profits.

We maintain that, in view of our natural resources, should this class of "capitalist" disappear entirely, their places will be better filled by men whose ideas can rise above cent. per cent., and who can entertain a proposition without the whole scope of their intellect being clogged and burdened with the momentous question—"what security can you give?"

The opinion is freely expressed that it is due greatly to this class of men that California is now a laggard in the onward march of home improvement and industrial progress; that she sees her raw products depart from her shores to be returned to her manufactured, and, with fourfold value, distributed to her citizens; that she has a population with far too large a proportion of unskilled laborers; that her home enterprises are few and her natural advantages overlooked. These men, who count their fortunes by tens of millions, have waxed fat by inanition. They have remained idle while others worked for them. No single step of progress has been due to them, but rather they have clogged the wheels and barred the way with that greatest of all commercial obstacles—high interest.

Better that they should go with their millions than to stay here and increase their store at the expense of still greater delay in our advancement toward that period when our home manufactures will give employment to as many more people as there are here. We have no sympathy with those who feel that in the going of any one of this class of men, the State or community is a loser. There will always be plenty of money lenders in California, and the absence of a few of them will do no great or lasting harm.

Saleswomen vs. Salesmen.

As perhaps you know, dear to the female heart, is the latest style. Even a plain country woman does not wish to be always behind the times; so once in a while, when the crop is good, when the hens lay well, and eggs bring a good price, and turkeys are high, I venture to your grand city for an outing.

I go down to some of the big stores, and how is it? Do the clerks stare at me? Do they make game of my hat? Are they quite shocked at my dress? If they are they don't say so. They hop and skip and jump about, they pull down and unfold and spread out, as if I were Mrs. Nob Hill herself.

But just go up stairs with me into some of the rooms where ladies are employed. As I open the noiseless door on the heavy carpets, they look up. One glance is sufficient. From the country! They see it at once. They read it in every article I wear. Very well. I stand a few moments waiting, then some one saunters up to learn what I want. Perhaps it is a cloak. I explain that I wish such and such a style. "Really that is quite out of date. We do not keep them now. No one wears them; these are so much more stylish;" and she slips into a garment, and walks up and down before the long mirror that you may see how well she looks in it. Quite true, but I wouldn't. If still I insist in my preference, she finds one of that kind; I can take it or leave it; she is not going to pull over a lot of cloaks to please an old woman from the country.

Foolish girl! Do you not know that such a one is more apt to purchase? Do you not know that because of the shortness of her stay she must not waste her hours in simply looking; but that she really wishes he ar.icle called for? Do you not know that if you would succeed you must make your services of value to your employer?

So I turn away, and find another cloak store, where the clerks are men. They find out what I want. At once they fall in with my ideas. They praise that particular style, and if it don't fit, if the sleeves are too short or too long, if there is too much trimming, or not enough, they find another and another, until I am suited.

Oh, girls, girls! When will you learn that if you would have business opportunities open to you that you must fit yourself for them? Do not complain that men take the places which belong to you. When employers find that you can make more sales than men can, you will surely have the opportunity.—*Mrs. R. in Rural Press.*

Historical Prize Essay.

Dr. Walter Lindley, of the Board of Education of Los Angeles, and a prominent member of the A. O. U. W. in Los Angeles, offers two prizes for essays entitled "A History of the Public Schools of Los Angeles." The first prize is a copy of the last edition of Webster's Unabridged Dictionary; the second prize is a copy of J. G. Holland's complete poetical works. Competition open to all members of the senior class of the Los Angeles High School. The object to be kept in view in preparing the essay shall be to give, first, the dates and some account of the establishment of public schools in Los Angeles; second, the names of principals, teachers in the High School, superintendents and school officers, with the dates during which each served; third, the manner by which the funds have been and are at present raised to support our public schools; fourth, the length of time required for the average child to commence in our primary department and graduate from our High School, and the time said pupil would be in each grade; fifth, any other information pertaining to the subject that the writer may think of interest.

The essay when printed shall not occupy more than three or less than one and one-half columns in the Los Angeles *Evening Express*. Each competitor must select some number, word or motto by which to distinguish his essay, which shall be written at the top of the first page. The essay shall be sealed in an envelop without the name of the writer. The name of the author, together with the motto, word or number, shall be written on a card and sealed in another envelope. Both of these envelopes shall be handed to Mrs. C. B. Jones, City Superintendent, by the 15th of May, 1881. The superintendent shall immediately hand the envelopes containing the essays to the Committee on Award. After said committee shall have decided on the comparative merits of the essays the superintendent will give them the envelopes containing the names of the authors. The names of the successful competitors shall be announced and prizes awarded on the evening of the graduation exercises of the High School.

Points of merit: 1. Accuracy and fullness of historical statements; 2. Grammar; 3. Rhetoric; 4. Orthography; 5. Penmanship.

Committee of Award—Frank A. Gibson, D. M. Berry, M. Kremer.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and WATCHMAN together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞ For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

San Francisco, - March 15, 1881.

Be Steadfast.

It is becoming a matter of frequent occurrence that some person dies who once belonged to the Workmen, but carelessly allowed his standing to become impaired, and naturally enough it is almost invariably the case that the family of such person is left in utter destitution. Very few prudent and careful men have so little regard for their families that once they find so easy a way to protect them as is furnished by the A. O. U. W., will neglect the means to secure so desirable an end. Indeed, it seems strange that under ordinary circumstances every one will do it. But the world is filled with all sorts of people who do all sorts of queer and absurd things, and until human nature changes we may expect in the future what has been in the past, and yet we do not feel that our duty to our common humanity would be fully performed did we fail to urge over and over again that every man who can, should join the Workmen and join for life. The cost of maintaining membership is so little that a man must be very poor indeed who cannot afford it. Seven cents a day will fully cover the expenditure—less than the indulgence of one daily cigar or two glasses of beer; less than the annual taxes on $2,000 worth of real property, to say nothing of interest on money invested, insurance, repairs, etc. How grateful we would be to the benefactor who should generously donate to us a house and lot worth $2,000. How carefully we would look after it and keep it free from tax leins, mortgages, and all other incumbrances if such were the conditions precedent for maintaining title. Why then should something better, safer and less costly by far, be neglected. Think of this, ye heedless ones, and hold fast to that which is good. Don't let so important a matter be left wholly to others to look after either, but look after it yourself. Go to the Lodge and pay your dues and assessments in person; and not only do this, but stay and join in those proceedings without which our beneficent Order would crumble to ashes in a day.

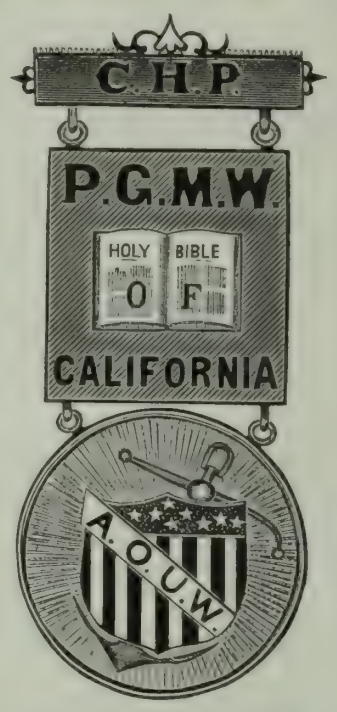
THERE never has been in the history of our Order when there was so large an increase of membership as at the present time. This growth is not made in the formation of new Lodges, or in any particular Lodge, but seems to be a general advance along the whole line, both country and city. One very favorable feature connected therewith is the large percentage of young men. In several instances we notice that young men just attaining their majority have joined a Lodge of which their father had been a member for years.

Put up the Safeguards.

The bane of most societies is a too frequent change in the laws by which they are governed, thus begetting a suspicion of instability and unreliability. Especially is this true in relation to changes in the fundamental laws, as embodied in their Constitutions. Hence, it has become a general practice to provide in these instruments against easy alteration. A two-third's vote of the representative body is usually required to sanction any alterations or amendment; but in many cases even this is not a sufficient safeguard against unprofitable and disastrous changes. When a society is new and occupies a field before untried, frequent and radical changes in its governmental machinery are almost invariably necessary, for man was not endowed by the Creator with wisdom sufficient to do any perfect work on the first effort. Everything, almost, must be learned in the dear school of experience. In such cases the two-thirds rule seems as wise as any that can be adopted. But when experience has proven a general plan of government successful, common prudence dictates that it be put beyond the power of even two-thirds of a body to change.

Time was when the A. O. U. W. appeared but a hopeless venture in a new and untrodden field. With no precedent to guide and no great mind to direct, it appears strange, indeed, that it should ever have become the grand success it has. During its years of progress, having to force its way along the pathway of experiment, its laws, of necessity, had to be made easy of alteration; but the society may now be safely said to have gone by the period of experiment. What now is most needed is to be assured of permanency of laws. To secure this, the Supreme Lodge, at its next session, should set the example by providing that no alteration or amendment to the Constitution or General Laws of the Order, passed in the future by that body, shall become operative till ratified by at least two-thirds of the Grand Lodges. This is desirable not only for the purpose before stated, but also to ensure such changes only as will meet with the approval of a large majority of the brotherhood. A law that does not meet with popular approval had better never be passed, for such a law will not be faithfully executed, and tends directly to bring all laws into contempt. Though the Supreme Lodge legislate ever so wisely, there will always be plenty to indulge in grumblings or unfriendly criticism, if nothing worse. All this can in the future be avoided by such a measure as is here proposed. Heretofore our steps seem to have been guided almost by inspiration. Let us now make sure that the glorious temple which has been reared beneath our hands be not left at the mercy of the destroyer.

AN exchange says: The secret of California's success lies in the fact that her membership is made up of such material as has given the Order a place high in public esteem, men among whom there are not only harmonious action and a unity of purpose, but also an intensity of enthusiasm. This beautiful star of the west beams with the greatest brilliancy of any in our constellation. May it ever increase. [It can also be said that another reason for our success is that we have been fortunate in securing for Grand Lodge officers men of talent, tact and foresight, and thoroughly imbued with the interest of the Order.—EDS. WATCHMAN.]



SISTER JULIA MORRIS, P. W. Sister of Honor of Silver Spray, No. 3, was married to S. Cohn, Esq., on Sunday, March 6th, at the residence of the bride's parents, 610 Grove St. The service was performed by Rabbi Vidaver. Sixty couple sat down to the feast that was recherche in every respect. Bro. Morris, father of the bride, is a member of Magnolia Lodge of Workmen, as also of Silver Spray.

MRS. E. J. BUTLER, of Eureka, Nev., took the Degree of Honor of Silver Spray, No. 3, Feb. 28th. Mrs. Butler intends to start a Lodge of Degree of Honor in Eureka. Her husband, Bro. E. J. Butler, is Financier of Alpha, No. 1. We hear that this Lodge has nearly 100 members, and is prospering finely.

THE January number of the PACIFIC STATES WATCHMAN was a particularly excellent one. Containing a large quantity of choice reading matter, embellished with well-executed illustrations, it yet set before its readers a great deal of the news of the Order. We congratulate our contemporary on its success.—*Missouri Overseer.*

The Souvenir Presented to Bro. Taylor.

We will redeem a promise made the readers of the WATCHMAN, in a late issue by presenting, this week, an engraving of the elegant badge presented to Clay W. Taylor, P. G. M. W., at the reception lately given to the Grand Lodge of the A. O. U. W. in this city. Our engraving, made from a photograph of the original, is slightly less in size than the badge, though in all respects is a faithful representation of that magnificent jewel. The uppermost portion of the engraving shows a solid gold pin for fastening the badge to the coat. This pin is oblong in shape, and upon its face there appears, in relief, the letters "C. H. P." Below this is suspended a square field, with an enameled border in purple. Upon the upper and lower borders, respectively, there are inscribed, in raised letters, "P. G. M. W," and "CALIFORNIA." In the center of the field is represented the open volume of Holy Writ, bearing the words "Holy Bible, O. F." Below this hangs a solid gold medal, done in relief, containing, on its obverse, the American shield, the stars of which are diamonds, an anchor, and the legend, A. O. U. W.; the whole surrounded by a system of rays, also in relief.

Outline of Badge Presented Clay. W. Taylor.

The reverse side of the badge, not shown in the engraving, contains the inscription, "Clay Webster Taylor, Feb. 3d, 1881; C. H. P., P. G. M. W. of California, A. O. U. W."

This beautiful specimen of the jeweler's and engraver's handiwork was made at the establishment of W. K. Vanderslice & Co., No. 136 Sutter street.

The badge is superb in all its appointments, and aside from the interest of the noble Order which it represents, it is a just tribute to the skill of our local craftsmen in all that so essentially appertains to the fine arts.

H. H. PALMER, Grand Recorder of Illinois, has sent us his report for the past year. There have been 14 assessments during the year; 47 death losses of $2,000 each have been paid to beneficiaries. The receipts of the office have been as follows: Beneficiary fund, $95,191.35; general fund, $12,287.01. Nineteen hundred beneficiary certificates were issued during the year, while 28 certificates have been refused by the Grand Master.

THE Relief Committee, by resolution, have appointed the following brothers to be known as the Employment Committee: C. C. Gilmore, Chairman, 11 and 13 Beale; H. S. Dearborn, 605 Linden avenue; G. W. Lamont, 15 Second avenue; J. D. Nield, room 9, 326 Montgomery; A. V. Thompson, 209 Fair Oak street.

ONE of the Lodges in the East has had cabinet-size photographs taken of all their officers, past and present, and had them framed and hung upon the walls of the Lodge-room.

VALLEY, No. 30, will celebrate its anniversary by a grand ball at Union hall, on April 8th. As in the past, we may expect a very enjoyable affair.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

A GREAT number of orders for rituals remain unfilled for the reason that no rituals are on hand to fill them. In a few days a fresh supply is expected.

A MEMBER suspended from the Order should not be reported as *expelled*. Expulsion only results as a penalty on conviction for some offense under the laws of the Order.

OUR Lodges should bear in mind that when a member has left us and joined *another jurisdiction* the money he leaves behind in the beneficiary fund should not be forwarded to the Lodge he joins but sent to the Grand Recorder of this jurisdiction instead.

WHENEVER a member who stands temporarily suspended desires reinstatment he should be required to pay not only those assessments which have become delinquent but also any others which may be pending in the Lodge and not delinquent. Frequently members are reinstated and suspended on the same evening. This should not be allowed.

EVERY Lodge should have a copy of Robert's Rules of Order, and very few by-laws. About half a dozen sections is all that a Lodge really needs in the way of special laws, the constitution being sufficiently comprehensive to meet nearly every case that cannot as well be disposed of by resolution as in any other manner, and then in such case if a change be needed the approval of the committee on Laws and Supervisions would not be required.

NOTWITHSTANDING the direction repeated every month on assessment notices sent to Lodges, more than half the money orders received at this office are made payable at the San Francisco office, instead of "Station B., San Francisco." So far as our convenience is concerned they might about as well be made payable in Oakland. Patience has ceased to be a virtue. Hereafter officers remitting orders payable on the wrong office may expect to see them returned for correction.

NOTWITHSTANDING the instructions of the Grand Master many remittances continue to be made without the required remittance report accompanying. I am compelled to insist on these reports before giving credit for moneys received, for I *must* have them as vouchers for the cash entries on my books. It is not left a matter of choice with this office. So please don't send any money without the remittance report at the same time, and *in the same package.*

WE have made an arrangement with Wells, Fargo & Co., by which the great bulk of our matter will go through to its destination by express. On supplies ordered from this office the cost of transportation will be paid by the Grand Lodge and charged into the price of the articles furnished. This will make quite a saving, not only to the Grand Lodge but to the subordinate Lodges also, and especially as hereafter all papers on which there is any writing except mere direction will be charged first-class rates if passing through the mails.

FROM the number reported as having been granted *final* cards, where *clearance* cards are meant, I am forced to conclude that very many Recorders do not read the WATCHMAN or reading do not profit thereby. A final card severs a member's connection with the Order *altogether*, while a clearance card merely gives the privilege to join some other Lodge within the time specified by the card. We have no traveling cards nor use for any, as any one possessed of the semi-annual pass-word and the signs, can visit any Lodge of the Order no matter where located.

THE following letter from the Treasurer of the committee having in charge the excursion of the Alameda county Lodges to San Jose, speaks for itself:

"SAN FRANCISCO, February 16, 1881.

H. G. PRATT, GRAND RECORDER.—*Dear Sir and Brother:*—Enclosed please find $15 for the Upchurch fund, being balance on hand after paying expenses of the excursion of the A. O. U. W. to San Jose. By order of the committee.

H. L. FARRIER, Treas. of Com."

The total contribution of this jurisdiction now amounts to $909.70 and should be $1,000.

If those Lodges which have not yet contributed would do so the amount needed would be fully realized.

It is with much pleasure in this connection that I am able to lay the following letter from Bro. Upchurch before the readers of the WATCHMAN:

"SEDALIA, Mo., February 21, 1881.

H. G. PRATT, GRAND RECORDER.—*Dear Sir and Bro:*—I send you to-day by mail my photo. as a small token of my appreciation of your kind interest in my behalf.

I also wish to return my humble thanks to the officers and members of the Grand Lodge for their kind remembrance as expressed in telegram of the 2d inst., and through you I wish to return my humble gratitude to the members generally for their kind and liberal contributions to the Upchurch fund. It would afford me great pleasure to meet and thank them personally, but as that is out of the question I trust that they will accept this as an expression of my appreciation of their noble efforts in creating a fund to relieve me in my declining years. I can assure you that such kindness has made an impression on my heart that can never be erased. May the great Supreme Master Workman above bless and abundantly prosper you both as an Order and as individuals. Fraternally yours in C. H. and P.

J. J. UPCHURCH."

OFFICE OF GRAND MASTER WORKMAN,
A. O. U. W. STATE OF CALIFORNIA,
San Francisco, February 28, 1881.

H. G. PRATT, GRAND RECORDER.—*Dear Sir and Brother:*—It is very evident that Lodges do not fully comprehend the law in relation to the payment to the Grand Recorder, of back beneficiary assessments, and that many of them have in their treasuries amounts of moneys which should be in the treasury of the Grand Lodge. You will therefore prepare a plain and concise statement of the law upon the subject, and send it to the subordinate Lodges, together with a request that their books be properly examined in this particular, and that all surplus moneys in said beneficiary fund from this cause, be forwarded to you, to be used toward the payment of losses by death in this jurisdiction.

Fraternally yours, in C. H. and P.

WM. H. BARNES, G. M. W.

OFFICE OF GRAND RECORDER, A. O. U. W. OF CAL., March 5, 1881.

To all subordinate Lodges in this jurisdiction:

In obedience to the foregoing command I have the honor to submit the following:

ART. XIII, Sec. 9, Grand Lodge Constitution of California, provides that—

"The Financier shall upon receipt of arrearages from beneficiary assessments as provided in Sections 10, 11, 12 and 13 of this article, pay the same into the beneficiary fund (said amount from arrearages to be forwarded to the Grand Recorder, *upon the first order on said fund thereafter.* * * *.")

The same requirement is found in the Constitution of the Supreme Lodge, in which the beneficiary laws governing the whole Order are prescribed. Also in Nos. 256, 273, 274, 276, 279 and 280 of the Digest.

It seems proper to explain that "arrearages" do not include any moneys paid on an assessment that may have been levied, but which is not delinquent in the Lodge at the time of reinstatement, and such payment (if any), is not to be reckoned as "back beneficiary," nor forwarded as such.

The law contemplates that a member standing suspended for any period less than six months, shall pay on reinstatement into the beneficiary fund, just the same amount that he would have paid had he remained in good standing. Arrearages, then, are what he would have paid *up to the first of the month in which he is reinstated.* Payment of a pending assessment, or assessments, by such member is to be accounted the same as if paid by a member who had not been suspended.

When a member is reinstated who stood suspended from the Order for six months' arrearages of beneficiary assessments or dues, the case is different. He must pay into the Beneficiary Fund what he would have paid had he remained in good standing up to the time of his *suspension from the Order*, not exceeding eight dollars. (See Grand Lodge Constitution, Article XIII, Sec. 13, and supplement, page 71.) This is the amount of his arrearages of assessments, or back beneficiary fund, and is the amount to be forwarded *as such*, on the next remittance of the beneficiary fund by his Lodge. He must pay in addition one dollar to remain in the Lodge, for the next assessment that may be levied after his reinstatement, but *not* for any that may be pending at the time of such reinstatement.

Moneys belonging to the Beneficiary Fund must in no case be confounded or mixed with moneys belonging to the General Fund. No. 267 of the Digest reads as follows:

"The Beneficiary Funds shall be kept sacred for the purpose designated in the laws of the Order, and *shall only be used in the payment of death assessments.*"

The foregoing being the requirements of the laws in relation to the remittance of "Back Beneficiary Assessments," you and each of you are hereby requested to make special examination of your books with reference thereto, and forward any surplus moneys that may be in your respective treasuries accordingly.

Fraternally, in C. H. & P.,

H. G. PRATT, Grand Recorder.

A Model Lodge.

We suppose the question of Lodge attendance will always be one of those bugbears that will arise and vex the members who are punctual in their duties. But the question really lies with the Lodge itself, or, more strictly speaking, with a few energetic members. We have received letters from different Lodges in this jurisdiction, and they say, as a rule, they find no difficulty in securing the attendance of the members. Now, why is this? Simply that a few earnest and thoughtful brothers, seeing the way things were drifting, have taken the bull by the horns, so to speak, and inaugurated a system whereby the Lodge-room was made a place of peace, rest and true social enjoyment. This is the prime object. Bring out the social spirit of the members. Minister to the feeling which actuates nearly every man, and the Lodge will take on new life and activity.

We were interested in reading in the fraternal department of the New York *Era* the means adopted by a Lodge of the K. of P. for making their meetings interesting. Now, what was done by this Lodge can also be done by every Workman Lodge. The members of the Lodge cast lots, and those selected are required to either read a paper, an essay, declaim a piece, or deliver a speech or oration at a meeting of the Lodge. This exercise is purely voluntary, yet the members have been requested to take part therein in such a brotherly and persuasive way that hardly any one feels like refusing. The one chosen, however, is at liberty to make his own selection as to the character of the exercise, and no criticism is allowed that would tend to discourage any future effort.

In addition to this there has been organized, of the members of the Lodge, a history class, who spend from 30 to 60 minutes each night after closing, in reading, reciting, asking and answering questions. To this exercise the entire membership is invited, either as participants or spectators.

Now here is something tangible—something that each Lodge can take hold of and develop as they may. It will be hardest at first to get the plan started. Some one or two members will have to lay their heads together, and be also possessed of great patience and perseverance, before there will begin to bear fruit. Perhaps it may not be successful in every Lodge, but at least there can be no harm in trying. Every Lodge owes it to itself to make its meetings attractive, and we give this hoping to hear that it may be adopted, or something like it. Honest, steady perseverance will accomplish wonders. Let the Lodge-room be made a place of pleasant rest, recreation, and instruction—a place where fraternity with its attendant blessings will find full and free scope. Let it be a school where can be learned all those attributes that will make man feel better toward his fellow-man; and if ever trial and tribulation should fall upon the A. O. U. W., the members thereof will have been educated in their Lodge-room to such a standard as will cause them to stand by each other as the mother does by her child.

Ourselves.

Those connected with the publication of the WATCHMAN feel proud of the many kind words and the cordial support which the members of the A. O. U. W. have extended to it. It has always been the endeavor to so conduct it as to merit the confidence and respect of the brotherhood. That we have succeeded in our efforts is evident by the freely expressed words of praise and the financial support tendered by the brethren.

It is our highest aim to make the WATCHMAN worthy of the great Order of which it is the representative. Its course shall ever be onward and upward, and we hesitate not to guarantee a due return to all who will assist in extending its usefulness. It is necessary that a live journal should be issued in the Order's interests. Ours is an Order that should be prominently brought before the public, its history chronicled, and the many items of events occurring in the Lodges set forth. To more fully do this we invite correspondence from all brothers as to matters happening in their Lodges, and of subjects of benefit to the Order.

In the organization of new Lodges, we will furnish Deputies with back copies containing the "Aims and Objects of the Order." They can thus be saved considerable trouble in explaining to new members what the Order is organized for. Then the paper will be likely to be distributed among their friends, other persons will be attracted to the Order, and the result will be an increased membership in the Lodge.

We also occasionally send sample copies to brothers whom we think would like to read the paper, and would also like to know what the Order is doing. To all such, if they do not feel at liberty of subscribing, we would be pleased to have them give the paper to other brothers, or outsiders who would likely become members of the Order.

Where we have no authorized agent, and any brother would like to act as such, we will give liberal inducements for his time and trouble. All communications should be addressed to the WATCHMAN Publishing Co., 202 Sansome St., San Francisco, Cal.

News of the Order.

We present a brief epitome of the most important transactions of the various Grand Lodges. It will give the reader an idea of what the A. O. U. W. is doing in other parts of the country:

New York Grand Lodge.

The annual session of the Grand Lodge of New York was held at Lockport, N. Y., Feb. 1st. The report of Grand Master Case states that there have been 23 new Lodges instituted since the last annual session, and 3,074 new members have joined the Order during 1880. The number of beneficiary certificates issued up to Dec. 31, 1880, is 17,030. "The growth of the Order has not been so great as during the two previous years, owing much to the absorbing interest of the late presidential canvass, affecting all classes and industries; and moreover the early enthusiasm attendant upon the Order is in a measure subsiding, and in the future we may expect a more moderate, but by far a much healthier growth, more to be desired." The Grand Master has the following to say on the State Medical Examiner question:

Our assessment cards for the current year show 108 deaths. The average length of membership of the deceased is a little over two years. The average age about 39 years. The largest percentage of gains were made in 1878, and the largest death rate occurs among those who joined in 1879. The membership during the past year have been startled by the frequent reports of death by consumption, which seemed, considering the short period of membership of some who have thus died, out of all proportion to other assigned causes.

This fact has led me to examine, to a certain extent, some of the Medical Examiners' reports in this class of cases on file in the Grand Recorder's office. There are, in fact, 26 cases of death by this disease reported, how many more it is not easy to tell. This takes from our pockets $52,000—if honestly, we do not object, if otherwise, we protest. With a competent and skillful physician at the head of this department, well paid, clothed with ample authority to make such changes in form and manner of examinations as his experience might suggest to be wise and prudent, with full authority to reject applicants and remove for cause, subordinate Lodge Medical Examiners, I most emphatically believe, would save this Grand Jurisdiction tens of thousands of dollars annually.

This part of the report was referred to a special committee on Medical Examinations, which presented two reports, the majority one being that each subordinate Lodge shall appoint or elect a standing committee of three to consult with the Medical Examiner on all applications for membership prior to same being presented to the Lodge, and they shall approve or disapprove of the same before it shall be presented. The minority report was in favor of enacting a law creating the office of State Medical Examiner. The *Censor* states that the consideration of these reports elicited the most thorough discussion of the session, and, after some amendments, the minority report was adopted. Representatives to the Supreme Lodge, E. B. Travis; Edwin Elmore and E. M. Clark.

Pennsylvania Grand Lodge.

The 11th annual session of the Grand Lodge of Pennsylvania was held in Philadelphia, Tuesday, Jan. 11th. The number of representatives present was 137.

From the Grand Recorder's report the following is taken: During the year 73 deaths have been reported, requiring 15 assessments to be made. The amount collected on the 15 assessments was $151,311, which, with the balance on hand Dec. 1st, 1879, $2,959, makes a grand total of $154,270. There was paid to the beneficiaries of our Order during the year the sum of $146,000; refunded by order of the Grand Master Workman, $14, and $12 advance beneficiary, which makes a total of $146,020, which leaves a balance in the hands of the Grand Recorder of $8,244.

The Grand Recorder also reports that "according to the instructions of the Grand Lodge, at the annual session held in Meadville, January, 1880, the balance due the Supreme Lodge on yellow fever donations has been paid."

The representatives to the Supreme Lodge are J. M. Stevenson, J. H. Lenhardt and Samuel B. Myers.

An amendment to the Constitution providing for Grand Medical Directors was, after a lengthy discussion, lost.

Amendments regulating the manner of electing Grand Lodge officers were adopted. The officers of the Grand Lodge are to be voted for by the subordinate Lodges at a stated meeting, the returns to be forwarded to the Committee on Returns and Credentials, who shall count them at least one week before the assembling of the Grand Lodge and declare the result. In a case where there is no majority received by any candidate, an election will then be held by the Grand body in open Lodge.

Grand Lodge of Ohio.

The Grand Lodge of Ohio met at Cleveland, Tuesday, Feb. 8th. The Grand Recorder's report showed the following receipts and expenditures for the past year: Amount received by Grand Recorder, $59,671; amount paid on death losses, $55,284.50; number of Lodges, 68; number of members, 2,872.

The Grand Lodge abolished the Board of Grand Medical Inspectors, and appointed one officer, to be known as the Grand Medical Inspector. This seems to be better than the old rule, as by having one officer, if there should arise any difficulties, they can be properly placed, and the Inspector held accountable. He must render an account of his stewardship at each session of the Grand Lodge, or oftener, if called upon by the Grand Master to do so.

The representatives to the Supreme Lodge are Judge J. S. Brunaugh, Hon. M. J. Swadener and Hon. S. B. Berry. Cincinnati was selected as the next place of meeting.

Grand Lodge of Minnesota.

A correspondent of the *National Bulletin* writes that the Grand Lodge of Minnesota convened in Winona, Feb. 1st, and remained in session three days, with about 100 delegates in attendance. There were but 52 of the 69 Lodges represented, owing to a violent snow-storm prevailing, which effectually blockaded several of the railroads. The Grand Master Workman reported having instituted 11 new Lodges and initiating 262 charter members within the past year.

The following recommendations of Grand Master Bradly were adopted: A continuance of the medical director system; biennial sessions of the Grand Lodge; annual election of officers of subordinate Lodges; a reduction in the minimum for initiation fees; weekly or semi-monthly meetings of Lodges, at their own option; reducing the standing committees to three, and placing them upon the pay roll; a basis of representation in proportion to taxation.

Maryland Grand Lodge.

The Grand Lodge of the Ancient Order of United Workmen of Maryland, met in the city of Baltimore, Jan. 11, 1881. From the report of the Grand Master Workman we learn that the Order in Maryland has increased since last session in a very satisfactory degree, and is in a flourishing condition. The Grand Lodge is on a solid financial basis. A resolution was passed looking to the consolidation of Maryland and West Virginia into one Grand Jurisdiction, and attaching Delaware and Virginia. In the latter States there are as yet no Lodges established. Among the measures brought before the Grand Lodge was a proposition to secure the services of a Grand Lecturer and competent Deputies. The representatives to the Supreme Lodge are Samuel Eccles, Jr., George N. Mowen and J. S. Keller. The next session will be held on the second Tuesday in January, 1882, in Baltimore.

Kentucky Grand Lodge.

The eighth annual session of the Grand Lodge of Kentucky was held at Louisville, Tuesday, Jan. 25th. The membership is 1,561; number of deaths, 20; amount paid to the heirs, $44,000. Biennial sessions will be held hereafter, Covington being chosen as the next place of meeting, which will be Feb. 4, 1882. It was decided that the Financier's receipts of the payments were binding, even if the Financier had failed to enter said amount on the books of the Lodge, and that payments be made to the Financier at any place.

The representatives to the Supreme Lodge are G. R. Keller, A. M. Sea and C. Shryock. There were about 200 members of the Order in attendance upon the Grand Lodge.

Michigan Grand Lodge.

The Grand Lodge, A. O. U. W. met in Detroit, Michigan, Feb. 1st. The report of Grand Master Workman Sessions for the year shows the number of deaths to be 24, on which the sum of $48,000 had been paid as death rates, which was promptly paid, and the members have increased over 1,000. He advised the appointment of a State Medical Examiner, and some way of collecting assessments so that too many will not come together. Grand Recorder Wilson's report indorsed the suggestion of a State Medical Director, and stated that five of last year's losses show evidence sufficient to cause their rejection by a medical supervisor. The question of average age was discussed, showing that as the membership increased the average also increased, when the reverse should be the case, if they would keep their assessments down to the ratio of mortality in insured life. In that State there are now 81 Lodges, with a total of 5,072 members in the jurisdiction of the Lodge. The receipts of the general fund during the year were a little over $6,700, and disbursements about $4,300. The beneficial fund receipts were $43,874, and disbursements $42,000. The present membership represents an insurance of $10,336,000. The expense of managing the entire business of the Order has been 74 cents for each $2,000 of insurance.

IN the Feb. 15th number of the PACIFIC STATES WATCHMAN, organ of the A. O. U. W., appears a portrait and sketch of the new Grand Master Workman, W. H. Barnes, of San Francisco, also a digest of the proceedings of the fourth annual session of the Grand Lodge, and much other matter of interest. As a most able and enterprising representative of the interests of the Order the WATCHMAN is deserving of liberal patronage, and every member who would keep himself well informed concerning the progress and workings of the fraternity should forward his name as a subscriber.—*Castroville Argus.*

FURNITURE.

New and second-hand at auction prices, at H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

WOMEN AS INVENTORS.—It is often loosely said by men that women never invent anything. But women can be, and are, inventors, as is shown by the report of the Patent office for the past year, when more than 70 patents were granted to women, an increase of 10 over the previous year. Most of the patents are for household articles, with which they are most familiar, and in which improvements would be suggested by daily use. The feminine mind is, as a rule, quicker than the masculine mind; it takes hints, and sees defects which would escape the average man's attention, particularly in all domestic utensils. The beginning of everything is an idea; but they who have ideas are often incapable of giving them material form. Women frequently carry the germs of patents in their heads, and cause some rude machine containing the germ to be constructed which serves their purpose. If they were men, they would, in all likelihood, have applied for patents, and, in a proportion of cases, have obtained them. But woman seldom thinks of getting any profit out of her ideas or from her ordinary labor; her whole and only aim being to lessen the trouble and friction of her work. In many of the farm-houses of the country, especially in those of New England, divers improvements have been made in culinary and other utensils through the suggestions of women—suggestions that should have been patented. If women would fix their minds to inventions, it is entirely probable that they would distinguish themselves in that line far more than they have ever done hitherto.—*N. Y. Times.*

Congress Springs.

It will not be very long now before city people will begin to think of going to the country. The lengthening of the days, and the sprouting of the grass on the hills begin already to make the person, who is usually confined to cobble-stones and asphalt for his walks, think of pleasanter places. It is not always necessary, either, to go long distances for attractive scenery and pleasant surroundings. The writer last summer spent a number of enjoyable days at Congress Springs, in the foothills of the Santa Cruz mountains, Santa Clara county, a place only three hours' ride from San Francisco. Here the hills are wooded, the canyons have flowing water, and the locality is warm and sunny, sheltered as it is from the sea fogs and winds. There is good fishing in the creeks, and good quail shooting in the hills near by; and by going eight or ten miles back, one may get a shot at a deer. The waters of the springs from which the place derives its name, are similar in composition and effect to the famous Congress Springs of the East. Mr. Sage, the proprietor of the hotel, has owned the place some years, and understands how to make his guests comfortable. Prices are reasonable—$12 to $14 per week. There are many pleasant walks and drives in the vicinity, and we are assured that any visitor can enjoy himself for a week or so very satisfactorily. The season at these springs usually opens early.

Sensible Socials.

It is to be regretted that people are not more social; that the long winter evenings are not improved more generally in our country villages by getting acquainted with our neighbors, by exchanging thoughts with them, and each adding something to the common store. One great objection to the more frequent exchange of hospitalities is the amount of labor it adds to the burdens of the housekeeper—the tired woman who would really be refreshed and brightened by intercourse with other minds; who would be lifted out of the tiresome routine of her every-day work into an almost ideal region. But if with poor help, or possibly without any, she must be perplexed by the thought of elaborate entertainment; she cannot enter with any zest or enjoyment into the visit, and so the chief good to be derived from it is at once done away with. It is not right that so much should be thought necessary as is almost invariably offered to guests that a tea should not be considered complete without a variety of meats, half a dozen kinds of cake, and other things accordingly. An experiment tried in one of the large villages in this State is worthy of being repeated elsewhere. A number of ladies and gentlemen deliberated upon this subject, and at length resolved to see what could be done. There were about 12 in all, and they agreed to meet once in two weeks at each other's houses during the winter. They were to come to tea and spend the evening in reading, music or conversation, just as each hostess should decree; a simple supper was to be served. The bill of fare agreed upon was white or brown bread, tea or coffee (not both), one kind of cold meat, one kind of cake, cheese or pickles, and some canned fruit; each lady pledging herself not to offer anything more. The result was a series of æsthetic teas, which were a delight to those who participated in them, and proved clearly the possibility of being hospitable without great weariness of flesh.—*Exchange.*

A NEW STYLE OF CARD FOR WOOLEN MILLS.—A new invention makes the teeth of cards a little more than one-half the ordinary length. It is claimed by this that so much stripping is avoided, and that the wire does not retain the dirt and fibers as any other teeth do; that the ordinary card teeth are longer than is actually necessary to the carding operation, which is effected by the extreme end of the teeth. The new process uses steel wire, tempered and hardened and flattened, or needle pointed wire; the cards seldom requiring grinding, are very durable, etc. The invention is of English origin.

CARVING isn't fun. A young man was invited to carve a turkey at a dinner recently, and before the knife was finally taken away from him, he had upset a glass of water, wrenched his shoulder, shot the bird across the table into a lady's lap and nearly jabbed a man's eye out, and it wasn't a tough bird either.

WHY has a man lost all his teeth when one is extracted? Because he is a toothless man.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Humboldt.

EDITORS WATCHMAN:—There will be more accessions to Bay City Lodge, No. 111, to report to the Grand Recorder before this month is out. Every Workman here is pleased at the reports of Grand officers made at the late session. Representative Watson gave us an elaborate review of the work of the Grand Lodge on his return, and Past Representative Bell added a pleasing account of his experiences among the Workmen of San Francisco. I regret to have to report the death of Joseph B. Kimball (not a member), aged 25 years, a Humboldter by birth, and son of a Master Workman of Bay City Lodge. He was a most exemplary young man. There is a prospect of several accessions to our Lodge from the neighborhood of Ferndale before many months, and that application may be made for a Lodge at that point before the year is out.—G.

Magnolia, 6, D. of H.

A very enthusiastic Lodge of the Degree of Honor was instituted in San Jose on Tuesday evening, March 1st, by Wm. H. Barnes, G. M. W., with 99 charter members. The object of this degree is to interest the wives and daughters of Master Workmen in the success of the A. O. U. W. As the Degree of Honor is purely a ladies' Lodge, they filled its principal offices. The officers for the ensuing term are: Mrs. Dr. J. S. Potts, W. S. H; Mrs. J. H. Baird, S. H.; Mrs. Archy McDonald, S. C.; Mrs. A. P. Murgotten, S. S.; Mrs. H. Rich, S. T.; Mrs. C. W. Clark, S. W.; S. F. Moreland, F. W.; P. V. Baker, O. W.; A. P. Murgotten, 1st A. to W. S. H.; T. H. Cordell, 2d A. to W. S. H.; Mrs. G. E. Gallup, 1st M. H. to S. H.; Mrs. John Manzer, 2d M. H. to S. H.; Mrs. Geo. Lendrum, P. W. S. H. Finance Committee: Mrs. T. H. Cordell, Mrs. J. C. Morris and W. L. Coombs. Committee on By-Laws: S. J. Hinds, Geo. Featherston and C. D. Wright. Committee on Good of the Order: Mrs. J. W. Lowery, Miss Ella Baird, Miss J. M. Pitman, F. J. Saxe and Wm. Osterman. The Lodge meets at Champion hall on the first and third Tuesday evenings of each month. All Master Workmen in good standing, their wives, sisters, daughters and mothers are eligible to membership. A pleasant feature of the occasion was the reading of a congratulatory letter from Silver Spray Lodge, No. 3, of San Francisco, which was received with loud applause. The installing officer was assisted by P. M. W's, M. S. Levy and A. P. Murgotten.

Mt. Diablo, 91.

EDITORS WATCHMAN:—Our Lodge is the largest in the county. It has between 40 and 50 members, and several applications handed in at our last meeting. I must say that the members of the A. O. U. W. in this Lodge are all splendid men. We meet on Friday evening of each week, and the members generally take interest and attend the meetings. Our Worthy Master is always on hand, and has a good word to say in favor of the Order. C. Sharp, M. W., and W. S. Urmy, Recorder, instead of M. Kirsch, M. W., and E. S. Moore Recorder.—J. M. WILSON, D. D. G. M. [The change will be made in our next issue. The first form has been printed.—EDS. WATCHMAN.]

Stockton, 23.

The first grand promenade concert and literary entertainment of Stockton Lodge, No. 23, was held at Mozart Hall, Friday evening, February 25, 1881. This immense hall was beautifully and elaborately decorated for the occasion with flags, streamers, shields, evergreens and flowers. On the north end of the hall there were three festooned arches, on which, respectively, were these words, "CHARITY," "HOPE," "PROTECTION." The center had the word "Hope" extending to each end of the platform. The audience filled the large hall, standing room, only, being left. Bro. Workmen were provided with a neat blue ribbon, on which was printed Stockton Lodge, No. 23, A. O. U. W., which they wore on the lappel of their coat. Wives, daughters, sisters and mothers of Workmen wore a red ribbon bow in a conspicuous place. This was strictly an invitation party, and was composed of the best class of the refined and hospitable people of Stockton and surrounding country. At 8:15 P. M. the programme was commenced by an overture by Dreyfus' band of eight pieces. Bro. George Lissenden, M. W., acting as master of ceremonies, introduced Bro. C. M. Keniston, County Superintendent of Public Schools, who, in touching and eloquent words, delivered an address of welcome which will be found elsewhere in this issue. Response, Wm. H. Barnes, G. M. W., who was in one of his happiest moods and fairly electrified his appreciative audience. From his extended and interesting speech we give a few items: "We are progressing beyond our expectations, and in the last 24 days have bid a Workmen's welcome in our Lodges to over 300 selected men. I draw courage and inspiration from this sympathizing audience of fair women and gallant men, and I know this part of our jurisdiction will not suffer at the hands of the noble brethren of Stockton Lodge, No. 23. May it be like the granite hights of Yosemite, above all ready to succor and assist their fellow men, widows and orphans." Soprano solo and encore, Miss Lou Elliott (her sister Miss Gertrude accompanying on the piano). Miss Elliott has but lately returned from the Boston Musical Conservatory where she has been studying. Her effort on this evening was excellent and showed genius and an artist. Quartette, Bros. Phelps, Jackson, Watterman and Mr. Franz. They were heartily encored. Vocal trio, Miss Lou Elliott and Bros. Jackson and Watterman. This was a masterly effort and received a storm of applause. Selections, Orchestra. Senior P. G. M. W., W. H. Jordan, who arrived by the 8:40 train, was then introduced, and gave a short speech, full of feeling and pathos, that warmed the hearts of his hearers. Soprano solo, "I Love my Love," Miss Lou Elliott, who completely carried the audience to the highest pitch of enthusiasm and admiration. Clay W. Taylor, P. G. M. W., who was one of the late arrivals, was then introduced and in a felicitous and happy manner made one of his grand speeches, interspersed with humorous hits. Quartette, from the Bros. named above. The hall was soon put in readiness for the grand march, headed by Bro. Trivett and the Grand officers. Almost the entire company joined in the march. Dancing was kept up until a late hour with unabated zeal throughout the whole time. A cordiality and what might be termed a family reunion seemed to be a prominent feature of the evening. There were no jars or displeasures noticeable from the commencement to the close. The music was of the highest order, interspersed with logical and humorous remarks from three of our leading Workmen, Bros. Jordan, Taylor and Barnes. It was one of the most complete and successful entertainments that has been given in the city of Stockton, as we are informed, by any society, social or beneficiary. To the able management of the committee and hearty co-operation of the brethren of this part of our vineyard the WATCHMAN extends sincere congratulations.

Temple, 11.

Bro. Wm. H. Eadon, M. W. of Temple, No. 11, Temescal, reports his Lodge in a flourishing condition. They are fitting up a new hall. Bro. S. Morrell, capitalist, has donated two months' rent to help the brethren along. The members of this subordinate are royal in their benefactions, and much given to extreme hospitality. There are at present 44 members in good standing, with two applications before the Lodge on Monday, February 28th. We had the pleasure of meeting Bro. Eadon in Olympic, Tuesday, March 1st, and from information attained, expect a large increase of membership in Temescal this year.

San Francisco Lodge Locals.

Burns, 68.

The M. W. degree was given to five on Thursday evening, February 23d, in a manner that was impressive to the candidates and pleasing to members and visitors, of which there was a large number. This being the regular evening for literary exercises, after the business of the Lodge was over, they resolved themselves into a free and easy meeting. The following programme was very acceptably rendered: Solo and encore, Bro. Felix Desmond; recitation, from Shakespeare, Bro. N. S. Wirt; song, quartette, Bros. Pohlman, Fairwether, Edminister and Hester; reading, Bro. Martin Fusier; solo, Bro. Wm. Edminister; recitation, Bro. M. J. McGrath; solo, Irish song and encore, Bro. Gus Pohlman; recitation, "The Gray Mare," Bro. Gray; solo, Bro. Fairwether; recitation, Bro. Duncan; instrumental music, Bro. Hester; Scottish song, Bro. Bell. This was a very enjoyable and profitable entertainment and was listened to with close attention to the end. Under the head good of the Order, Wm. Thackery, P. M. W., of Harmony, made a few acceptable remarks, followed by Bro. A. J. Vining, M. W. of Hercules, in his pleasing manner. Bro. Mahoney, Reporter of the K. of H., made a short speech, followed by Bro. C. D. Coon, of Hercules.

Fidelity, 136.

We note a continued activity in this Lodge. On March 2d, 12 received the degrees. The *personnel* and youthful appearance of these new brothers was all that could be desired, several of the candidates being young men who have not yet launched out into the sea of matrimonial life. The hall was well filled, several visiting brothers being present. If those careless of life's duties could look in at one Lodge meeting and see the cordial greeting of one to another and the evident satisfaction among its membership they would certainly join this Lodge and effect for themselves an improved condition. Under head good of the Order some very interesting remarks were made by quite a number of brethren, including several visitors. It was certainly a profitable and pleasant evening spent.

The M. W. degree was conferred on 10 at their last meeting; average age under 35 years. The work was given in a very impressive, dignified and correct manner by each officer. Two petitions received for the degrees. The Lodge has increased its membership beyond the capacity of their present hall. A new one will be built soon for their accommodation on Taylor street near Geary street. This Lodge is having a new directory printed of their members, which will be incorporated with the by-laws, giving address and place of business. From what we know of this membership, it will show a large class of the leading business men of this city. The hall was well filled on this evening, and at recess the new members received the hearty congratulations of their brethren. Preparations are being made to give a musical and literary entertainment on the last meeting night of this month.

Golden Gate, 8.

The "Mother of Lodges," Golden Gate, No. 8, is now moving ahead with regular accessions to her membership. There were petitions for the degrees and four J. W. were made Master Workmen, Thursday, March 3d. The work was well done and the brethren admitted on this evening were worthy of our great brotherhood. The utmost good feeling seems to prevail and this old and historic Lodge is on the high road to prosperity. They have adopted what is termed the "assessment fund." Twenty dollars is set aside to pay delinquents, from which one assessment is paid for a brother.

Hercules, 53.

This thrifty subordinate has left its small hall, usually known as the "Sardine Box," and gone to Hamilton Hall. This is one of the largest and most beautiful halls in the State, the frescoing being a gem of art. The drapery and furniture are all new and of the best quality. On March 4th there was 75 in attendance, a number of Grand officers and distinguished visitors. After the usual routine of business, under the head good of the Order, Bro. E. F. Loud, D. G. M. and Wm. B. Smith, D. D. G. M., made some interesting remarks, followed by J. Meredith Davies, P. M. W., in one of his grand and elaborate speeches. The well-known orator of Hercules Lodge, Bro. Manser, made one of his humorous and instructive speeches, followed by Prince E. Hilton, P. M. W., in reminiscences of the early history of Hercules. Among many good things he said was this: "I think as much of attending my Lodge when Friday night comes as I do eating my supper." He is not the only one of these earnest brethren who make it a point never to miss a Lodge meeting if possible.

Magnolia, 41.

One of our progressive and thrifty subordinates is Magnolia, 41. On March 7th the J. W. degree was conferred on two candidates and the M. W. on one. The work was given in an acceptable manner by each officer without the aid of the ritual. This Lodge pays sick benefits at the rate of $10 per week. As the membership is largely composed of young, healthy men there have been but few calls on the Lodge. As a consequence, they have a large amount of money in their treasury. Bro. Davis is now serving his second term as Master Workman in a manner that is worthy of commendation and congratulation. Their meetings are well attended and hardly a night but one or more candidates are initiated. Caleb Brind, D. D. G. M., now acting P. M. W. of this Lodge, is one of our earnest, conscientious Workmen who will no doubt fill his position with honor to himself and profit to his Bro. Workmen. This Lodge has an organist, which adds much to the interest and pleasure of their Lodge meetings. At recess there is a sociality and friendliness exhibited to one another and to visitors that fully exemplifies the sunshine that exists in our Order.

Myrtle, 42.

The meeting of March 5th was a good one. Four applications received and the J. W. degree given to three persons. The WATCHMAN acknowledges the receipt of an invitation to a musical and literary entertainment on Saturday evening, March 26th, 1881, at Pythian castle. As heretofore we shall expect a fine time. Under the head good of the Order, Dr. Haley, P. M. W., C. C. Gilmore, P. M. W., Bro. Dennery of Hercules, and E. F. Loud, D. G. M., made some very acceptable and interesting speeches. Our D. G. M. took occasion to compliment the officers in their work, saying it was almost letter perfect.

Olympic Visits Triumph.

Business was passed with quick dispatch on Tuesday evening, March 8th, in Olympic, 127, as it was on the cards for the members to visit Triumph, 180. There was an election of officers in 127, caused by the resignation of the brother who held the Overseer's chair. Bro. Keating was advanced from Guide to the vacant position, Bro. Jones from I. W. to Guide, and Bro. Blohme was elected I. W. unanimously, two of the brothers resigning in his favor. After the Lodge was closed the members proceeded in a body to Red Men's hall, and were soon ushered into the Lodge-room of Triumph, where they were received in words of welcome by the M. W., Bro. Lichau. After the business of the evening had been proceeded with, and Good of the Order reached, addresses were made by the visiting brothers, commencing with the Master Workman, Bro. Rossbach, followed by Bro. Morgan, sitting P. M. W., who we think can claim the title of orator of Olympic Lodge. His words certainly had a tendency to call to the minds of his hearers the great good our fraternity is doing, and what every member should do and be in Order to make himself worthy of belonging to the Ancient Order of United Workmen. He was followed by Bro. Dixon, P. M. W., one of the most useful members of the Lodge, as he is always on the alert for some thing that will interest and make profitable the meetings. His witty remarks on this evening were loudly applauded by the members of both Lodges. Then came Bro. Cummins, another of Olympic's leading spirits. One point of his remarks is worthy of notice: A ship sailed out of a harbor loaded with its human freight. When out upon the mighty ocean, the cry of fire was suddenly raised, and all was confusion. A brave and stalwart man with his child were among the passengers, and telling the little one to grasp him around the neck, but not too tightly, he plunged into the surging waters and struck out bravely toward the shore. When he had nearly reached his place of haven, a rushing breaker came and lifted him and child safe and sound upon the high and dry land. Thus it is with the Ancient Order of United Workmen, it takes our children upon its broad back, and when we have gone the way of all the living this noble Order insures to them Protection. In appropriate and fitting language, Bro. Cummins exemplified this idea, and it would be well for all those who are negligent of their duties as Master Workmen to give heed to the truths that are embodied in the structure upon which the A. O. U. W. is founded. It is not they who will perhaps suffer the loss, but their wives and children. Bro. Cummins was followed by E. P. Fish, Foreman of Olympic, in some well fitting words. After remarks by other brothers, including the senior P. M. W. of Triumph and M. W., the Lodge was closed. The visit was in every respect a success, and the hope was expressed that 180 would soon return the compliment.

San Francisco, 4

The oldest Lodge in our city is gradually increasing its membership with the substantial men of our city. On the last two meeting nights the degrees were conferred on four on each evening. They now have 130 members in good standing, and expect to have 150 soon. On this evening, at the request of the Master Workman, C. W. M. Smith, each member is expected to bring in one new member within 30 days. As is well known there has never been a death from the membership of this Lodge. While they expect to largely increase in numbers, the quality, and not numbers, will be the chief object.

Triumph, 180.

EDITORS WATCHMAN:—Triumph Lodge, No. 180, A. O. U. W., was organized August 21st, 1880, with 37 members. At this writing, it numbers 81 members in good standing, with an age averaging 36–78 years, and we think that better than the average of Lodges, as to age. We of Triumph are satisfied with our progress. On last Tuesday evening, the 8th, we conferred the M. W. degree on two, and elected one to receive the J. W., and still have applications upon our desk. There being two assessments this month, we paid one out of the general fund. So, you see, we have a fund to draw on, which shows we have been prudent and saving, and in earnest as to growing, both in membership and purse. While we are not paying sick benefits, our hands and hearts are always open to relieve distress, when made known to us. At our last meeting we relieved a distressed family with coin, to help gladden their hearts; and when again called upon we will advance a duplicate to any of our distressed brothers or their families. At 9:20 the Master Workman of Olympic Lodge, No. 127, was announced with his brothers as a body on a visit to us (God bless every one of them). Our Master welcomed them in his usual happy style, and a feast of good feeling was enjoyed, and under "Good of Our Order," remarks were made by Bros. Rossbach, Morgan, Dixon, Cummins, and others too numerous to mention; all of which were well rendered and received in a spirit of good. E. Lichau, M. W. of Triumph, called upon Bro. J. Waterman, Senior P. M. W. of the Lodge, who responded. And so ended one of the happiest of our meetings. Our motto is, come early and often; and we are a TRIUMPH.

Unity, 27.

According to a rule in this Lodge, at their quarterly meetings no degree work is done. Tuesday evening, March 8th, was the quarterly meeting, consequently the whole evening was given over to sociality and a general interchange of sentiment. Bros. Galloway, of Valley, and Baird, Hollings, Abrahamson, Martin, Seligman, Rafael and a number of others made acceptable and instructive remarks. This Lodge has nearly 200 members, pays sick benefits of $10 per week, and has a good fund in the savings bank. It may be justly termed a lively Lodge, and generally a large attendance.

Valley, 30.

The world moves, and so does Valley, No. 30. On March 2d six petitions were received, the J. W. degree was conferred on eight candidates, and the M. W. degree on eleven. Each officer takes pride in the work and it may not be unwell warranted in saying that the work is done as as by any Lodge in the United States. It might be supposed that the large amount of work done would prolong their meeting beyond the usual time. In this, however, under the able management of Bro. Case, M. W., and the efficient Financier, Bro. Camp, the ready Recorder, Bro. Lyle and other officers, the business moves on correctly and with quick dispatch; all the details connected therewith being scrupulously attended to. On this evening there was a large attendance, and quite a number of visitors from sister Lodges. The anniversary of this Lodge will be suitably celebrated in the near future. Steadily the membership is advancing on the predicted 1,000. We may expect this number to be reached this year.

Washington, 60.

This Lodge may be termed one of the staid and solid Lodges of our city. Their growth has never been rapid, but steady and regular. The meeting of March 10th was of unusual interest. There were three petitions; one received the J. W. degree, and five the M. W. W. B. Smith, D. D. G. M. W., was present, and gave the secret work of the Order in a manner that might be termed letter perfect. Cosmopolitan hall, in B. B. building, was well filled. They now have 180 M. W., and we are assured that it will soon number 200. We can point with pride to the membership of this

Lodge, composed as it is largely of wholesale merchants and prominent business men of our community. At recess personal congratulations were profusely distributed, visitors present receiving a good share and a cordial greeting. Bro. Leopold Cassel, D. D. G. M. W. of Multnomah county, Oregon, comprising the city of Portland and East Portland, was present. He reports over 2,280 membership, and will soon have a jollification and be set apart as a separate jurisdiction. Under head, "Good of the Order," he paid our fraternity a very high compliment. In the course of his remarks he touchingly recited their early struggles and present triumph. Their great success he attributed largely to the support given by our own jurisdiction. Wm. Smith, D. D. G. M. W., made a few well-timed remarks, speaking in very high terms of the officers of Washington Lodge and his district, saying he should establish a school for instruction. P. M. W. Lindsey took occasion to make some criticisms on the the different secret work of D. D. G. M. W. As he remarked, he had just returned from Oregon, and was always met with an open hand and warm heart by the brother Workmen of Oregon.

Yerba Buena, 14.

This old and honored Lodge is enjoying an unusual degree of prosperity. The meeting on March 12th was a grand one. Their cosey hall was completely filled on this evening, only standing room being left. The M. W. degree was conferred on six, and two petitions for the degrees. The Master Workman, Bro. C. H. M. Curry, presides over his Lodge with dignity and modesty. The secret work given by all the officers on this evening will compare favorably with any Lodge in this jurisdiction. They now have over 150 members, and the leading spirits have set their figures at 200 members or more this year. This Lodge pays sick benefits at the rate of $10 per week. On this evening there was two cases of distress and sickness that came before the Lodge that were very convincing proof of the wisdom of making a sure provision of this kind. It may not be amiss to state that one case was a brother of this Lodge in a foreign land, sick unto death's door, and his only resources were the benefits given by his Lodge. A resolution was offered to reduce their sick benefits to seven dollars per week. After a spirited debate the resolution was defeated.—Com.

An Unwrecked Life.

Editors Watchman:—I read the story of a "Wrecked Life," in your issue of Feb. 15th, and while I do not agree with the whole of it there is something about it that should lead serious and intelligent men and women to deep and sober thoughts on the subject of life and death. Yesterday's mail brought a plain, but startling, account of the demise of one, whom (though I never saw face to face), I thought worthy of a short sketch which I might entitle "An Unwrecked Life."

The facts, if all written, would show an extraordinary amount of physical and mental suffering, of years of varied circumstances, of unusual ups and downs, of trials, afflictions, distresses, disappointments, discouragements, difficulties on every side and losses of all the things that make life dear; and also of the true and tenacious holding fast to the "faith once delivered to the Saints," and to the simple exchange of the mortal for that immortality which lasteth through the eternity of God. In comparing the two cases, viz., "the wrecked life" and "the unwrecked life," it must be plainly evident to any sensible person that the latter had the advantage of the former.

When I look around and see the seething mass of humanity, all rushing and hurrying hither and thither, everyone seeming to be in pursuit of some object or the accomplishment of some ideal or plan which they think will result in good for they and theirs, I am appalled and utterly horrified with the daily accounts of suicides of the facts of intelligent persons taking their own lives by their own hands, and rushing into the presence of God. It seems these occurrences are becoming painfully prevalent among members of our Order of A. O. U. W., and it occurs to me that our Grand Lodge should hasten to arrange matters with a view to prevent it as much as lies in their power. Something stringent and forcible should be adopted and carried into effect at once, or we may find our beneficiary fund bankrupt before many years. If it be known that the relatives and friends of suicides were to be excluded from the beneficiary fund of the Order it might possibly be the means of deterring men from suicide, and if they still intend to do so, and carried their intentions into effect, the Order would not be called on to suffer financially on account of the suicide. The same rule could be applied to murderers and drunkards. We do not want the dangerous and lawless class of men as members of our Order. If we begin immediately to expel members for drunkenness and vicious or immoral conduct we will find, on the whole, that the Order will be much better off in quantity and quality of its members. We might as well publish in our advertisements that we want good men only—"and none others need apply." By "good men," I do not mean any particular sect, denomination, or religion, but I do mean men who have sand enough in them to be good citizens and live useful lives and die natural and respectable deaths. There is too much mawkish and sickening sentimentality abroad in the land on the subject of suicides. If men live as their conscience dictates there will be less suicides and fewer murders. Let the Lodge of A. O. U. W. be stalwarts on the suicide business. "Charity, Hope and Protection" does not include self-murder.

Anti-Suicide.

Washington Corners, Alameda, Feb. 25th.

An Address of Welcome.

The following address was delivered by Bro. C. M. Keniston, County Superintendent of Public Schools, at the third anniversary and first grand promenade concert of Stockton Lodge, No. 23:

To me has been assigned the pleasant duty of extending to you on behalf of Stockton Lodge, No. 23, our hearty welcome and cordial greeting, as you have met with us to assist in these our annual exercises.

We feel especially honored at this time with the presence among us of the G. M. W. of the State. We welcome him to a place in our midst who has so long held a place in our hearts, chosen as he has been to control and direct the workings of that beloved Order in whose interests we are assembled to-night, beneath whose banner we march, the principles of which are eternally engraven upon our hearts, and we trust exemplified in our lives.

The sands of bygone times are strewn with the wrecks of orders and associations of every character. Societies, political, religious and sectarian, have been formed, blazed like a meteor for a time, and then gone out in darkness and oblivion. The names of the unsuccessful are legion, and from the character of those that survive we can draw but one conclusion—that only those institutions that are founded upon the eternal principles of truth and right can ever be permanent and successful. And to-night, my brothers, I congratulate you upon being the honored officers of an Order that has stood the test of time, an Order that leaving speculation for practice, has gone forth among the homes of men like some missioned spirit of good, with its deeds of charity and love. Wherever it has moved the tear of sorrow has been wiped away and the face of anguish illumined with a smile. "It has no marble altar, no wreathed statue, no offerings of incense, but hearts of affection build up its shrine, the widow and the orphan are its living monuments, and gratitude pours out for it a free libation."

And to our friends who have favored us with their presence to-night, those who have not lifted the vail that separates us from the busy world, we bid you welcome, welcome to a closer friendship with us and our noble Order, welcome to a deeper sympathy in the grand work in which we are engaged.

An organization embracing within its jurisdiction nearly 100,000 members, working harmoniously together, upon the broad basis of universal brotherhood for the general diffusion of the principles of benevolence and charity, and whose ministrations are so effective in the relief of distress incident to human life, cannot but win the esteem and confidence, and, when properly understood, command the best wishes of all thinking men and women.

All here present cannot fail to be in full sympathy with the objects of our Order, and gratified with the results already obtained. It is not long since the Order of Workmen was introduced into California, and already we number more than 12,000, including many of the best citizens of the State. During the past year $157,000 was paid to the families of our deceased brothers in this beneficiary district, while during the 12 years of its existence our Order has paid over $2,000,000 for the same noble purpose. We are proud of our record as to-night we ask you to contemplate the great work we are doing, the charities and blessings we are daily dispensing to the widow and orphan—the thousands who have received the benefits of our Order's open handed charities, and are praying for its continued success. But we realize that our work has but just begun; we would go forward until our principles—Charity, Hope and Protection—like Jupiter's golden chain, draw the earth into one great brotherhood; till not a cry of the orphan comes up from the hearthstone unheard; till not a tear starts from the widow's eye unseen and unpitied; till charity, philanthrophy and mutual relief shall have made more, wider and greater conquests than glittering spear or crescent. We will go on unfurling the white banner of our Order, giving it proudly to the breeze till its triumphant folds intertwine, and become blended with the stars and stripes of the freeman's hope and home, till man is bound in brotherhood to man, till tears are changed to smiles and groans to benedictions.

Brethren, let union of sentiment, union of effort, union of interest and action be graven on our altars and reign in our hearts and councils. Then shall our fraternity increase and flourish and become more and more useful to our race, and when we shall have passed away in the flood of years it shall be said of our Order—

"As some tall cliff that lifts its awful form,
Swells from the vale and midway leaves the storm;
Though round its breast the rolling clouds were spread,
Eternal sunshine settles on its head."

Bro. Brewer, P. G. M. W., has just returned from a flying visit to Arizona.

Resolutions of Respect.

Hall of Tulare Lodge, No. 78, A. O. U. W.,
Tulare City, Cal., Feb. 5, 1881.

[In Memoriam.]

The undersigned committee, appointed to draft resolutions expressive of the sense of this Lodge on the death of our brother, Antone Steinkellner, submit the following:

Whereas, Our Brother Antone Steinkellner, has been taken from our midst by the hand of our great destroyer, death,

Resolved, That in his death, this Lodge of Ancient Order of United Workmen has lost one of its most useful members, and the community at large a respected citizen.

Resolved, That we most sincerely tender our heartfelt sympathies to the family of our deceased brother in their sad and heartrending affliction.

Resolved, That this resolution be spread upon the minutes of this Lodge; that a copy be sent to the family of our deceased brother.

T. A. Lewis,
C. M. Hatch,
C. F. Hall. } Com.

To the General Relief Committee.—We have received from Bro. A. J. Henry, a member of San Rafael Lodge, No. 24, a letter stating that through sickness he lost his former situation as book-keeper and salesman in a store at San Rafael. At present he is out of employment, and has a wife and child to care for, being in very reduced circumstances. He says he is a good book-keeper and thoroughly acquainted with the grocery and general merchandise business, and can furnish first-class references. We take this method of calling the attention of the committee to the case. From the tone of the brother's letter, he has been very unfortunate through no fault of his own. He is at present living at Woodland, Yolo county, Cal.

Cane Presentation.—Editors Watchman: Last Saturday, 5th inst, a pleasant occurrence took place at the binding establishment of D. Hicks & Co. Brother Schaffner, the courteous and efficient Recorder of Memorial, No. 174, for 16 years in the employ of the above firm, was about to sever his connection and seek other fields for his labor. His shopmates presented him with a handsome gold-headed cane appropriately engraved, as a token of their regard for him during this long period. Brother Schaffner was highly pleased, and somewhat touched with this token, coming as it did from each and every one of his co-laborers. He replied appropriately to the presentation speech, thanking all who had thus remembered him. We wish our worthy brother success in his new departure, and know he has the best wishes of all, especially of No. 174.—M., San Francisco, March 9, 1881.

The Vallejo *Evening Chronicle* issued March 5th a large 12-page sheet containing a review and prospectus of Vallejo and Mare Island, and other points of interest in Solano county. It also gives a brief history of each fraternal society. From it we learn that Vallejo Lodge, No. 75, has at present a membership of 83, and is rapidly growing in membership and influence, comparing favorably with the first Lodges of the Order in the State. The paper is to be commended for its enterprise. Such work as this is of great advantage in building up a town and county.

Bro. G. T. Wagstaff, of Mountain View Lodge, No. 59, paid us a short visit. He reports this part of our vineyard in a healthy condition. He had encouraging words as to the interest and favor the Watchman received at their hands. As a further reminder, he gave several names and subscriptions for this year.

We were shown the "Perfect Rest chair" and "Patent Perfect sofa bed" at the Indianapolis Chair Manufacturing Co., 160 New Montgomery St. Bro. F. Rentschler called our attention to a new beautiful design in parlor and bed-room sets. This enterprising house has opened a new carpet store as an adjunct thereto.

Bro. A. Levingston, a veteran in the crockery business, has opened a magnificent store at 717 Market St. Having connection with foreign houses, he is selling imported and domestic goods at very low prices.

We notice that Bro. A. Bley, of Washington, No. 60, has opened his line of spring goods at his millinery store, 750 Market St., with a magnificent display of the latest styles and newest fashions.

Bro. F. Hanson, stalls 11 and 12 California Market, supplies the choicest meats that can be procured in this market. We speak from personal experience.

Officers and members of the A. O. U. W. receiving a complimentary number of the Watchman with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

Laumeister Mills.—The growing demand for all kinds of meal for family use has induced our enterprising and experienced miller, Bro. C. S. Laumeister, to erect, and equip with new and improved machinery, facilities for manufacturing each brand known to the trade. His efforts in this line have met with so much favor that our genial brother has enlarged and added to his premises until he now occupies the commodious premises 203, 205 and 207 Mission street. His meals are pronounced the best in the market.

The firm of W. K. Vanderslice & Co., silversmiths, 136 Sutter street, has long been known for the superior quality and finish of their work. If anything unique in its design and execution is to be presented as a souvenir to anybody, this firm is most always sure to be entrusted with its preparation. The recent badge presented to Bro. Taylor, P. G. M. W., is a case in point. Besides their gold and silverware, they have a large and fine assortment of watches and diamonds.

"Sound on the Goose," etc.—Having found it to our advantage to patronize Bro. M. J. Healey, merchant tailor, of No. 1,056 Broadway, Oakland, we feel like telling his brother Workmen of Keystone Lodge (and the rest of "mankind") that he recently made the best pair of pants ever strapped to a modest member of our most exceedingly modest newspaper fraternity. His shop, a very busy one, is evidently conducted with practical economy, for the benefit of himself and patrons.

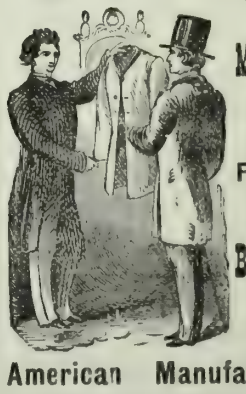
It seems they need a live Deputy in New York. We read in an exchange that Suffolk county, the largest county in the State of New York, in point of territory, has not a single Lodge of the A. O. U. W.

Bro. Mills, Foreman of Newark, 169, informs us that the anniversary of his Lodge, April 8th, will be celebrated in fine style. It is expected that Grand Master Barnes will address them.

Our Grand Master, Wm. H. Barnes, is at present in southern California with the Press Association. Several Lodges in this part of the State will be visited by him.

The members of the A. O. U. W. in Butte county are commencing to talk up their annual celebration on May-day.

Bro. Adolf Bura, cigar manufacturer and wholesale and retail dealer in domestic cigars, 104 Dupont street, is one of the live men of this city. This is the place to get a good cigar.



The Metropolitan Coffee Saloon, No. 227 Montgomery avenue, is one of the popular resorts of this part of the city. Bro. W. Neilsen is caterer and proprietor.

Bro. J. Johnson, merchant tailor, 406 Larkin street, between Tyler and Turk streets, is an artist in his line. We have an experimental knowledge that has been very satisfactory. Give him a call.

M. J. HEALEY

Saws.

The grand secret of putting any saw in the best possible cutting order consists in filing the teeth at a given angle to cut rapidly, and of a uniform length, so that the points will all touch a straight-edged rule without showing a variation of 100th part of an inch. Besides this there should be just enough set in the teeth to cut a kerf as narrow as it can be made, and at the same time allow the blade to work freely without pinching. On the contrary, the kerf must not be so wide as to permit the blade to rattle when in motion. The very points of the teeth do the cutting. If one tooth is a twentieth of an inch longer than two or three on each side of it, the long tooth will be required to do so much more cutting than it should, that the sawing cannot be done well. Hence the saw goes jumping along, working hard and cutting slowly. If one tooth is longer than those on either side of it, the short ones do not cut, although the points may be sharp. When putting a cross-cut saw in order, it will pay well to dress the points with an old file, and afterwards sharpen them with a fine whetstone. Much mechanical skill is requisite to put a saw in prime order. One careless thrust with a file will shorten the point of a tooth so much that it will be utterly useless, so far as cutting is concerned. The teeth should be set with much care, and the filing should be done with great accuracy. If the teeth are uneven at the points a large flat file should be secured to a block of wood in such a manner that the very points only may be jointed, so that the cutting edge of the same may be in a complete line or circle. Every tooth should cut a little as the saw is worked. The teeth of a handsaw, for all sorts of work, should be filed fleaming, or at an angle on the front edge, while the back edges may be filed fleaming or square across the blade. The best way to file a circular saw for cutting wood across the grain is to dress every fifth tooth square across and about one-twentieth of an inch shorter than the others, which should be filed fleaming at an angle of about 40°.

NEW WORLD PRODUCTS AND THEIR EFFECTS.—Mr. Goodyear, in his work on gum elastic, significantly remarked: "It is a very curious reflection that the articles which have most affected the commercial and financial resources and conditions of the nations of Europe have been chiefly derived from the New World. We allude to the potato, to tobacco, the precious metals and cotton, and another article has sprung up which bids fair to be as important—caoutchouc." Mr. Goodyear's anticipations have already been verified in a remarkable manner, but the future has far more in store for the world as the results of its introduction and economical application.

A NEW ELECTRIC LIGHT BURNER.—For over 20 years Mr. Holland, the gold pen manufacturer, of Cincinnati, has been experimenting with iridium, seeking some method by which it might be fused. Some time ago he discovered a flux which he mixed with the iridium dust, and successfully fused it in a common crucible in the ordinary draft furnace. He cast the metal in any shape desired, and in bars of ingots weighing as much as 10 ounces. The metal thus fused and cast defies the file and resists all acids. The only mechanical way of cutting it is by friction, with a copper wheel charged with diamond dust or fine corundum. Prof. Nelson Perry, of the Cincinnati University, regards this as one of the most wonderful discoveries in metallurgy he ever knew. As soon as his discovery was made, Mr. Holland saw that iridium would be valuable as a burner for electric lights. Iridium burners two inches long, and from one-eighth to one-sixth of an inch thick were tested, but the machinery used was found to be too powerful for an incandescent light, which is all that was aimed at with the iridium burner. The light produced, however, was very pleasant, and no glass globes were necessary as the atmosphere produced no effect on the metal. Experiments are now in progress with the Maxim machine, the electric current of which can be more easily regulated. A set of burners can be furnished for about $4, and these burners will radiate a 10-candle light, upon present calculations, for an indefinite time. Mr. Holland has patented his discovery in this country, and also in Europe.

WHAT WE THINK WITH.—Without phosphorous no thought. So declared a famous German physiological chemist some years ago. That particular brain substance which he supposed to be essential to thought has heretofore been known as protogen with phosphoric acid. Considering this name not clear and definite, another German chemist has proposed for it the following precise and significant combination of 72 letters. Oxaethyltrimethylammoniummoxydhydrateleylopalmethyloglycerinphosphosaure. If mental derangement is in any way due to deficiency in the elements of this highly-complicated compound, or to any snarling of its multitudinous constituents, the wonder is that anybody can ever think straight. And what a lot of it that German must have had in his head when he contrived such a name for it!

THE Salt Lake *Tribune* says: Salt Lake is on the eve of a great boom. Several new railroads are soon to center here, the Street Railway Company are extending their line, the Electric Light, Power and Heating Company's works are nearing completion, the Telephone Company is stretching its wires and opening its exchange, large business blocks are contemplated, and dwelling houses innumerable.

Insurance.

THE
NEW ENGLAND MUTUAL
Life Insurance Company,
OF BOSTON,
All Policies in this Company are Governed by the Massachusetts Non-Forfeiture Law.
The only Company on this Coast Governed by this Law.
This Company was incorporated A. D., 1835, and ha accumulated Assets of

—The— Eclipse Self Regulating Incubators are now in actual use in most parts of this State, and giving general satisfaction. They are a success, and being such are invaluable to all who attempt to raise chickens; are easy to manage, and cost merely a trifle to keep in operation, and will do much better work than can be done with hens, with a small portion of the labor and risk.

Invaluable for Young Chicks and Moulting Fowls. It comes packed in various sized packages, and being a powder, is easily mixed with the customary feed. Give it a trial. Send Stamp for Circular and Testimonials.

Price.—Single pound, 50 cents; Two and a half pounds, $1.00; Six pounds, $2.00; 25 pound keg $6.25. Address,

Cape Horn.

Cape Horn derives its name from the danger in passing; it is a bold promontory, situated on the north side of the Columbia river, in the Territory of Washington, about midway between the Cascades and the Dalles. The river bends around it from the northeast, the channel keeping midstream, in which are numerous rocks that rise above, or near to the surface of the water, which, together with the high winds that often blow a strong gale "around the Horn," dashing the waters into a foam against the rocks, make the passage a dangerous one, even for the most skillful oarsman.

This promontory is of basaltic formation — like most others on the Columbia—and rises near 250 ft. perpendicular from the water's edge, and extending about a mile in length, the lower part projecting several hundred feet out into the river. Near the summit, and from many crevices of the cliff, a kind of fir or stunted cedars are to be seen, which add materially to the charm of this otherwise most romantic locality.

Only a short distance above Cape Horn—on the south, or Oregon side of the river—is situated another perpendicular rock of peculiar basaltic formation, "Rooster Rock," and still another, which rises from the middle of the river for some hundreds of feet, called "Lone Rock," or "Castle Rock." At another point a tiny stream of sparkling water pours over the cliff in one unbroken fall, 700 ft. in hight.

For varied and remarkable scenery the Columbia river, for 1,000 miles from its mouth, is certainly the most notable of any river in the world. The most magnificent views of earthly scenery are presented from different points. High mountain peaks, covered with perpetual snow, are to be seen in all directions. Among these peaks the most notable are Mt. Hood, Mt. Jefferson, Mt. Adams, Mt. St. Helen, Mt. Rainier, and the Three Sisters. The sight is grand beyond description. At places, the country, as viewed from the river, looks barren and worthless, and the waters move sluggishly toward the sea. At others, the country presents the most beautiful appearance, with gardens, vineyards, crops and herds—a perfect Elysium. Again it is covered with thick forests of heavy timber, or the broad, rich bottom lands are awaiting the husbandman to yield a thousand fold the seed sown. Another view, and we have the submerged forests; then again the towering basaltic cliffs rising on each side from 1,000 to 1,500 ft. in hight, through which the river runs with a rapid current. Many beautiful cascades are to be seen on each side, while passing along this narrow channel; some of these in their fall from the hights, are lost in spray before they reach the river below, while others come pouring down from over the cliff, hundreds of feet above in one unbroken sheet.

CAPE HORN ON THE COLUMBIA RIVER.

A Word to the Indifferent.

We would like to instill into the minds of every member of the Order a feeling of true charity; a cultivation of the spirit of brotherly affection; a casting out of all harsh feelings that may may arise in our intercourse with brother Workmen. Now it is not possible for this to happen if a member rarely attends his Lodge. There is, or ought to be something in the Lodge-room that will insure a companionship of fellow-feeling, a true and sincere regard for each brother there assembled and the Order at large. It is by the exercise of this subtle and not easily pictured ideal, that man comes forth purified, ennobled and such a creature as God intended we should all be when he gave to us the spirit of life. There are many ways in which a man can do something. We should not coop up our feelings, talents, and all things else of which we are possessed within the walls of our own beings. Rather should it be our purpose, aim and object to do all the good that we possibly can.

What a grand Order ours would be if every man felt and acted as do those who are regular in their attendance at the meetings of the Lodge. No fear then that when the hour of trial came, we would not bravely weather the storm. Why? Because the members would have become indoctrinated with the essence of those words which are the corner stones of the Order—Charity, Hope and Protection. In the Lodge-room, in social intercourse therein, and in visitations to the brethren in other Lodges, they would have imbibed those principles, which would be an impregnable barrier against all assaults that selfishness could array against it. In the Lodge-room we would learn to sympathize and give aid and succor to all brothers, and assist them whenever possible. The principles that are inculcated in the ritual would find worthy exponents, and the Order would be strengthened in every part.

The members owe it to themselves to foster a true brotherly affection. Their families demand that they should be true to their plighted faith. The Order, as constituted, is beneficent in its purpose, noble in its aims, and has for its object the highest and dearest desire of every true man—the preservation of his home. O, ye Workmen, who are negligent, do you realize your responsibility? Do you ever think of your own firesides? Does it not often come forcibly to your minds, that without the success which has attended this Order, your families would be left to struggle as best they may? Have not you or some of your friends tried to protect your families in some purely business association, and saw all your efforts suddenly cast to the four winds of heaven? Shame upon you, then, if, when an Order is instituted, giving a reasonable and safe protection, you do not lend aid to the perpetuation and preservation of its principles. The structure is there in all its beautiful, rounded proportions. Then carry out to the fullest extent the aims and objects of the A. O. U. W.

CHICAGO has 22 Lodges of the A. O. U. W.

Home Miscellany.

Spring Cleaning.

'Tis morn! On leaving home around I glance –
All there is luxury and elegance;
The dog and cat upon the hearthrug lie,
My sweet wife kisses me and says good by,
While servants bring my hat, and coat and cane,
With so much comfort, how could man complain?

'Tis noon. As to my home I then draw near
I hear the sound of blows. The atmosphere
Is but a stifling, blinding cloud of dust;
'Tis from the carpets beaten, I mistrust;
And, horror stricken, to the house I fly,
A scene of desolation greets my eye.

The carpets up, the curtains down, fires out,
Furniture all upset and plied about;
While back and forth, with heads in towels bound,
With skirts looped up a foot above the ground,
And arms all bared, fly creatures—can it be
My lovely wife and servants neat I see,
Tearing about in those outrageous duds,
And stirring up this awful smell of suds,
While in their eyes there gleams a dangereus light?
Great heavens, 'tis they! Oh, what a dreadful sight!

The dog, once scalded, from them keeps aloof;
The cat has sought for safety on the roof;
And in the dining-room, where I had thought
To find a toothsome dinner, they have got
A fiend of Afric blood, who joys to swing
A whitewash brush and spatter everything.

But I am not forgot. My feast is spread
Out in the woodshed on a barrel head—
One slice of bread, a plate of warmed-up beans,
Some water in a mug, a dish of greens.
Oh, banquet rich! And best of all, you see,
I've brought a fellow home to dine with me.

—*Boston Post.*

Phineas Foster.

"And what is it you're thinking of, Phineas, my lad, all this long afternoon, that you've not opened your mouth once? 'Tis time you were thinking of a wife, I should say. Little did your father need, when he was your age, to have his mother tell him as I now do you that she would have no old bachelors round the house. No, Phineas, my lad, old bachelors do not belong to our family, and ill would be my luck to be bringing in the first. Look round, and when you find the right one bring her home here to me, to the old homestead. None of the new fashioned misses, with their silks and fine airs and delicate ways, but think of me when I was a girl, and ask her, as your father did me, could I milk the cow? could I scrub and sand the floor? and was I a busy-body and gadder-about?"

And while, her breath being exhausted, the speaker looked up from the stocking she was darning to see what effect her words had upon Phineas, my lad (for she had such a habit of saying my lad when she spoke of her son that it seemed like his surname), we will look at him too. Phineas Foster, the hero of our story, is not much of a sight as he sits there patching an old shoe—for he is farmer in summer, cobbler in winter. He is tall and thin, with that extremely diffident appearance which white hair, very red face, and falling, stooping shoulders give to any man; but Phineas suffered not only from these personal defects, but his eyes being extremely weak were protected from the light by a pair of silver-bowed, blue-glass spectacles. His blue cotton trousers having at some former time given out at the knee, his careful mother had taken out the weak part and sowed the rest together again, giving by such an abridgement a view of ankle, etc., decidedly unbecoming to the style of figure of our friend Phineas. The tout ensemble, though striking, was anything but agreeable, and Phineas looked much more like a candidate for old bachelorship and one corner of his mother's fireplace, that for matrimony and its cares.

Yet there was one in whose estimation Phineas Foster was the one perfect, and she, sitting in a distant corner binding the shoes which he was to sole, waited as impatiently as we do for his reply to his mother. Now Phineas was not guilty of much thinking, and when he found his mother's eye was upon him, said, with an additional shade of red in his countenance:

"'Tis little of misses I've been thinking; but since nothing else will suit you, where shall I find one?"

The worthy mother, not being much of a matchmaker, was in her turn rather confused, for she well knew her son was no favorite among the country lassies, but speaking quickly, as if at no loss, answers:

"Why, look about yourself, Phineas, my lad. A good wife is a blessing from the Lord—but you must search till you find her. Look about you, my lad."

Again those timid eyes over in the further orner were lifted, but Phineas did not seek to meet their gaze. Little did either mother or son know that she who was to be their light and joy, and to save Phineas from bachelorship, was the penniless orphan, without home and friends, that fortune had thrown upon the hands of Mrs. Foster. If Phineas *would* but look about him, look into that little corner!

"But that's not telling me where to look, mother. There's Maggie Watson, but 'twas only the other night out on the green, when they thought I'd gone home, I heard her ask, 'What does Phineas seem like?' and when she said, 'A goat,' they laughed. Well, I heard them. Who wants any of them for a wife? That's what I was thinking of."

"Phineas, my lad, go to the minister. He will help you. Go to the minister and inquire for some worthy body."

This idea seemed as brilliant to the son as to the originator of it, and he answered with unusual haste:

"I'll go this night, mother, for I must have a wife. The sooner we're all settled down again the better."

Neither of the two noticed that at these words the poor orphan, who had sat so quietly pursuing her irksome tasks left them alone.

Evening came, and with it appeared Phineas, having dispensed with the aforementioned diminished article of wearing apparel and donned his Sunday's best, before the minister's door. We will not linger on the workings of the wife-seeker's mind before he could intelligently explain the object of his visit; but he departed with a light heart, and repeating to himself his future wife's name, lest he should forget it ere he reached his anxious parent.

The spiritually wise are not always the most worldly wise, if so the Rev. Mr. N. would not have chosen Anna P. for a helpmeet for our hero. She lived many miles away in a distant State, and knowing the inexperience of our marriageable friend, Mr. N. offered to arrange all preliminaries for him, which offer, as we should suppose, was most gratefully accepted.

Anna P. was about bestowing her affections on another individual when the offer of our bashful friend came to her through her much respected friend, the minister. There seemed to her to be a want of some element in the new aspirant's character to allow so much of proxy in such an affair; still, trusting to the superior wisdom and advanced years of Mr. N., she bade adieu to her former satellite and accepted the ministerial proposal. All went on smoothly, and the wedding day drew near.

I said all went smoothly, but there was one change in the quiet household. She who had made herself so useful in that lonely house, Priscilla, the orphan, had gone to a neighboring village to drown among the cares of a little school her sorrows.

Phineas leaves the paternal mansion on his first journey with a gloomy heart, and painfully conscious of having in his possession a marriage certificate, and in his carpet-bag a new suit of clothes, starts for the home of his beloved, for the wedding day has come. As he passes by the village where now lives Priscilla, he thinks how much pleasanter it would be if he were coming to take her home again to that little corner of the sitting-room which she had made her own, instead of going in search of a new face. He never had wondered why she had gone at all.

It is difficult for us in this age and region of weddings to believe that a person could have been in existence as long as Phineas had and never been to a wedding; yet so it was. There was little marrying and giving in marriage in the retired place of his home, and he had slighted even his few opportunities. He knew there was a minister and a certificate, but there his knowledge ended. So, having arrived at his destination somewhat after the promised hour on account of various accidents, he thought to save time he would go to the clergyman himself, and that being accomplished, go and greet his wife. He happened to have a message from Mr. N. to a brother minister in this town and, armed with certificate and carpet-bag, he hastens to put his bright thought into execution; finds the person whom he seeks at home, and having delivered the message, announces the fact that he wishes to be married.

"I should be most happy to officiate on the occasion."

Encouraged by this remark, Phineas hands his certificate to the clergyman, who, looking it over, asks at what hour his services will be required.

"Now, sir, if you please," answers the impatient Phineas.

"Then I shall be obliged to refer you to someone else, since I have an engagement which will prevent my accompanying you."

Phineas, growing desperate, says that "it will suit him just as well here as anywhere else, that he is in much haste, having never seen his wife, and had come here on his way to save time." The truth flashed upon the amused listener, who explains to the discomfited lover that a bride as well as a bridegroom must be present. He waits only to say, "Why, I though if I brought my certificate you did not need her," and hastens with redoubled eagerness to reach the home of his fiancee.

We will not go with him. Pity for his misfortunes draws us back, but we can imagine his dismay when he found that his beloved, all things being ready, clergyman waiting, company assembled, hour past, and no bridegroom at hand, had, knowing him only through a third person, supposed him false, and had then and there restored her love and given her hand to her former lover, who had reached such a state of calmness as to be about to act as groomsman on the occasion of her marriage to Phineas. The glimpse which she had of her almost husband as he made his sudden exit did not cause her to regret the exchange.

As our hero was returning uncomfortably home it seemed to him expedient to stop and see Priscilla, thinking that a few kind words from her would prepare him the better to meet his expectant mother. When poor Priscilla saw him approaching her home, she thought he had come for her to go and welcome his new-found wife, and little was she prepared for the abrupt, yet to her, welcome greeting of our honest Phineas:

"Priscilla, won't you go home with me? I can't go home without *any* wife, and why won't you do as well? for you know the ways of the house, and we can all *settle down.*"

Had Priscilla ever read a novel, she would have expected some falling upon the knees, or at least one kiss; but she would have waited in vain. Phineas never kissed his mother; why should he his wife?

Should any desire to know the after fate of our humble friend Phineas, I can show them at any time the house where dwell Phineas Foster, his wife Priscilla and his mother, now no longer burdened with anxiety lest her son shall be the first old bachelor in her family.

Tribute to Woman.

The following beautiful tribute to woman recently delivered by a reformed man, we give place to in our columns, with great pleasure.

"I should like to propose a toast to-night, although a total abstinence man myself—a toast to woman. To be drank, not in liquor of any kind, for we should never pledge a woman in that which may bring her husband reeling home to abuse where he should love and cherish, sends her sons to a drunkard's grave, and her daughters to a life of shame. Oh, no, not in that, but rather in the life giving water, pure as her chastity, clear as her intuitions, bright as her smile, sparkling as the laughter of her eyes, cheering as her consolation, strong and sustaining as her love—in the crystal water I would drink to her that she would remain queen regnant in the empire she has already won, grounded deep as the universe in love; built up and exercised in the homes and hearts of the world; I would drink to her, the full blown flower of creation's morning, of which man was but the bud and blossom, to her who in childhood clasps our little hands and teaches us to lisp the first sweet prayer to the Great All-Father, who comes to us in youth with good council and advice, who in manhood meets our heart yearnings with the faithfulness of conjugal love, and whose hand, when our feet go down in the shadow, gently smooths the rough pillow of death as none other can; to her who is the flower of flowers, the pearl of pearls, God's latest, best and brightest gift to man—woman, peerless, pure, sweet, royal woman."

What Are Boys Good For?

The urchin who answered: "They are good to make men of," made an admirable reply. But the sort of men we are to have in a few years depends upon the sort of boys we have now. A man is but a grown-up boy. The present crop of boys contains some hopeful specimens, who give promise of useful manhood. But it also shows a large percentage of boys who must be reconstructed before they can possibly develop into a manhood that can fill any honorable or useful positions in society. Boys who shun or shirk useful work or improving study, and spend their time in idle dissipations or vicious activities, can never become useful men. Boys who, being obliged to do something for their support, assiduously seek easy work, are not hopeful prophecies of manhood. They will never amount to much. When we see the tendency of city boys to be industrious only in playing billiards or baseball or in some other useless or demoralizing pursuit, and the disposition of country boys to seek in the city for easier or more respectable (?) employment than the country offers, we feel unhopeful of the future. It is from these two classes that the constantly increasing armies of shyster lawyers, quack doctors, poor preachers, bummer politicians, drunken loafers, petty thieves, tramps, deadbeats, etc., are chiefly recruited.

Boys, if you want to be men of worth, don't be afraid of hard work or hard study.

"Lives of great men all remind you
You can make your life sublime."

Read the lives of great men of the past and present, and emulate the virtues and imitate the example of their boyhood. Dr. Benjamin Franklin went from a soap boiler's shop, through a printing office, to fame world-wide and immortal, by dint of industry and study. What boys have done you can do.

THE EFFECTS OF WORRY.—That the effects of worry are more to be dreaded than those of simple hard work is evident from noting the classes of persons who suffer most from the effects of mental overstrain. The case-book of the physician shows that it is the speculator, the betting man, the railway manager, the great merchant, the superintendent of large manufacturing or commercial works, who most frequently exhibits the symptoms of cerebral exhaustion. Mental cares accompanied with suppressed emotion, occupations liable to great vicissitudes of fortune, and those which involve the bearing on the mind of a multiplicity of intricate details, eventually break down the lives of the strongest. In estimating what may be called the staying powers of different minds under hard work, it is always necessary to take early training into account. A young man cast suddenly into a position involving great care and responsibility, will break down in circumstances in which, had he been gradually habituated to the position, he would have performed its duties without difficulty. It is probably for this reason that the professional classes generally suffer less from the effects of overstrain than others. They have a long course of preliminary training, and their work comes on them by degrees; therefore, when it does come in excessive quantity, it finds them prepared for it. Those, on the other hand, who suddenly vaunt into a position requiring severe mental toil, generally die before their time.

Training the Child.

Some writer has said that "women make the country what it is, and if men fall short of manly sufficiency and integrity, it is the fault of the mothers who bore them." If it is true, what a fearful responsibility rest on the mothers. Men talk too much about the sacredness of the domestic altar, and do too little to uphold it by their own purity, integrity and co-operation. If the example of either parent is such as to neutralize the wisest teachings of the other, disappointment and sorrow are too sure to follow. In the first years of the child its training must fall mostly upon the mother, who is likely to be more at home than the father, and whose sympathies are apt to be quicker and nearer, and more tenderly adapted to its undeveloped helplessness. While she moves in the maternal sphere, and her children are young, the responsibilities of the mother are paramount to all others. She should be no dogmatist; should cast all the casuistry of the schools to the wind, for her creed is very simple, and must be inscribed upon the infant's palm: Love to God, and love to man. "All things whatsoever ye would that men should do to you, do you even so to them." This is the burden of her morning and evening and noontide teaching. Integrity—savage, unadulterated integrity—she enforces as the law of the inner and outer life. She must never acquire a look of care, a feeling of discontent, a melancholy, or despondency fatal to the comfort and cheeriness of the household; and perpetual coercion, perpetual admonition, perpetual fault-finding, and checking, muddles the poor little brain of a child, and distorts its moral sense. It is to be hoped the flippancy and shallowness of our age will not be entirely bereft of these stately, clear-seeing and morally grand women of the olden time, whose example has done so much to ennoble our sex. Reform must begin at the fireside, The foundation for empire is laid there, and when families are disorderly, treacherous, corrupt and wicked, the nation will be a reflex of what is existing there. In our great crisis of war and disorganization, we see widespread corruption and malignity, commercial fraud and political dishonesty. The people are as the mothers who have reared them; for woman was designed to be the great spiritual, moral center, and men have a right to look to us, even more than to themselves, for the right training of the child. If men were more willing and women more freely admitted to share in all subjects pertaining to legislation, "the world would be the better for it." At present the race is stultified in order to keep one sex within the sphere of action which the other conceives to be appropriate for her, as if she were not the best judge of where she belongs and what she is best able to do. At the earliest dawn of reason—which commences in the little one sooner than most people imagine—it should be taught the self-control and government of its appetites and passions; should be taught his superiority to brute instinct. I know of a mother who always kept Friday as a fast day, not from religious asceticism, but because she wished to act an example of self-denial to her children. She would say in the morning: "Come, my darlings, I shall eat only bread and drink water to-day; are either of you strong enough to go with me?" Sometimes, indeed, most generally, the little ones joined her. There was no compulsion, no gloom about it; indeed, there was, perhaps, no brighter day than their fast day.

Once the little boys, the eldest not six years, were invited to a party of children, and when the entertainment showed a table covered with dainties, they took only bread. The hostess, greatly surprised, inquired the reason, when they whispered, smilingly: "We and mamma agreed to fast to-day." She suggested that it would do no harm to break the fast on such an occasion, but the brave little fellows adhered to their resolution, and declined every luxury. When they returned home they brought a basket filled with all the pretty dainties the lady had forced upon them.

"I do not think, mamma, we ought to save nice things fast day to eat afterward," said the oldest young hero, and, as the other one assented, they agreed to carry the basket to a child so poor that he had never had such luxuries.

In training the child the slightest variation of the truth should be promptly corrected. He should be taught to feel the meanness and cowardice of falsehood as unworthy the character of a man. This great cardinal virtue, firmly rooted in the child, will become the foundation for all other manly virtues. He should be early taught the sacredness of his word. If he make a promise, however trivial, he should be held to it. He should be taught punctuality also, and be made to see that he has no right to waste his own time, far less that of another. These things belong to the great moral code that no one can violate with impunity. There are lesser virtues which are essential to gentle breeding, and which greatly affect our own taste and comfort as well as that of others. I would train a child to that forecast and considerateness for others that he would not endanger the safety of the passerby in the street by casting the parings of fruit upon the side-walk; or offend his taste by scattering the shells of nuts, and spitting in a railway car. I would train him to keep all expressions of sickness and pain, and physical necessities of every kind, religiously in the background.—*Mrs. E. J. S.*

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of thirteen letters.
My 6, 2, 1, is a boy.
My 2, 5, 5, 1, is to require.
My 4, 7, 8, 13, is a thought.
My 8, 9, 9, is to commit error.
My 11, 10, is a negative.
My 12, 10, 11, is a Spanish title.
My whole is the name of a great literary work.

CEPHA.

Syncopations.

1. Syncopate to caution and leave pallid.
2. Syncopate a sailing vessel and leave a winged animal.
3. Syncopate mutilate and leave a weight.
4. Syncopate to strike forcibly and leave a wager.
5. Syncopate a market and leave a rug. O. G.

Charade.

At morning's early dawning,
My *first* is on the wing;
And as he swiftly mounts aloft,
The groves with music ring.

In time of war and bloody strife,
When knight's thereto repair;
They bind my *second* to their heels—
They fall or conquer there.

'Mid lilies fair and tulips gay
My *whole*, with countless eyes,
Looks upward to the heaven's blue,
And with their azure vies.

Syllable Puzzle.

1. A Latin preposition signifying by.
2. An instrument for writing.
3. A nickname.
4. A personal pronoun.
5. An exclamation.

The above syllables combined form a word signifying at right angles to a horizontal plane.

AUNT HANNAH.

Metagram.

Complete, I am an important organ of the body; curtailed, I become to perceive by the aid of a certain faculty; now behead, and I become a portion of the head; transposed, this forms an epoch. What am I?

MELANCTHON.

My Monkey.

There never was such luck. I've always thought that I'd rather have a monkey than be a million heir. There is nothing that could be half so splendid as a real live monkey, but, of course, I knew that I never could have one until I should grow up and go to sea and bring home monkeys and parrots and shawls to mother just as sailors always do. But I've actually got a monkey. It was Mr. Travers that got the monkey for me. One day there came a woman with an organ and a monkey into our yard.

She was an Italian, but she could speak a sort of English, and she said that the "murderin' spalpeen of a monkey was just wearing the life of her out." So says Mr. Travers, "What will you take for him?" and says she, "It's five dollars I'd be after selling him for, and may good luck go wid ye!"

What did Mr. Travers do but give her the money and hand the monkey to me, saying, "Here, Jimmy! take him and be happy." Wasn't I just happy though?

Jocko—that's the monkey's name—is the loveliest monkey that ever lived. Toby Tyler may talk about his "Mr. Stubbs," and tell how he understands everything said to him, and begs for crullers, and all that; but I tell you "Mr. Stubbs" was just an ordinary illiterit monkey alongside of my Jocko. I hadn't had him an hour when he got out of my arms and was on the supper table before I could get him. The table was all set and Bridget was just going to ring the bell, but the monkey didn't wait for her.

To see him eating the chicken salad was just wonderful. He finished the whole dish in about two minutes, and was washing it down with the oil out of the salad bottle when I caught him.

Mother was awfully good about it, and only said: "Poor little beast, he must be half starved. Susan, how much he reminds me of your brother." A good mother is as good a thing as a boy deserves, no matter how good he is.

The salad someway did not seem to agree with Jocko, for he was dreadfully sick that night. You should have seen how limp he was, just like a girl that has fainted away and her young man is trying to lift her up. Mother doctored him. She gave him castor-oil as if he was her own son, and wrapped him up in a blanket and put a mustard plaster on his stomach, and soaked the end of his tail in warm water. He was all right the next day, and was real grateful. I know he was grateful because he showed it by trying to do good to others, at any rate to the cat. Our cat wouldn't speak to him at first, but he coaxed her with milk, just as he had seen me do, and finally caught her. It must have been dreadfully aggravoking to the cat, for instead of letting her have the milk, he insisted that she was sick and must have medicine. So he took Bridget's bottle of hair-oil and a big spoon and gave the cat such a dose. When I caught him and made him let the cat go, there were about six tablespoonfuls of oil missing. Mr. Travers said it was a good thing, for it would improve the cat's voice and make her yowl smoother, and that he had felt for a long time that she needed to be oiled. Mother said that the monkey was cruel, and it was a shame, but I know that he meant to be kind. He knew the oil mother gave him had done him good, and he wanted to do the cat good. I know just how he felt, for I've been blamed many a time for trying to do good, and I can tell you it always hurt my feelings.

The monkey was in the kitchen while Bridget was getting dinner yesterday, and he watched her broil the steak as if he was meaning to learn to cook and help her in her work, he's that kind and thoughtful. The cat was outdoors, but two of her kittens were in the kitchen, and they were not old enough to be afraid of the monkey. When dinner was served Bridget went upstairs, and by-and-by mother says, "What's that dreadful smell? Sure's you're alive, Susan, the baby has fallen into the fire." Everybody jumped up and ran upstairs, all but me, for I knew Jocko was in the kitchen, and I was afraid it was he that was burning. When I got into the kitchen, there was that lovely monkey broiling one of the kittens on the gridiron just as he had seen Bridget broil the steak. The kitten's fur was singeing and she was mewing, and the other kitten was sitting up on the floor licking her chops and enjoying it, and Jocko was on his hind legs as solemn and busy as an owl. I snatched the gridiron away from him and took the kitten off before she was burned any except her fur, and when mother and Susan came downstairs, they couldn't understand what it was that had been burning, and guessed the cook must have put egg-shell on the fire.

This is all the monkey has done since I got him day before yesterday. Father has been away for a week, but he is coming back in a few days, and won't he be delighted when he finds a monkey in the house?—*Jimmy Brown, in Harper's Young People.*

Humorous.

Chips.

WATER colors—so does whisky.

THE man who digs 100 ft. into the ground for water gets along well.

WHY is the earth like a blackboard? Because the children of men multiply upon the face of it.

THE man who comes about solely to kill time should confine himself strictly to his own business.

EVERY to-morrow has two handles. We can take hold of it by the handle of anxiety or the handle of faith.

"FREE CHOPS" is a sign hung out by a Chicago restaurant, and when customers apply they are shown to a wood pile and handed an ax.

A YOUNG lady desired her lover to promise her that he would never smoke another cigar. "I'll do it," he said; "sustained by your love, a meerchaum will do for me."

"BRIDGET, I cannot allow you to receive your lover in the kitchen any longer." "It's very kind of you, ma'am, but he is almost too bashful to come into the parlor."

ALL the men in an entire county in Minnesota turned out on a wolf hunt the other day. The result was 36 dog fights and the capture of a fellow who had run away from his wife.

AN exchange says: "The bee stings itself to death in trying to sting someone else." Some men make things uncomfortable all around them for a season, but the end is generally worse for themselves than for those they sought to annoy.

"SEE that my grave's kept green," he warbled, under the window of his fair one's domicile one pleasant night. "I'll tend to the grave business, young man," shouted her enraged paternal ancestor, as he poked an old musket out of the second story window. No more concert that evening.

Household Hints.

Domestic Recipes.

Cold Water Cake.

Two cups of sugar, four eggs, yolks and whites beaten separately, one cup of cold water, stirred in slowly, three cups of flour, two teaspoonfuls of yeast powder, half cup of melted butter put in the last thing. Flavor to suit the taste.

Soda Pound Cake.

Beat two-thirds of a cup of butter to a cream, add two cups of sugar, six eggs, yolks and whites beaten separately, three and a half cups of flour, two teaspoonfuls of cream of tartar in the flour, one teaspoonful of soda dissolved in one cup of milk. Flavor to suit the taste. Both these cakes require about three-quarters of an hour for baking.

Ginger Sponge Cake.

One cup of butter, two cups of molasses, four eggs, three cups of flour, one cup of milk, two teaspoonfuls of yeast powder, one tablespoonful of ginger.

Cream Tapioca Pudding.

Soak three tablespoonfuls of tapioca in water three hours, put the same into one quart of boiling milk and boil 15 minutes. Beat the yolks of four eggs in one cup of sugar and turn them into the pudding five minutes before done. Flavor with vanilla or lemon.

Cream for Pudding.

Take the whites of three or four eggs and beat to a stiff froth, add three tablespoonfuls of white sugar and pour over the pudding. Bake five minutes.—*Clara Deming, Vallejo.*

Health Column.

Oxygen as a Curative Agent.

Is oxygen a curative agent? The wonderful power which it possesses of destroying organic matter, and the purifying effect which always results therefrom, has led us, reasoning by analogy, to believe that many diseases which are now regarded as incurable, would succumb to the cleansing power of this element. The air contains only 20.095% of oxygen, the remaining 79.005 parts being composed entirely of nitrogen, which serves to dilute the oxygen. The depressing effect of a smaller amount of oxygen and increased amount of carbonic acid is felt when one has been for a short time in a poorly ventilated room

In mountainous countries, where the hight above the sea level is not too great, the refreshing effect of the air is proverbial. This is simply because the proportion of oxygen is greater and of carbonic acid less.

The purifying effect of oxidation is strikingly shown in running brooks. Here water which is unfit to drink on account of organic impurities, becomes pure by running a mile or two. This change is due to the fact that in the act of flowing each particle of the water is brought into contact with the air, and absorbs the necessary amount of oxygen to combine with the organic matter, thus destroying it.

In many diseases a "change of air" is recommended as a cure, or at least as a source of relief. In its incipient stages consumption may often be cured by vigorous exercise in the open air, and by living wholly out of doors.

The benefit derived from pure air and exercise is due entirely to the large amount of oxygen which exercise—such as horseback riding—enables and compels the patient to inhale. The organic germs of disease are thus oxidized and destroyed.

We submit, then, to the public for consideration, the question: Will not the breathing of pure oxygen gas prove to be the solution to the problem, "How shall we treat consumption?" There is a well authenticated case in which a child was cured of hydrophobia by inhaling three cubic ft. of oxygen. In this case blood poisoning was the evil, and oxygen seems to have combined with the poisonous principle, thereby destroying it.

A young Frenchman who has recently been experimenting upon himself, finds that he can inhale oxygen without experiencing any ill effects. He took as much as 100 liters a day for several days. The writer has often inhaled oxygen for experimental purposes, and its use was never followed by any unpleasant effect.—*Hall's Journal of Health.*

MEDICAL USES OF EGGS.—For burns or scalds, nothing is more soothing than the white of an egg, which may be poured over the wound. It is softer, as a varnish for a burn, than collodion, and being always at hand can be applied immediately. It is also more cooling than the "sweet oil and cotton," which was formerly supposed to be the surest application to allay the smarting pain. It is the contact with the air which gives the extreme discomfort experienced from ordinary accidents of this kind; and anything which excludes air and prevents inflammation is the thing to be at once applied. The egg is also considered one of the best remedies for dysentery. Beaten up slightly with or without sugar and swallowed, it tends by its emolient qualities to lessen the inflammation of the stomach and intestines, and by forming a transient coating on those organs to enable nature to resume her healthful sway over the diseased body. Two or at most three eggs per day would be all that is required in ordinary cases; and since the egg is not merely medicine, but food as well, the lighter the diet otherwise, the quieter the patient is kept, the more certain and rapid is the recovery.

THE CROUP.—Toward midnight, after the first sleep, the hateful croup usually fixes its dreadful fangs on the unconscious child. What avails it in the country, miles away from a physician or a drug store, that this, that, or the other remedy is "good for" the disease, when neither physician nor remedy could be had for hours; and all this while the mother is in agony, and the infant sufferer clutches its throat for breath? In such an emergency no medicine known is so potent for cure as a boiling teakettle and a bit of flannel; or, as a lump of ice or snow, with a handful of salt, applied to the throat in a silken pad or bag.—*Dr. Hall.*

WAR ON THE POTATO.—Dr. Heath, a scientist of New York, has ventured upon dangerous ground. He read a paper before the Farmer's Club, in which he opened a war against the time-honored potato. It is an agent, he says, in producing obesity. Many lean persons will be glad to learn that they will double on the potato ratio at once. "Ah, but" says Dr. Heath, "the potato makes the wits fat, also;" and further, "after the lapse of a few generations it dwarfs, mentally and physically the people who live upon it." As in the admixture of food, the potato has not been proved dangerous during several centuries, we think people will be willing to trust it in the future.

THE TERRIBLE CRAMP COLIC, so often fatal before the dawn, can often be relieved within an hour with a milk emetic, and flannels, wrung in boiling water, applied to the stomach.

Worth Knowing.

HOW TO PREVENT WRINKLES.—There is no such thing as wiping out wrinkles. In men they are often honorable evidence of hard mental labor, in women they are usually the evidence of coming age, although care and suffering have much to do with them. Sometimes fair foreheads are prematurely wrinkled from a nervous habit of raising the eyebrows, and from a too great and a too constant pressure of the pillow on one or both sides of the head while sleeping. And just here comes a fact worth remembering. If the forehead has escaped wrinkles, crow's feet are prematurely seen about the corners of the eyes. We all see these crow's feet in men and women whose brows are smooth and young looking. They are the result of sleeping on the light and left sides. The pressure upon the temple and cheeks leaves wrinkles at the corners and underneath the eyes which disappear in a few hours, but finally becomes so fixed that neither hours nor ablutions will abate them. If girl children were compelled to sleep on their backs and continued the habit when they reach womanhood and afterward, they would arrive at middle life without crow's feet gathering in the neighborhood of the eyes, and in most cases their foreheads would be free from even shallow furrows.

FOR CLEANING KID GLOVES.—Get one quart of deodorized benzine, one drachm of sulphuric ether, one drachm of chloroform, two drachms of alcohol. Pour a little of this into a clean bowl, and wash the gloves in it as you would wash anything. After the dirt is nearly out, rinse in more of the clean fluid. Usually one rinsing is enough, but if the gloves were very much soiled, rinse the second time. If the gloves are of cheap kid, it is best to dry them on the hand, but a nice glove, after having been rubbed with a soft cloth to smooth out wrinkles, may be hung on a line to dry. This preparation is an excellent thing to keep in the house, not only for cleaning gloves, but for taking out grease spots from clothing and carpets, and for sponging coat collars and felt hats.

A GOOD clock oil is made as follows: Take olive oil and dissolve it in boiling alcohol, and add it drop by drop until it is no longer taken into solution. Upon cooling it will let fall crystals, and leave a considerable portion still fluid. The fluid part is to be poured off, filtered through a piece of white blotting-paper, and may be used in this form, or the alcohol may be distilled off for fresh processes, and the pure lubricating oil which remains is very suitable for oiling watches, clocks, or other delicate machinery. This will not oxidize or gum up, even when exposed to great cold. Or take neatsfoot oil and drop into it some lead shavings in order to neutralize the acid contained in the oil. Let this stand for a considerable time (the longer the better). Oil thus prepared never corrodes or thickens.

VENTILATE YOUR CLOSETS.—Soiled undergarments or the wash clothes ought not to be put into a closet, ventilated or not ventilated. They should be placed in a large bag made for the purpose, or a roomy basket, and then put in a well-aired room at some distance from the family. Having thus excluded one of the fertile sources of bad odors in closets, the next point is to see that the closets are properly ventilated. It matters not how clean the clothing in the closets may be; if there is no ventilation that clothing will not be what it should be. Any garments after being absorbed for a while will absorb more or less of the exhalations which arises from the body, and thus contain an amount of foreign—it may be hurtful—matter which free circulation of pure air can soon remove.

A SOLDERING fluid which does not occasion rust is prepared in the following manner: Small pieces of zinc are immersed in muriatic acid and left in it until the acid is saturated with it, which may be known by the cessation of ebullition of the acid, and also by the zinc, after that stage, being left undissolved; add spirits of ammonia, about two-thirds of the quantity of the acid; thin with a little quantity of rain-water. When, at the time of adding the zinc, if the muriatic acid is heated to a low degree, the solving of the zinc will be achieved sooner. This fluid does not cause rust on iron or steel, and is excellent for all purposes, even for tinning.

PURIFYING A WELL.—A correspondent of the *Inter-Ocean*, living in Battle Creek, Mich., says that he purified his well of water, which was so subject to many worms, bugs and other insects as to render it almost unfit for drinking, by placing in the well a couple of good-sized trout. They have kept perfectly healthy, and have eaten up every live thing in the water; in the winter season crumbs of bread or cracker are thrown in. The water is perfectly pure and sweet.

TO MEND BROKEN CROCKERY, use lime and the white of an egg. Mix only enough to mend one article at a time, as it soon hardens and cannot be used. Powder a small quantity of the lime, and mix to a paste with the egg. Apply quickly to the edges, and place firmly together. It will soon become set and strong, seldom breaking in the same place.

WITHERED LEAVES having the yellow-brown or red autumnal colors can be made green again by steeping them in water with a little zinc powder.

Fraternal.

Masonic.

THERE is no room in the realms of Masonry for Atheists.—*N. Y. Era.*

IN 1813, the Duke of Leinster was elected Grand Master of Ireland, and held the position over 60 years, when he was succeeded by the Duke of Abercorn, the present Grand Master.

ARTHUR W. KEDDIE has been reappointed Masonic Inspector for the 6th Masonic district, which includes the Lodges in Beckworth, Sierraville, Quincy and Taylorville.

NAVAL LODGE, No. 87, F. & A. M., is the oldest Lodge in Vallejo, having been organized July 17, 1855. It received its charter May 7, 1856, and the first meeting was held thereunder May 28, 1856.

THE Brotherhood of St. John is a recently established organization in this city. It is about 15 months old, the object insurance, and Master Masons only are eligible for membership. The late Julius George was one of the original promoters of the organization. Its expenses are probably lighter than any other known insurance organization, being confined solely to the item of stationery. Only two members have died since the organization was established, for each of which an assessment was levied.

THE Royal Arch was originally a part of the Master's degree. It was separated from that of Master somewhere between 1720 and 1756. The separation, however, was not acknowledged by the Grand Lodge of England until 1777, or thereabouts, for in 1755 that grand body unanimously resolved "that the meetings of the brethren under any denomination of Masons, other than as brethren of this our ancient and honorable society of Free and Accepted Masons, is inconsistent with the honor and interest of the craft, and a high insult on our Grand Master and the whole body of Masons." The first book of Constitutions of the Supreme Grand Chapter was issued in 1776, and about this time the system of R. A. Masonry was propagated in Great Britain and its dependencies, and was introduced into this country.

MARYSVILLE COMMANDERY, No. 7, Knights Templar, received a fraternal visit from about 30 members of Sacramento Commandery, No. 2, on Saturday, March 12th. A number of ladies accompanied them. On arriving at Marysville the party were met at the depot by members of Commandery, No. 7, headed by a full brass band, and carriages were in waiting for the ladies. The Sir Knights marched to the Western hotel, where dinner was taken and several hours were spent in pleasant conversation. Subsequently the members of the Order repaired to the Temple, where degrees were conferred. Then the doors were thrown open and dancing was inaugurated. A magnificent banquet was served during the evening, and at the conclusion of this a handsome gold-headed cane, suitably engraved, was presented to Eminent Commander, Phil. W. Keyser (who had just completed his third term and declined re-election). The presentation was made by Sir Knight E. A. Belcher and was fittingly responded to by the recipient of the beautiful gift, to whom the testimonial was a genuine surprise. In the morning, prior to the departure of the visiting Sacramentans, the Marysville Knights procured carriages and drove their guests about the city showing them places of interest, the levee system, etc. The visiting Knights are loud in their praises of the generous and unbounded hospitality which had characterized their reception and entertainment at the hands of Marysville Commandery, No. 7.

THE installation of officers of Oakland Commandery, No. 11, took place March 15th. On this occasion the usual Masonic custom was departed from, and ladies admitted within the sacred precincts. After the lines had been formed and the representative officers received, Sir Hiram T. Graves, Past E. Grand Commander of California, assisted by Sir Blake as Grand Marshal, proceeded to regularly install the following officers of the Commandery according to the impressive ritual of the Temple: Sir Solomon Lathrop, Eminent Commander; Sir J. E. Benton, General-issimo; Sir W. F. Fletcher, CaptainGeneral; Sir David McClure, E. Prelate; Sir George D. Metcalf, Senior Warden; Sir Herman Sears, Junior Warden; Sir F. W. Cushing, Recorder; Sir R. C. Gaskell, Treasurer; Sir George Patterson, Standard Bearer; Sir Z. Taylor Gilpin, Sword Bearer; Sir Carroll Cook, Warden; Sirs C. W. Banks. X. Y. Z. Marchand and Charles Jones, Guards, and Charles E. Gillette, Sentinel. At the conclusion of the ceremonies the installing officer delivered an impressive charge, ending with appropriate scripture selections, after which the Grand Marshal made the usual proclamation, the lines were reformed and under the escort of the uniformed Knights, the company repaired to the banquet hall, where a rich and tempting repast was spread. Among the guests were a large number of ladies, several prominent Masons of the Lodge and Chapter, and visiting Knights Sirs H. T. Graves and Alexander de Leo de Laguna of California, No. 1, and H. H. Blake, of Golden Gate, San Francisco, George W. Hopkins, De Witt Clinton, Virginia, Nevada, and S. P. Kelly Calvary, Providence, Rhode Island. Eminent Commander Lathrop acted as Toast Master, and after a full discussion of the sumptuous repast, the cloth was removed, and he proposed as the first sentiment "The Grand Commandery of California," responded to by Sir H. T. Graves, who complimented Oakland Commandery and described her as a staunch ship, well manned and rigged, and afloat upon the sea of prosperity, with the banners of the Order floating at the masthead. He then referred to the progress and growth of the Grand Commandery as the representative of the grandest Order in the world, including 50,000 Knights in the United States, and of the session of the Grand Encampment of the United States in 1877 and 1880, and referred to the fact of the next grand conclave to exceed all previous ones; and which is to be held in San Francisco. He closed with the sentiment of "Success to the Knights Templars' Triennial Union," which was responded to in humorous vein by Sir R. W. Gaskell in a description of the trip to Chicago. The next toast was "To the Golden Gate, the youngest Commandery in the jurisdiction," responded to by Sir H. H. Blake. "The Order of Knighthood throughout the world," was responded to by Sir David McClure, who spoke of the Order as being the grandest human organization ever formed by man. It was founded upon the divine principle of truth, based upon right, included the brotherhood, and even embraced the sisterhood. Sir Knight Graves then proposed "Self-sacrifice as exemplified in the character of Sir J. E. Benton," which elicited some humorous remarks from that gentleman and Mr. Gaskell. Sir Knight Benton next proposed "The ladies, our solace by day and our comfort as Knights," which was drank standing, Commander Lathrop responding in a bright, witty speech, and called upon Sir George D. Metcalf, who ably seconded his chief in an excellent speech. The last regular toast offered was to "California Commandery, No. 1," ably responded to by the Acting Grand Commander. The sentiments presented after were impromptu, personal or unimportant. Several songs were sung, a pleasant time enjoyed, and the exercises closed with the recitation of Sir Robert Morris' celebrated Templar poem by Sir Solomon Lathrop.

I. O. O. F.

THE tenth anniversary of Odd Fellowship in Germany was recently celebrated by nearly every Lodge in that country.

THE Vallejo Odd Fellows' Library Association was organized October 9, 1873. Seven trustees perform the business of the association. The library contains about 1,200 books of choice literature.

OUTSIDE of the Church, Odd Fellowship is unquestionably one of Pennsylvania's greatest institutions. Such is the public endorsement by the press of the Keystone State. Its 86,000 Odd Fellows are certainly a power in the land, and will increase in influence as they regain the former quota of 100,000 for which they are now striving.—*Register.*

ON Monday evening, Feb. 14th, an Odd Fellows' banquet took place at the Italian restaurant, Clay St., in honor of the fraternal visit of the Golden Rule Encampment, of Oakland, to the Unity Encampment of this city. An enjoyable time, replete with pleasant reminiscences, was had, during which brief speeches were made by Messrs. Estee, Benton, Galloway, Black, Lyon, Norcross and Lewis. J. S. Swan gave a comic recitation.

H. D. RICHARDSON, D. D. G. M., has prepared for the Vallejo *Chronicle* some statistics of the relief work done by the Odd Fellows of Solano county for 1880, from which we take the following: Solano, No. 22, total relief for charity, $243.50; total expenses, $1,190.65; total assets, $6,778.37. San Pablo, No. 43, total relief for charity, $1,757.50; expenses, $3,466.15; assets, $23,342.55. Suisun, No. 78, total relief for charity, $1,212; expenses, $1,895.42; assets, $13,047.94. Vacaville, No. 83, total relief for charity, $461; expenses, $958.35; assets, $8,134.65. Montezuma, No. 172, total relief for charity, $522.75; expenses, $1,550.80; assets, $8,466.22. Rio Vista, No. 180, total relief for charity, $222; expenses, $777.58; assets, $3,052.77. Elmira, No. 214, total relief for charity, $194; expenses, $457.10; assets, $3,072.70. Golden State, No. 216, total relief for charity, $847.50; expenses, $1,601.75; assets, $11,019.40. Bird's Landing, No. 284, total relief for charity, $217.25; expenses, $687.50; assets, $1,104.44.

IN the year 1854, in consequence of the establishment of a Naval station at this post, it was the means of bringing a large number of mechanics together, among whom had been accorded the privilege of a few to unite in the Eastern States with the Order of Odd Fellowship. The number were in the habit of gathering at the house of one Bro. Capron for social intercourse and to consult over the plan of organizing a Lodge of Odd Fellows. On Saturday evening, August 18th, 1855, in consideration of a dispensation granted by E. W. Calt, Grand Master of California, San Pablo Lodge, No. 43, was established, with J. W. Hilsee, D. N. Darlington, Ezra Dix, Pendleton Culston and James Brownlie as charter members. E. W. O'Brien, J. M. Dunlap, Samuel Rule, J. G. Gardner and David Wright were admitted as members the same evening by card and initiation. The Lodge met in what was known as Aspenall's hall, at the corner of Virginia and Santa Clara Sts. The Lodge now owns a handsome edifice at the corner of Georgia and Marin Sts., and numbers about 165 members.—*Vallejo Chronicle.*

WE find the following in an exchange concerning Odd Fellowship in the national capital: Ex-President Hayes, who is a Past Grand of his own Lodge in Ohio, has taken a deep interest in Odd Fellowship in Washington the past four years. Hon. John Sherman, ex-Secretary of the Treasury, is a Past Grand of his Lodge in Ohio. Many of the high officials in Washington take pride in saying that they are old Odd Fellows. Among the members of Congress several are lecturers upon Odd Fellowship. The most eloquent of these are ex-Senator Booth, of California; Hon. J. S. C. Blackburn, of Kentucky, and Hon. Wm. M. Myers, of Indiana, members of the House of Representatives. Hon. J. Proctor Knott, of Kentucky, is a comical genius, and makes an audience roar with laughter. Ex-Gov. Newell, of New Jersey, who has lately been appointed Governor of Washington Territory, and who has been a member of the House of Representatives for several years, is a fine speaker. In the Departments are poets, authors and lecturers, who are busy all winter lecturing upon Odd Fellowship all over the United States. In the Middle and Southern States courses of lectures have been gotten up in the winter season, and distinguished Odd Fellows have given brilliant lectures to the public, under the auspices of Odd Fellows, and this has helped the Order amazingly. Much of the interest that has recently been awakened is attributed to this cause. More attention is now paid to the literary culture, in connection with the Order, and the result is that a better class of men, who are highly educated, are coming into the Order. Our best men in the nation are just finding out what a grand and beneficent Order the Odd Fellows present to the world for approval. It is only necessary that the talent in the Order should be shown by the public lecturers what Odd Fellowship is, to have its membership of half a million doubled in a single year.

ON the 26th of April next, American Odd Fellowship will have been established 62 years. Few there are, indeed, who can tell the great good this wonderful benevolent organization has accomplished in the brief history of a half century. From the archives of our Sovereign Head we can unearth the most astounding statistics, commemorative of greater practical results for the advancement of civilization and the harmonious blending of the interests of the human family, than can any other kindred organization for the same period. We now have more than a half million active members marshaled under our banner of white, whose ample folds are indelibly impressed with that emblem of constancy and peace, the Dove hovering over our escutscheon, the symbolic letters F., L., T., excircled with the three links of sympathy that unites us as one in our aims and rewards—firmly standing shoulder to shoulder battling in the cause of justice, equality, loving kindness, and the fraternization of mankind. In this noble work we have brought to bear an annual revenue of nearly $4,500,000, from which nearly 2,000,000 of dollars are paid annually for the relief of the sufferings of our fellow beings. While in the aggregate for the half century, over 77,000,000 of dollars have been laid upon the altars dedicated by our Order to Benevolence and Charity; and of it has been appropriated for the relief of the distressed and the education of the orphan, the vast sum of 30,000,000 of dollars, leaving in our treasuries an almost incredible sum, as a guarantee fund for the continuance of the practices of its active ministrations in the cause of humanity; and with a faithful administration of its well-regulated laws, assuring its permanency beyond a question of doubt, despite the efforts of all foes without, or enemies within. Are not results such as these sufficient cause for rejoicing, and for an interchange of sentiment and feelings expressive of the general good? We think so, and do most earnestly recommend that every Lodge and brother in our jurisdiction mark the day of the birth of our Order with a show of reverence for its founders, and with public manifestations, general thanksgiving and prayer for the continuance and perpetuity of the character and influence for good of this, the noblest work of human conception, the Order of American Odd Fellowship. Brothers, let us all in some fit and becoming manner celebrate this, our natal day.—*New Age.*

Knights of Honor.

A NEW Lodge of K. of H. is to be instituted at Temescal by C. H. Richards.

DR. HALEY will try and organize a new Lodge of K. of H. in Mendocino City. It is stated that the roads are very bad up there, but we think the worthy Doctor can surmount the difficulties, if the epizootic has not sickened all the horses.

UNDER the law as changed, all printed paper filled in with writing is rated as first-class matter, and must be paid for at the rate of three cents for each half ounce. Thus the assessment notices heretofore carried for one cent in an open envelope, must in future be prepaid with full postage to secure their delivery. The same will apply to all other blanks filled in and forwarded through the mail by the Lodge Reporters.

WE expect to see some action taken at the next session of the Supreme Lodge to reduce the amount of per capita charged to members working under a Grand Lodge jurisdiction. It does seem that the amount now charged is excessive, and much more than is necessary to defray the running expenses of the Supreme Lodge. Think of it, brother Representatives, and see what can be done to reduce this tax.

SINCE the enforcement of the law requiring all examinations to be referred to the State Medical Examiner before the candidates can be admitted, there has been a very great decrease in the number of Lodges organized in the interior, and until some change is made to facilitate the business of organizing Lodges, but few will be started, as under the present law it will not pay a Deputy to make the frequent trips necessary to attend to the preliminary duties of organizing a Lodge. We consider the duties of State Medical Examiner of great value to the Order; but we think a system might be devised whereby a new Lodge could be instituted without first submitting the examinations of charter applicants to State Examiner; having it understood that in case they were rejected as beneficiary members by the State Examiner, they should become honorary members. This would necessitate the repealing of the law which prohibits persons under 55 years of age becoming honorary members; but we can see no great objection to admitting a person of any age as an honorary member. We hope this matter will be thought over by our Supreme Representative. The system mentioned has been found to work well in a sister Order. And while it costs a Deputy more in time and expenses to organize a Lodge than he receives for his labor, we need not expect many new ones to be organized.—*California K. of H. Journal.*

CENTENNIAL LODGE, No. 261, New York, has a membership of over 700 and $10,000 in the treasury.

WE find the following questions and answers in the *K. of H. Reporter:*

1. Has any Past Dictator, in the absence of the sitting Past Dictator, the right to correct the Dictator in case he gives the work incorrectly? No. The Grand Dictator and his deputies are charged with instructing the officers of a Lodge in the work.

2. In case all the Past Dictators in a Lodge, including the sitting Past, are elected to other offices in the Lodge, who is to fill the P. D.'s chair? The Dictator may call any 3d degree member to the P. D.'s chair temporarily for each meeting.

3. A member who has paid his dues for the first quarter of '81, takes a card Jan. 7th, and immediately deposits the same in another Lodge. Can the latter make him pay his dues over again? They should not; but whether they can or not has never been decided by the Supreme Lodge.

4. A member takes a card Dec. 15, 1880, and deposits same in another Lodge, Jan. 7, 1881, and is received. Which Lodge should he pay dues to for quarter beginning Jan. 1st? He must pay to the Lodge which granted him the card, for the quarter beginning Jan. 1st, 1881, before the Lodge in which he deposits can consider his application favorably. See Art. VIII, Sec. 4, Sub. Const.

5. Assessment 77 is called to the Supreme Treasury, Jan. 26th, and Lodges directed to collect assessment No. 78. Does this give each member 30 days from Jan. 26th in which to pay No. 78? Yes.

Knights of Pythias.

A NEW Lodge of K. of P. will soon be instituted in West Berkeley.

THE membership of the K. of P. on the first day of January, 1880, was 89,522.

BAYARD LODGE, No. 53, will give an invitation ball on Saturday evening, April 23d.

TAMALPAIS LODGE, No. 65, was instituted by J. H. Harney, G. C. C., on Saturday evening, March 19th. There were 75 charter members.

NEW YORK had ought to be thankful for its good fortune this winter, as it is the only jurisdiction that has a Shedd over it.—*N. Y. Era.*

ON the assembling of the Grand Lodge of the Knights of Pythias in the city of Davenport, Iowa, recently, an address of welcome was delivered by the Mayor, Hon. Roderick Rose, Supreme Master Workman of the A. O. U. W. The remarks of Bro. Rose gave such unqualified satisfaction to the Sir Knights, that the Grand Lodge requested him to reduce them to writing for insertion in the Grand Lodge Records.

American Legion of Honor.

A NEW Lodge of A. L. of H. is under way in the western addition of this city.

A NEW Council was instituted on Saturday evening, February 19th, at Shiels' building, 32 O'Farrell street, by Deputy Supreme Commander E. J. Field, with 43 charter members. The new Council was named Washington Council, and the following are the officers: Commander, C. O. Burton; Vice Commander, J. M. Camp; Orator, P. H. Blake; Past Commander, C. E. Blake; Secretary, D. McLaren; Collector, W. S. Potter; Treasurer, H. S. Winn; Guide, Sidney Smith; Chaplain, S. C. Beatty; Warden, C. Ellis; Sentry, C. A. Stahle.

PACIFIC COUNCIL was instituted by D. S. Van Slyke, D. S. C., at San Jose, on Thursday evening, March 17th. Thirty-nine names were appended to the roll of membership. The following officers were elected: Commander, John Britton; Vice Commander, D. C. Bailey; Orator, E. A. Clark; Past Commander, A. P. Murgotten; Secretary, E. B. Lewis; Collector, C. J. Owen; Treasurer, A. E. Moody; Chaplain, W. A. January; Guide, W. D. Brown; Warden, C. H. Peiper; Sentry, Al. Haehnlen. The objects of the organization are as follows: To unite fraternally all persons of sound bodily health, and good moral character who are socially ac-

ceptable, and between 18 and 65 years of age. To give all moral and material aid in its power to its members and those dependent upon them. To educate its members socially, morally and intellectually. To establish a fund for the relief of sick and distressed members. To establish a benefit fund, from which, on the satisfactory evidence of the death of a member of the Order, who has complied with all its lawful requirements, a sum not exceeding $5,000 shall be paid to the family, orphans, or dependants as the member may direct.

Order of Chosen Friends.

THE revised constitutions have arrived, and Councils in need, can obtain the same upon application.

SUPPLIES are now sent to every State in the Union in which this Order is allowed to exist, and one set has been shipped to Bozeman, Montana Territory.

FOUR new Councils have been instituted lately—two in Oakland with 100 members; one in Vallejo with the same number, and one in this city with a membership of about 50.

CITY Councils will observe, that since the establishment of the Councils in Oakland, they have no right to entertain the application of any one from that city without the consent of those Councils.

THE first annual session of the Grand Council of Indiana convened at Indianapolis, Tuesday, Feb. 15th. Quite a novel resolution was introduced. It was no less than that the representative to the Supreme Council be instructed to vote in favor of doing away with the Indiana Grand Council, and also to prohibit the institution of Grand Councils in other States. It was called by some of the members as a plain case of suicide. It did not meet with favorable action at the hands of the Grand body.

THE establishment of a Grand Council will necessitate the following estimated expense: Salary of the Recorder, which has been suggested at from $50 to $100 per month, and we shall take the maximum, say $100, which would be $1,200 per annum; contingent fund of Grand Councilor per annum, $300; printing, postage and sundries per annum, $250; making a total of $1,750 per annum. The revenue as established at present is $1 per capita tax for 3,000 members, which the Order will number in this State by July 1st, $3,000; deduct from this the per capita tax due the Supreme Council, 3,000 members at 25 cents, $750, which would net $2,250, leaving a net surplus in the Grand Council treasury of $500; more than sufficient to pay mileage and per diem to representatives, and if the Order should increase, as predicted, to 5,000 by the first annual session of the Grand Council, there would be enough income to warrant a reduction instead of an increase of the same.—*Our Chosen Friend.*

Royal Arcanum.

THIS Order has a membership of about 26,000.

MASSACHUSETTS has a membership of about 5,000.

THE *Royal Arcanum Journal*, published monthly by T. E. Peckenpaugh, Wooster, Ohio, is well filled with news of this Order.

THE Royal Arcanum is about to be introduced in this city. A charter for the establishment of a Lodge has been applied for, and it will start with a membership of 30 or 40. The Order is similar to the American Legion of Honor in its objects, the only real difference being in the amount of insurance. The Order has already a large membership in the East.

THE Royal Arcanum was organized in Boston, Mass., June 23, 1867. There is but one degree, and the ceremony of initiation is short and interesting. In States where no Grand Councils exist, subordinate Councils are organized by the Supreme Regent or his Deputies, and they work under dispensations until the meeting of the Supreme Council. The charter fee, to be paid at the time of the institution, is $100, in return for which the Council receives a set of supplies, sufficient, usually, to last them several months. The cost of a charter member cannot be less than $6 for initiation, which entitles him to benefit certificate, $2.50 for medical examination and supervision, one assessment for the widows' and orphans' benefit fund, and dues for the current quarter, which is not less than fifty cents. A strict medical examination is required to be made by a physician who is a member of the Order. The assessments are graded according to age. Three thousand dollars is the highest amount paid on the death of a brother. This sum is paid on the death of every full rate member, and $1,500 on the death of every half rate member. To promote the fourth object of the Order, there is a provision of the subordinate constitution that "any member in good standing, and not in arrears for dues or fines, having six months previously obtained the degree, who may become disabled, by sickness or other disability, from following his usual business or some other occupation, shall receive from the funds of his Council such weekly benefits (to be paid weekly) as his Council may in its by-laws prescribe, which shall not be less than $1 per week;" and there are the usual guards against imposition. Under this provision should a member become permanently incapacitated for work, the income from the sick benefit will be ample to pay his assessments, and ultimately secure to his family the $3,000. Within 30 days after the initiation of every member the Secretary of the subordinate Council forwards to the Supreme Secretary the application and Medical Examiner's certificate with one dollar, for which the member receives a benefit certificate for $3,000 or $1,500, as the member is full or half rate. It is made payable on the death of a member, to the person or persons named in the application, and the beneficiary must be of the family or those dependent upon a member. The one dollar paid for certificate also pays for keeping this record of each member so long as he remains in the Order.

I. O. G. T.

GOOD TEMPLARISM is spreading in Montana. Hayes Lodge, No. 8, was instituted at Fort Custer by J. C. Budd, special Deputy, on Washington's birthday, with 29 members.

AND now Rough and Ready, Nevada county, has a Lodge of Good Templars, it being instituted by Chas. E. Clinch, D. D. W. C. T., is called Perseverance, and starts with 33 members. Spirits of '49, how ye must wonder at the changes which have taken place!

VALLEJO LODGE, No. 64, I. O. G. T., was organized December 2d, 1862, and has been in existence a little more than 18 years. The charter members numbered 16. Launched by these few the Lodge did not spring into the fullness of strength at once, but gradually diffused itself like a heaven throughout the community, though not without serious struggles, but the course has been onward and upward. Its present membership is about 125, and lately has been receiving many new members. Besides being for social and mutual enjoyment, it is productive of good results, which are characterized by the radical and vigorous warfare against the evils of intemperance. Its history has been eventful. At one time it was the banner Good Templar Lodge in the State, having in 1875 over 300 members. In April, 1876, the place of meeting was changed from Odd Fellows' hall to Masonic hall; and since its organization it has contributed more money to the Orphans' Home than any other two Lodges in the State. The present Lodge Deputy is Charles Daly. The next session of the Grand Lodge of Good Templars will be held at Vallejo.

THE Visalia *Delta* says that by far the best session of the District Lodge, I. O. G. T., ever held in Tulare county was that of March 12th, at Hanford. Six Lodges were represented by 34 delegates and 10 district officers; they were: Visalia, Hanford, Grangeville, Jonesa, Lakeside and St. Johns. Reports were made of the membership and condition of the several Lodges in the county, showing the number of members to be: Visalia, 77; Hanford, 55; Grangeville, 85; Jonesa, 75; Lakeside, 63; St. Johns, 34; Plano, 30; Porterville, 38; Noradell, (Pride of Tulare), 28; Woodville, 15; Tulare, estimated, 30; Lemoore (Fairfield), estimated, 20; making in all 550. Most of the Lodges were represented as in a good thriving condition, and the prospects of the temperance cause were thought to be brightening. Grand Lecturer Crowhurst gave a very encouraging account of his work in the county. Among his other helpful suggestions as to the management of District Lodges was the one that at future meetings delegates from each Lodge be prepared to report: 1st, their numerical condition; 2d, financial standing; 3d, methods of work; 4th, influence in the community; 5th, and the results for good. There were present besides the delegates, numerous members of the Order, making a better attendance than ever before assembled in Tulare county on a like occasion. The ladies of Hanford Lodge provided a bountiful repast for the guests, to which ample justice was done. The next District Lodge was appointed at Tulare City, Saturday, June 4th.

Christian Temperance Union.

THE members of the Ladies' Christian Temperance Union of Salinas have a column in the Salinas City *Index*, edited by themselves, from which we make some selections:

IT IS said that there is a law in Sweden according to which a man who is seen drunk four times is deprived of his vote at elections. The adoption of that principle would considerably restrict the number of voters in some places on this side of the Atlantic.

THE habit of using ardent spirits by men in office has occasioned more injury to the public, and more trouble to me, than all other causes. And were I to commence my administration again the first question I would ask respecting a candidate for office would be, "Does he use ardent spirits?"—*Jefferson.*

HERE are Dr. Thomas Guthrie's excellent reasons for being a total abstainer: "I have tried both ways; I speak from experience. I am in good spirits because I take no spirits; I am hale because I use no ale; I take no antidote in the form of drugs, because I take no poison in the form of drinks. Thus, though in the first instance I sought only the public good, I have found my own also since I became a total abstainer. I have these four reasons for continuing to be one: First, my health is stronger; second, my head is clearer; third, my heart is lighter; fourth, my purse is heavier."

THERE are a great many families which cannot afford things needful for their comfort and convenience. Many a woman has not a cent she can call her own to use for comfort or luxuries, while her husband has his liquors, his cigars and tobacco. Three ten-cent drinks a day cost $109.50 a year; three ten-cent cigars daily cost as much more, making $219 worse than wasted by the head of the family. But dram-drinkers and tobacco-users resemble that man of whom it was said, "Of all his father's family he loved himself the best." A little more attention to the second and great commandment, "Thou shalt love thy neighbor as thyself," would greatly improve the behavior of these men and cheer the hearts of many sad children and weary wives.

Selections.

THE temperance societies all over the country are active.

THE Ancient Order of Foresters is claimed to be the largest friendly society in the world. It reports about $14,000,000 of cash assets.

THE usual monthly musical and literary entertainment of the Canadian Association took place at B. B. Hall on Tuesday evening, March 22d. The programme, which was finely executed, was as follows: Overture, orchestra; solo, A. A. Burton; comic song, Miss Gracie Stark; solo, J. F. Searight; recitation, Miss Mary Booth; ballad, John Davis; zither quartette, "Serenade," A. Fine, S. Sherrott, H. Farnsworth, H. D. St. George, G. Grendle; solo, J. J. Nachtrieb; ballad, Mrs. Braid; comic song, Mr. Sam Booth; ballad, F. Smith; facial expressions, Mr. Harry Latham. Terpichore then held the floor and her votaries indulged in the mazy to their heart's content. These entertainments of the Association afford great pleasure to the participants. The executive committee is as follows: Daniel McLeod, M. J. Sullivan, C. E. Hunt, J. W. Harris, A. Barker, S. Beatty, Jas. Fraser, W. B. Blair.

OFFICERS of fraternal societies receiving this notice marked are requested to examine the complimentary copy sent to them, and if consistent, assist in extending the circulation of the WATCHMAN. To persons who will act as Lodge or local agents, we will allow favorable rates of commission according to service rendered in forwarding our enterprise.

Workmen Guarantee Fund Association.

INCORPORATED JANUARY 22d, 1880.

W. H. JORDAN, - - - - - PRESIDENT.
Past Grand Master A. O. U. W. of California.

ADMISSION FEE, $3.00. ANNUAL DUES, $2.00.

ENDORSED and has the BEST WISHES of the SUPREME MASTER WORKMAN OF THE UNITED STATES, as per letter on file.

ENDORSED and Recommended by Past Grand Master Clay W. Taylor, in the following letter:

OFFICE OF GRAND MASTER WORKMAN, A. O. U. W. OF CALIFORNIA, SHASTA, CALIFORNIA, October 2d, 1880.

To the Officers and Members of the Workmen Guarantee Fund Association:

It affords me pleasure to say that the aims and objects of the "Workmen Guarantee Fund Association" meet with my most hearty approval and endorsement. As an auxiliary to the A. O. U. W of California, it is calculated to do great good, and I commend it to the favorable consideration of the members of our noble fraternity. Yours, fraternally,

CLAY W. TAYLOR, G. M. W. of California.

ENDORSED and Recommended by H. G. Pratt, Grand Recorder, one of the Directors of the Association.

ENDORSED and Recommended by C. H. Haile, Grand Receiver, also, one of the Directors of the Association.

ENDORSED and Recommended by Jordan, Brewer and Taylor, the Supreme Representatives of California to the Supreme Lodge of the United States, who are Officers and Members of the Association.

ENDORSED and Recommended by 128 Past Master Workmen who are Members of the Association and Representing 91 Lodges throughout the State.

ENDORSED by the Membership of nearly 900 of the most Influential and prominent members of the A. O. U. W. in Cal.

The principal object of this Association is to afford an additional protection of $1,000 to the families of deceased members of the Ancient Order of United Workmen, at the lowest possible cost. To become a member the applicant must be a Master Workman Degree member of the A. O. U. W., in good and regular standing in his Lodge. The admission fee includes the first assessment of one dollar, as provided by the Constitution, and which assessment is placed to the credit of the Guarantee Fund and cannot be diverted for any other purpose than the payment of death losses. This fund is kept guarded, and disbursed on the same principle as the Beneficiary Fund of the Ancient Order of United Workmen. Five dollars (which includes admission fee and dues for one year) must accompany the application, and if forwarded by Express or Post Office order, all expenses for such transmission must be paid by the applicant.

No Director of this Association receives any remunerafion for services rendered. There is no sinking fund, consequently the members have the benefit of every dollar received. There are no Lodge dues to pay or Lodge meetings to attend; there is no re-medical examination to be made only in exceptional cases, when, in the judgment of the Executive Committee, it is necessary.

The Directors are men of well known business integrity, and are among the most prominent members of the Order, each being a Past Master Workmen. The average costs of this additional protection, including assessments, will be about $8.00 per year, or less than 20 cents a week.

The sum for which this $1,000 can be secured, and the assurance that every obligation will be promptly and faithfully discharged, is the inducement offered to every member of the A. O. U. W. in good standing to apply at once for admission.

OFFICERS.

PRESIDENT, - - WM. H. JORDAN. | SECRETARY, - - - E. M. READING.
VICE-PRESIDENT, - - - P. VEASEY. | TREASURER, - - - R. H. ORTON.

Chairman of the Executive Committee: W. W. HANSCOM.

Chairman of the Finance Committee: J. H. HARNEY.

For further information address or apply to

E. M. READING, Secretary.

Office—38, St. Ann's Building, corner of Powell and Eddy Streets

SAN FRANCISCO, CAL.

A Glimpse at San Gabriel.

The seeds of the earliest civilization upon this territory were sown in 1761, in the forest of evergreen oaks, which then covered the flanks of the Sierra Madre, or grew in irregular bosses quite low in the valleys. "Fair Oaks park," an unbroken section of this original growth, reminds us Pasadenians of the scenery of "Sibagnoo," San Gabriel, and "Isanthcagna," Mission Viega, when the Fathers settled on the Rio de Los Tremblores. They found not only Nature in royal and gracious mood, but an aboriginal people exceptionally superior in their physical development and habits of life. The children of Catalina island were described by the early voyagers as white, with light hair and ruddy cheeks; the women as having fine forms, very beautiful eyes, and a proud but modest demeanor. Their dress, according to these old chronicles, indicated a certain refinement in savage life not often found in natives of warm climates. For the better class, it consisted of a skirt of dressed deer skin reaching to the knees; a seal-skin cape, with openings for the arms, fell to the waist, and was often profusely and even elegantly embroidered with small shells. The skirt had its heavy fringe also. "The women of Santa Barbara," says Mr. Bancroft, in his "History of the Native Races," "wore rings of shell or bone in the nose; in Los Angeles these ornaments were not in fashion." The belles of the Serranos wore only pieces of polished ivory attached to their ears with a shell ring, and with these bracelets and necklaces of small shells, or of rounded bits of ivory perforated and strung upon sinews.

Cabrillo mentioned having seen, somewhere upon the coast, houses like unto those of New Spain, and there is no improbability that some intercourse was held between these natives and the more advanced southern peoples before the arrival of the missionaries. The padres found large villages in their journey hither through the Dieguanos country. Their territory extended inland 100 miles, and 50 miles north and south of the parent mission.

Enekelkawa was the site afterwards occupied by the San Luis Rey Mission; Pasheckno, of San Fernando. Saticoy, Ohai, Cocomogna, Pala, Hahamogna, are the not unmusical names of Indian villages, which some poet of the future may weave into a garland of song as tender and graceful as the song of Hiawatha.

But between San Diego where the cross was first erected, and Monterey their objective seat of empire, the fathers found no country so fertile and inviting as this. The forests were filled with game, wild foods of every kind were plentiful. The increase of live stock introduced by them was beyond all precedent. The olive and the vine flourished. Remains of the Vina Madre or Mother vineyard of San Gabriel may still be seen. With an eye to beauty as well as utility these vineyards were intersected with walks shaded by fruit trees of every description, adorned with roses and flowering shrubs, and made pleasant by the sound of flowing waters brought from the surrounding hills.

When the Mission Viego was abandoned for the more eligible site of which the church at San Gabriel is a monument, Father Salvadea reigned in supreme authority over some 15,000 souls. He believed in education by work, and his converts were no sooner baptized than they in turn were set to convert chapparal into pastures for the Lord's flocks; he built the mill and dam at the Kewen place, enclosed many miles of the domain with hedges of tuna, laid out a beautiful square around the church with a sun dial in the center, planted the first orange orchard, and brought the date palm, it is said, from the City of Mexico, to whisper at vesper time of the triumphs of the redeemed. How dreamlike and unreal all this seems as the train goes whirling past the lonely palm tree and the old sanctuary, and is lost in the distance.

It is common to include the missionaries, treatment of the Indians in the summary of the wrongs they have endured at the hands of christian civilization. *Amor a Dios*, the motto of the fathers forcibly applied, led to no spiritual development, and though a certain care was maintained for the temporal welfare of the neophytes, when the protection was withdrawn, the Indians were even worse off than before. Nevertheless, against the dark picture of greed and cruelty under Spanish domination, and the records of a century of dishonor under the descendants of Puritans and Cavaliers, the condition of the Catholic missions in their prime is truly a page glowing with the heroic self-sacrifice of Father Junipero and his devoted followers.

In the palmy days of Mission San Gabriel, Los Angeles, (Yaugna, of the native tongue), was an insignificant suburb; but when, by its peculiar and poetic consecration, it had drawn away men's hearts from the rugged old saints who guarded its northern, southern and eastern gateways, just then, the Missions received their death blow. It was as cruel as it was needless, and the heart, if not the judgment of the writer has long accepted the belief, that this shock paralyzed the southern half of California. Religion and industry fell together, and recovery was slow. A new generation, was needed to build again more stately mansions; social, political and religious, for the coming millions who are to find not palaces, or coliseums, and ruined temples of dead faiths, but homes of beauty amid scenes of peace, the refinements of art, the inspirations of science and religion in the new Italy.

In 1781, and the years succeeding, the Angelenos, believing that the Barbarinos had the fairest women, went thither on horseback for their wives. Now Santa Barbara and the Queen of the Angels are married in the interest and destiny of the "new State" of Southern California. In 1881, the descendants of Don Antonio Maria Lugo's four fair daughters, of the Cota's, and Carillo's, and Vallejo's are planting railways and "sowing cities where none be," as much like Americanos as if they had come over in the *Mayflower*. They do not grieve to see their great landed estates divided for the benefit of the people whom the railways bring. The native Californians, as the old families are often called, are among our most enterprising citizens. And in their intense local attachment to the soil, to all that makes Southern California unlike any other Pacific land, lies my expectation of a different type of civilization, of the possibility of contentment with moderate wealth, of culture and competence brought within the reach of all.

One of the most hopeful signs in our southern heavens, is an awakening interest in education, and in the spirit which characterizes the effort to build up the University of Southern California; to build, as the great world-renowned seats of learning have been built, first of students, then of stones. Like the woman who talked of her "library" when she had only a bookcase in which she kept her bonnets, too many of our new institutions have consisted mainly of edifices and professors. Here in a wooden house, consecrated to sound learning, a few wide-awake teachers and citizens have pledged themselves to the training of a generation of cultured men and women. One of the charms of southern California has been the simplicity of life everywhere; among the old and wealthy families there has been no pretension, but a simple, old-fashioned hospitality, as dignified as it is charming and sincere.—*Jeanne C. Carr.*

Ratio Between Wages and Cost of Living.

We have taken some pains to gather up and collate a few statistics relative to the maximum average and maximum rate of wages paid for labor during the past two or three years in various sections of the United States, and also the correlative figures showing the corresponding fluctuations in the cost of living for the same time and in the same places. The article we have written to show these things is worth preserving for future reference, and should it prove to be duly appreciated by our readers then shall we have been fully repaid for time and labor expended.

One of the most curious things about the ratio existing between wages and the cost of living is the fact that, for all practical purposes, it is a constant quantity, or nearly so. To illustrate, let us suppose a mechanic receives $40 per month, and pays out $20 in the same time for living expenses. Now the ratio between his wages and expenses is 2. If, on account of some sudden "panic," his wages are cut down to $30, and by dint of economy he manages to live on $15, the ratio remains the same as before, 2. If he goes to a mining town and earns $100 per month, while it costs him $50 a month to live, it will be seen that the ratio is still unchanged, being simply the quotient arising by dividing the one number by the other. It is true, he now makes $50 per month, which sounds very well abroad, but his employment is not always steady.

When we say, then, that this ratio is a constant quantity, we simply mean that, as economists have it, all circumstances being taken into due consideration, the ultimate result "amounts" to about the same thing to the laborer as to the mechanic, whether he works in a country where very high, average or very low wages are paid. It will thus be readily seen that the gist of the whole matter turns on that quaint aphorism which recites that the smallest excess of income over expenditure is wealth, while the smallest excess of expenditure over income is poverty.

The actual necessities of life cost so little in ancient Italy, that a Roman soldier could follow Cæsar through all his extended campaigns, and yet save money enough to support a family out of his wages, which reached only about 14 cents a day, since it is well known that *denarius*, or Roman penny, was a soldier's daily allowance. And so, also, in our Savior's parable, the idlers who were called from the market-place, the general rendezvous for such fellows, received each man a "penny," whether they had borne the heat and burden of the day, or straggled into the vineyard at the eleventh hour.

According to a large array of statistics on file at Washington, it appears that the cost of living and average wages paid for labor have decreased about 15 per cent. during the past three years, in all parts of the Union except Colorado, California, Oregon, Minnesota and Washington Territory. In Colorado and New Mexico there have been an increase in the rate of wages paid for labor and a corresponding increase in the cost of living in those countries. These changes are due to the effect of large mining oprations. Eighteen months ago, the average rate of wages paid to farm hands throughout all the States, was $22.60 per month without board. Now, the average rate is $20.31, or about 10 per cent. less. During a similar lapse of time in New York, New Jersey and Pennsylvania, the wages paid for farm labor has fallen over 50 per cent., while the cost of living has fallen about 10 per cent. In Virginia, Maryland, North and South Carolina and Georgia, wages have fallen 15 per cent., and the cost of living 16 per cent., thus effecting almost an absolute compensation. In Alabama, Mississippi and Louisiana, wages have fallen 5 per cent. and the cost of living 3 per cent. In Ohio, Illinois, Indiana, Michigan and Wisconsin, good farm hands now receive about $23 per month; while a little further West, say anywhere between the Mississippi and Missouri rivers, the average pay is $23.81. Commencing with Ohio, the figures in the last mentioned States have not materially changed for a year past. During the summer of 1877, it appears that wages throughout the country reached the lowest figures known in many years. Laborers in California receive higher pay than those east of the Rocky mountains, but then, as a rule, they are only employed during the hurried part of the season.

From what has been said, it will be easy to conclude that common laborers do fully as well in the end, in the Atlantic and Lake States as in the Pacific States and Territories. To resume the thought already touched upon, there are evidently deep under currents prevailing the great labor systems of our land, which, seemingly without the knowledge or consent of human agency, are sure to empty, sooner or later, into the undisturbed ocean of reciprocity. Justly considered, this is a study no less interesting to the employer than to the employed, and worthy to be rated as one of the leading economies of the day.

The World's Fair of 1883.

The Executive Committee of the World's fair, to be held at New York in 1883, are holding frequent meetings at their rooms in that city, and report a gratifying increase in popular sentiment everywhere; not only in this country, but in Europe as well.

The Centennial exhibition, although a grand success, was an experiment, and did not elicit anything like the full interest of all the States of the Union. Some, indeed, did not participate at all; but those that made appropriations were amply reimbursed in the advantages which they derived. The only regrets over the grand results have been formed in the minds of people whose States failed to make appropriations to enable their citizens to share in the benefits.

This was especially the case with California, but the recent Legislature found time in the midst of a greatly disturbed and exciting session to unite in a strong majority for the passage of a bill appropriating $5,000 "to provide for a proper representation of the products of California at the next World's exhibition, to be held in New York, in 1883." The amount is small, but it is amply sufficient for all preliminary work; and there can be no doubt but that the next Legislature will supplement this appropriation by whatever additional amount the wants and needs of exhibitors may seem to require.

The States and Territories will determine, each for itself, the manner and character of their exhibitions. Some will prefer to make full exhibitions; others to exhibit specialties. Some will prefer to furnish their own exhibition buildings, after the manner of Kansas and Colorado at Philadelphia. Others will seek space in the buildings of the Commission. It is yet too early to forecast what may be the policy of California, but at the proper time this matter will take shape, according to circumstances. Efforts will soon be made to arrive at an approximate estimate of what will be the extent of California's exhibits, and the space which she may need. It has been suggested that a street of States should be laid out in one of the principal buildings, similar to the street of Nations in the main building at the Philadelphia exposition. Such a design, if properly carried out, would form an imposing feature in the exposition, and would do much to excite an honest spirit of emulation among the exhibitors from the different States. An avenue of States has also been suggested, with buildings for State exhibitions, like the Kansas building at Philadelphia, where the great mass of the exhibits of the several States could be aggregated. For such a plan the great grain-producing States of the West might make their exhibits more prominent by introducing them in bulk; the Southern States would have ample room for their bulky products of cotton, rice and sugar; the mining States, their combined products of mine and field, and the New England States their manufactures, etc. Such an arrangement would be especially favorable for adding interest and zest to "State days," which will be set apart for the different States for especial State ceremonies. This feature contributed largely to the interest of the exposition of 1876.

The times are propitious. The country, and indeed the whole world, is fast entering upon an era of remarkable prosperity. Our experimental exhibition of 1876 surprised both ourselves and Europe; and the announcement of another American International exhibition for 1883, is awakening interest abroad, far beyond that which was created in 1876. Our people, our merchants, our capitalists, our manufacturers and our producers of every class, should and will be fully aroused to the importance of the work in hand. The exhibition of 1883 will be commensurate with the growth of the country, and worthy of the exalted purpose to be accomplished in aid of the united industries of the world.

Official Recommendations.

From Grand Master Workman Wm. H. Jordan's Annual Address, 1880.]

During the past year I have received large assistance in my work from the Pacific States Watchman and *Workman* [consolidated with the Watchman.—Eds.], and common courtesy would require that in this communication I should recognize the aid thus received by favorably commending these journals to the consideration of our brotherhood. The value of assistance in communicating information to the membership and introducing our cause to the people of the State, it would be difficult to compute. On all occasions when I have desired the use of their columns for official communication they have been tendered me without cost, either to myself or this Grand Lodge, and I would suggest that as a recognition of these services you authorize the Grand Master and Grand Recorder, in future, to publish such of their official communications as they may desire in the columns of these periodicals, paying therefor a reasonable compensation. This should be done without creating any official organ or assuming any responsibility for other matter than that appearing over the signature of the Grand officers.

[*From Grand Master Workman Clay W. Taylor's Annual Address, 1881.*]

It is meet and proper that the untiring and never-ceasing efforts of the Pacific States Watchman should not be overlooked or forgotten. Its proprietors have spared no time or expense in their devotion to the welfare of our fraternity, and the Watchman is to-day one of the best fraternal journals in the land advocating the interests of the A. O. U. W. Its leading articles are copied in every journal connected with our Order, and for its faithful devotion to our interests, it merits, and should receive, our cordial support.

[*From Grand Master Workman Wm H. Barnes, 1881.*]

With a full knowledge of the ability and enterprise of the conductors of the Pacific States Watchman, with a realization of its value and usefulness, not only to our Order at large, but to individual members, I unhesitatingly recommend it to the practical and unanimous patronage of our Order in California.

Ourselves.

Those connected with the publication of the Watchman feel proud of the many kind words and the cordial support which the members of the A. O. U. W. have extended to it. It has always been the endeavor to so conduct it as to merit the confidence and respect of the brotherhood. That we have succeeded in our efforts is evident by the freely expressed words of praise and the financial support tendered by the brethren.

It is our highest aim to make the Watchman worthy of the great Order of which it is the representative. Its course shall ever be onward and upward, and we hesitate not to guarantee a due return to all who will assist in extending its usefulness. It is necessary that a live journal should be issued in the Order's interests. Ours is an Order that should be prominently brought before the public, its history chronicled, and the many items of events occurring in the Lodges set forth. To more fully do this we invite correspondence from all brothers as to matters happening in their Lodges, and of subjects of benefit to the Order.

In the organization of new Lodges, we will furnish Deputies with back copies containing the "Aims and Objects of the Order." They can thus be saved considerable trouble in explaining to new members what the Order is organized for. Then the paper well be likely to be distributed among their friends, other persons will be attracted to the Order, and the result will be an increased membership in the Lodge.

We also occasionally send sample copies to brothers whom we think would like to read the paper, and would also like to know what the Order is doing. To all such, if they do not feel at liberty of subscribing, we would be pleased to have them give the paper to other brothers, or outsiders who would likely become members of the Order.

Where we have no authorized agent, and any brother would like to act as such, we will give liberal inducements for his time and trouble. All communications should be addressed to the Watchman Publishing Co., 202 Sansome St., San Francisco, Cal.

Do Not Delay.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the Watchman. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

Officers and members of the A. O. U. W. receiving a complimentary number of the Watchman with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

The Recorders of all Subordinate Lodges are requested to correspond and act as agents in securing subscriptions for the Watchman. We will pay liberal rates for services rendered. Remember, Brothers, that you can accomplish a mutual benefit to the Order and ourselves.

An Improved Electro-Medical Apparatus.

Dr. James B. Williams, of 759 Market street, in this city, has lately erected an improved electrical apparatus for medical purposes, an illustration of which is given in the present issue. The apparatus was designed and manufactured by himself for his own use, and is the most complete apparatus of the kind on the coast, besides being one of the most complete in existence.

The apparatus is mounted on a table measuring 4x2 ft., and connected by insulated wires, *O*, to a stationary battery of improved construction containing 60 cells.

The different pieces composing the apparatus are connected with each other by means of doubly insulated wires, no one piece being independent of the rest of the apparatus. The action of each piece is controlled by suitable switches, and can be thrown into or removed from circuit instantly without interrupting the flow of the current.

All the pieces are worked by the current from one battery only, and arranged in such a manner that any or all currents generated by the apparatus, whether faradic or galvanic, may be used simultaneously if required.

Any degree of rapidity to the interruptions can be given to both currents at once, or the galvanic may be slowly interrupted while the faradic is being rapidly interrupted, or *vice versa*.

A is a "short coil" galvanometer wound in two sections, between which a small magnet is suspended on a spindle moving with very slight friction. The number of degrees marked off on the dial plate by the needle bear a proportion to the strength of battery current used.

The current selectors, *N*, introduce into or remove from circuit any number of cells from 1 to 60. The switches are arranged so that the circuit is never broken while the strength of the galvanic current is being increased or diminished. This is an important feature, for by its use disagreeable shocks are avoided.

The faradic rheotone, *E*, consists of an upright electro-magnet, which attracts three armatures mounted on vibrating springs. By adjusting the springs any degree of rapidity can be given to the interruptions of the faradic currents from the very rapid to that of a slow pendulum motion.

The induction coil, *C*, consists of a primary coil surrounded by six secondary coils. These coils are wound in planes perpendicular to the long axis of the primary coil, and can be combined in different ways to produce "harsh" or "smooth" currents, thus adapting them to the most sensitive persons.

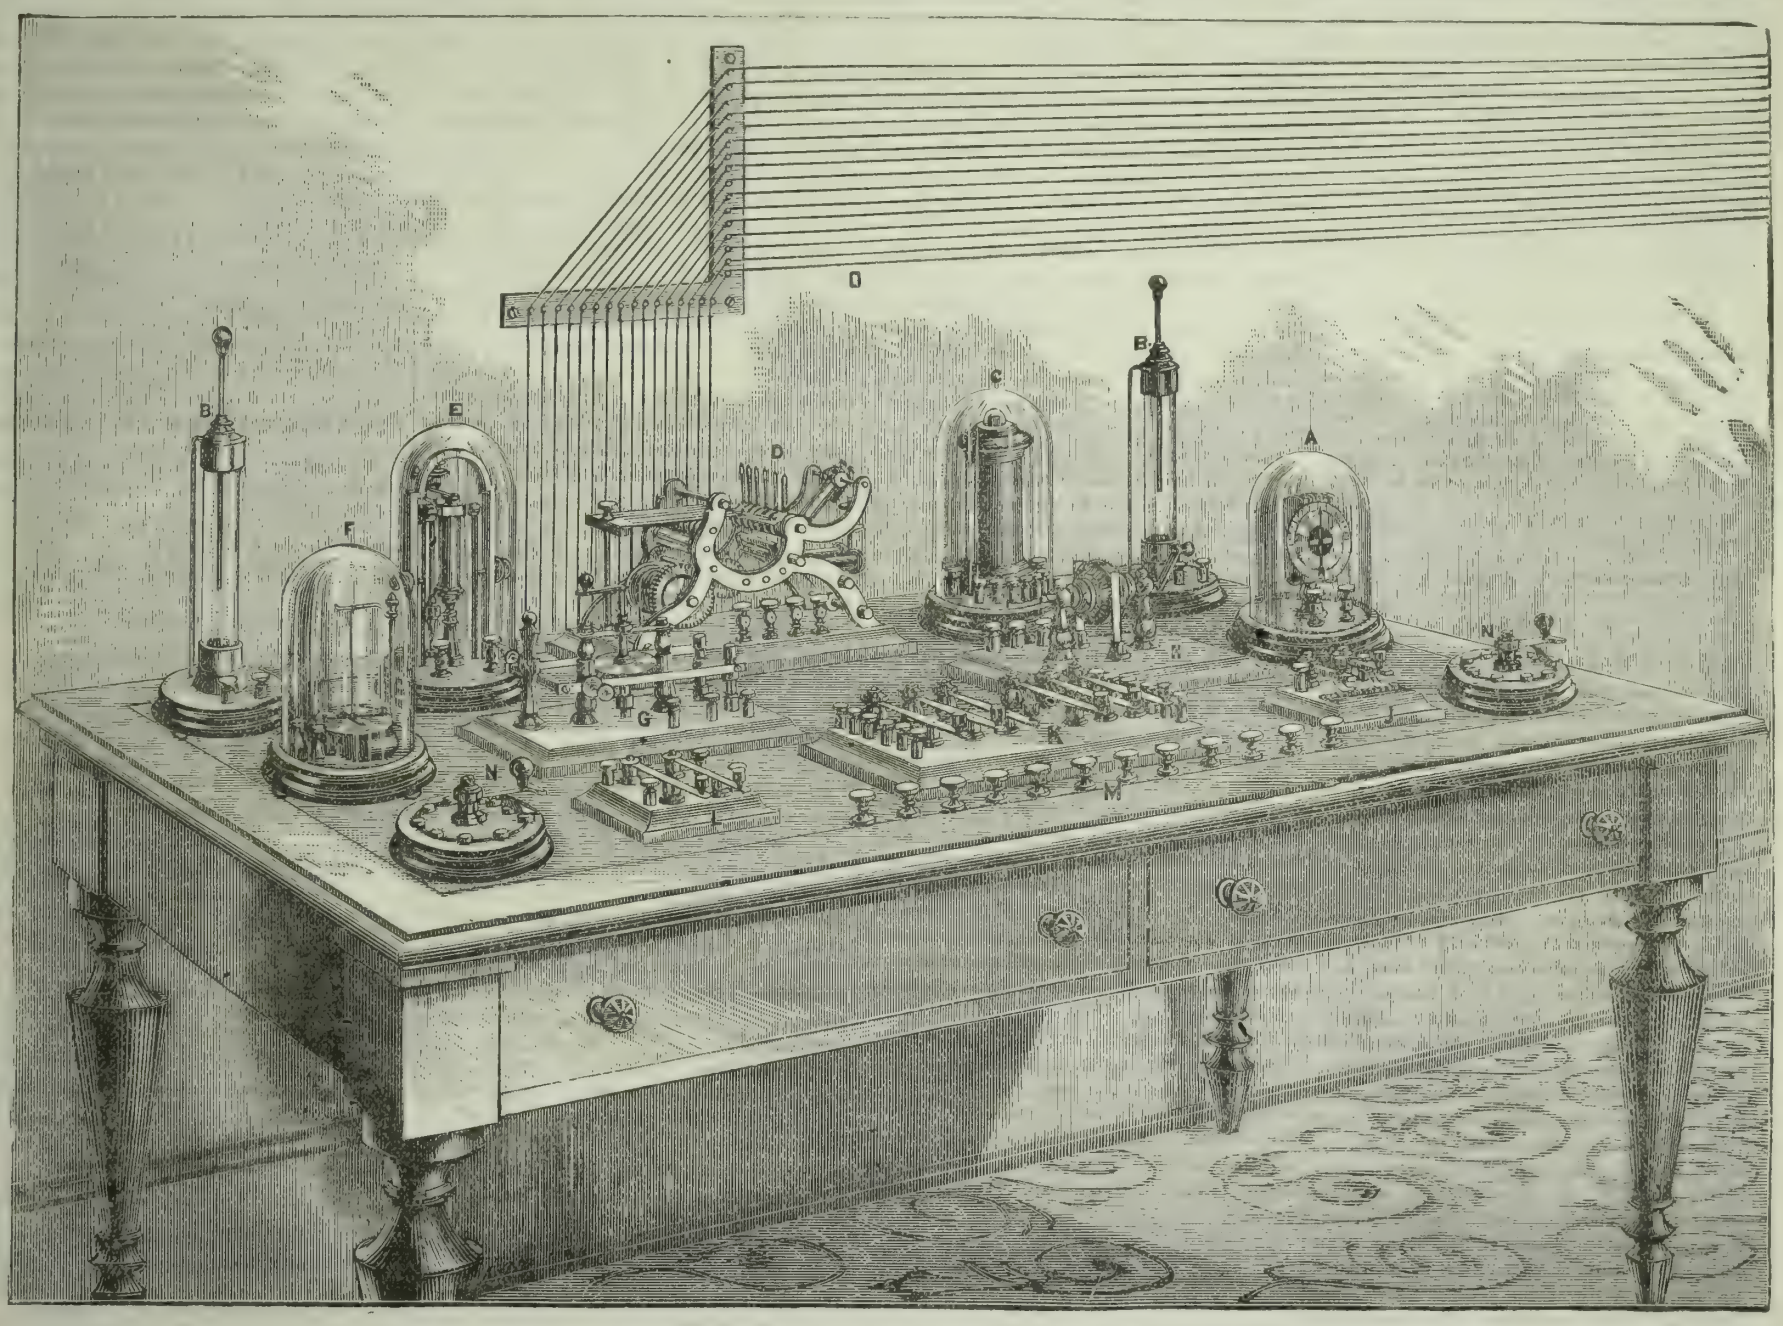
The strata in which the secondary coils are wound, contain various sizes of silk-insulated wires—coil No. 6 containing No. 40 wire, the finest manufactured—carefully insulated from each other, and the entire system of secondary coils literally embedded in an insulating medium.

The switch, *J*, selects the currents from the secondary coils in such a manner that different combinations of currents can be thrown into two of the binding posts, seen at *M*. By the use of this switch a current can be selected to suit any particular case without having the trouble of unfastening the conducting wires, and without breaking the currents.

The rheotone, *D*, is built upon the framework of a telegraphic register, the clockwork of which gives motion to a revolving cylinder. This cylinder is divided into sections, upon which a series of springs are made to pass by a system of levers. The sections contain an insulated material at regular intervals; and with the combination of levers and springs any current, whether galvanic or faradic, may be interrupted from one-half to three and a half times a second. The circuit is regulated through the agency of an electro-magnet, fastened to the framework, all the breaks being made with platinum points.

The commutator, *H*, reverses all the currents generated by the apparatus. It consists of a cylinder upon which are fastened two pieces of brass connected with the positive and negative poles of the battery. Revolving the cylinder causes the brass plates to press alternately upon two upright springs, thereby changing the direction of the currents at every half revolution of the cylinder.

The rapid commutator, *G*, consists of a cylinder, the halves of which are insulated from each other, mounted on a spindle, driven by a system of wheels. This apparatus will reverse any current as many as 60 times in a second, or by adjusting a set screw, the same apparatus will *interrupt* instead of *reverse*.



The astatic galvanometer, *F*, indicates the strength of the galvanic current while passing through the body. It is so sensitive that the current from one small cell passing through the entire length of the body will cause the needle to be deflected several degrees. A "shunt" is added so that the strength of the current from any number of cells can be indicated.

The water-rheostates, *B*, are used to regulate the currents, acting on the same principle as the "shunts" of a galvanometer—that is, by introducing more or less resistance into an accessory circuit, thereby controlling the current in the principal circuit. With their use, currents may be regulated better than by any other method.

The switch, *L*, breaks or closes the circuit in the positive or negative poles. The six-lever switch, *K*, connects all the before-mentioned parts of the apparatus together. No part or parts can be used unless the levers controlling their action be moved to the right or the left, as the case may be.

The entire apparatus is so arranged that *no shock can be given* unless special combinations are used for that purpose.

Dr. Williams is now completing a new form of atomizer for applying medicated vapors to the lungs, throat and nasal passages, locally, for diseases of those parts. The apparatus is stationary, and will be so arranged that the vapors may be started or stopped instantly, and any amount of medicinal substances can be incorporated with the vapors. It is intended to use electricity to illuminate the different passages for purposes of examination.

AN IMPROVED ELECTRO-MEDICAL APPARATUS.

GENIUS, MONEY AND LABOR.—Tennyson can take a worthless sheet of paper and by writing a poem on it make it worth $5,000. That's genius. Mr. Vanderbilt can write fewer words on a similar sheet and make it worth $50,000,000. That's capital. And the United States Government can take an ounce and a quarter of gold and stamp upon it an "Eagle-bird" and "Twenty Dollars." That's money. The mechanic can take the material worth $50 and make it into a watch worth $100. That's skill. The merchant can take an article worth 25 cents and sell it to you for $100. That's business. A lady can purchase a comfortable bonnet for $10, but prefers to pay $100 for one, because it is more stylish. That's foolishness. The ditch-digger works 10 hours a day and shovels out three or four tons of earth for $1. That's labor.

THE AZTECS AS MINERS.—Five stone hammers, such as are found in ancient ruins and abandoned mines of the Aztecs all over the country, were recently discovered in the Silver Belt mine, Arizona, showing that the mine had been worked in ancient times.

Chinese Arts.

A Chinaman working in an Oakland family was given charge of the chickens, at his earnest solicitation, and in doing his work about the chicken yard deviated from ordinary observances in several ways. Finding the hens did not lay equal to his anticipation, he went to work and, without consulting his employer, cut their tails nearly off, cutting away the lower end and bringing the upper to a sharp point. The hens looked so curious after the operation that the roosters did not recognize them. Wanting to hatch some eggs, and selecting a hen that would not set, he made her do it. His persuasive was to get a box in which he placed the nest and eggs, the box being so low that the hen could not stand upright, but had to squat on the eggs. In front of the bars of the box he placed food and water. No results as yet from either experiment.

Chinese ingenuity in forcing plants is illustrated by an anecdote related by the Virginia City, Nev., *Enterprise*. A Chinaman working about a saloon in Virginia City, brought to his employer a Chinese lily in full bud. He said it would be seen that the plant would bloom just at 12 o'clock with the coming of the Chinese new year. The plant was brought to the saloon about 10 o'clock. The Chinaman dosed it with a white powder dissolved in warm water, and performed over it several ceremonies. The buds were observed to swell visibly, but at 11:40 o'clock not one had opened. It began to be buzzed about that John's exhibition would prove a failure, and John himself pretended to feel great chagrin. There stood the plant on the bar, with a crowd of curious and rather sarcastic barbarians grinning about it, while the hands of the clock were fast moving up to the midnight hour. When it lacked about three minutes to 12 John drew out a piece of bamboo, about an inch in diameter, from some secret recess about his raiment. Placing this to his mouth he gently blew his warm breath on one of the buds, and almost instantly it was seen to expand and stand forth a full-blown flower. In rapid succession flower after flower was thus brought out, and at midnight the whole plant was a mass of blossoms.

VALENTINE'S day affords an opportunity for many people to do a little annonymous meanness.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and WATCHMAN together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

Entered at the San Francisco Postoffice as Second-Class Matter.

San Francisco, - April 1, 1881.

An Awakening.

Since the adjournment of the Grand Lodge there seems to have awakened a fresh interest in the Order throughout the State, and the office of the Grand Recorder is thronged with applications for beneficiary certificates. About 370 came in February, and from present indications, about the same number will be received in the present month. The Lodges generally are reported as in a prosperous condition, as, indeed, might be inferred by the large and constant increase going on. The success of the A. O. U. W. is no doubt a great help to other societies aiming at substantially the same end, but it does not necessarily follow that all these will prove successful. In the nature of things it must be expected that some of them will fail. Which of them, we may not be able to forecast, but we will simply venture the opinion that it will be those that have departed most radically from the plan of the parent society. None of them have so perfect a business system as the A. O. U. W., none of them are more economically conducted, and none, we believe, have so equitable a system of assessments. This latter proposition, of course, will be combatted by the advocates of the graded system, but facts are terribly stubborn things, and facts sustain our position. The man, no matter what his age, who stands the best chance to live for the seven years succeeding his admission to the Order, is the best risk, all figures and statements and "tables of expectancy of life" made by insurance sharps to the contrary notwithstanding.

To the Workmen, then, we say, above all things don't desert the best society for a poorer one, and then if more protection than it guarantees is wanted, choose that society which you may find on close scrutiny to be most nearly based on the plan of the A. O. U. W.

BY reading under "Lodge Locals," it will be seen that a visit to the Alameda Lodges by the Grand Lodge officers would be very acceptable to the brethren. We are under obligations for the reports which appear in this issue, and hope all brothers will send us items of the happenings in their Lodges. The news appearing under "Lodge Locals" is of great interest to all the brethren, many of whom have told us that it is the first thing they look for. Therefore we hope to hear from every Lodge in the State.

PARTIES receiving this paper with this notice marked are requested to act as correspondents and help increase the circulation.

Graded Assessments.

The subject of graded assessments, like Banquo's ghost, will not down. The records of the Supreme Lodge and every Grand Lodge bear evidence of this fact, to say nothing of the paper and ink devoted to the subject by our doughty journalists. And yet our plan of assessments remains the same as in the beginning, as we trust it will at least, till time shall demonstrate whether it is more just than any other (which from such statistics as we have, it seems to be), or whether it is otherwise. The truth is no system of which we have any knowledge is but comparatively just. This must be apparent to the most casual observer. A joins a beneficial society—lives and pays his assessments for a year and dies. His beneficiary gets $2,000. B also joins and pays for two years; when he dies the same benefit is paid as in the case of C, though he has contributed twice as much. D pays for five years and five times as much as A and his beneficiary gets no more than C's. The same results very nearly obtain no matter how assessments are graded. The difference is so slight as to be scarcely appreciable—not worth making any ado about certainly. But the injustice of any of these plans is palpable if we concede that each should receive in proportion to what he pays, and this is the ostensible end which the advocates of graded assessments aim at, but cannot, in the nature of things, accomplish, or scarcely be said to approximate. A plan like the following would reach a more satisfactory result in this direction: Suppose the expectancy of the life of a beneficiary certificate to be seven years, which experience proves to be the fact. Let the beneficiary of him who remains in good standing in the organization receive, say, $2,000, if then he die. But if he die in one year, let the payment be one-seventh of that sum; if in two years, then two-sevenths, and if in three years three-sevenths, and so on in like proportion. If he live longer than seven years in the organization, pay in like proportion. This would work out something like justice, and yet it is more than doubtful if the plan would prove a success in practice.

There are other considerations than even and exact pecuniary justice involved in beneficial societies which are quite as important as that. Consider what a fraternal society would be with the elements of charity and benevolence eliminated. The shadow might be left, but the substance would be gone. Brethren, take heed of the good old proverb, and let well enough alone. Nothing succeeds like success, and to attempt any radical change in a successful institution, is one of the most dangerous endeavors in which we can engage.

We most thoroughly and conscientiously believe that in aim and scheme, and plan of government in general and detail, the A. O. U. W. is by far the best ever yet devised by the wisdom of man. Let no wild theory or plausible sophistry, or even apparent reform disturb it except as plain and imperative necessity shall demand.

CASES multiply which show the great amount of practical good that is being accomplished by the A. O. U. W. The Dayton (W. T.) *News* relates a case in which the widow of Bro. C. O. Fields received from the Grand Recorder at Portland, Oregon, the $2,000 beneficiary money. In view of the fact that she is in a comparatively destitute condition, this sum will seem almost providential, and we can imagine with what fondness her mind will contemplate this wise provision—the loving gift from one who, though absent, is not forgotten. It seems to be the duty of every man—no matter how promising his pecuniary condition may be now—to make some provision for his family in case he is suddenly summoned to another world. The amount expended per year is very small and will not be missed from one's income, while the satisfaction of knowing that there is $2,000 laid away, in case of accident, is simply soothing. The amount expended by Bro. Fields would not exceed $15, and we believe none can be found who will say it was not a good and wise investment. To those who are undecided, we say, join the Order, if you can, and then realize that your loved ones will not be cast upon the charity of a cold and unfeeling world, in case of your sudden departure, without preparation, for another realm.

A SUCCESSFUL Lodge is one that manages its business like the private affairs of any well conducted mercantile house.

Grand Lodge for Nevada.

Our brethren in Nevada, it seems, are in doubt as to the advisability of organizing a Grand Lodge in that State, notwithstanding the fact that they have the requisite number of subordinate Lodges for such purpose. We may anticipate the response asked for by our correspondent by saying that we believe in Grand Lodges on general principles. Little can be done in the way of spreading the Order without such a body, and especially where the Lodges are so remote from the headquarters of the Supreme Lodge, as is the case with the Nevada Lodges. It is a mistaken notion that a Grand Lodge is necessarily a burden on the subordinates. Such an idea prevailed in the early days of the Order in California, and not a little effort was required on the part of our then Deputy Supreme Master to induce our Lodges to consent to the organization of our Grand Lodge. Had he failed in his efforts, it is safe to presume that to-day not 50 Lodges would be in the State, where now we have nearly 200. The Order was planted in West Virginia some 10 years ago, and to-day but eight Lodges answer the roll call. When the harvest is to be gathered, laborers must be put into the field, and no one will work so faithfully and efficiently as he who has a direct and personal interest in the outcome. Nor can a person properly supervise a work when thousands of miles away. The genius of our law regards subordinate Lodges, in places that have no Grand Lodges, as in a sort of embryotic condition. They are required to pay per capita tax, but have no representation in the Supreme Lodge, to which their tribute goes. The Supreme Lodge issues their beneficiary certificates and gets pay for the same. These two items turned into the treasury of a Grand Lodge, is sufficient by themselves to almost bear the expenses of a Grand Lodge. Then a considerable revenue can all the time be realized from the organization of new Lodges and the furnishing of supplies. It seems a plain proposition that without a Grand Lodge, success is impossible. With a Grand Lodge, failure can scarcely come, except as the result of bad officers or bad management.

Arizona Items.

EDITORS WATCHMAN:—To prove to you that the march of the A. O. U. W. is onward, let me cite you the fact that here, near the verge of "Uncle Samuel's" claim, located some years ago, in the ancient and honorable "Pueblo of Tucson," we find a Lodge of the genuine article; as bright and frisky as any two-months' old institution to be met with anywhere. In brief, the facts are these: On the 14th of January, 1881, the Lodge was organized with 21 members, and now has 37 M. W. degree members, and four elected for the J. W. degree. The following is the roll of officers: Moye Wicks, P. M. W.; Chas. E. Holbrook, M. W.; H. Buchman, For.; W. M. Blaine, O.; B. Heineman, Rdr; J. M. Berger, Rvr; Frank Miltenberg, Fin.; W. L. Cropper, G.; F. Percy, I. W.; W. H. Lewis, O. W. Meeting night, Wednesday of each week; place of meeting, Odd Fellows' Hall; name of Lodge, Arizona, No. 1. We meet members of the Order almost every day, from the east and from the west, north and south; strangers, yet brothers of one great family, far away from kindred and friends, yet, even here, we find a familiar spot that reminds us of home. To all such "wayfarers" a cordial invitation is given to come and see us.—A. T.

THE *Union and Recorder*, of Milledgeville, Georgia, reproduces in full, from the WATCHMAN (giving credit for the same) the sketch of the fraternal history of Grand Master Barnes. The *Federal Union* is the office in which he learned the printer's trade in boyhood, and of which his father is still one of the proprietors. The kind estimation in which our G. M. W. is held in California is very gratifying to his old friends, not only South, but in almost every State of the Union, as is evidenced by scores of letters and extracts from papers that have been received.

WE had the pleasure of meeting Bro. J. W. Porter, of Gridley, Butte county, of Gridley, No. 67. He reports everything in connection therewith in a prosperous condition and growing right along. They now have 36 members and expect to reach 50 this term. He says that the brethren are taking great interest in our Order and are receiving the staunchest men of their town and surrounding country.

A Good Law.

EDITORS WATCHMAN:—There was one thing done at the Grand Lodge session that I am pleased with, and I hope all D. D. G. M. will carry out to the letter of law—and that is to install no M. W. or G. F. into office unless they have memorized the secret work of our Order. I hold that any brother who has been raised to the high office of G. F. ought to be intelligent enough (if I may put it that way), and take interest enough in the Order to learn at least the secret work, if they do not memorize the ritual in total. No other Order of any strength or standing will, or does, to my knowledge, install the first or second officer without examination in regard to the secret work. It looks shameful to initiate a member, and have to call on a P. M. W., who has earned a rest, to do the work to save the credit of a M. W., who is M. W. in name—no more. I sincerely hope that that portion of the law or instruction to D. D. G. M will be carried out to the letter; and I am confident that our Order will be a pride to all members who are blessed with a beneficiary certificate, for when it is a positive portion of our law, those members (who are in all small country Lodges), who want the credit and prize of a M. W. jewel and P. M. W. jewel, will distinctly understand that they have to win it to wear it. There will be less of the political manipulating in the Lodge-room for office. I hope that our beloved Grand Master, Bro. Barnes, will have it distinctly understood that D. D. G. M. shall not install M. W. or G. F. in office unless they have the secret work. I have intruded too long. Fraternally yours in C. H. and P.,

JOHN KARR, No. 77.

Grand Recorder's Statement for February.

We condense from Grand Recorder Pratt's Financial Statement for February the following leading figures:

DISBURSEMENTS.

Balance in hands of G. Rvr., Feb. 1, 1881, Benef. Fund	$ 1,874.00	
Received during Feb., Benef. Fund	10,460.00	
Total		$12,234.00
Paid Elspeth Ross, Benef. Fund, Warrant No. 152	2,000.00	
Paid Mrs. J. D. O'Hara, Benef. Fund, Warrant No. 153	2,000.00	
Paid Louise Owen, Benef. Fund, Warrant No. 158	2,000.00	
Paid Christine DeWolfe, Benef. Fund, Warrant No. 162	1,000.00	
Paid John Maitland, Benef. Fund, Warrant No. 163	1,000.00	
Paid Wm. Maitland, Benef. Fund, Warrant No. 164	1,000.00	
Paid Mrs. C. Luna, Benef. Fund, Warrant No. 166	2,000.00	
Total paid from Benef. Fund		$11,000.00
Bal. Benef. Fund on hand		1,334.00

WARRANTS ISSUED.

No. 98, Contingent, Clay W. Taylor, G. M	$100.00

BRO. HERTZ GOLDSMITH, of Cincinnati, Ohio, died on the 13th of January last. He was 79 years old, and joined the Order June 2, 1872. It will be seen he was 70 years old when he became a member. It was not until 1873 that the restriction was placed as to age of applicant for admission to the Order. At this time, however, the Order was quite small, and but very few over the age of 50 were admitted.

THE people of Los Angeles appreciate the benefits conferred by the A. O. U. W. Los Angeles, No. 55, is steadily adding to its membership. On the evening of March 16th, 21 candidates received the M. W. degree. Taking advantage of the presence of the G. M. W., the "work" was exemplified by him.

SEVEN deaths in the Supreme Lodge jurisdiction to be paid for in March. Ohio furnishes 3; Kansas, 1; Massachusetts, 1; Colorado, 1; and British Columbia, 1.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 206 Sansome street, San Francisco, is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

One assessment for this month. One may also be expected for next month. Last year we had none for April, but we paid for the exemption by three in May.

Two hundred and seventy-five new beneficiary certificates had been issued in the month of March ult., up to the 26th. The number of our Master Workmen in good standing is now about 11,500.

Lodges will help us materially in paying death-losses promptly by remitting at once on receipt of assessment notices. This is never a hardship on the part of the Lodges, for the cash is always on hand, and needs only to be remitted.

It seems necessary to again call attention to the fact that there are but two ways under our law to reject a candidate—one by the medical examiner and the other by ballot. An unfavorable report of the committee of investigation does not reject.

After a committee have reported on an application for membership, the application can not be withdrawn. This has been decided over and over again. Under our law the report of a committee does not reject a candidate, but a ballot must be taken.

Much annoyance would be saved not only this office but the Lodges also, if all bills were paid in the month in which they are received. Then there would appear no such item as "bills rendered," which so many times is not understood.

The granting of clearance cards should not be reported on the monthly report. Only transfers of membership should be reported when official notice has been received of such transfer, it made to some other Lodge; or when admitted by card from some other Lodge. Final cards are another matter, and where granted, should be reported, of course, for a final card severs the member's connection with the Order altogether.

Presentation.—Wm. H. Barnes, G. M. W., who is also the popular Secretary of the Pacific Coast Press Association, was presented at Los Angeles, by Col. Ayers, of the *Express*, on behalf of the Press excursionists, with a massive gold ring, set with a large solitaire diamond. The ring is inscribed "P. C. P. A. to W. H. B., 1881," and is a testimonial recognizing the ability with which he managed the recent excursion, as well as the esteem in which he is held by the members.

Steps have been taken to have our annual picnic. The General Relief Committee has requested each Lodge to ascertain its wishes in relation thereto and report. There will probably be appointed one person from each Lodge to make up a general committee to carry out this worthy object.

In our description of Dr. Williams' improved electro-medical apparatus, it is stated in the last paragraph that he is now completing a new form of atomizer. Since the article was written we have learned that the apparatus has been finished. It seems to us that this atomizer will prove of great interest to the medical examiners of the Order.

The yearly anniversary celebration of our Order will come up before the Lodges to take action thereon. That is, to get the authority from each Lodge to make preparations for a worthy celebration.

As an evidence of the favor in which the Watchman is received, we report 20 new yearly subscribers from Tucson, Arizona. Thanks, brethren, and here is the right hand of fellowship.

Bro. Sonday, of Hercules, who has held the position of paymaster in the army department for 16 years has been reappointed. We congratulate our brother on his new appointment.

Harmony, 9, Hercules, 53, and Bernal, 19, have donated to the Relief Committee the per capita tax of 17 cents left from the General Reception Committee.

From Grand Master Workman.

Circular to Deputies.

Dear Sirs and Brothers:—You have been appointed to supervise the various districts of this State, as named in your commissions, in the full confidence that you will labor faithfully in the interests of our Order and do all in your power to advance its mission. The position you have attained by service, and your familiarity with its laws, customs, etc., render it unnecessary for me more than briefly to allude to the matters in which I desire you, in your several districts, to represent the G. M. W., viz:

1. To install, or cause to be installed, the officers of the Lodges in your district. In the event you cannot personally attend an installation, you will select a competent brother in your place, who will perform said duty and report to you.

2. To exercise general supervision over said Lodges, and see that the work conforms to the ritual and the laws of the Order, and to instruct in the same when necessary.

3. To decide all questions of law and order that may be submitted to you by Lodges (not individuals), such questions to be formally submitted in writing, under seal, and answered in writing, and copies of the same kept by you, to be reported to this office.

4. To grant dispensations for public displays, processions, or public entertainments in your district.

5. To examine the semi-annual reports and receive the Grand Lodge dues, or require the receipt of the Grand Recorder for the latter item before you install the officers.

6. To see that Lodges have no more than five rituals each, and that the incoming M. W. receives all the rituals belonging to the Lodge from his predecessor, and gives a receipt for them, which receipt you will obtain and forward to the Grand Recorder.

7. To bring to the notice of Lodges the necessity of holding to a strict account any of its members whose conduct may be such as to cast a reflection upon the good name of the Order. In plain English, that men who disgrace themselves, the Order, and their families, by drunkenness, are not to be permitted to remain in the A. O. U. W. And not only drunkenness, but any other offense against good order and good morals, is to be taken cognizance of by the Lodge.

8. I desire you to carefully survey the field, with the view to the institution of new Lodges, and to examine the law of last session in regard to same. While new subordinates are to be desired, yet, without a reasonable prospect for permanency and success, they are not to be instituted.

9. As our Order is young, and our objects but imperfectly understood by the people, public addresses by competent speakers, in places where they are, as well as where there are not Lodges, I deem to be of benefit and importance to our growth. You will therefore take this matter into consideration, and communicate your views upon it.

10. The Degree of Honor is a social and fraternal degree, to which all Master Workmen, their mothers, wives, sisters and daughters (16 years and upward), are entitled, and has proved itself valuable by uniting the families of members with them in the general objects of the Order. It can be conferred by a subordinate Lodge, or separate Lodges can be instituted. It can be made the occasion of pleasant gatherings, and I recommend it to your notice.

11. No one is allowed to own or possess any copy of any part or parts of the "secret work." Should such be in the possession of anyone, said copy is to be immediately destroyed without delay. The failure to comply with this requirement shall render the non-compliant subject to charges. (The only exception to this is the official "work" in possession of the Grand Recorder.)

In conclusion I desire to express the belief that I shall have your earnest and untiring efforts during the term, and shall personally, to the extent of my power, endeavor so to co-operate with you, by presence and counsel, that when our official relations shall have closed, we may merit the approbation of the great Order we serve. Truly yours, in C. H. and P.,

Wm. H. Barnes, G. M. W.

We feel much encouraged in our efforts to publish a paper that shall be worthy of this great brotherhood. From all parts the subscriptions are coming in with letters of encouragement. Oregon, Nevada, Arizona, and every town in this State are remembering us substantially. We will try and prove ourselves worthy of their confidence.

J. W. Kinsley, owing to his business engagements, has resigned as Grand Lecturer. He was an able officer, and has done good work in that position.

In noticing the marriage of Sister Morris we recorded her P. W. Sister of Honor, whereas it should have been Worthy Sister of Honor.

New Lodges are in process of formation in Humboldt Co., Tehama Co., Placer Co. and Trinity Co.

Our friends in Bodie are pushing things, and 143 will soon have 100 members.

The Grand Lodge Question.

Editors Watchman:—At the regular meeting of Alpha Lodge on the 8th inst., the question of forming a Grand Lodge in Nevada was fully discussed. Two weeks since it was referred to a committee of five, who exerted themselves to learn the advantages which might accrue to our own Lodge and the Order throughout the State; and after conferring with our sister Lodges and Bro. Kinsley, the committee reported adversely, stating that the expenses attending its formation and maintenance, in their opinion, did not justify it. We are still open to conviction, however, and will cheerfully rescind the vote to report adversely to the formation of the Grand Lodge, provided that we can be shown our error, and that good will inure to us. It is amusing to read some of the communications received from some of the Lodges with whom I have corresponded, hoping to gain light, that we might act advisedly and for the benefit of all. One brother writes: "Although we adopted the resolution to form a Grand Lodge, I cannot give you my reasons why we done so." Another writes: "Our Lodge agreed to the formation of a Grand Lodge, but now regret it, and trust Alpha will not fall into the same error; and a third says, "we cannot see any advantages to be derived." Thus you perceive all are in the dark with us; and for the benefit of the Order throughout the State, we ask most respectfully that some of the brethren in your jurisdiction, older in the harness than ourselves, to show us through the Watchman whether any benefit, more than we now enjoy, can possibly arise to us before we can form a separate jurisdiction; or, in other words, the advantages to be derived to us in the formation of a Grand Lodge in Nevada.

In my last I mentioned the large death rate of Ohio, which is within the jurisdiction of the Supreme Lodge, although having a larger membership than requisite to form a separate jurisdiction, in conformity with the laws of the Order. To show that this works detrimental to other States which are within the same jurisdiction, I need but state that the last notification from the Supreme Recorder shows the number of deaths occurring for the month to be seven, while three of this number come from the city of Cincinnati; and during the year 1880 no less than 32 deaths occurred in the Order in the State of Ohio, while the State of Nevada in nearly two years has had only two deaths. It is evident that this acts detrimental to the growth of our Order, particularly where it is young, as in Nevada, as the death rate in the general jurisdiction is much increased. It is to be hoped that the Supreme Lodge at its next sitting may take some cognizance of this under "Good of the Order."

Alpha Lodge is increasing in numbers, each week receiving new accessions to its ranks, and ere many months we shall be not only Alpha in name, but also in membership.

Yours in C., H. and P.,

I. C. C. Whitmore.

Eureka, Nev., March 10, 1881.

Be Careful.

Editors Watchman:—I have always declined to affiliate with other benevolent Orders, being fully satisfied in my own mind that if I performed my duties faithfully in one, it was sufficient, and that the claim of time and means as a good and provident "Patrie Family" would not allow me without injury to myself and family. For 25 years I adhered to this resolution, but when the A. O. U. W. fever broke out in this city, and Valley Lodge, No. 30, opened her doors for good men and true, my friends were so persistent in their solicitation and representation of its valued feature of providing for our families while in good health and circumstances, that I allowed my name to go before the Lodge, and passed a good No. 1 medical examination. After a very critical examination of the Order, I soon came to the irresistible conclusion that if this A. O. U. W. institution is to be a success and have permanency, none but the physically sound and morally pure should ever cross its threshold; and whenever and wherever, in any Lodge of the A. O. U. W., I have been called upon to make a few remarks for the "Good of the Order," the above idea was always uppermost in my mind, and found expression. Now, sir, when I read in the last number of your valued Watchman (March 15, 1881) of the proceedings of the different Grand Lodges of the A. O. U. W., I was greatly pleased with the manly statement of Grand Master Case, of New York, in his address to the Grand Lodge, and it certainly ought to be read by every member of the A. O. U. W.; and not only read, but acted upon, for the preservation of this noble Order, though of recent date. The Grand Master says:

"The membership during the past year have been startled by the frequent reports of death by consumption, which seemed, considering the short period of membership of some who have thus died, out of all proportion to other assigned causes. This fact has led me to examine, to a certain extent, some of the medical examiners' reports in this class of cases on file in the Grand Recorder's office. There are, in fact, 26 cases of death by this disease reported; how many more it is not easy to tell. T takes from our pockets, $52,000; if honestly we do not object; *if otherwise, we protest.*"

This is language of the true ring and metal, and should be imitated by every G. M. W., wherever the like cause may be noticed, and no other course seems to be justifiable in any Grand Master if he has any regard for the honor and permanency of the A. O. U. W.

Yours in C., H. and P.,

Ar-gus-i.

A Tribute to the Altar.

A beautiful altar and a set of gavels were presented to Stockton Lodge, No. 23, Friday evening, March 11th, by Bros. Mathews, DeLano, Lissenden and Keniston. The presentation speech was made by Bro. C. M. Keniston, in the following eloquent words:

Master Workmen:—It gives me pleasure at this time to present to you, and through you to the Stockton Lodge, this beautiful altar and these gavels, the altar being the gift of Brothers Mathews and DeLano, and the gavels of M. W. Lissenden, given as a token of their esteem for our Order, and their love for the Lodge, of which they are worthy members.

From the time Noah built the first altar upon coming out of the ark, all through the ages, altars have played an important part in the history of individuals, societies and nations. To them the oppressed of every clime have fled for sympathy and protection. Upon them all the great sacrifices of the world have been made. Around them have clustered the hopes and aspirations of the human family. Is it any wonder that holding such a warm place in the hearts of mankind, the skill of years has been devoted to their construction, that untold wealth has been lavished upon them that they might be made beautiful? Is it at all strange that our Order, founded as it is upon the eternal principles of truth and right should in the midst of every Lodge-room erect and dedicate an altar as one great agent in teaching the lessons sought to be inculcated by the A. O. U. W.

Realizing, then, its importance, let us my brothers, as we gather around this beautiful altar and place upon it the Holy Bible, and the "working tools" of our Order, as we dedicate it to its holy mission, be ourselves re-dedicated to the grand work to which we are pledged.

Around this altar we are to encourage one another in the duties of benevolence. Before it the good works of "Charity, Hope and Protection" are ever to be presented as the only acceptable sacrifices. In this quiet retreat are to be cultivated those flowers that brotherly love shall scatter on the rugged pathway of life.

There is something noble, something heroic in the acts of benevolence and kindness that seems to elevate and dignify human nature. It is when we kindle the fire of gratitude in some bosom that the flame of love burns brightest in our own. Let us each feel that we have a work to do. Let us each realize the importance of individual effort in our great work.

The sum total of perfect happiness is made up of the mites each one contributes. Alone the dewdrop would be useless, but uniting with kindred drops they distill their freshness upon the tender plants, making the whole earth to bloom in fragrance and beauty. So each one of us can perform some little act of kindness, that, though of itself small, may yet, when united with similar acts, affect the happiness and the destiny of our fellow men.

With reference to these gavels I would say, Master Workmen, may they ever be used by the presiding officers of this Lodge, as symbols of authority, is controlling a Lodge that it is ever ready to obey the authority they represent promptly and cheerfully.

Master Workman, in receiving this altar and these gavels, I entreat you and the brothers here assembled to accept the gifts with a full appreciation of the sincerity of the giver, and the deep significance of the gifts themselves.

May this altar stand in our midst a silent monitor leading us to higher motives and purer lives. As we look upon it, and gather round it from week to week; as we listen to the sound of the gavel, may we ever remember the givers, and be influenced by the gifts to go forward in the path that duty leads us, until we shall have carried to glorious results the heaven-born teachings and principles of our Order.

Attention is called to the card of B. M. Atchinson & Co., wholesale and retail dealers in butter, cheese, etc. They occupy four stalls in Center market on Sutter St. Under the management of Bro. E. L. Cutter and his corps of helpers, they are prepared to fill country or city orders of fresh articles in their line daily. Their attractive establishment is connected by telephone, and goods are delivered free.

Henry Ottman, 502 Hampshire street, Quincy, Ill., has sent us a P. M. W. badge, heavily gold plated, which he sells for 75 cents. His prices for members' and officers' badges is 35 cents each. They are made of solid metal, warranted treble silver plated, and to last 10 years, the name and number being engraved on the cross-bar.

FURNITURE.

New and second-hand at auction prices, at H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

WOMEN AND MINING.—There are many vocations at the present time which were, at one period in their history, almost exclusively monopolized by men, but are now being opened to admit woman, who has compelled recognition by her talent and ability. The ranks of the theologians and physicians show many women who well maintain the position they have sought and secured. Beyond a speculation in stocks, the business of mining has presented but few points of interest to the gentler sex. A case has recently come under the *Mining Review's* observation which is at least worthy of record. Mrs. B. C. Clark, by the death of her husband, came into possession of a number of mining claims, and in order to intelligently superintend their development, and to gain a knowledge of the science of mining, she has taken a course of study in Prof. Mardock's school of assaying and chemistry in Chicago. This lady has also studied the operations of machinery, smelters and crushers, and is thoroughly imbued with the spirit of mining. A woman, as a skilled writer on metallurgy and mining, or as a superintendent of mines, would be a new thing under the sun.—*Nevada Transcript.*

AN ELECTRICAL ELEVATOR.—Dr. Siemens, who appears to be indefatigable in seeking to extend the sphere of usefulness of electricity, has brought out an electric elevator, which he has been exhibiting at Mannheim, Germany. Its construction appears to be simple, and suggests an easy method of putting in safety brakes. The cage is carried by wire ropes, having counter-weights, so that the cage, when loaded, is practically in equilibrium. The current generator at the base is electrically connected to the dynamo-machine in the cage, and the latter actuates two toothed wheels, taking into a metal rack running up the center of the passageway of the lift.

THE WAY TO REST.—To understand this is of more importance than to know how to work. The latter can be learned easily; the former it takes years to learn, and some people never learn the art of resting. It is simply a change of scenes and activities. Loafing may not be resting. Sitting down for days with nothing to do, is not restful. A change is needed to bring into play a different set of faculties and turn the life into a new channel. The man who works hard finds his best rest in playing hard. The man who is burdened with care finds relief in something that is active, yet free from responsibility. Above all, keep good natured and don't abuse your best friend, the stomach.—*Sel.*

Progress in Machinery.

One hundred years ago, when thread numbered 150 by the standard set up by spinners was considered the utmost degree of fineness possible by English spinners, a pound of cotton spun to such fineness would give a thread 74 miles in length, sufficient to reach from Boston to Concord, N. H. The machinery of to-day spins for useful purposes thread numbered 600—from one pound a thread 196 miles in length. And machinery has been constructed so delicate that a pound of cotton has given a thread reaching 1,061 miles—farther than from Boston to Chicago! The weaver of my boyhood could throw the shuttle perhaps 25 times a minute, but not at that rate through the day. Human muscle would break down under such rapid action. In 1850, Compton's loom threw the shuttle 50 times a minute, whereas so great has been the advance of invention, that the loom of to-day is considered a slow-moving mechanism if the shuttle does not fly 240 times a minute. "No man can afford to take as a gift to-day a cotton manufactory equipped with the machinery of 1860," was the remark of the late superintendent of the Amoskeag mills. "We are breaking up the machinery of those days for old iron."

In some departments of cotton manufacture, a man with the present machines will do eight times the amount of work which he could accomplish in 1860. In the manufacture of coarse cloth an operative with 10 machines does twice the work which he could accomplish with 13 machines before the war. There never was a period so fruitful in discovery, so fertile in invention as the present, and the reason is manifest. The first discoverers and inventors groped in the dark. They were ignorant of nature's laws. They did not know what force was. They had a limited comprehension of what the simple mechanical powers were. There was little accumulated wealth of research.

In contrast, the mechanic of to-day has all the discoveries, the experiments, the ascertained facts, mathematics of machinery, the laws of force at his command. He inherits the scientific wealth of all the past and makes it his capital. Instead of gazing, as it were, upon old mines worked out, he beholds mountain ranges filled with golden ore, and engages in his work with the stimulus of the needs of the human race, and the ever increasing wants of an advancing civilization.—*Sci. Am.*

"MUSIC hath charms to sooth the savage breast," as the man said when he put a brass band around the neck of his bull dog.

THE GREAT BRIDGE AT ST. LOUIS.—A few years ago, in anti-bridge days, passengers were ferried across the Mississippi and landed on the crowded levee, at great inconvenience. But now, thanks to a great architect and mechanical skill, the tired traveler sits in his comfortable car until it reaches the depot in the heart of the city. The upper Mississippi has been spanned by 12 great railroad bridges, costing in the aggregate over $20,000,000, and this one at St. Louis has cost as much as all the other 11 combined. This magnificent structure is a monument to the engineering skill of Capt. James B. Eads. How can we describe it? Four massive piers of granite reach down to a rock foundation, more than 100 ft. below the surface of the river, and rise 80 ft. above the water. These stupendous piers support three immense arches, each one 500 ft. long. The arches are composed of chrome steel tubes united by a vast network of iron braces. The bridge has two divisions, the upper portion being used for carriageways, horse-car tracks and promenades. Through the lower division runs a double line of steam railway tracks, on which 100 daily trains go thundering back and forth. Leaving the bridge the trains plunge into a tunnel as dark as midnight, and nearly a mile in length, passing under the city to the great Union depot. As trains now meet at this great central station, and twice a day, it is probably the busiest place to be found in the country; morning and evening one can see no less than a dozen trains standing there ready to depart to all points of the compass.—*St. Louis Times.*

THE STING OF A WASP, or bee, or yellow-jacket has often proved fatal in five minutes, when the prompt application of hartshorn to the wound, and a few drops swallowed with water, would have antagonized the poison and saved the life; but in a dozen houses in the country there might not be found a drop. It may be useful to know that a bit of soap or a handful of wood ashes stirred in a glass of water, makes a good hartshorn substitute in half a minute; or, if there be not a wood fire in a mile, a handful of moist earth grabbed from the first mud-puddle, or pond, or brooklet's edge, contains hartshorn and other curative elements, which, if applied in the shape of a poultice, gives instant relief to the sufferer.—*Dr. Hall.*

No climate however balmy, no skies however bright, no circumstances however adventitious, can avail for man's benefit, unless he himself be sufficiently vigorous and intelligent to take advantage of them for his own purposes. This necessary vigor and intelligence ean be gained only through continued effort and energetic action.

USES OF CHEMISTRY.—Let us give chemistry its true place. It has led the world's progress for half a century, and it will lead it with still more rapid strides during the next half century. It has preceded the practical man, lantern in hand, along all the untrodden paths of invention and discovery. It has become to every progressive industry what a cane is to the blind man. It does not follow, however, that we can depend upon it alone, nor that we can rely on every analysis handed us. Because the blind man finds a cane helpful, no one with unimpaired vision would be wise in shutting his eyes and walking with the aid of a cane. Still less would the blind man be wise to throw his cane away because it sometimes fails to detect an obstruction in his path. We have a right to distrust an analysis when it points to conclusions which cannot be safely accepted unproven, but the man who looks to the chemist for all the information which an intelligent study of the composition of matter can give him, will know more and act more wisely than the man who depends upon his practical knowledge or his general intelligence. When we are willing to pay for care, skill and experience in laboratory work, and the profession offers a career for ambitious young men who are driven from it by the lack of promising opportunities in this field, the general standing of chemical work will be raised, and there will be a longer list of names which, appended to analyses, will command confidence. Meanwhile, no one who spends money judiciously in learning all that the chemist can tell him will waste it, while the owner or manager of works who feels that he can dispense with the chemist's services, will make a mistake.—*Iron Age.*

THE GRAND CANAL OF CHINA.—This canal is likely to share the fate of the great wall. This water-way was constructed by Kublai-Khan and his successors of the Yuen race, and is 600 miles in length. There are 10,000 flat-bottomed boats on this canal, and these are used in the transportation of grain. The *Echo* states that this great water-way is an enormous "white elephant," as it costs an enormous amount every year for repairs, the appropriations there, as elsewhere, not being entirely devoted to the purpose for which they are meant. Junks are delayed every month while channels are cut for their passage. This year, for the first time since the construction of the canal, the grain from Nanking, with the consent of the government, has been forwarded by sea, and this fact has impelled the Peking authorities to consider the expediency of abandoning the canal as a commercial highway.

THE brilliant Sophie Arnold, when she heard of a certain diplomatist that had been eaten by wolves, exclaimed, "Poor brutes! Hunger must indeed be a terrible thing."

ANNIVERSARY BALL, VALLEY, 30.—The tickets of invitation for the third anniversary of Valley, No. 30, to take place at Union hall, on Friday evening, April 8th, have been issued. As a gem of art and new design they are worthy of this Lodge and the occasion. The lithographer and designer is Bro. W. T. Galloway, member of Valley, and Past Grand Patriarch of I. O. O. F. The invitation is printed on light blue satin ribbon, three inches wide, held in place by an ornamental paper clasp. Over this an elaborately embossed covering of silken pasteboard on which are the emblems and tools of our Order, together with ornamental pictures of the cooing dove and stately swan, and other appropriate pictures. Between these are arranged the names of the several committees. This when folded rests on a large ornamented pasteboard four and one-half by seven inches, making a souvenir that is creditable to the designer and lithographer, as well as this progressive Lodge. We scent a grand affair on this auspicious occasion and understand invitations will not be indiscriminately given out.

CONTINENTAL COFFEE AND SPICE MILLS.—Bro. Adam H. Murphy, No. 12 Fourth St., having an experience of ten years in this city, is furnishing unadulterated and all kinds of fresh ground spices and coffee to his customers. Long experience in the East and here in selecting, buying, roasting and blending coffees gives him great advantage. He furnishes a brand known as the Arabian coffee. It has great strength, delicious flavor, and a rich aroma. His large business enables him to furnish fresh ground coffee daily, and at very low prices. An examination of price list and quality of goods in his attractive store, No. 12 Fourth St., is always in order.

EXPERIENCE WITH IMPERIAL EGG FOOD.—A. J. Lineback, of Calistoga, writes: I have used a six lb. box of imperial egg food. I have about 250 hens, and when I began to feed it they were looking badly, and their combs were pale. Now their combs are a bright red, the fowls look hearty and healthy and have commenced to lay. I think it is an excellent preparation.

WE will sell for the next 60 days at our wholesale and retail hardware store, No. 28 New Montgomery St., under the Palace hotel, builders' materials, carpenters' tools, brushes, fine cutlery, parlor rifles, air guns and everything in our line at lower rates than ever. Call and examine my new stock and be convinced. Frank P. Latson, proprietor, was formerly with the late H. Rosekrans.

THE new steamer *Ferndale*, a notice of which appeared in a former issue is, now making her regular trips to Eel river, carrying freight and passengers. Her owners are well satisfied with their venture in this worthy enterprise. Bros. Johnson & Veasey, agents and commission merchants, 324 Davis St., report an increased trade in this new and heretofore unnavigated portion of our State.

BRO. JOSEPH GUSTI'S oyster and chowder house, 105 California market, is the resort of all who have partaken of choice viands. It is quite a common expression: "Suppose we go and have an oyster cocktail at Joe Gusti's?" His parlors are open night and day.

OUR genial brother, J. W. Collins, of Burns Lodge, will furnish pure country milk to his customers. The Belmont dairy is recognized as one of the best, if not the best dairy in this city, to procure milk, and at reasonable prices.

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Alameda, 5.

EDITORS WATCHMAN:—Alameda Lodge, No. 5, had a grand reunion on Wednesday night, the 16th inst. Ashler Lodge in a body, and West End the same, with our own members, filled the Lodge-room. On this occasion the M. W. degree was conferred on a candidate, and I can assure you, Mr. Editor, that we are so proud of our officers that we almost feel like challenging any set of subordinate Lodge officers to do better. After the degree had been conferred, under the head good of the Order, music, singing and speaking occupied the evening. Bro. Wheaton, M. W. of Ashler Lodge, made some very interesting remarks, among which was the problem what shall we do to secure a better attendance at our meetings, to which Bro. Wheeler, of the same Lodge responded, and whose remarks if carefully considered by every member would be very likely to bring them out once in a while. The address delivered by P. M. W. Cheminant, of Ashler, was one of his masterpieces, and if time and space would allow would furnish you with a few extracts. Will do so in the near future. The Glee Club, of West End Lodge, gave a song which was heartily encored. Various other officers of the West End assisted in speaking and singing, but the grand finale was the Scotch bagpipe, conducted by the M. W. of Ashler. Now, I will have to conclude, as I cannot write any more for laughing.—W. SANDERSON, Financier of Alameda Lodge, No. 5.

Butte, 114.

Monday night, March 14th, was the regular meeting night of the Lodge, and was called to order at 6 P. M. The work of the Order being through, the Lodge closed, and the doors were thrown open for a social gathering. The hall was filled with about 140 persons. The following programme was given: Opening ode by the choir; opening address, Bro. Smith; music by the orchestra; quartette, entitled "Spring," by Bro. and Mrs. Connor; lecture on the "Foundation, Growth and Benefits of the Order," Bro. Hunter; music by the orchestra; quartette, "Home Returning," Misses Colclasure and Wheeler, Mrs. Connor, Bro. Connor and Mr. Whorten. After an intermission of 20 minutes the programme was proceeded with as follows: Declamation, Bro. Mitchell; song, entitled "The Bridge," Mrs. Connor; select reading, "The Three Lovers," Bro. Hooper; quartette, "Home by the Sea," Miss Bradshaw, Mrs. Connor, Bro. Davis and Mr. Whorten; song by the Thornbrough sisters; song, "Cruel Slavery Days," Bro. Hill; instrumental music, Miss Colclasure; declamation, Bro. Newman; quartette, "The Old Musician and His Harp," Mrs. Connor, Bro. Connor, Mr. G. Jones and Mr. Whorten; closing address, W. C. Smith, M. W.; closing ode by choir. The order of exercises was admirably carried out, and all went home well satisfied that the A. O. U. W. was a noble institution. This is the first social that our Lodge has given. I send this by instruction of Bro. Hunter, he not being able to write, having met with an accident occasioning a dislocation of the right shoulder. Yours truly in C., H. and P., C. F. HOOPER.

Chico, 58.

The *Enterprise* says that Chico Lodge, No. 58, A. O. U. W., has decided to have its annual picnic on Saturday, the 30th day of April, and have commenced to make preparations to that end. Invitations have been sent out to all Lodges in northern California, and delegations from Marysville and Sacramento are to be present. The material composing Chico Lodge is a sure guarantee that this will be a grander parade than any heretofore given. The experience of their success last year imparts new life to the arrangements for this, and we know they will profit by it to their own credit and the honor of Chico.

Haywards, 18.

EDITORS WATCHMAN:—Haywards Lodge, No. 18, was instituted January 17, 1878, with 13 members, charter closed with 26, and like other country Lodges during the early part of that year had a very hard struggle to live. To-day they have a Lodge of 55 members of the best material in that section of the country, a fact that would do credit to the Grand Lodge officers if they would only visit Haywards Lodge this term. This reminds me that the officers of the Grand Lodge have only visited this Lodge once in about two years, therefore I think that Haywards Lodge ought to be placed the first on the roll of Lodges to be visited by that Grand Body. Haywards Lodge had a grand reunion on the 15th inst., at their Lodge-room, with delegations from neighboring Lodges and Alameda, upon which occasion the M. W. degree was conferred by the Master of Alameda Lodge, No. 5. I must say that the officers performing this ceremony deserve great credit for their proficiency in the work, and to my mind I think that officers of one Lodge conferring the degrees in another would be the means of creating a friendly rivalry amongst them as to which of them could do the best. After the degree had been conferred, arrived good of the Order. Now, under this head, you can always lookout for something good in Haywards Lodge, but unfortunately the majority present had in their mind the grand table spread in the adjoining hall waiting for all to regale themselves, and more especially those of us who had been advised to practice the Tanner system, but I think all of us did our whole duty to the magnificent spread. After the feast we returned to the Lodge-room. Bro. Haile being called to the chair, announced the Lodge duly opened for "high jenks," in which mirth and fun flew fast and furious. In conclusion I must say the grand reception given to all visiting brethren will be long remembered by the participants.—W.

Ione Valley, 141.

W. A. Bennett, Recorder of Ione Valley Lodge, 141, writes that the Lodge is in a flourishing condition. It now numbers 51 members. The meetings are well attended. They have more applications coming in. The D. D. G. M., J. Steinmetz, paid them a visit on the 16th inst., and exemplified the secret work, which was done with satisfaction to all.

Mendocino, 70.

This Lodge held a very pleasant meeting on Wednesday evening, March 9th. Geo. H. Bowman, P. M. W., was presented by the Lodge with a Past Master Workman's jewel, or badge of office, made of rolled gold and worded as follows: "Presented to P. M. W., George H. Bowman, as a Token of Love and Esteem, by Mendocino Lodge, No. 70, A. O. U. W." The presentation speech was made by Walter Ferral. Mr. Bowman responded, thanking the Lodge, and the members then passed the balance of the evening in the most pleasant manner. No. 70 is one of the largest subordinates in the county and the membership is steadily increasing.

San Leandro, 12.

EDITORS WATCHMAN:—On the 11th inst., Grand Receiver Haile and Deputy Sanderson visited San Leandro Lodge, No. 12, and, having the pleasure of being present that evening and listening to the instructions and unwritten work as exemplified by the Deputy, I came to the conclusion that the Lodges in this district are earnestly working for the good of the Order. This Lodge has about 50 members, and an average attendance of 30, which I consider very good for the country. After the usual routine of business was finished, and Good of the Order reached, various short speeches were made by different members, which would occupy too much space to furnish extracts. A warm discussion arose about the admission of members into the Order who are daily using alcoholic liquors, and from the interest taken by some of the members I am led to the conclusion that San Leandro Lodge is fully prepared to meet any emergency in that direction. Through information I find that the Grand Lodge officers have only visited this Lodge once since the organization of the Grand Lodge. I am confident they would be fully paid for their visit in seeing the interest the members of the Lodge are taking in the future prosperity of our noble Order. I sincerely hope they will try and make it convenient to visit San Leandro Lodge, No. 12, this term.—MORE ANON.

Reception by the Los Angeles Lodges.

The evening of March 15th witnessed a notable gathering of the Workmen of the southern portion of the State. Over 1,000 ladies and gentlemen assembled in Turn Verein hall, Los Angeles, to welcome Grand Master Barnes. The Lodges represented were Los Angeles, No. 55; Southern California, No. 191; and Nos. 82, 84, 85, 120, 130 and 151. Deputy Dunsmore presided. The entertainment given was in all respects most successful, and, says the Los Angeles *Herald*, must have been fully appreciated by Grand Master Barnes. The hall was crowded and the audience composed of the best people of Los Angeles. The advertised programme was not strictly adhered to—a duet by Mrs. Beeson and Mr Mannon and a solo by Mr. Barnes constituting the departures from the published routine. The opening ode by the Lodge was rendered with pleasing effect. Col. Godfrey welcomed the guest of the evening in his usual happy style, putting the audience in good humor for the reception of Bro. Barnes' address. The Grand Master is an impressive and highly entertaining speaker. He explained the objects of the Order, showed the benefits accruing from it, and while accrediting kindred organizations their full meed of praise, he claimed that the United Workmen were of more practical benefit to the widow and orphan than other similar bodies. His address was listened to with marked attention and was more than well received. Mrs. Beeson was in excellent voice and received two well merited encores. Her selections were good and rendered with remarkable sweetness. Messrs. Enderlein, Mannon, Whitney and Book did some excellent singing and the Grand Master himself contributed not a little to the enjoyment of the festivities by a solo, which he gave in response to numerous solicitations. One of the features of the evening was the rendition of two comic pieces by Prof. Higgins. The husband whose wife was always too late for the train, but who was finally left behind himself, and the rash young man who attempted on a cold winter night to capture the yellow Thomas cat and finally came to a halt in the midst of a molasses-candy party, were pictured in such a mirth provoking manner that the entire assemblage was kept in a continuous roar of laughter during both recitations. The opening prayer by the Rev. J. W. Ellis and the benediction of Rev. M. M. Bovard met the requirements of the occasion. After the closing ode the guests left their seats, some returning home and others lingering for social converse. Brother Barnes ought to be proud of his welcome and the Order deserves congratulations upon the success of the evening's social and reception.

San Francisco Lodge Locals.

Burns, 68.

Charity in its truest sense is exemplified in Burns Lodge. On two separate meetings a brother in distress has received the sum of $55 to aid him in his calamity. From the report of the entertainment committee by Bro. Flint, P. M. W., of Burns Lodge, we may expect a fine programme at their Lodge-room, Pythian Castle, on Thursday evening, March 31st. Brethren are invited to be present.

Fidelity, 136.

A summary of the work of this vigorous Lodge is very satisfactory to the members thereof, and most certainly to the Order in general. In that time they have increased their membership by adding 15, swelling their numbers to 281. They are now looking around for a fine hall, as their present one is not large enough. We believe that they have contracted for one which will be in all its equipments and surroundings worthy of this Lodge.

Hercules, 53.

On March 17th, our brethren of Hercules, after dispatching their regular business, held their monthly Lodge social. The chairman of the entertainment committee, Bro. Moore, opened the exercises by calling Bro. Rhind, their organist (as he is also of Valley, No. 30), for an overture; reading, by Bro. Vining, M. W.; song, Bro. Bergemann; reading, Bro. Dennery; reading, Bro. Cunningham; violin solo, Bro. Phillips, accompaniment on the piano, by Bro. Rhind; banjo solo and encore with song, Bro. Brown; speech, Bro. Manser; closing with a few complimentary remarks from Bro. Marshutz, of Sts. John.

Magnolia, 41.

The Lodge-room was completely filled on March 20th. There were several applications and the J. W. degree was conferred on one. The details of the Lodge business including attention to the personal wants of several brethren were strictly attended to. A resolution was unanimously passed requiring the Financier to make quarterly reports of disbursements and receipts instead of semi-annually. Under head Good of the Order, Bro. Hart, M. W. of Friendship, who is about to make Oregon his home, was called upon for a few remarks. On this occasion his words of eloquence warmed the hearts of Magnolia and at the conclusion unanimously passed a vote of thanks to our worthy brother. Afterwards a resolution was passed to visit Friendship Lodge at her next meeting.

Olympic 127.

Not to be behind the times, but wishing to join hands with their brethren of other Lodges, the Workmen of Olympic, 127, are adding steadily to their membership. On Tuesday evening, March 22d, four fine appearing candidates presented themselves before the altar and took their first lesson in the principles of our Order. This was interpreted to them by the different officers in good style; and after a short recess, in which they were introduced to their brother members, they took their departure. On March 29th they will receive their final lesson and become Master Workmen. There are more applications on the Recorder's desk, and we expect to see Olympic forge ahead at a lively rate. Have not members of other Lodges met in the Lodge-room brothers whom they knew in boyhood, or came from the vicinity of where they formerly lived. A chance word spoken will bring to the mind that perhaps this brother and yourself once roamed over the same hills and valleys, and memory will be carried back to the halcyon days of youth, and the old and happy scenes will be visited again. This has been our pleasant experience in Olympic Lodge, for one of the brothers initiated March 22d, Chas. D. Dunn, came from the same part of Shasta county that we did. And then the pleasant chat of the old times—times that will be held dear while memory lasts. No doubt other brothers have experienced the same event that is related. And thus does the Lodge fulfill another purpose, bringing friends together whom the vicissitudes of life have cast widely apart. Another of Shasta's former sons is a worthy officer of Olympic Lodge, Bro. Keating, Overseer. It is fitting that this should be, for, as snowy Shasta rears its white-crowned peak toward the blue firmament, standing as a giant sentinel over the fairest portion of the State, so does Olympic Lodge scintillate in the bright diadem of the San Francisco Lodges.

San Francisco, 4.

We have the pleasure of recording a very interesting meeting of our pioneer Lodge, on Wednesday evening, March 16th. The M. W. degree was conferred on four in a creditable manner. After which Bro. Fechheimer, Foreman, in a very neat and appropriate speech presented Bro. Carlson, P. M. W., with a gold P. M. W. badge on which was inscribed: "Presented to P. M. W., E. Carlson, by Members of San Francisco, No. 4, A. O. U. W., as a token of esteem, March 16, 1881." Bro. Carlson responded in a speech full of golden words of good cheer to the brethren of the Ancient Order of United Workmen. Bro. Carlson has been one of the leading members of our Order, he having done yeoman service on the finance committee for several terms. Interesting remarks were made by Bro. E. Lewis, P. M. W. and others, which made the meeting one of pleasure and profit to all present.

Oak Leaf, 35, to Valley, 30.

On Wednesday evening, Mar. 23d, a small delegation, numbering 60, of Oak Leaf, paid a fraternal visit to Valley, No. 30. The large Lodge-room was well filled previous to their arrival; with this addition it might have been termed a mass meeting. The brethren of Oakland were received with honors, and welcomed by a neat speech from the Master Workman, George A. Case. There were five petitions received for the degrees, and a ballot taken on eight candidates, when a recess was had and friendly greeting and handshaking indulged in for awhile. The M. W. announced that there was a brother here from Missouri who wished employment. Under head "good of the Order," Bro. J. J. Jones, M. W. of Oak Leaf, in a few well-chosen words addressed the Lodge. Bro. Dunton, P. M. W., was then called, and in his humorous and inimitable manner made a speech that was well received and loudly applauded. Among many good things he said was this: "Do not endanger this grand old Order that has filled every pledge by going after new Orders and new organizations." D. S. Hirshberg, P. M. W., then, in a very able manner, entertained the Lodge with appropriate remarks that were well applauded. The Master Workman, Geo. A. Case, was loudly called for, and in response said: "I proposed to make the programme, but it being ordered otherwise, it alters the *Case*." Bro. J. M. Winnie, M. W. of Pacific, No. 7, made a few remarks, followed by Bro. Robinson, P. M. W. of Oak Leaf, in his usual interesting manner. Bro. Black, Foreman of Valley, then made one of his humorous speeches, that was most cordially received, followed by F. Filmore, P. M. W. of Valley. Bro. Frost, of Oak Leaf, then sang a song that was highly entertaining. Bro. Miller, P. M. W. of Oak Leaf, the eloquent reserve, was called, and responded in fitting words for the occasion, after which Bros. Filmore and Porter, of Valley, sang a duett. At this late hour, W. H. Barnes, G. M. W., arrived, and received a royal greeting, and was invited to close this auspicious event, which he did *a la* Barnes. These two leading Lodges of our jurisdiction, starting at about the same time, and closing their charters with over 200 members each, have always been extremely friendly to each other as Lodges, and on this evening there seemed to be a desire to renew and enlarge their friendship. It was a grand meeting, alike profitable to all, and an example that should be followed by other Lodges. Valley has increased her membership 25 in the month of March, and several applications for April. Who dare say now that her membership will not be 1,000 this year?

THE old, reliable and well-known piano warehouse and parlors of Woodworth, Schell & Co., 105 Stockton street, formerly of No. 12 Post, under the able management of Bro. J. P. Curtis, of Fidelity, 136, is still in the front ranks with a large stock of the celebrated pianos of the house of Henry F. Miller, of Boston, and Grovesteín & Fuller, of New York. This house deals only in first-class instruments, sell them at reasonable rates, and at one unvarying price to all. Our genial Bro. Curtis is always ready to show his stock and sell for cash, installment plan, or to rent. This house conducts its business on the strictest principles of integrity and honest dealing.

BLUM'S orchestra, brass and reed band, is well and favorably known for the excellence of its music. The inspiriting strains from this well-conducted band, and the harmony of each instrument with the rest, attest at once the skill of the members and the leader's thorough knowledge of his business. Many of our Lodges have engaged this band for our socials and annual reunions, and freely give credit to its efficiency. M. M. Blum, leader and prompter, at 647 Market, Nucleus block, will promptly attend to all orders entrusted to him.

NEWPORT SWIMMING BATHS.—This popular swimming establishment is almost ready to receive guests. The arena has been renovated and repaired and is in complete order. A large building 30x80 ft. fronting the beach, has been lately erected, having a glass frontage on both sides. There will be 200 dressing rooms. This favorite resort will be under the immediate supervision of Bro. J. P. Wonderlich, and will be kept with a view of accommodating the best class only of ladies and gentlemen. Refreshments will be served and a regular clam chowder on each Sunday. Fifteen trains of the S. P. C. R. R. pass daily.

THE separable button, patented in England, France and America, and manufactured by E. Shrier, 201 Montgomery street, is one of those serviceable things which will attain wide use as it becomes further known. The misery occasioned by the falling off of buttons is well known, and this little invention will be hailed with unmixed satisfaction. We understand it is Bro. Shrier's intention to start a manufactory for the purpose of placing these buttons on the market in large quantities. He is also one of our leading clothiers, his stock of clothing and furnishing goods for gents, youths and children being of the last styles.

HARRY N. MORSE'S COLLECTION AGENCY.—This agency at Oakland, 859 Broadway, Room 14, has facilities for the collection of notes and accounts, unsurpassed by any other house in this State. The manager, Bro. D. S. Hirshberg, P. M. W., is the active manager. Any business entrusted to him will receive prompt attention and be handled with skill.

A NEW FLEA PEST.—The Manchester (N. H.) *Mirror* gives the following: A Hollis family by the name of Patch is tormented with fleas to a degree heretofore unknown in a civilized country. It appears that in 1876 a member of the family came from a sea-port town in a second-hand suit of clothing. Shortly after, the father, mother and three members of the household discovered the presence of a black insect. This insect is called a flea by the Hollis people. He burrows under the skin of the victim and tortures]him day and night. Artificial heat makes him more lively, and hence the family have little or no fire in house, preferring to endure the cold rather than a terrible burning and itching. They have baked their clothes and burned their beds, they have consulted medical men at home and abroad, have tried internal and external remedies, and still get no relief. They are isolated from the community and in deep trouble.

CLEANING WATER PIPES.—A correspondent of the *Forest and Stream* gives a novel method employed to cleanse a two-inch water pipe which had become choked with mud. A string was tied into a hole punched in the tail of a small eel, which was straightway put into the pipe. An occasional jerk reminded the eel that it was incumbent on him to proceed, which he did, arriving at the lower end of the pipe with the string. A bunch of rags was tied to the string, and thus the pipe was cleansed.—*Locomotive.*

A POWERFUL LIGHT.—The Brush Electrical Manufacturing Company at Cleveland, Ohio, has recently manufactured for use in the British navy an electric light, which has been tested and found to have a 100,000-candle illuminating power—a power 50 times greater than the ordinary electric lamp for street lighting. This is believed to be the largest and most powerful light ever made with human hands. It is designed to be used in night attacks, and to scrutinize the sea for torpedoes. A 40-horse power engine is required to produce the light. The carbons used are two inches and a half thick. The intense heat generated between the carbon points is half a million degrees, one-ninetieth the estimated heat of the sun. It is calculated that with an ordinary reflector a beam of light will be cast so powerful that a person 15 miles away can see to read by it.

ENCROACHMENTS OF GREAT RIVERS.—The extent of the encroachments of rivers like the Mississippi and Missouri upon their banks can only be compared with what is taking place upon the south-eastern shores of Great Britain by the action of marine currents. Indeed, owing to the direct manner in which American rivers impinge upon their banks in certain parts, the destructive action is, in this case, still more rapid. Several thriving towns on the banks of the two rivers specified have within the last few years been swept away by the erosion of their banks.

IMPROVEMENT IN ORDNANCE.—In the matter of building large ships, and casting heavy guns, the American people have not kept pace with Europeans. The heaviest American-built ships are floating shells compared to the massive iron vessels England, France, Italy and other European powers have constructed; and the largest guns on American ships or seaboard defences bear no comparison in the weight of missile thrown by the guns which are floated on European navies. It is now intimated that the discovery of what is termed a new system of ordnance, by an American, will do away with the improved cannon, which have been brought to their present state at such enormous cost. Late Eastern papers give long accounts of recent ordnance experiments in Washington, in which the new invention was tested. These experiments are reported as highly satisfactory, but still showing that the plans of the inventor are not yet perfect, or, rather, that they have been imperfectly carried into practice. The purpose of the inventor is to make war so destructive that, by common consent, it will be abandoned as a means of settling international difficulties.

RUBBER WHEELBARROW tires were first invented in England to prevent the noise of wheelbarrows in warehouses, railroad stations, etc. To accomplish this object a rim of vulcanized rubber is fastened around the tire of the wheelbarrow.

SCIENTIFIC PROGRESS.—The recognized and frequently applauded tendency of modern investigation in natural sciences, has been toward an accumulation of facts, rather than toward any effort to generalize from them. As a reaction against the mania of speculation prevailing in the earlier stages of the development of modern chemistry, geology, etc., the direction taken has produced highly salutary results. The foundations thus laid have been broad and substantial, and the haze of doubt and uncertainty has been swept away in many departments of science, while new fields of research are constantly opening to a large number of intelligent and active workers. No one will be inclined to underrate the value of their labors, and yet it is difficult to escape the feeling that, notably in chemistry, this search for new facts is conducted without the proper discrimination. A mass of data is piled up without order or connection. It would be valuable material in the hands of those skilled in grouping and arranging it in such a manner as to secure a basis for further work. In its present shape, however, it is only raw material, and while a great deal of credit properly attaches to original investigation, it should be remembered that it is as great a thing to make a fact useful as to find it out.—*Iron Age.*

ONE gallon of neat's-foot oil mixed with four ounces of lampblack makes a good harness oil.

The Electric Eel.

Among the wonderful appliances furnished by nature, the battery of the electric eel is among the most interesting to the student and naturalist. The eel abounds in the Orinoco and the Amazon, but the force of the current and the depth of the water prevent their being caught, though the natives often feel shocks from them while bathing in those rivers. The engraving upon this page is intended to represent a novel method the natives have adopted for securing these amphibious electric batteries. Humboldt, in his "Travels to the Equinoctial Regions of America," thus describes this method of "fishing with horses," which gives an excellent idea of the ingenious though cruel method. He says: Having waited near the bank of a small stream the Indians were soon seen returning from the savannah, driving before them a number of wild horses and mules. They brought about thirty of them, which they forced to enter the stream. The extraordinary noise caused by the horses' hoofs makes the fish issue from the mud and excites them to the attack. These yellowish and livid eels, resembling large aquatic serpents, swim on the surface of the water and crawl under the bellies of the horses. A contest between animals of such different organizations presents a very striking spectacle. The Indians, provided with harpoons and long slender rods, surround the pool closely, and by their wild cries and the use of their rods they prevent the horses from running away and reaching the bank. The eels, stunned by the noise, defend themselves by the repeated discharge of their electric batteries. For a long interval they seem likely to prove victorious. Several horses sink beneath the violence of their terrible strokes, which they receive from all sides in organs the most essential to life, and, stunned by the force of the shocks, disappear under the water. Others panting, with mane erect and haggard eyes expressing anguish and dismay, raise themselves and endeavor to flee from the storm by which they are overtaken. They are driven back by the Indians into the middle of the water; but a small number succeed in eluding the active vigilance of the fishermen. These regain the shore stumbling at every step, and stretch themselves on the sand, exhausted with fatigue and with limbs benumbed by the electric shocks of the *gymnoti*. In less than five minutes two of the horses are drowned. The eel, being five feet long and pressing itself against the belly of the horse, makes a discharge along the whole extent of its electric organ. It attacks at once the heart, the intestines, and the cœlic fold of the abdominal nerve. It is natural that the effect felt by the nerves should be more powerful than that produced upon man by the touch at only one of the extremities.

The *gymnoti* require a long rest and abundant nourishment to recover the galvanic force which they have lost. The horses remaining in the water appear to be less frightened, and gradually the *gymnoti* timidly approach the edge of the water, where they are taken by means of small harpoons attached to cords. The Indians feel no shock in pulling them from the water, as the cords are very dry. Eels thus taken are but slightly wounded. They are very good eating, and the Indians use them largely for food. In Dutch Guiana they were formerly employed to cure paralytic affections.

One peculiarity noted by naturalists is that the electric action of the fish depends entirely upon its will. The shock, too, can be directed to any point desired, as for instance if two persons touch, one the head, the other the tail, one will feel a shock and the other will not be affected at all.

NATIVES FISHING FOR ELECTRIC EELS.

THEY have a matrimonial benefit society in the East. It is for unmarried persons, and provides benefits ranging from $500 to $1,500, to be paid as a marriage benefit. What next? How do our California bachelors look upon the scheme? Perhaps a good many of them might change their single blessedness if they could be assured of enough money to take them on a bridal tour. Some might make good husbands; others would only like to get the $1,500 legacy, and then what? Perhaps the deserted bride might wish the matrimonial society had never entered into this false and wicked world.

The Good that is Being Done.

Misanthropes may rail at the terrible amount of wickedness that is running through the world, and talk of the good old days when vice with its attendant evils was not heard of so frequently as it is now. Still we do not believe that society is altogether so bad. We like to look at the bright side of human nature. In the good old times, if anything outside the usual rut happened, it was hardly heard of beyond the immediate neighborhood. Now, by the aid of electricity, the doings of a day are flashed over the whole country, sometimes startling by their atrocity the mind of the reader. By this agent things that perhaps we would never hear of are brought vividly before us, and make one believe that the world as it is growing older is also rising in the scale of wickedness. It seems to us that this fact of wide publicity is the cause of the hasty remark, the world is going to the bad.

Would a fraternal beneficial society of the magnitude of the A. O. U. W. be possible thirty years ago? The fact that there was none would go to prove that it would not. We argue from this fact that the world is not going to the bad. It is only by the wide currency given to deeds of evil that it seems so.

The successful manner in which the A. O. U. W. has been conducted has given an impetus to other societies of a similar nature, all tending toward the same noble end. It has also, we think, strengthened the older orders—such as Masonry and Odd Fellowship—by breaking down a prejudice which many good and worthy people held toward secret societies. The result of all this has been that men have got new ideas of life, are made better and stronger, and are strengthened in their desire to resist evil. The principles that fraternal Orders inculcate tend to lead men to do what is right. They are taken out of their own little world, and by association with their fellow men are made to see that there is still some sunshine left.

Here in California it was from these older Orders that the A. O. U. W. drew its first strength. Then the great outside public hearing of the grand object of the organization cast their lots with them. Thus many lost their prejudice. They became associated with the very best men of the community, and whatever doubt they had heretofore as to the merits or demerits of secret societies, speedily vanished. It did not stand to reason that these men who had come together did so for any sinister purpose. The cause was holy, just and good.

No, we do not think the world is awry and out of joint. Especially in these United States is the flower of its manhood enlisted under the banners of fraternity, and while this is so we can afford to look with pity upon the errors of the few. The many deeds of benevolence that fraternal societies are performing; the many homes they are brightening with their ministrations, will offset a thousand-fold the grave crimes which the unfortunate commit. Let the good work go on. There is still room within the folds for many more.

No spirit of exclusiveness actuates the A. O. U. W. It is willing that all those who are found worthy and have the necessary qualifications should join hands with the men who have already plighted their faith one to the other. They will find that it is wide-reaching in the practical benefits it will confer upon them, and upon those who will be left behind when they have gone to meet their Maker.

PAID WITH PROMPTNESS.—The Shasta *Courier* of the 26th ult. says: Our late fellow townsman, Chas. McDonald, who died January 30th, was a charter member of Shasta Lodge, No. 71, of the Ancient Order of United Workmen. This Lodge was instituted December 18, 1878, when Mr. McDonald became a member. On Monday last the Recorder of the Lodge paid to Mrs. McDonald the amount of her deceased husband's beneficiary certificate, $2,000. This circumstance illustrates the prompt manner in which the A. O. U. W. dispenses its true and practicable charity. Mr. McDonald had been a member of the Order but little more than two years, and within fifty days after his death his beneficiary certificate of $2,000 is paid without any quibbles or technicalities intervening.

WE had the pleasure of meeting Bro. S. J. Mayo, of Los Angeles, on April 6th, at Valley, No. 30. He is a member of the new Lodge, No. 191, and reports a rapid growth thus far.

NEW YORK had a membership March 1st of 14,928.

Home Miscellany.

When You and I Were Young.

There is no time like the old time
When you and I were young;
When the early flowers blossomed
And birds of spring time sung.

When we roamed the fields together,
Or loitered by the stream,
I crowned you with forget-me-nots
And called you little queen.

There is no home like the old home,
To us the dearest spot,
Where we spent the days of childhood—
They shall never be forgot.

We may now look back with sorrow,
As through the world we roam,
And wish we could return again
To see the dear old home.

Oh, could we but recall the hours
We spent at thoughtless play,
And be for once a child again,
Our years one happy day.

Could we but kneel in prayer once more
Down by our mother's side,
Again receive that good-night's kiss
From her at eventide.

The dear old home, the dear old time,
Shall never be forgot;
We'll keep for them in memory
A cherished, sacred spot.

—*Ada E. Taylor.*

The Widow's Picnic.

In one of the many neat but humble dwellings which encircle the thriving town of M——, situated on the line of the Southern Pacific Railroad, dwelt the Widow Harty, and her two boys and two girls. The departed spouse, Dennis Harty, had joined one of the beneficent Orders of the day, and had left his widow with a snug sum of money sufficient to keep the olive branches from raggedness and hunger. Her constant care was to regulate her little household and train them up in the way they should go. She never failed to regret the loss of Dennis, and cherished his memory with due diligence. She was a woman who had a "theory" that there was only one good husband for a woman; if she drew a prize the first time, she would likely get a blank in further ventures, and *vice versa*. She lived an easy-going, industrious life since her widowhood began, which was some two years past. She seemed likely to glide along in the quiet stream of her widowhood until she became mother-in-law to somebody, without a ripple on the tide. But this was not to be, for the appearance of Larry Hughes broke up the even tenor of her way, and her troubles began.

Larry was a countryman of hers who had a claim some ten miles up Dry creek. One day, passing by with his cart on his way to the town, he stopped at her gate to give some of her children a lift to the school-house. There were some half dozen urchins in the cart he had already picked up along the road, who, calling his attention to them as they were leaving home, he added them to his load. He was a good-looking, good-natured, merry specimen of an Irishman, to whom life's troubles seemed but trifles. She had often seen him pass with a lot of children, but this was the first time he had picked up any of her brood. She was at the gate as he drove up, and the compliments of the day were freely passed to and fro over the fence. This was the beginning of an acquaintance, continued with increasing intimacy and interest, till the widow began to overhaul the records to see if her "theory" of the result of a second draw at the lottery would hold water; she counted off the ayes on her right hand and the nays on the left, and was relieved and satisfied to find they came out even anyhow.

One day Larry drove up to the gate with his load of fruit and vegetables, and stopped. He told her there was to be a picnic at the grove May Day, and would she and the children like to go with him in the cart. Everybody was going. She was thinning out a bed of onions, and as soon as she could get some of the kinks out of her back, she took a survey of the cart. It was a likely looking affair enough. She minded seeing lots of women folks and children going into town on worse looking rigs than Larry's cart, and then, too, she wasn't proud. Indeed, what had she to be proud of unless of her children and her good name? She thought, too, with a slight blush, how pleasant such a ride would be "across the moor" beside Larry, and the children tucked out of the way at the tail of the cart. And she thought, too, (widows think awful fast) a little encouragement would not come amiss to Larry, who seemed inclined to play the laggard in love. It will be such a treat for the dear little darlings and she consented to go for their sakes. Larry didn't care for whose sake it was so she was along, and the thing was settled.

May-day morning came in soft and balmy; a light cool breeze was moving up the valley, invigorating and exhilarating. It was what was called a good season, and crops waved with the promise of abundance, and everybody felt as though now was the time for enjoyment. The widow had not been idle since the day of the invitation; and there was a fine large new basket with a rainbow handle, filled to the brim with evidences of her skill as a cook, which was to serve the double purpose of contributing to the greatest pleasure of a picnic, that of feasting in the open air, and as a sort of domestic battery to bring Larry to business. It was covered with a nice tablecloth, and was placed forward in the cart. The young ones were stored away in the rear and with the widow beside him, on a fine buggy-robe he had borrowed for the occasion from a friendly hostler in the town, Larry started in good style for the grove. They arrived in due time for the exercises provided for the day. By the time noon came, everybody was ready for the eating part of the programme.

The basket was placed against a tree and the snowy cloth spread under its branches. The cakes, pies, custards, tartlets, etc., were scattered picnic fashion. The widow sat opposite to Larry, with the children right and left. Everything was lovely. As Larry glanced over the feast spread by the widow's hand before him, he mentally vowed to engage her for life, if possible, on the way home. The widow took up a deep custard, and was in the act of passing it to him when a pig, which had found entrance to the grounds, thought he would prospect the basket at the foot of the tree. He got his fore feet into the basket; he became alarmed in the rear, and undertook to pass on through the basket instead of backing out, and the result of his fright was that he got the basket upon his back, with the handle firmly around his body like the cinch of a saddle. With a fearful squeal, he made a break straight ahead, overturned the first young one he came across, dashed between the widow and Larry just in time to fling the contents of the custard over his head and shoulders. It filled his eyes and hair instead of his mouth and stomach, and converted a joyful shirt bosom and collar into a picture of misery.

The pig continued on his course, making a wreck of every home circle he entered and demoralizing the whole institution. He was perfectly crazy with fear, stood up on his hind legs, then on his fore, like a California broncho; tried to roll over, and then to shake off the horrible thing on his back; tried to rub it off against anything or anybody he could see, meanwhile keeping up the most frightful and piteous squeals ever heard. He was the liveliest thing that ever dropped in at a picnic. What with the pig and the screams of laughter from those who succeeded in getting upon the wagons and the fence, and the shrieks of the women and children as he raged among them and over the dishes, there was no time for manners, much less courting. As soon as Larry could get enough of the custard out of his eyes to see which way to go, he made for the fence. The widow had just time to jerk two of the youngest into a wagon as the pig again came around, when she made a bold dash for her basket. The pig wanted she should have it, but offered it in such haste that she sat down quicker than she ever did before in her life. Then she climbed into the wagon with her hat under her arm.

She screamed over to Larry to get the basket, but somehow Larry couldn't hear her, leastways he told her so on her way home. Every time the pig circled around near by her, she would exclaim, "Oh, my basket, my beautiful basket." The pig finally found the gap he came in at and away he went down the road with the beautiful basket on the top of his back forever.

In spite of the terror and destruction created, it was voted that the fun and excitement was worth it all; nobody was seriously hurt and there was yet plenty to eat. Everybody was in high glee except the widow; she was cross, the loss of her basket for which she had paid $2.50 was no trifle. The feast she had spread with so much pride was no longer a thing of beauty or a joy to the soul, and not the least of her sorrows was the selfish escape of Larry to the fence, leaving her to look out for herself and family as best she could. She was very cool to him for some time and felt herself aggrieved. But who can sulk long or be cross at a picnic among a tribe of young folks bent on fun and frolic? By the time breaking up came she had recovered her usual good humor, and Larry and she were again on loving terms. The remains of the feast, dishes, etc., were stowed away under the seat and the table cloth placed over them. This was the only recourse, as the basket was gone and there was no box to be had. They jogged along comfortable-like towards home. The widow was in fine spirits, said nothing was so bad but it might be worse, and they had had a splendid time anyhow. Larry's spirit rose with the occasion and he thought it was now or never. He asked the widow for her hand and offered to divide all his worldly possessions with her in exchange—singing:

"I've built me a nate little cot, love,
I've pigs and potatoes in store.
And I've twenty bright pounds in the bank, darling,
And it may be a pound or two more."

The memory of the departed spouse came suddenly to her, as no doubt it comes to all widows under such circumstances, and she hesitated. The memory of all the loving kindness of Dennis rushed like a flood into her heart, that loving care and forethought too, which had kept the sting of poverty and distress from her widowhood, and her tongue refused to utter the ready affirmative that was in her heart.

"It was so sudden," she said. She hadn't dreamed of such a thing. She thought all along it was the children he was so fond of; she wanted a little time to consider. Would he call Sunday week for an answer. Yes, he would call every day of the week for the matter of that. But little more was said, as each kept up a busy thinking till they arrived at the gate.

"Hould the lines, Mrs. Harty, while I tend to the children; I'll have ye all out in the twinkle of an eye," said Larry; and he did sure enough. She took the lines, and he sprang to the ground. The bolt which kept the bed of the cart in position had, unbeknown to him, worked out, and as he jumped off, the equilibrium was destroyed, with the balance of power with the children at the tail of the cart. As soon as he reached the ground the rest were dumped like a load of rubbish in front of the gate.

The widow resumed her proper position in the world as soon as possible. Which end of her struck first she never knew; that she made one revolution she was certain. Her ear was full of molasses and her hair of gravy, and her hat was jammed down over her eyes with the rim between her teeth. As for the children, they looked as though they wouldn't need to ask for preserves for a month, if allowed to lick themselves clean.

Mrs. Harty was mad as a hornet. This second catastrophe was too much for her love, and it went out like a match. "Is this the way to bring a lady home, you villian? If I catch ye within my door I'll have ye out in the twinkle of an eye!" and she shook her fist at him. The cart, relieved of its load, righted up with a bang which set the old horse thinking about home, and he started off at a rate which presumed that the result of his mental investigation was, that he thought it was late. Poor Larry gave a beseeching look at the widow, and an anxious one after his rapidly disappearing vehicle. She looked so ferocious and warlike that he quickly decided it best to look after the cart and old Mike.

The widow stood as though dazed, for some minutes; but a string of teams from the picnic were coming rapidly up the road, and that was no place for her and her family in such a queer muddle; so she scraped the debris into the tablecloth, gathered up the four corners, and pushing the young ones ahead of her, she dragged the wreck through the gate, into the house, and closed the door behind her. Here, shut out from the rude world, she let her feelings have full sway, and woman's best friend in such times came to her relief, and she shed tears in abundance. Such a day she had never experienced in all her life. It seemed a month since morning. What a day it had been!

"This day so wildly welcomed,
This day my soul had singled out of time
And marked for bliss."

She soon had the children to bed with but little ceremony in the way of supper. As the twilight shadows fell she drew her chair to the window, and looking out upon the coming of the gloom and of the stars, she soliloquized as follows: "The spirit of Dennis was wid us today, shure. He don't like Larry, and that is so. Bad luck to the day! If I am to live such a life as Mrs. Larry, I had better stay as Widow Harty." And she did "stay" as Widow Harty, for Larry never came back for his answer, and it was months before she set eyes upon him again.—*G. W. T. C., Point of Timber.*

Keep Your Troubles Sacred.

A worthy wife of 40 years standing, and whose life was not made up of sunshine and peace, gave the following sensible advice to a married pair of her acquaintance. The advice is so good and so well suited to married people, as well as those who intend entering that state, that we publish it for the benefit of such persons: "Preserve sacredly the privacies of your own house, your marriage state and your heart. Let no father, mother, sister or brother ever presume to come between you two or to share the joys or the sorrows that belong to you two alone. With God's help you build your own quiet world, not allowing your dearest earthly friend to be the confidant of aught that concerns your domestic peace. Let moments of alienation, if they occur, be healed at once. Never, no never, speak of it outside, but to each other confess, and all will come out right. Never let the morrow's sun still find you at variance. Review and renew your vow; it will do you good, and thereby your souls will grow together, cemented in that love which is stronger than death, and you will become truly one."

Woman's Work.—Woman's work is never done. She would never have it done. Ministering to father and mother, cherishing her husband, nourishing her children—no true woman wants to see her work done. But because it is never done she needs resting times. Every night the heavy truck is turned up, the wheel horse is put up into the stable, and labor and care are dismissed till the morrow. The thills of the household van cannot be turned up at night, and the tired housemother cannot go into a quiet stall for repose. She goes to sleep to-night feeling the pressure of the morrow. She must have had "an eye" over all until every one is in bed, and must keep an eye ready to open at any moment to answer the need of children, and open both eyes bright and early to see the machinery well started for a new day. There is never any time that seems convenient for the mother of the little children to leave home even for a day; but with a little kindly help from her husband, and a little resolution in herself, she may go, and be so much the better for it that the benefit will overflow from her into the whole household. She will bring home some new idea, and will work with the enthusiasm that comes from a fresh heart.

Two Pictures.

Picture first.—Since the creation of the human race (when the "Lord God said, it is not good for man to live alone," therefore he made woman), it has been known and acknowledged by all that neither sex is a perfect whole without its counterpart. Without it man is an unfinished being. His soul and all his faculties demand the refining influences and gentle graces blended with them. As the cold earth needs the warmth of the genial light of the sun, so man requires the smile of woman to soften and develop him. What is home without a wife or mother? The wife is the hope-giving Iris of days of cloud and tempest. Yes, earth's lost paradise is restored with "love in a cottage," in the midst of which we find the wife, mother and sister, the angels of this earthly bower, infusing into thy soul, O man, her sweet purity, and speaking loving words of consolation to cheer thy heart.

A perfect woman, nobly planned,
To warn, to comfort, and command,
And yet a spirit still and bright,
With something of an angel light.

A man may have amassed wealth and have all at his command that gold can purchase, still he is not content. Money cannot procure happiness. If he has no domestic ties, no loved ones waiting for him, listening for his footsteps ready to give the welcome kiss after retiring from life's busy cares, his life is incomplete. When he leaves his *table de' hote* he stops listlessly and soliloquises: where shall I spend my evening? My rooms are elegant yet there is no one to greet me with a smile or welcome with a kindly word. Yes, I would give half I am worth to be as happy as my friend H——, with his lovely wife and little ones to climb upon his knee. Thus thinking, he turns his steps to the club room and spends his money in drinking and gambling, and listening too, if not joining in profane language, until manhood is lost and character debased. Home would have saved him. What are riches without a home?

Ah, woman, in this world of ours
What gift can be compared to thee!
How slow would drag life's weary hours,
Though man's proud brow was bound with flowers,
And his the wealth of land and sea,
If destined to exist alone
And ne'er call woman's heart his own.

Picture second.—Living in complete obscurity there are good, noble, virtuous women of elevated and intellectual minds, who would make the best of wives. If their husbands were possessed of limited means they would prove themselves helpmates by their industry and frugality, and would encourage and console by words of love and sympathy. Yes, those women are living in obscurity—and why? Because the better class of men are living alone and entertaining the idea that the women of California are not fitted for wives, which may be true to a certain extent. But there are only a few comparatively of those shiftless women, and is it not unkind that, however hard we struggle against adverse fortune, having the good old Puritan principles and firmness of character to live true lives, that we must unjustly be thrown upon the scales with the few scheming, unprincipled women?

I say again, good women are living unsought and unknown because the better class of men do not seek them. A good woman is modest and retiring, and does not advertise herself as in the "market," e'en though it be leap year. We cannot fight for love as men do.

We should be woo'd, and were not made to woo.

Yes, they live secluded because there is no way by which they can appear upon the stage of life. They have no capital to enable them to enter business, thus they have to work for a mere pittance, scarcely sufficient to pay the exorbitant rent of their little room, with the plainest food. And pray, where is their clothing coming from? *Man* will constantly harp about the extravagance of woman in dress and finery, and yet invariably court the society and pay his devoirs to the elegantly clad in preference to the plainly dressed lady, although the latter be far superior in intellectual culture. Gentlemen, do you not see that you encourage by action what you disclaim by words? Unthinkingly you wrong the good woman. She feels the slight, although her intelligence teaches her that "fine feathers do not always make fine birds." Thus those who were designed for each other, wander apart, for woman, with her quick perception, would make a much better choice in selecting a partner for life, were it not indelicate for her to make the first advances, fearing in so doing her actions would be misconstrued.

It seems as though every avenue for woman to assist herself were closed while our dry-good stores and libraries, etc., are filled with men clerks, occupying positions that women ought to, while they should strengthen their muscles by working at the anvil, or wielding the carpenter's hammer, or tilling the ground, and various other branches of industry by which labor would be equallized and women would have a better chance in the world. Women should have the same salary for what they are competent to do that men are paid doing similar work.

Now, do you not see the two pictures which I have presented are true? The "Apostle Paul" said, "let every man have his own wife." Were that command heeded we would soon see society coming up to a higher standard. Instead of clamoring for "woman's rights," we have endeavored to portray some of "woman's wrongs."—*Angie E. Marjeson, S. F.*

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of sixteen letters.
My 1, 8, 10, 9 is a small shady valley.
My 7, 11, 16, 13 is a limb of a bird.
My 11, 6 is a conjunction.
My 14, 5, 16 is a heavy weight.
My 12, 4, 7 is recent.
My 3, 11, 16, 8 are domestic animals.
My 2 is a vowel.
My whole was a distinguished general. O. G.

Buried Animals.

1. It is wise to have one's plans made ere commencing an undertaking.
2. It was to the rabbi that we appealed in vain for protection.
3. To this land we came long years ago.
4. Do good unto all men is the command.
4. "Be around at the time appointed," whispered burglar Tom to his confederate.

ANNIE.

Problem.

Henry Smith owes Jerry Jones and Rolan Brown a certain sum of money. On one occasion he pays them $53; giving Jones four-elevenths of the sum due to him, and to Brown, $3 more than one-sixth of his debt to him. At a second time he pays them $42. Jones receiving three sevenths of what remains due to him, and Brown one-third of what is due to him.

What was the amount of Smith's indebtedness to each?

O. G.

Reversals.

1. Reverse a man's name and form a fish.
2. Reverse duration and form to vomit forth.
3. Reverse face value and form to strike.

CEPHA.

Fraction Puzzle.

Take one-fifth of an apple, one-fourth of a pear, one-sixth of an orange, one-fifth of an olive, one fifth of a peach, one-fifth of a lemon, one-tenth of a watermelon, and make a fruit. DICK N S.

A Mother's Boy.

"Is there a vacant place in this bank which I could fill?" was the inquiry of a boy, as with a glowing cheek, he stood before the president.

"There is none," was the reply. "Were you told that you might obtain a situation here: Who recommended you?"

"No one recommended me," was the answer. "I only thought I would see."

There was a straightforwardness in the manner, and honest determination in the countenance of the lad which pleased the man of business, and induced him to continue the conversation. He said: "You must have friends who could aid you in a situation; have you advised with them?"

The quick flash of the deep blue eyes was quenched in the underlying wave of sadness as he said, though half musingly, "My mother said it was useless to try without friends," then, recollecting himself, he apologized for the interruption, and was about to withdraw, when the gentleman detained him by asking him why he did not stay at school another year or two, and then enter into business life.

"I have no time," was the instant reply, "but I study at home and keep up with the other boys."

"Then you have a place already?" said the interrogator. "Why did you leave it?"

"I have not left it," answered the boy quietly.

"Yes, but you wish to leave it. What is the matter?"

For an instant the child hesitated; then he replied, with a half-reluctant frankness, "I must do more for my mother."

Brave words! talisman of success anywhere, everywhere. They sank into the heart of the listener and recalled the forgotten past. Grasping the hand of the astonished boy, he said, with a quivering voice:

"My good boy, what is your name? You shall fill the first vacancy that occurs in the bank. If, in the meantime, you need a friend, come to me. But give me your confidence. Why do you wish to do more for your mother?"

Tears filled the boy's eyes as he replied:

"My father is dead, and my sisters and brothers are dead, and mother and I are left to help each other; but she is not strong, and I want to take care of her. It will please her that you have been so kind, and I am much obliged to you."

So saying the boy left, little dreaming that his own nobleness of character had been as a bright glance of sunshine to the busy world he had so tremblingly entered.

UNCLE MOSES TURNS OVER A NEW LEAF.—A neighbor with a coffee cup in her hand called in on Uncle Moses yesterday, remarking, "Uncle Mose, I want to borry a cup ob parched coffee from you for breakfas' till to-morrer." "Go right to the box on de shef and hep yersef." The neighbor did as requested, but discovered the box to be as empty as the head of a legislator. "Uncle Mose, dar's no parched coffee in dis heah box." "Does yer know why dar ain't no coffee in dat ar box?" "No, I doesn't know nuffin' about it." "Dar ain't no coffee in dat ar box," said the old man solemnly, "bekase dat ar am de returned coffee box. Ef yer had brung back all de coffee yer borrowed last year hit would be plum full."

A LITTLE girl hearing it remarked that all people had once been children, artlessly inquired, "Who took care of the babies?"

Humorous.

Chips.

"HYMEN'S bonds" are recommended as a safe, popular investment.

ALTHOUGH painting is a difficult art to learn, most artists paint easel-y.

WHEN is money damp? When it's mist in the morning, and due (dew) in the evening.

WHERE is the need of having a standing army? demands a peace journal. No need whatever. Let them sit down.

A MAN has invented a chair that can be adjusted to 800 different positions. It is designed for a boy to sit on when he goes to church.

WE hear of a man who has made a fortune by attending to his own business. This is authentic. But then he had few competitors.

"NEVER take a bull bi the horns, young man," counsels Josh Billings, "but take him bi the tail, then you ken let go when you want to."

"MRS. BROWN, I do wish you would try to bring David out a little. Why, do you know he's so bashful that I really think if he caught the measles they wouldn't come out."

"HAVE you dined?" said a lounger to his friend. "I have upon my honor," replied he. "My dear fellow," rejoined the first, "what a very scanty meal you must have made."

PECK'S *Sun* has been looking up the millinery business, and it finds that 30 cents' worth of velvet, three cents' worth of wire and 40 cents' worth of feathers can be stirred up and sold for $25.

A WRITER on the style says, "It is the fashion in France for the ladies to take their tea in bonnets and gloves." One objection to this is that some of the bonnets do not hold much more than a lump of sugar.

A GENTLEMAN from Indiana recently registered at an Illinois hotel and looked at the printed notice in his bedroom. "Please do not blow out the gas." The occupant of the adjoining room heard him remark, "I pay my money, and I am going to blow out the gas if I want to."

Household Hints.

A GOOD PEA-SOUP.—In an article on "Summer Soups," Mrs. Beecher gives the following as a recipe for "a most delicious pea-soup": Put half a pound of butter into a soup-kettle, over the fire, and add to it a quart of green peas. Shake them round constantly for 15 minutes to prevent their browning. Then take out half the peas, and set aside; then pour in two quarts of vegetable stock, or some prefer boiling water. Cut fine about a pint of spinach, half a dozen green onions, a little mint if agreeable, and a head of celery. Set the kettle where this will stew slowly two hours, till all the materials are reduced to a jelly, then add the pint of peas reserved, three teaspoonfuls of sweet butter rolled in flour, two teaspoonfuls of salt, and one of black pepper. Let it just boil up, then pour into a hot soup tureen, and serve immediately.

MILK SOUP.—Wash, pare, slice and parboil a pound of potatoes; pour away the water; skin and scald two onions, chop them; place the potatoes, onions, one teaspoonful of salt and half a teaspoonful of pepper in a stewpan, with one quart of cold water; bring to a boil and boil till quite soft (about a half hour), crush the potatoes and onions with a spoon till smooth, and one quart of new milk and one ounce of crushed sago; stir continually till it boils, then boil for 10 minutes. This soup may be made richer by adding one ounce of butter or dripping to the quart of cold water; also by putting a yolk of an egg, well beaten, into the tureen, and mixing the cooked soup slowly with it. The soup must be off the boil, or the egg will curdle.

JUGGED PIGEONS.—Clean and wash well, and stuff with a dressing made of the giblets boiled and chopped; a slice of fat pork also minced fine; the yolks of two hard eggs rubbed to powder, some bread crumbs, pepper and salt, bound with a beaten raw egg. Tie the legs and wings close to their bodies, and pack the pigeons in a tin pail with a tight top. Plunge this into a pot of boiling water; put a weight on top to keep it steady, and cook two hours and a half. The water should not boil over the top. Drain off the gravy into a saucepan, thicken with a tablespoonful of butter rolled in flour. Season, boil up, pour over the pigeons, cover again, and leave in the hot oven ten minutes before serving.

MINCED CHICKEN OR MUTTON WITH EGGS.—Take, if chicken, some of the white meat from the breast and remove all skin and outside parts—if mutton, an underdone slice or two from the leg, saddle or loin; mince it very finely; put it into a stew-pan with a little good gravy or beef tea free from fat; flavor it if liked with a few herbs and spices, and simmer gently until quite hot, but not boiling; then thicken it with a little butter and flour, and season to taste with pepper and salt. Put this mince on a small dish and serve on the top a poached egg.

Health Column.

Hot and Cold Baths.

The London *Lancet* in a recent number points out the difference between the effects of hot and cold baths. The effects of the cold bath, it says, being mainly due to impressions made upon the cutaneous nerves, the modifications of the cold bath largely depend on their power of increasing its stimulating action. The colder the water the more violent the impression. The frequent change of water, such as is found in the sea or in running streams, increases the stimulating effect. Great force of impact, as when water falls from a hight or comes forcibly throuh a hose upon the body; the division of the stream, as is seen in shower baths and needle baths, and the addition of acids or salt to the water, all act, it would seem, by increasing the stimulating power which the water exerts upon the cutaneous nerves.

Warm baths produce an effect upon the skin directly contrary to that brought about by cold water. The cutaneous vessels dilate immediately under the influence of the heat; and although this dilation is followed by a contraction of the vessels, this contraction is seldom excessive, and the ultimate result of a warm bath is to increase the cutaneous circulation. The pulse and respiration are both quickened, as in the cold bath. The warm bath increases the temperature of the body, and by lessening the necessity for the internal production of heat, decreases the call made upon certain vital processes, and enables life to be sustained with a less expenditure of force. While a cold bath causes a certain stiffness of the muscles, if continued for too long a time, a warm bath relieves stiffness and fatigue. The ultimate results of hot and cold baths, if their temperature be moderate, are about the same, the difference being to use the words of Braun, that "cold refreshes by stimulating the functions, heat by physically facilitating them; and in this lies the important practical difference between the cold water and the hot water systems."

SUNDAY DINNER.—Sunday, by a large majority of mankind, is made a day of feasting, and the Sunday dinner is the principal one of the whole week. If there is any scrimping it is done through the week and the strength of the purse and efforts of the housewife are both concentrated and brought to a focus upon a Sunday dinner. Sunday is said to be a day of rest; but very little rest does the stomach find when it is loaded with an assorted cargo of highly seasoned viands, which gives it a job of overwork. And this is more onerous and provoking, as its owner lounges around and takes little or no exercise, which leaves the other organs without employment, and the poor stomach has to work on all alone, although it often exercises its constitutional right of grumbling at its owner's indiscretion and gluttony, which hath such extent that by the close of the day he feels much like a stuffed anaconda. If the quantity of food we eat is to be regulated by the exercise of the body, then the Sunday meal should be the lightest of the week, as usually but little physical exercise is taken on that day, whereas the contrary is the fact and the appetite is nursed and whetted throughout the week that it may make an onslaught on the fat of the land on Sunday, which is a manifest impropriety and a gross violation of the laws of health.

CHLORAL FOR TOOTHACHE AND FACEACHE.—Dr. Sporer in a St. Petersburg medical journal, after referring to the great benefit he had derived from chloral, whether administered internally or as an embrocation dissolved in almond oil, for the relief of rheumatic and other pain, states that in toothache and its accompanying facial pain a most effective remedy is found in dissolving from a scruple to half a drachm in two drachms of glycerine, and applying a plug of wadding soaked in this to the carious tooth. As, however, this causes in some cases considerable irritation of the mucous membrane of the mouth, he has during the last four years always applied the chloral in substance. From a half to at most one grain of the granules of chloral are wrapped in a little wool to keep them together, and placed in the cavity of the tooth. When the chloral has dissolved the accumulated saliva is to be spit out. If the tooth is in the upper jaw the chloral should be kept on by the finger until dissolved. The most violent toothache is in a few minutes relieved. He cites some cases in which most distressing and long-abiding toothache, accompanied by severe prosopalgia, was thus promptly cured.

HYDROPHOBIA VIRUS.—That obscure poison which produces hydrophobia has been known to lie latent in the human system for years before developing its fatal results. M. Pasteur asserts that the supposition is well supported that the virus does develop in certain organs, and not, as in other cases, in the blood; and that when, after a period variable according to circumstances, the organized poison passes into the blood severe symptoms come on rapidly, and the victim soon dies. An explanation substantially the same as this had long been advanced as a mere theory, but now M. Pasteur advances it is n ascertained physiological fact.

Worth Knowing.

Detecting Gas Leaks.

Mr. G. F. Ansell, of England, whose death was recently announced, recently applied the principle of his fire-damp indicator in the production of a handy little instrument for detecting gas leaks. The action of Mr. Ansell's fire-damp indicator is founded on the fact that different gasses have different rates of diffusion through a porous body, the velocities of diffusion being inversely as the square roots of the respective densities of the gases. In the gas-leak indicator this property is taken advantage of as follows: A small chamber is provided, having its back formed by a disk of terra-cotta, this chamber being provided with a small stop-cock, by which its interior can be placed in communication with the outer air. If, when this stop-cock is closed, the indicator be taken into a room where a gas leakage exists, the gas, in virtue of the above-named law of diffusion, enters the chamber through the terra-cotta disk more rapidly than the inclosed air escapes, and the pressure in the chamber consequently rises. This increase of pressure is utilized to move a hand on a dial at the front of the instrument, each pressure corresponding to a certain percentage of gas in the atmosphere in which the indicator is placed. The dial is graduated from 0 to 35% of gas, and is moreover marked to show when the mixture is and is not explosive. The instrument is very sensitive and prompt in its action, and it is calculated to serve a very useful purpose.

EFFECTS OF TEA ON THE SKIN.—If you place a few drops of strong tea upon a piece of iron, a knife blade for instance, the tannate of iron is formed which is black. If you mix tea with iron fillings, or pulverized iron, you can make a fair article of ink. If you mix it with fresh human blood, it forms with the iron of the blood, the tannate of iron. Take human skin and let it soak for a time in strong tea; and it will become leather. Now, when we remember that the liquids which enter the stomach are rapidly absorbed by the venous absorbents of the stomach, and enter into the system by the skin, lungs and kidneys, it is probable that a drink so common as tea, and so abundantly used, will have some effect. Can it be possible that tannin, introduced with so much liquid-producing respiration, will have no effect upon the skin? Look at the tea-drinkers of Russia, the Chinese, and the old women of America, who have so long continued the habit of drinking strong tea. Are they not dark-colored and leather-skinned?

NICOTINE POISONING.—A rather unusual case of poisoning by nicotine has occurred lately in a Paris suburb. The victim, a man in the prime of life, had been cleaning his pipe with a clasp knife; with this he accidentally cut one of his fingers subsequently, but as the wound was of a trivial nature he paid no heed to it. Five or six hours later, however, the cut finger grew painful and became much swollen; the inflammation rapidly spread to the arm and shoulder, the patient suffering such intense pain that he was obliged to betake himself to bed. Medical assistance was called, and the ordinary remedies proved ineffectual. The sick man, questioned as to the manner in which he cut himself, explained the use to which his pocket knife had been applied, adding that he had omitted to wipe it after cleaning the pipe. The case was now understood, and the patient's state becoming alarming he was conveyed to the hospital. There the doctors decided amputation of the arm to be the only hope of saving the patient's life, and this was immediately done.

SECURING GLASS IN SKYLIGHTS AND ROOFS.—A recent English patent shows what seems to us a very convenient and reliable way of fastening sheets of glass in skylight frames of either wood or iron. In the case of a wooden rafter a piece of sheet lead is cut three and one-half times the width of the rafter, laid across the rafter, projecting equally on either side, and nailed at intervals. The lead is then doubled back over the heads of the nails to the center of the rafter on either side and turned up at a right angle. The glass is then laid and the lead turned down over the face of the glass so that when finished the lead covers the glass the same width of the rafter. If T iron is used for a rafter the lead is doubled under the edge of the T instead of nailed, as in the case of wood, and in all other respects handled just the same as with wood.

RUBBER HARNESS.—Rubber saddle girths are made of gum elastic or other webbing, with a spring of perforated elastic compound, about two inches in length, inserted either about the middle or at either end of the girth. The springs are varied in length, according to the thickness and the width of the web. By the use of this girth the saddle is made more secure from turning, as the girth may be drawn very tight without inconvenience to the horse. Surcingles are made either of woven web or perforated felt, like saddle girths, only about twice their length.

EGGS VS. MEAT.—According to Dr. Edward Smith, an egg contains 15¼% of carbon and 2% of nitrogen. Another writer estimates that the value of 1 lb. of eggs, as food for sustaining the active forces of the body, is to the value of 1 lb. of lean beef as 1,584 to 900. As a flesh producer, 1 lb. of eggs is about equal to 1 lb. of beef.

Fraternal.

Masonic.

We note in the Petaluma *Argus*, that the Masonic Lodges of that city have referred the whole matter relating to the building of a Masonic temple to the building committee. The committee has the matter under advisement, and it is not yet determined whether the building will be commenced this summer or not.

The Marquis of Hamilton has been installed Provincial Grand Master of the Province of Londonderry and Donegal, Ireland. The Grand Master of Ireland, the Duke of Abercorn, K. G., was present, with a large gathering of Freemasons. The Prince of Wales, Grand Master of England, sent a congratulatory telegram. The Grand Master of Ireland recently had the pleasure of seeing his eldest son advanced to the highest dignity in the gift of the craft, in the northwest of Ireland.

In 1733, Anthony, Lord Viscount Montague, Grand Master of England, on application of several brethren residing in New England, appointed Henry Price as Provincial Grand Master over all the Lodges in New England. On the 3d of July, 1733, he constituted the first Grand Lodge of Freemasons on this continent. It was known as St. John's Grand Lodge. In 1792, it was united with the Grand Lodge formed by the Earl of Dalhouise, Grand Master of Scotland, of which Gen. Joseph Warren, who fell at the battle of Bunker Hill, was the first Grand Master.—*N. Y. Era.*

Mrs. Jennie Mann, Grand Matron, Order Eastern Star, making her annual round through the State, was received at Masonic Hall by Reveille Chapter, No. 47. The order, as known, is a feminine attachment to the F. & A. M., the female relations of Master Masons being eligible to membership, and the Reveille Chapter has become numerous. Necessarily, the feminine element imparts to all its proceedings a social quality, such an occasion as the one now reported being pre-eminently distinguished by that characteristic. The Grand Matron, who is a lady of fine presence, culture and talent, took an active part in the entertainment, other members, when called upon or as the spirit moved them, contributing their share. There were short speeches, in pleasant vein, recitations of prose and verse, songs were sung, and the whole was capped by a supper as bountiful in quantity as delicate and appetizing in its material. There were present lady guests from other chapters, and, when the meeting was dissolved, its participants went home in the mood to declare it one of the most enjoyable incidents of their experience.—*Monterey Democrat.*

The Masons' and Odd Fellows' Cemetery Association have held their annual session. The following Trustees were elected: S. Warford, A. Clark, Geo. W. Simonton, M. Myers and C. Daly. The Trustees organized by electing M. Myers, President; A. Clark, Treasurer, and C. Daly, Secretary. From the reports of the officers it appears that there are $375.79 in the treasury. During the past year there have been 31 interments in the cemetery, 28 by death and three by removals. Within the past 12 months 8 full ($20) lots have been sold, and six half ($10). Up to March 3, 1881, there have been 195 persons buried in the cemetery, of which number 53 were removed from other places. The total receipts of the past year were $409; disbursements, $316.20. After a lengthy discussion it was ordered that no person be interred in the cemetery unless the lot first be paid for; it was also ordered that in all cases permits for interments must be obtained from the Secretary. G. W. Simonton stated that they have recently been casting some fountains at the Navy Yard, which would be very suitable for the cemetery. The pattern could be obtained, and the Association could get a fountain cast and set up at a cost of about $300. The fountain would compare favorably with the one the Association talked of purchasing last year, at a cost of $1,000. The proposition was received favorably, and on motion a committee, consisting of G. W. Simonton, A. Clark, A. J. Brownlie and O. H. Butler, was appointed to consider the matter and report at the meeting to be held next week. There is at present $256 in the Fountain Fund.—*Vallejo Chronicle.*

I. O. O. F.

The Oakland Odd Fellows will celebrate the sixty-second anniversary of the Order by a picnic, Saturday, April 23d.

The 18th anniversary social of Abou Ben Adhem Lodge, No. 112, took place at Ixora hall, 737 Mission St., on Friday evening, April 1st. It was one of the most enjoyable affairs of the season, everything being conducted in that admirable style for which this Lodge is noted.

The Odd Fellows of Vacaville, Solano Co., intend giving a grand ball in that place on the occasion of the 62d anniversary of the introduction of the Order in America. The people of Vacaville are proverbial for the good times they have, and no doubt they will sustain their reputation on this occasion.

Encampment Battalion, I. O. O. F., gave its first social at Ixora hall, Mission street, on Wednesday evening, April 6th. Judging from the successful manner in which the first party of the Battalion was given, their future socials will be much sought after. The Encampment is certainly to be congratulated upon their success in this instance.

The Odd Fellows of Redwood City have just purchased a very fine Mason & Hamlin organ, and placed it in their hall. The instrument cost $210, and will make an important addition to the already well appointed hall. Some seven different societies use the hall, and all will appreciate the use of the splendid organ, so liberally furnished by the Odd Fellows, who own the hall and fittings, renting to the other societies.

The members of Big Tree Lodge, No. 78, I. O. O. F. will celebrate the 62d anniversary of American Odd Fellowship in an appropriate manner at Sheep Ranch, Calaveras Co., on Tuesday April 26, 1881. The exercises of the day will be: First, a Rebekah Degree meeting at 10 o'clock; second, a procession starting at 1 o'clock; third, dedication of burying ground; fourth, an oration by Hon. I. H. Reed, and in the evening the exercises will be concluded by a grand ball. The Committeelof arrangements, Messrs. A. M. Woods, R. Raggio and W. A. Henry, will leave nothing undone to make the affair a complete success.

The members of Myrtle, Rebekah Degree Lodge, says the Vallejo *Chronicle*, are talking of giving a calico apron and nectie party in the near future. The parties heretofore held by the Lodge have given great satisfaction, and the one in contemplation would undoubtedly prove the same. The peculiarity of this kind of party is that calico aprons are distributed to the ladies, and calico neckties to the gentlemen, no two aprons or ties being alike, but it being so arranged that there is an apron and tie cut from the same pattern of goods. After these are distributed, a hunt commences on a matching of the articles, and when the gentleman finds the lady who has an apron to match his tie, she becomes his partner for the evening or for the next dance. As may be imagined, there can be no end of fun and jollity, while the peculiarity of the affair would be the means of drawing a large attendance.

Don't make the mistake that ritualistic work is the foundation on which Odd Fellowship rests. No change in the work will change the grand principles on which the Order mainly depends for its solid growth and popularity. The finest scene of the artist on canvas is vastly inferior to one of God's grand panoramas stretching out before the eye of one of Nature's enthusiasts. So no dramatic representation; with all the appliances introduced for stage effect, can equal one act of real charity, or the living example of him who visits the sick, relieves the distressed, and buries the dead in accordance with the holy commands of our Order. If we regard the substance and not the shadow of our institution we will not only maintain its honorable position before the world, but will move forward to still grander and nobler results. The Order with its half million of members is still in its infancy, with prospects of strong and steady growth.—*Independent Statesman.*

Notes of preparation are heard far and wide for the approaching birthday (62d) of this Order. From the five men who gathered at the Seven Stars inn at Baltimore, Maryland, on the 26th of April, 1819, have sprung a membership which now numbers over 450,000 men. The single Lodge then instituted (Washington, No. 1) stands to-day at the head of 7,100 similar bodies, governed by 50 Grand Lodges, which in turn acknowledge fealty to a Sovereign Grand Lodge. The revenue from a few pennies per night has reached $4,500,000 annually, and the relief dispensed touches the grand sum of $2,000,000 per year. Since 1830 1,250,000 men have been initiated, 86,500 of whom have been buried by kindly hands; 121,000 widowed families and 903,000 brethren have been relieved, at an expenditure of over $30,000,000. The total receipts for 50 years have been $78,000,000, and after deducting relief and expenses, the Order has now in the neighborhood of $30,000,000 assets. Its system of sick benefits has proven a feasible and successful one, and its death rate and the average age of its membership remains the same, viz.: The death rate is about one per cent., and the average age of its members is about 40 years.—*Call.*

The editor of the *Bee-Democrat* describes a visit he made to Friendship Lodge, Middletown, Lake county, in company with Dr. Crumpton, D. D. G. M., as follows: Friendship Lodge is in a flourishing condition; it has two buildings, the upper story of one of which it uses for a Lodge-room. For some years it has carried a heavy indebtedness on this property, which, at one time they almost despaired of paying, but by perseverance and good management of a few who determined to stand by the Lodge through thick and thin, they have succeeded in doing so. They are now free from debt, and have some money in the treasury. This being a pleasant state of affairs, they propose to celebrate the coming 26th of April in grand style. They hope that the Odd Fellows throughout the county will join with them in making it a day long to be remembered by all who participate. W. H. Barnes, P. G. M., will probably be the orator, and he is one of the best on the coast. We congratulate Friendship Lodge on being able to throw off the yoke of indebtedness; but when such staunch men and true Odd Fellows as D. Poston, G. W. Rawson, C. M. Young, S. G. Butler, D. W. Lilly and others put their shoulders to the wheel, such a result is not surprising. The citizens of Middletown owe these men a debt of gratitude for keeping their Lodge up in good shape; an Odd Fellows' Lodge is a recommendation for any town, as it carries with it a guarantee of respectability, and in various ways helps a town; even men who are not members recognize this fact.

No one can better appreciate the idea of a judiciary for the Order than one who has served as Chairman on a Committee of Appeals in Grand Lodges. While engaged in that capacity, I have often wondered if a time would not come when the duties incumbent upon such an office might not be otherwise accomplished. Under the present arrangement, there is too little time for the proper examination and writing of reports upon the various applications on appeals from subordinate Lodges. When I was a member, the Grand Lodge was in session from four to five days, and on one occasion, six days; at each session were presented new questions, which demanded time in order to watchfully consider their progress. When I would be about to speak upon a subject, the Secretary would hold up a bundle of papers calling out, "Chairman on Appeals": I was handed matter enough for a week's consideration. The committee is notified to meet at my room at half past seven o'clock; the time comes; no one there but myself. At last a quorum is obtained, and we find there are ten appeals. The very first one is complicated; the law must be examined; having no copy at hand it must wait. The next seems plain, but a single suggestion complicates the question. The evening has passed, and no conclusion reached. Thus it is for three evenings, and not half the appeals are even read; but we must report the next day; a hasty glance is therefore taken of each appeal, and a report is written and the members sign it. The Chairman also reports; it is his own opinion hurriedly made up; it is not what the brothers—who have reason to be deeply interested in it—had a right to expect; they are disappointed, and so are the members of the committee when they see it in print. Badly as the matter stands, several appeals must go over for want of time. This is the result of too much to do in a given short period of time.—*Moses in New Age.*

Knights of Pythias.

Nevada has 485 members, and reports a gain for the year 1880 of 130.

The 18th anniversary of the Order was observed in the District of Columbia. The parade was one of the grandest sights ever witnessed in the line of a society procession in Washington City. A grand banquet was held in the evening.

The registered membership of the Endowment Rank on January 31st, was 11,271, in the first class, 15,257 in the second class, and 80 in the third class. During the month of January ten benefits were paid in the first class and seven in the second class, making a total of $42,000 during the month, and a grand total to January 31st of $583,517.

Oak Lodge, No. 166, was instituted in the village of Flushing, L. I., recently, and for the purpose of showing how the "boys" enjoyed themselves, we quote from the New York *Era:* Having finished their work and eaten their supper, Marshal General Stivers and a goodly company of festive brethren initiated the fun of the evening. The darkened parlor was cleared of its sleeping occupants, at the point of the sword, and to the deafening music of tin horns kindly furnished by the proprietor of the hotel, much to the despair, no doubt, of his permanent customers; the billiard room was turned into a pandemonium, and games were counted and the ivory balls disappeared from the table in the most mysterious manner. At last five o'clock was announced, and out into the morning air, redolent with the perfumes of the Flushing propagating houses, marched the stalwart company, headed by their buglers, for the depot. Only one blast was blown during the march to the train upon the hideous horn, and that by Ottiwell, hitherto yclept the "silent man," and then stillness reigned, disturbed only by the tramp! tramp! of the Knightly soldiery. At the depot, however, the fun (?) was renewed, and the screech of the locomotive was drowned in the horrid din of the horns and the Sioux yells of Stivers, Mills and Ottiwell. A blast was given for Oak Lodge, another for Flushing, another for Huss, and another for a bevy of pretty girls who got out out of the train just as it was moving away. From Flushing to New York every station was treated to a piercing blast, and while crossing the river every steamboat and flying bird was treated in like manner. The last toot died away in the distance as the elevated train moved away from the ferry, carrying Stivers and Ottiwell with it. It is probable that Flushing never before had such a jolly and noisy crowd as this was, and it is likewise probable that it will never want to have one like it again.

Says the *Pythian Journal:* Our interpretation of one of the first lessons taught us in our Order, is that of friendship of the strongest type imaginable. And to our mind this is the most impressive lesson taught in the Order. And where the lesson of friendship is fully understood and appreciated there should be no selfishness, that being the greatest evil sought to be removed by ours and kindred institutions. Yet we occasionally find a locality where the membership seem inclined to the opinion that their Lodge constitutes a little world, outside of which they are not aware of the existence of any person who has any claims on them. One city we know of not a thousand miles distant from this city where the membership is composed of men whose standing in the community is first-class and who no doubt feel that they are discharging their whole duty as Knights of Pythias, but in our opinion they do not fully understand and appreciate the beautiful lesson of self-sacrificing friendship as taught in our first rank. If they comprehend its full meaning they could not treat visiting brothers with the cold-heartedness they do. It is unnecessary for us to designate the particular locality of which we write, as so far as the writer is concerned he is always able to take care of himself, and is too independent to get down upon his knees and plead for recognition; neither have we any desire to be made a lion of when visiting the membership of the Order. But so long as our standing in the Order is unimpaired, we claim that we have a right to expect courteous treatment from the brotherhood in any locality we may visit. And we would suggest that each and all members of the Order give the lessons of friendship as taught some serious, sober thought, and then ask themselves the question, have I on every occasion practiced the teachings of the Order? Have I extended to the visiting brother all the courtesies due him as a member of our honorable Order? Have I treated the strange brother in the same manner I would desire to be treated if absent from my home among strangers? When these questions are satisfactorily answered in your own mind, then carefully study the teachings of the Order, and the evils can be readily removed. In a word, let us one and all learn the true meaning of all our beautiful lessons as taught in the different grades of rank, and when we know our duty do not hesitate to do it. Then there will be no cause of complaint.

That our influence may be felt, each individual member should comply with every requirement exacted from and of him during his progress in the Order. Each succeeding lesson in the Order should be impressed indelibly on his mind. And he should thoroughly understand the preceding rank before being advanced to another. Hence the urgent necessity for a rigid examination and thorough schooling in the different grades of rank. When this is done we will be Knights of Pythias in practice as well as in name.

Knights of Honor.

The reception to the Grand Lodge, K. of H., given by the San Francisco Lodges, will take place at Woodward's gardens April 13th. A general committee has been appointed from each Lodge, from which various sub-committees have been chosen. The literary exercises will commence at 8 A. M., closing at 10. Then the order for the grand march will be given. An interesting programme has been arranged, and, no doubt, the reception will be on a par with previous ones given by other fraternal societies.

The Supreme Dictator says: "The main purpose of our Order is to enable a brother to provide for his family after his death, and the fund we accumulate for this purpose is sacred to the widows and orphans of deceased brothers. If, therefore, a brother has a wife or children, he *cannot* be allowed to divert this fund from them. If he has not, then in the exercise of the offices of friendship, he may otherwise dispose of his benefit. It is the duty of subordinate Lodges to watch this point and see that this law is not violated."

A new Lodge of K. of H. has been instituted at Hill's Ferry, by John S. Alexander, District Deputy. He was assisted by the following members of Cedar Lodge No. 1,992, of Modesto: R. A. Johnson, R. B. Treat, A. S. Fulkerth, E. P. Grant, J. R. Broughton, Thos. Wallace, C. C. Swain, Henry Lewis, C. A. Post, C. L. Anthony, A. Jofts, John Hardesty, Dr. W. J. Wilhite, D. C. Coleman, T. M. Lane, C. A. Peterson and B. Johansen. The new Lodge is named West Side, and started with 18 charter members. Following is a list of the officers for the term ending June 30, 1881: Henry Klehn, P. D.; C. F. Miller, D.; R. M. Wilson, V. D.; W. Morehead, A. D.; F. Zucker, Rep.; J. McNish, Fi. Rep.; S. J. Newman, Treas.; J. C. Green, Chaplain; C. Vandergraw, Guide; A. Cahen, G.; E. P. Bennett, S.; N. E. Bunker, H. Klehn and A. Cahen, Trustees; Dr. C. F. Miller, Med. Ex. The new Lodge will meet Thursdays. At the conclusion of the ceremonies, the visiting brethren from Modesto were invited by the members of the new Lodge to partake of a banquet at the Russ hotel. This invitation, it is unnecessary to relate, was accepted by the visitors. They speak in the highest terms of praise of the kindly treatment of the members of West Side Lodge, and speak of the supper spread at the Russ hotel as being an elegant affair.

In the "Rules to be observed by medical examiners in the examination of all candidates for membership in the Knights of Honor," says the *Advocate*, "if consumption is found to have occurred in the family, the applicant is to be regarded as not eligible, and must be rejected, under the following circumstances:" "If in one parent, not eligible until 45 years of age." Frequent cases have come to our notice recently which cause us to consider the above requirement arbitrary and unjust, as it now stands without any qualification. We know of no other society which fixes the age higher than 35 years, and nearly all consider 30 years a safe limit. During the last month a case has come to our notice which confirms us in our opinion.

After considerable solicitation upon the part of many members of our Lodge, one of our very best young business men was induced to make application for membership. We all knew him to be perfectly healthy, and his appearance indicated a good, strong constitution, and perfectly free from every injurious habit. We congratulated ourselves upon the prospect of so valuable an accession to our ranks. What is now our amazement to find that the above "rule" excludes him from our Order, and under these circumstances: After his birth his mother contracted a cold, which terminated in consumption, and being under 45 years of age he is ineligible. His mother's mother is still living, at the age of 83; and her grandmother died at 84, and no other trace of consumption is known to have existed in the family, his father having died from the effect of an accident, and the lungs of the applicant being found entirely sound. Having the welfare of the Order as fully at heart, we believe, as any other member, and desiring to see all proper safeguards thrown around the medical examination of candidates, yet we believe this rule is too arbitrary; and if the high limit is to be retained, we believe that common sense dictates some qualification in cases where the consumption is proven to be not hereditary, or contracted after the birth of the applicant, and the applicant at 30 is found to be free from any indications of the disease.

American Legion of Honor.

THIS Order has a membership of between 20,000 and 25,000.

A COUNCIL of the American Legion of Honor was organized in Lakeport, March 19th, by Deputy Commander, A. Noble, of Petaluma, to be known as Lakeport Council, No.—, with the following officers: Commander, Dr. P. H. Thornton; Vice Com., Jas. C. Baker; Secretary, Mrs. P. H. Thornton; Collector, Mrs. S. M. Riddle; Treasurer, S. J. Gordon; Medical Examiner, Dr. Thornton; Post Com., H. F. Childs; Orator, Isaiah Taylor; Chaplain, Mrs. E. E. Jenks; Guide, F. H. Keyser; Warden, Ben. Carson; Sentinel, J. F. Erott.

THE *Journal* of the A. L. of H., the official organ of this Order, has the following:

THE fee for the Med. Ex.-in-Chief should in all cases be collected by the subordinate medical examiner and forwarded with the application direct to the Med. Ex.-in-Chief.

THE Supreme Treasurer reports the receipt of $74.50 on distress call No. 2. We hope the widow of our late Bro. Oliver will receive the full amount to which she is entitled.

MEDICAL examiners who make a *proper report* of the personal history and present condition of each applicant have no trouble with the Med. Ex.-in-Chief. Good risks are often rejected on account of the carelessness or ignorance of the local examiner.

BENEFIT CERTIFICATES in the A. L. of H. cannot be issued in favor of any but a member or members of the family, or a dependent or dependents of the persons taking membership. The full name of each beneficiary must be given as well as their relationship to the member.

APPLICANTS who do not present themselves for initiation within four stated meetings (eight weeks) after their election must be re-examined. A medical examination is not good for more than eight weeks. Let all take due notice and govern themselves accordingly.

A COUNCIL cannot grant permission to a companion to change from a lower to a higher degree until the companion has been examined by the subordinate medical examiner, and the examination approved by the Med. Ex.-in-Chief, precisely the same as for new membership.

THE Supreme officers have already refused to pay one or two claims on the benefit fund on account of false statements made in the application for membership. No matter what may be the policy of other societies, the A. L. of H. will not encourage fraud by paying a claim where the applicant for membership has wilfully falsified or concealed any important facts concerning family or personal history, present condition or habits. None but good risks need apply.

COUNCILS are required to prepay all charges on applications forwarded to the Supreme office. Should they fail to do so, the applications will not be received. All correspondence with this office must be signed by the proper officer and under seal of the Council, otherwise they will be deposited in the waste basket. It has been the practice of many Councils when forwarding mail matter to this office, to omit placing sufficient postage thereon, which necessitates quite an item of expense to the Supreme Council, which should be borne by the Council sending the same. To all such we would say that in the future all mail packages directed to this office upon which there may be due any postage will not be taken from the postoffice. If you wish them to reach this office you must prepay all postage. Applications sent by mail or otherwise, must be properly folded, not rolled.

CHAS. K. DARLING, Supreme Treasurer, gives the following statement for the month ending February 28, 1881:

GENERAL FUND.

Balance on hand last report	$10,028.59
Received from Supreme Secretary	6,350.82
Total receipts	$16,379.41
Paid 36 orders, amounting to	3,233.94
Balance on hand	$13,145.47

BENEFIT FUND.

Balance on hand last report		$ 7,845.39
Received on Assessment No. 5 & 6		1.23
Received on Assessment No. 7		9.56
Received on Assessment No. 8		7,485.99
Received on Assessment No. 9		3,181.63
Total received and on hand		$18,523.80
Paid order No. 34	$5,000	
" " " 35	2,000	
Amounting to		$ 7,000.00
Balance on hand		$11,523.80

Knights of the Golden Rule.

FROM the *Knights' Journal:* A member of a castle in Texas inquires as to who are salaried officers, and if they are required to give bonds. We will anwer by saying that the only officers under the pay of Supreme Commandery are the Supreme Secretary and Supreme Treasurer, and they are required to give sufficient bond. The affairs of the order are carefully and economically administered.

THERE is one fact that must be apparent to all, and that is, if we could retain our classes, we must change our system of assessments, so that each and every member of the Order will be assessable at one and the same time, according to the amount of his Knights' Benefit certicate. The first class is evidently weakening under the present plan.

SIR DAVID WELLER speaks thusly on the subject of pooling assessments: "Probably it would be a good idea, now that things are running smoothly, to change the assessments according to the amount of benefit—that is, 25 cents in the $500 class; 50 cents in the $1,000 class, and $1 in the $2,000 class. This is a matter for the next Supreme Commandery to legislate on. Let the members make up their minds before they go to Chicago next August."

A MEMBER of a Cincinnati castle asks "if it is lawful to give an applicant a certificate on the Knights' Benefit Fund without his first having been duly initiated according to the ceremony of the Order." We will answer that if he is acceptable to the Knights of the Castle, yes. Why not? The only conditions prescribed in the constitutions and general laws of the Order for the issuance of a certificate are that the applicant shall not be over the age limit; shall be favorably reported upon by the Castle's medical examiner, shall be elected and take the obligation. When this ordeal has been safely passed he is a member *de jure*, and the certificate may be issued to him. This is the view taken by our highest authorities. One may keep his certificate, procured in this manner, alive by paying his dues and assessments, and not otherwise incurring the penalties of the law. Among the disadvantages of this nominal membership is that one is denied participation in the social and fraternal features of the Order; and not having the secret work and pass-word, he cannot visit his own or another Castle, cannot hold any official position, and, consequently, is barred to all the titular honors of the Order, and in traveling is ignorant of the talisman which discovers friends, and protects one against want and suffering. He may enjoy simply the protection guaranteed by his Knights' Benefit Certificate—nothing more. Now let it be understood, however, that even this great boon is given him only by the consent of the members of the Castle to which he applies. The *Journal* does not hesitate to say that it sees nothing to disapprove of in this plan. What we want are good risks. If we can get acceptable and accepted men to cooperate with us in the beneficiary department, who don't fancy the social feature, let's take them.

I. O. Foresters.

THE *Foresters' Banner*, published at St. Louis, Mo., devoted to Independent Forestry, is full of live news of this Order. We make some selections, as follows:

THE Supreme Chief Ranger, on the 1st of March, 1881, rendered the following decision: "If more than six months have elapsed since the date of a suspension of a member, he must again make application as a new candidate, and is ineligible if he is over 50 years of age at the time of such application."

THE *Banner* would like to see the Supreme Court take favorable action on the following: *First of all.* The endowment law must be in accord with principles of equity and sound common sense. It is not right that those who were members when that law was enacted, should pay a less assessment than those who came in since. The assessments should be graded according to age, and based upon the tables of mortality. *Secondly.* There should be, all over the continent, a universal system of supervisory medical examinations. Missouri has lead the van, and our Supreme Court has only recommended that the State jurisdictions do it. The Supreme Court should enforce it, by its own legislation. *Thirdly.* The Supreme Court should thoroughly revise and codify the laws of the order; and as part thereof should embody the new Missouri code, as a code for the order at large. As it stands now, a Forester in this city (or other cities) to know the laws of Forestry, must examine at least eight or ten different books, and then finally give it up, and say there is no harmony whatever in Forestric law.

INDEPENDENT Forestry is not quite seven years old. Up to October 1, 1880, a little more than six years of effort, it had paid for relief and endowments the magnificent sum of $371,863 32, and all this at so light an expense per member as in no case to be burdensome. Who can estimate the vast amount of good that has been accomplished by this glorious result? If ours is not a divine institution surely it is a human institution carrying out divine principles! The great body of Foresters are of the bone and sinew of the land. They are the men who carry on the activities of life; and by brawn or brain are earning a livelihood for themselves and their loved ones. Forestry enables us to combine our power for good, and thus each one is enabled to receive the help he may need. Each man stands as the ward of the whole. We pool, as it were, all our individual power and wealth, and each one receives the benefit of the whole, and is enriched, strengthened and protected thereby. This is one, and only one, of the objects of Forestry.—*High Chief Ranger Wilson, of Ohio.*

I. O. G. T.

A LODGE of Good Templars has been instituted at the Central Colony, Fresno county, with 19 charter members.

THE I. O. G. T. will give a grand picnic at the Sycamore grounds, Colusa, on Saturday, April 30th. No pains will be spared to make it a success. All kinds of games and amusements will be on the ground, and a match game of base ball will be played. All are invited to attend.

THE Good Templars' Lodge in Fairfield, Solano county, is in a flourishing condition, and has a membership of about 80. The Lodge, after the routine business of each meeting, has a choice literary and musical programme, which is gone through with, much to the edification and instruction of its members.

Visit of the Journalists to Southern California.

The following, written by Wm. H. Barnes, Secretary of the Pacific Coast Press Association, for the *Weekly Call*, contains so much that is briefly and well said, that we are constrained to give it at this date for the benefit of our readers:

The residents of Los Angeles and San Bernardino counties last June, through L. M. Holt, of Riverside, extended an invitation to the Pacific Coast Press Association to visit the Citrus fairs of those two counties, and "to bring their friends with them." The railway authorities were interviewed, and through the courtesy of ex-Governor Stanford a very low rate of fare was obtained.

On March 8th, 72 excursionists, representing 13 daily and 32 weekly publications of California, left San Francisco on the four o'clock P. M. train. Among the party were those who had grown gray in journalism, while others could give experiences in the service of from 5 to 30 years each. Some 30 ladies were included in the number, and good will and enjoyment ruled the hours as the express train sped along.

Quarter past eight o'clock P. M. at Lathrop for supper (and a good one), with the pattering rain for an accompaniment, and then on through the darkness again.

At six o'clock A. M. of the 9th, Caliente was reached, at the foot of the Tehachapi mountain; all were up and eager to see the celebrated "Loop," the tunnels, engineering, etc. Your correspondent was courteously given a seat in the cab with the engineer, and the climbing up hill began. A rain-storm, which ended in a heavy fall of snow, continued for more than two hours, interfering sadly with the views along the line, but sufficient was observed to pay a merited tribute to the skill, enterprise and energy which have builded such a magnificent road through such a wild, forbidding country. Tunnel after tunnel, curve upon curve, until at last the summit is reached, and snowballs are carried into the car to keep company with violets, roses, lilies and oranges.

A downward run of 20 miles, and Mohave, the station for breakfast, is reached, a sort of created oasis in the desert; its surroundings merit its name—the land of desolation! A hail-storm prevails at this point, and a wind blows, against which it is difficult to stand. The ample breakfast is quickly disposed of, and the shelter of the home-like cars sought. Miles upon miles of level waste are all around, with naught of even vegetable life, except the weird desert yuccas standing like ghostly sentinels at regular intervals. As they disappear in the distance, a rainbow shows its bright colors in the sky, not very promising for the day's weather, however, as the song says:

"A rainbow in the morning
Is the sailor's true warning."

And sure enough, there is rain and to spare in a little while.

But sunshine comes again, the great San Fernando tunnel, one and one-quarter miles long, is passed, and at 1:55 P. M., "on time," Los Angeles is reached. Here there is but a brief stop for dinner, and the "express" moves forward until 7:10 P. M., when Colton is "made," and welcome received from L. M. Holt, of the *Press and Horticulturist*, who, with a large committee of his fellow-citizens, is present to conduct the excursionists to Riverside, eight miles from the station. Carriages are rapidly filled, assignments to hotels and private residences quickly made, and in 15 minutes the depot is cleared and the party on the road to their resting places. Bonfires and illuminations are passed, and many shouts are given and returned, amid the sound of rattling wheels.

March 10th, at nine A. M., "per order," all were aboard for a drive about Riverside. In each carriage was a resident familiar with localities, etc., and it is not exaggeration to remark that during the three hours' drive, said excursionists acquired more practical knowledge in regard to citrus fruits and the possibilities of southern California than they ever knew before. To begin: ten years ago, the land was an unoccupied plain; to-day, it is a Garden of Eden. More than 20 miles are driven over broad avenues bordered with palm and magnolia, and roads through groves of trees lined with oranges, lemons and limes. Acres of vineyard tell where the famous Riverside raisins come from. Inquiry finds that apricots, figs, and scores of other luscious fruits are also grown in this favored locality. What has done it all? Brains, pluck and water—the first two in the individual, the latter on the land. Neither could have succeeded by itself, but combined, they have proved conquerors.

Riverside

Is a colony of cultured, enterprising people, some 1,300 to 1,500 in number, living in a locality where plenty of water is furnished by an irrigating company, and where almost every tropical fruit can be raised successfully and profitably. Unimproved land, with water privileges, can be bought from $80 to $100 per acre, while it would take $1,000 an acre to buy some of the improved. There are many handsome homes in the colony, and the social and moral status of its people is not surpassed by any locality. Their hospitality and enterprise is proverbial, and no honest man envies them their deserved prosperity. This colony can but advance in population and wealth as time passes.

At two P. M. lunch is served at the Riverside and Glenwood houses, after which the Citrus fair is visited. To say that the display astonished the visitors is to speak mildly. Here were between 30 and 40 varieties of oranges (one orange 18 inches in circumference), a dozen kinds of lemons, raisins that made the imported article seem common, figs, plums, olives, etc. By common consent the verdict was rendered that southern California had been but feebly and imperfectly understood hitherto, so far as this party was concerned—that its productions and possibilities had been entirely underrated; but that if forgiven for our unbelief and ignorance in the past, we would endeavor to do it justice in the future.

At eight P. M. a generous welcome was given by the citizens at Odd Fellows' hall, and sentiments and responses filled the time most pleasantly.

March 11.—eight A. M., and away to Colton, where Mr. Benedict takes a receipt from Mr. Morse, of the San Bernardino Committee, for "70 excursionists in good condition. And now comes a visit to the pioneer orchard of Mr. Van Leuven, and the picking of oranges from a tree he planted in 1857; then to the home of J. A. Waters, and now by the ruined adobe walls of the old Mission, and next a rest at the lovely grounds of Mr. and Mrs. Crafts, known as Crafton. Here a long table is set in the old-fashioned porch, loaded with viands, the handiwork of the ladies of the surrounding neighborhood. Delmonico never saw such a table, nor has its like ever been seen in San Francisco. Fruits, flowers, ornaments and substantials, and for waiters—the fair donors of the feast. It need scarce be said that the welcome by Judge Willis was hearty and sincere, and the responses equally so.

In to-day's travel of 40 miles, orchards and grain fields, vineyards and grazing lands, are passed. Here is plenty of good land at low prices, and all that is needed to make every acre of this area profitable is to use what has been used elsewhere, viz.: Brains, pluck and water. New San Bernardino, a handsome, well-built town of about 3,000 inhabitants is reached about 6 P. M.

The entrance of the excursionists was the means of gathering great crowds upon the streets. The San Bernardino Brass Band had kindly volunteered its services to the committee, and had been with the party all day, enlivening the ours with good music, and as the cavalcade of some 30 carriages drove into town, with said band at its head, it was very attractive to the ever-present "little people" in the vicinity, and the old folks had to be around to look after the "little ones, and "so there was a crowd, you know." Notwithstanding which all were comfortably provided for at Starkey's and the Southern hotels.

March 12.—A 6 A. M. call, quick breakfast and a three-and-a-half-mile drive to Colton, where was met L. M. Holt with a box of Riverside fruit for each journal represented. Received with many thanks by all. 7:10 train two and a half hours by rail and the Los Angeles committee is met at San Gabriel, and with teams are visited the great vineyards and groves of Messrs. Adams, Wilson, Stoneman, Shorb, Rose and E. J. Baldwin. Miles of vines and trees, until the eye wearies with the wealth before it. "Lucky" Baldwin insists that the party shall make at least a brief halt at his elegant residence, which is done, and an hour spent with this genial host, looking over his exquisite home, sailing on the lake, wandering in hot-house and on lawn, viewing the well-known racers of his stable, etc.

Next to Sierra Madre Villa, the beautiful retreat at the foot of the mountains that lies almost hidden in masses of vine and foliage. Here a couple of hours are thoroughly enjoyed, and a view across the valley from this elevation of 1,200 ft. above sea level, is grand beyond description. Groves, vineyards and green fields lie like a picture before the gaze, and the question comes again and again: "Is it possible a few years ago this was but a trackless waste?" But it was even so.

Again a move is made, and the new land of Pasadena, another home for the citrus fruits, is visited. Here are homes of culture and refinement, and springing orchards and growing vineyards. What will a few more years show, when so much has been done in so little time? At 6 P. M. the ancient city of Los Angeles is reached, and the Pico House and Cosmopolitan receive the excursionists within their commodious quarters, just as a boisterous wind begins to make its presence felt.

At 8 P. M. the Los Angeles club throws open its new rooms to the P. C. P. A., and extends a greeting to the visitors through the chairman, Judge Sepulveda, and the hospitalities of the club, during the visit of the Association. After a meeting of the P. C. P. A., and the election of several new members, the evening was spent in social converse between the visitors and visited.

Sunday and Monday, 13th and 14th, were used in inspecting the City of Angels, of which so much has been written. Its old churches and adobe houses strongly contrast with its newer edifices. Here are found the old Spanish families and the latest arrival "from the East." The past and the present, "old times" and "Young America," are in close juxtaposition in Los Angeles. But a kindly greeting comes from all, and at evening, around the grand banquet table, over which ex-Governor Mansfield presides, are gathered the representative sons and daughters of many honored families, who bid a welcome to the toilers of the Press, which was keenly appreciated, and will not be forgotten.

In Los Angeles is the Wolfskill orchard, with its 40 acres of 40-year old orange trees, each one of which lifts its branches laden with golden fruit to the number of thousands. This grove alone returns a fortune every year.

The Citrus fair was visited on the 15th. The large Pavilion permitted display, and ten of thousands of oranges and lemons were in sight. The five counties of Santa Barbara, Ventura, Los Angeles, San Bernardino and San Diego, all were here, in magnificent array. Language fails to convey an idea. Some one wrote of these Citrus fairs that "it was worth crossing the continent to see them." I endorse that sentiment, and the Californian who can raise the money, and does not visit the next display that is made south, of citrus fruits, will do himself and his State injustice.

On the 15th the excursionists disbanded, to return as they pleased, and the first trip of the Pacific Coast Press Association was over. More than 1,000 miles by rail and 120 by teams had been traveled without an accident. Seventy-two people had been together for 10 days without an unkind word, a single jar or unpleasantness, or a word of politics, and it gave all more confidence in human nature than they had before.

What was the good of it? First, it gave a large number of Californians an opportunity to see part of their State, which is a pleasure and delight, at a reasonable price; second, it enabled a class of men who rarely get away from hard work a little recreation; third, it gave said men a correct idea of southern California, which they did not have before; fourth, it pleased the people visited, as it showed appreciation of their efforts and commendation of their enterprise and energy, which they most emphatically deserve; fifth, it proved that individuals of different views and temperaments can associate together for days and "agree to disagree" in harmony and good will.

I have noticed in one or to journals an effort made to convey the idea that those who went upon this excursion were not regular or known journalists, etc.; but as one fully acquainted with those who were present, and with their reputation and services, I will merely say that some of the oldest editors of this State were among the number; that 22 journals were represented by their own editors, and the others by reporters duly accredited by the managers of said journals. As to the P. C. P. A. itself, none but *bona fide* editors or proprietors are eligible to membership.

There is no doubt that the P. C. P. A. had a most delightful time, and experienced a succession of pleasant and enjoyable surprises. There is also no doubt that all would be pleased to go again to this or some other locality, and that a vote would be given unanimously in favor of the next excursion.

THE friends of Prof. Herman C. Seib, organist of Fidelity, 136, have tendered him a benefit in the way of a musical concert to take place at B. B. hall on Thursday evening, April 21st. As Bro. Seib holds a prominent position as prompter of high-art music, and has always been ready to assist in all charitable undertakings, we predict for him a bouncing house. Tickets of admission are $1, and from the talent selected we may expect a rich treat.

W. W. MCKAIG, of Colusa, has assumed editorial charge of the Stockton *Independent*. He is a free and graceful writer, and the *Independent* readers will no doubt notice a marked improvement in the paper.

OREGON and Washington Territory having the requisite number of members to constitute a separate jurisdiction, has applied for permission to "go it alone."

TO THE READERS OF THE PACIFIC STATES WATCHMAN.—I have now a full stock of Builders Materials, Carpenter's Tools, Brushes, Fine Cutlery, Parlor Rifles, Air Guns, etc. at my wholesale and retail Hardware Store, 28 New Montgomery Street, under the Palace Hotel, which are offered at lowest prices in this market. It is no trouble to show my goods, as they are all new and selected especially for the trade. FRANK P. LATSON, proprietor, formerly with the late H. Rosekrans.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

OFFICERS and members of the A. O. U. W. receiving a complimentary number of the WATCHMAN with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

BRO. JOSEPH GIUSTI'S OYSTER, CHOP, AND CHOWDER HOUSE, 105 California Market, for ladies and gentlemen, is the place to get an oyster cocktail, or a meal fit for a king. His customers always feel happy after partaking of his good cheer. His parlors are open night and day.

TESTING DRAIN PIPES.—A writer in the *Ironmonger*, from long practical experience in testing drain pipes, confidently recommends for that purpose what he terms a "smoke test;" and which gives evidence as to leaks both to the sight and smell. The materials that he employs are soiled cotton waste and sulphur, the smoke from which, after ignition, is blown into the drain or pipes. If leakage exist in the latter inside of the house the smoke and smell both issue forth and show that something is wrong, and generally tells just where the fault or faults are. Sulphur, as is well known, is one of the best of disinfectants, and a dose of the fumes from this to the drains, after disease has been in the house, would effect much good.

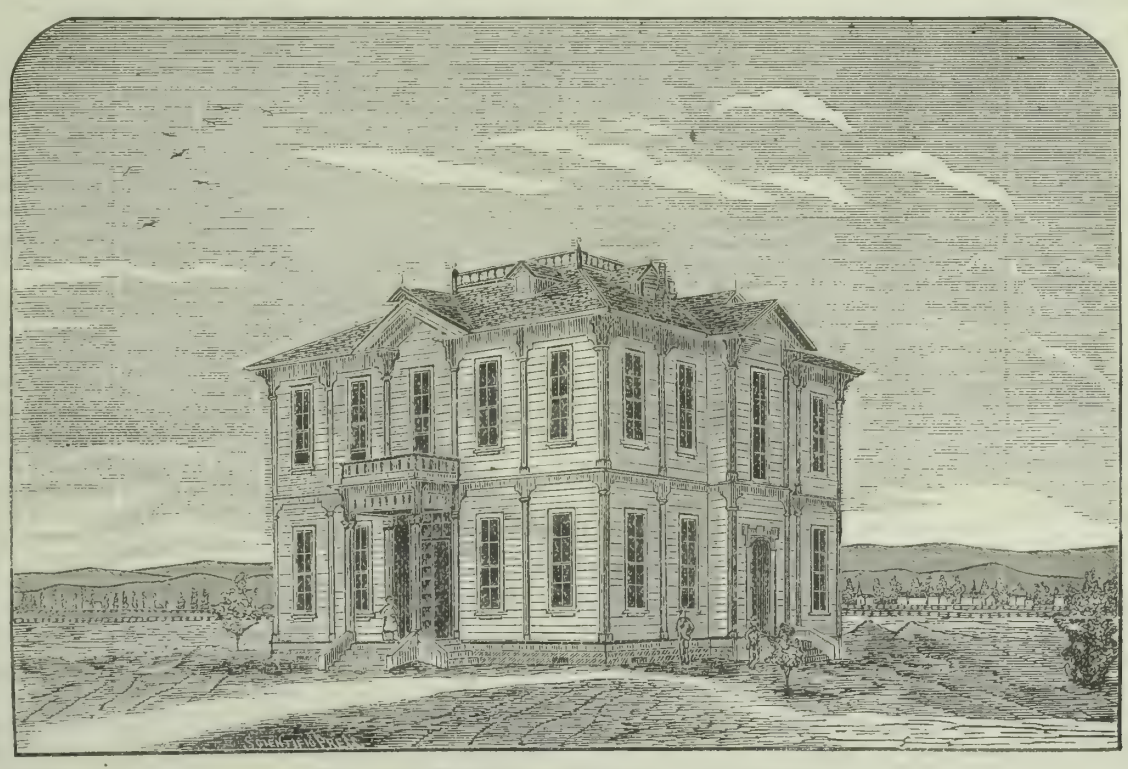
PHOSPHOR TIN.—An alloy of tin with phosphorus has been in use in Germany for some time for making phosphorus bronze. A practical man gives it as the result of his experience that such a compound must contain at least 9% of phosphorus, else part of the tin will remain uncombined. If more than 9% of phosphorus is introduced, the excess will be oxidized and volatilized, because the tin is unable to take up and hold more than a certain quantity of phosphorus. A compound containing 9½% of phosphorus corresponds to the formula $P^2\,Sn^5$, corresponding to the higher oxide $P^2\,O^5$.

A HIGH BRIDGE.—A bridge has recently been built over the Volga, in Russia, at a point where it is a mile in width. So great are the spring floods at that point, that the bridge has been built 100 ft. above the lowest level of the water; the depth of the river is more than 50 ft. The bridge rests on 14 piers. The girders are 364 ft. long and 20 wide, and were iveted together on the bank of the river.

TEACHER—"John, what are your boots made of?" Boy—"Of leather." "Where does the leather come from?" "From the hide of the ox." "What animal, therefore, supplies you with boots and gives you meat to eat?" "My father."

"DRESSED hogs are firm," says the Chicago market report, and the rumor is correct. We have seen dressed hogs in street cars and theaters firmer than the rock of ages

The University of Southern California.



We present to our readers in this issue an engraving of the new University building at Los Angeles, Cal. It was engraved by the PACIFIC RURAL PRESS, from a photograph by Payne & Co.

Los Angeles county and southern California generally are showing unusual signs of vitality and progress. One of the most promising indications is the interest taken by the people in educational matters. This new University is the outgrowth of an enterprise organized in June, 1879, by R. M. Widney, A. M. Hough, E. F. Spence, M. M. Bovard, J. P. Widney and G. D. Compton. To them, as trustees of an endowment fund, Gov. J. G. Downey, O. W. Childs and J. W. Hellman deeded 312 lots, 65x130, in West Los Angeles, a suburb of Los Angeles city proper. This endowment fund is so guarded in the deed of trust that it can never be dissipated or squandered; only the annual interest from it can be used, to meet expenses of conducting the University. The articles of incorporation prohibit the incurring of any debts against any property of the University. There is probably no institution in the United States so completely protected against debts and ruin by extravagance as is this one.

The building of which we give an engraving is 50 ft. square, two stories high, ceilings 16 ft. in the clear. The building contains seven large study and recitation rooms, and a chapel 30x50 ft. The building was completed in Oct., 1880, and the University then commenced its first sessions. Over 30 students have been enrolled up to the present.

The confidence of the public in the institu tion and its managers is so great that already over 500 volumes have been donated to the library; over $1,200 were given in a collection one evening in a small public gathering to buy furniture, apparatus, etc. Recently a Mr. Hodge bought five of the lots, and is proceeding to erect a boarding house on them costing over $3,000. This property he deeds back to the institution as a gift, to take effect on his death. A stranger, Judge James, sent to the trustees, unsolicited, a check for $600, to add to the fund. The building and all property of the institution is paid for. Some of the money of the endowment fund is now loaned out, and is bringing interest. President M. M. Bovard is in charge of the institution and, with an able corps of teachers, is rapidly preparing the students for the regular University course.

The University is now issuing an eight-page monthly paper called *The University of Southern California*. It is edited by an editorial board of six able writers who contribute their services. The advertisements in the paper pay its expenses. The subscription, which is $1 per year, goes to a library and apparatus fund for the institution. The paper is devoted to working up the educational interests of southern California.

THE SOUTHERN CALIFORNIA UNIVERSITY.

Destructive War Implements.

Dr. J. H. McLean, of St. Louis, who has expended about $200,000 for models of implements of war which he claims are so destructive that their practical use in one campaign would force the world into a state of perpetual peace, gave a public exhibition of his inventions at Washington Navy Yard on the 27th ult. About 200 persons were present, including the Chinese Minister and suite, General Benet, Chief of Ordnance; Commander McCormick, of the Bureau of Navy Ordnance; Admiral Scott, Colonel Macauly, Captain Harbison, Lieutenant Very and many army and navy officers. There were 14 implements on exhibition, but only four of them were tried, and of these only one worked perfectly. The "General Sherman," a small breech-loading cannon, which was expected to fire 26 shots per minute, fired 20 shots in a minute and a half. The "Vixen," built of bronze, fired a one-inch ball once in seven seconds. The "Annihilator," which was intended to fire two charges in a second, fired one in a little less than two seconds. The "Lady McLean," which has 36 barrels with an estimated capacity of nearly 13,000 shots per minute, with a range of three miles, was worked to the speed of 72 shots per second. The other guns were not in order for trial. Among other inventions that Dr. McLean exhibited is a magnetic torpedo propelled by clock-work, and guided to iron ships to be destroyed by a loadstone. The guns were pronounced fairly successful by the officers, but the claim that they would bring on a millennium was by no means admitted.

CUCUMBERS are worth 50 cents apiece. Cholera cordial can be bought at wholesale for half a dollar a bottle.

A Ruined City.

Four miles northeast of town, near Ross' Mills, there are several large and regularly shaped mounds. The largest of these mounds is within 20 ft. of the well-traveled road to Tempe. It is about 40 ft. high, and, when once the curiosity hunter has clambered through the debris of fragments of adobe and earthern pottery which covers the sides to the summit, he is rewarded by discovering the well-defined divisions of what was once a large house. Although large trees of the slow-growing mesquit have sprung up, the adobe walls which divided the interior of the building into rooms still remain whole and intact a foot beneath the surface. In some of these walls there still remain the ends of the rafters used to support the floors. All these pieces of rafters are charred, and appear as though they had been at one time subject to intense heat.

Looking to the northwest from the top of this ruin the eye sweeps a small plain, thickly dotted with mounds which differ from the large one only in size, and the whole is enclosed with the remains of what was once a thick adobe wall, the southeast corner of which was formed by the large house. An examination of the ruins discloses a regular system of streets running north and south, intersecting one another, and forming regular and equal-sized squares. Immense quantities of broken pottery strew the ground, and from these fragments, a relic hunter can select, with a little patience, a score of pieces, with each piece bearing a different design; but this variety in design applies only to size and shape, as no colors save black, dark blue and dark red appear to have been used by these ancient decorators.

Here and there can be found fragments of shell ornaments, bracelets, ear-rings, etc., manufactured from a shell somewhat similar to abalone. Everything connected with this desert of ruins tends to give rise to the opinion that the destruction of the city was sudden, speedy and complete; but when and in what manner, it, in common with other cities, was blotted from the land we now occupy, must forever remain a matter of conjecture.—*Phœnix Gazette.*

A CHILD'S IDEA OF HOME.—A little brother and sister were talking about home and their love for it. "I wouldn't swap my home for any other in the world," said the sister. "Oh, I don't feel so," was the boy's response. "I think that Willy A——'s home is as pretty as ours. It's bigger, and it's got more things in it. I think I'd like to swap ours for that." "But would you like to give up your father and mother for his?" asked his sister. "And would you rather have his sister than yours?" "No, I wouldn't want that," said the boy. "Well, to swap home means that," said the sensible sister, "for a home itself isn't a home. A home is your father and mother, and brothers and sisters, and everything you have in the house." Wasn't that well said? Isn't there a truth in those words which is hid from many of the wise and prudent, and revealed unto babes? A well furnished house is not a home. A home is the life and love which the family in the house represents. Who would swap his home for a rich neighbor's?

TRUST.—Little Tot, sleeping in her cot by my bedside, wakened in the night-time, called softly, "Mama, tate my han' in 'urs, I's 'faid." Gathering her chubby hands in mine, I soothed her with "Mama's by, dollie;" a smile of loving trust stole over her lips, and she was again in the untroubled sleep of innocent childhood. Sweet illustration of Christian trust. "Take my hand in yours, dear Father, I am afraid."

French Merchant Shipping.

The new law under which French shipbuilders and ship owners are to receive substantial bounties from the State, has already had quite a contrary effect to what was expected. The jealousy of manufacturers has been aroused, and a reaction has set in which must be regarded as a signal for more clamorous demands in the same direction. A writer in the *France* ridicules the statement in the preamble to the new act that the bounties are accorded "in compensation for the charges which the Customs tariff imposes on shipbuilders," and "for the charges imposed on the merchant navy for furnishing recruits and the service of the military marine." "If," says the writer, "the Customs tariff is defective, it should be amended. Otherwise, now that bounties have been granted to shipbuilders, the same favor must be accorded to cotton spinners, forgemasters, and everybody else." Moreover, it is pointed out by the writer that, if, after all the efforts made to improve the position of the French commercial marine, they should result in failure, ship owners might console themselves by the thought that the evil, Great Britain alone excepted, is universal, and that bounties will nowhere bring about the slightest remedy. The article concludes:

"Italy, which formerly built ships representing an annual tonnage of 100,000, did not perhaps, add 20,000 tons to her home-built shipping a year ago. The United States, which at one time caried by sea 90 per cent. of their own merchandise, were only represented last year by 15 per cent. A fatal revolution ha occurred. Steam has swept away sails, and iron and steel have taken the place of wood. And with what result? That vessels are now mostly built where iron, steel, machinery and coal are obtainable at the lowest rates, or, in other words, at Glasgow on the Clyde, Newcastle on the Tyne, and Sunderland on the Wear. The shipbuilding yards of London and Liverpool have themselves had to give way." The French will sooner or later regret that common-sense views such as these should have had no effect it altering the mischievous decision arrived at by the French Legislature, which, however, fortunately, is not irrevocable.—*Iron.*

A LEG AMPUTATED BY ELECTRICITY.—A very interesting operation was performed in the Toronto General Hospital a few weeks ago. It consisted of amputation, by means of electricity, of the left leg at the hip. The patient, a young man, being reduced very much by the sloughing of an open wound on the outside of the leg, it was desirable that he should lose as little blood as possible. Having placed the patient under the influence of ether, the customary flaps were made, and then a platinum wire, attached to the two poles of a galvanic battery, was encircled round the leg under the flaps. In a moment this wire was brought to a white heat, and began to cut its way through the limb. By the great heat the ends of the arteries were contracted, and only the larger ones required to be tied. Many of the leading surgeons of the city and a large number of the students from both schools were present.

"A COLLECTION will now be taken up," said the minister. "Deacon Swipes will pass—" and the good man waking suddenly with his hands full of hymn books responded: "No, I'll order it up, by thunder!" and then the minister dealt him a dreadful look, and the good man passed out.

PLUMP girls are said to be going out of fashion. It is true; the plumper the girl the slimmer her chances.

Industrial Partnership.

In the hall of the Society of Arts, on Wednesday the 16th inst., a paper was read by Mr. Sedley Taylor, M. A., late Fellow of Trinity College, Cambridge, "On the Participation of Labor in the Profits of Enterprise." Mr. W. H. Hall was in the chair. Mr. Taylor remarked that his justification in bringing the subject forward was to be found in the consideration that the relations between employers and employed under the system of payment by paid wages only were admitted on all hands to be unsatisfactory. This involved a chronic antagonism, breaking out periodically into internecine conflicts, which caused mutual exasperation. The bulk of these experiments had been made on the continent, and though not without examples of failure, they presented on the whole a very decided and encouraging success.

He then described, in a manner necessarily fragmentary, the main features of participation as practiced on the Continent. As to the system itself and its applicability to English circumstances, the theory on which it was based was that by directly interesting workmen in the fruits of enterprise better and more economical labor would be obtained, and thus a source of additional profits opened. These surplus profits, without injustice, might be allotted wholly to the workmen whose stimulated efforts produced them. In practice, however, a share went to the employer, who, if he pleased, might invest it in a reserve fund and protect himself against losses in bad years Thus participating, workmen did, in an indirect, but perfectly real way, share losses as well as profits with their employers. Participation successfully practiced, under whatever form, conferred signal benefits on the parties directly concerned in it. To the employer it gave industrial peace and increased security; for the thrifty workmen it accumulated as the result of his own efforts an economized capital which he might employ in making his old days easy and independent, or enable him to transmit a provision to his children. It brought to the workman likewise an enhanced feeling of respect for himself and his fellows.

Participation encouraged excellence of workmanship, and combated every form of trade dishonesty with singularly efficacious vigor. Considerations could be adduced to show that there was no lack of scope for participators' successes in many branches of English industry. He was inclined to think that participation in profits, if once clearly set before the working classes of this country, would soon be thoroughly understood and appreciated by them. His own conviction was that participation had a great future before it in this country. The work might well be undertaken by a special society, which should endeavor to facilitate in England the practical study of participation, whose objects should be identical with those of the French society, and which might spread sound knowledge on the subject; and he would be very pleased to receive at Trinity College, Cambridge, the names and addresses of any persons who would be disposed to join such a society, should it be called into existence. A discussion followed in which Mr. Lloyd Jones and other gentlemen took part, and which was adjourned to a day to be hereafter announced.—*Engineering and Building Times.*

THE NEW BIBLE.—The revision of the New Testament, which was begun under the direction of the Convocation at Canterbury 10 years ago, was completed last October, and the new version is now in print, although it has not yet been given to the public. The work is the result of the deliberations of two committees, one of 50 learned Biblical scholars in England and one of 30 in this country. The two committees did not meet together and take joint action, but corresponded with each other and compared notes, and, as a general thing, were able to agree upon the proper reading of the texts. In cases of disagreement, the text of the British committee is used, but the reading of the American committee is given in an appendix, so that the reader or student has before him both translations. The only copies of the book in this country are those which have been sent to members of the American committee, of which the Rev. Dr. Philip Schaff is the President, and they are pledged not to show them to any person, or give any information as to the changes made in the texts of the King James version, until the new version is formally approved and adopted by the Convocation of Canterbury. The Convocation met early in February, and as soon as it approves the version the revised New Testament will be given to the world. The American committee has taken out no copyright on the book, and the intention is to give it to the public free, as the old Bible has been given.

A HORSE can take up an oat when a business man can't.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and WATCHMAN together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - April 15, 1881.

Avoid the Danger.

We have upon our list of losses in this jurisdiction, some half a dozen unpaid, for the reason that payment must await the appointment of a guardian, administrator, executor, or some other action of the legal authorities. All this, in most cases, might have been avoided, had the deceased member's certificate been made payable to his wife, or else some other person named in the certificate. Frequently a certificate is made payable "subject to will," and the member dies, leaving no will. In such a case it is a matter of grave doubt whether the Order is liable to pay anybody. Our Constitution guarantees to each member of the M. W. degree (dying in good standing), the sum of $2,000, "to be paid to such person or persons as said member may have directed while living." The question naturally arises, to whom can the Grand Lodge legally pay where *no direction* for payment has been made? Under the Constitution of this State the officers of a corporation who make an illegal disbursement of its moneys, become personally liable therefor. Our Grand Master and Grand Recorder are thus placed in a position where much caution must necessarily be exercised for their own pecuniary safety; and should they some time refuse payment of some claim, it need create no surprise, for how much soever they might in some particular instance desire to pay a loss, the danger of personal responsibility might determine the matter otherwise.

Our members have it in their power to obviate any trouble in this direction. The law provides a way by which certificates may be readily changed, and to this, attention is earnestly directed.

A BILL was introduced February 28th in the New York Legislature, having for its object the crippling of fraternal societies by requiring them to deposit with the insurance commissioners $100,000. As these organizations have no capital, the money required for death losses being raised by an assessment, such a law would prove disastrous in its results. However, the author of the bill, seeing the storm which was raised, and dreading future consequences, had the enacting clause stricken out, and so the bill was killed.

YOSEMITE LODGE, No. 171, Fresno, will celebrate its first anniversary on Thursday evening, April 28th. It is expected that Wm. H. Barnes, G. M. W., will be present.

Relief Law to be Tested.

We learn that Indiana has had her allotted 20 assessments in the current year, and invokes the aid of the Relief Law to pay a balance due to her beneficiaries. If this is true we shall soon be able to see by practical experience the workings of the law. We can scarcely expect that it will be found so perfect as to need no amendment, and yet our faith is strong that but little change will be required. Perhaps it is fortunate that the test is to be made now and before the meeting of the Supreme Lodge, so that any defects may be immediately remedied. To this end we trust the Relief Board will act quickly. Our own jurisdiction, we are confident in predicting, will set an example of prompt work that will sustain its reputation for doing things in a way to challenge the admiration of the entire brotherhood. We do not know the extent of Indiana's needs, but probably a call of ten cents per member will be ample to meet the requirement. To the end that our members may be fully posted in relation to the law, we give the text below:

GENERAL RELIEF LAW.

SECTION 1. To protect each beneficiary jurisdiction of the Order from exigencies which may arise, increasing its death rate to an extent which would make assessments for a time oppressive upon its membership, and beyond the maximum fixed in this article for such jurisdiction; to strengthen and sustain the Order, and enable it to meet every emergency by giving the assistance of the whole to any part suffering from an epidemic or other calamity, a Relief Fund shall be raised, managed, and disbursed as provided in this Article.

SEC. 2. The Relief Fund shall consist of an amount equal to one dollar for each Master Workman degree member in all the Subordinate Lodges of the Order, to be raised by assessments of not less than 25 cents per month, except as hereinafter provided, to be assessed and collected under the same laws, rules and regulations as ordinary assessments for the Beneficiary Fund, and all the laws of the Order in regard to suspensions for non-payment of ordinary assessments or reinstatement of members shall be applicable also to these relief assessments; and members upon whom the Master Workman degree shall, from time to time, be conferred, shall be liable for these assessments as for ordinary assessments. *Provided*, Subordinate Lodges may set apart this Relief Fund and keep it intact by appropriations from their general fund or by assessments greater than 25 cents per month; but such assessments shall in no one year exceed the sum of three dollars per member. Said Relief Fund shall be kept in the treasuries of the Subordinate Lodges where raised, so that the same shall be at all times subject to the calls made thereon, as herein authorized. *Provided, however*, that Subordinate Lodges are not required to make the first assessment provided for in this article until they shall be officially notified that an exigency has arisen requiring it.

SEC. 3. The following maximum annual rate of assessments is established for the several jurisdictions of this Order,—that is to say: Iowa 18, Michigan 18, Minnesota 18, New Jersey 18, Wisconsin 18, Ontario 18, Kansas 18, Nebraska, 18, California 20, New England States 20, Delaware 20, Illinois 20, Indiana 20, New York 20, Pennsylvania 20, West Virginia 20, Oregon and Washington 20, Nevada 20, Montana 20, Missouri 22, North Carolina 22, Alabama 24, District of Columbia 24, Georgia, 24, Kentucky 24, Maryland 24, Ohio 24, South Carolina 24, Tennessee 24, Virginia 24, Florida 24, Supreme Jurisdiction 24, Mississippi 28, Texas 24, Wyoming 26, New Mexico 26, Louisiana 48. The maximum rate for other jurisdictions, which may from time to time be established, shall be fixed by the Supreme Lodge, or the Supreme Lodge Relief Board herein provided for, as such jurisdiction may be established.

SEC. 4. The Supreme Master Workman, Supreme Recorder, Supreme Receiver and the chairman of the Supreme Lodge Finance Committee, and Supreme Lodge Committee on Laws and Supervision shall constitute the Supreme Lodge Relief Board, with power to superintend, in accordance with and governed by the laws, rules and regulations of the Supreme Lodge, the collection, management and disbursement of the Relief Fund herein provided. A majority of said Board shall constitute a quorum.

SEC. 5. Whenever it shall be made to appear to the satisfaction of the Supreme Lodge Relief Board that the number of deaths in the Supreme Lodge beneficiary jurisdiction, or in any separate beneficiary jurisdiction, has been such as to require assessments for any fiscal year in excess of the maximum fixed for such jurisdiction by this Article, or whenever the membership in the Supreme Lodge beneficiary jurisdiction shall be reduced below 2,000, then the relief provided in this Article shall be extended.

SEC. 6. When the exigency aforesaid shall occur, the Supreme Lodge Relief Board shall examine into and certify the facts to the whole Order, and shall call upon the various Grand Master Workmen, and upon the Master Workmen presiding over the various Subordinate Lodges under the immediate jurisdiction of the Supreme Lodge, for such proportion of the Relief Fund as may be necessary, in the opinion of the Board, and as may be right and proper under all the circumstances, to meet, as rapidly as may be, the exigency. The officers thus called upon shall at once proceed to cause to be forwarded to the Supreme Lodge Treasury the amounts of the calls made upon them. These calls shall be forwarded to the Supreme Recorder by draft or post office money order, payable to the Supreme Receiver. The amount of the calls thus made shall be replaced in the treasury of the Subordinate Lodges by an assessment of an amount equal to the call thus made, if less than 25 cents per member; if more than that sum shall be called, then by assessments of not less than 25 cents per month, unless the Subordinate Lodges shall determine to otherwise pay the same, as authorized by Section 2 of this Article.

SEC. 7. The Supreme Lodge Relief Board shall from the Relief Fund thus placed in the hands of the Supreme Receiver, extend such relief to the overburdened jurisdiction as may be right and proper and necessary under the circumstances, to maintain its integrity and preserve its perpetuity. Correct accounts of the transactions of the Relief Board shall be audited and certified by the Supreme Lodge Finance Committee, and included in the monthly statements of the Supreme Recorder, and said Board shall report to the Supreme Lodge in detail, at the same time that reports are required to be made by the Supreme Lodge officers.

SEC. 8. The jurisdiction receiving relief under the provisions of this Article shall be required to assess its membership to the extent of the maximum established therefor by this Article for the period, if necessary, of three years from the time the application for relief is made, or if no application for relief is made, then from the time the relief is extended to the end that it may return to the Relief Fund the amount taken therefrom for its relief, and, after paying the death losses occurring in said jurisdiction during said period, the surplus is to be returned to the Supreme Lodge Treasury until the whole sum thus received shall have been returned; provided, that if the maximum assessments thus levied shall not, within the said period of three years, pay the death losses occurring in said jurisdiction during that time, and return to the Supreme Lodge Treasury the amount received from the relief fund as aforesaid, then the amount of any balance due shall constitute a donation from the Order at large to said overburdened jurisdiction.

SEC. 9. When any portion of the relief fund shall be returned to the Supreme Lodge Treasury, as herein provided, it shall be apportioned monthly to the various Grand Lodges in proportion to the amounts received from each, to be disposed of as said Grand Lodges may respectively determine. The proportion of the relief thus returned, to which the subordinate Lodges under the immediate jurisdiction of the Supreme Lodge would be entitled, shall be passed to the credit of said Lodges on the books of the Supreme Lodge.

SEC. 10. Any officer failing or refusing to perform the duties enjoined by this article, or who shall in any manner, directly or indirectly, evade the provisions thereof, shall be suspended from all the rights and benefits of the Order.

The charter of any Grand or subordinate Lodge so failing or refusing shall be suspended.

It shall be the duty of the Supreme Master Workman, with the concurrence of the Supreme Lodge Relief Board, to carry the provisions of this article into execution.

Said suspension shall be removed whenever the delinquent shall comply with the provisions of this article.

THE BENEFIT TO BE DERIVED.—The interior papers of this State have a lively interest of the good accomplished by the A. O. U. W. Upon all occasions they lay before their readers facts in connection with the Order. The Red Bluff *Sentinel* says that when one considers the benefit to be derived from a membership in the Order of A. O. U. W., he will rightly surmise that the organization is a glorious one, and it behooves every man, be he married or single, to possess a certificate of membership. The sound and substantial benefits to be derived from the Order have been plainly shown in Red Bluff of late, where bereaved and fortunate widows of members have been presented on the death of the husband with the magnificent dowry of $2,000. The last to receive the sum was the widow of our late esteemed friend, Robert Roseveare, who in his life well knew the benefits to to be derived from fraternal societies. The A. O. U. W. is yearly gaining a large membership, and its acts in the above respect faithfully carried out are the main causes for its success. No sensible man can well afford at the present time to be deprived of the benefits of the direct insurance, or a connection with one of the beneficial Orders of the day.

THE Ukiah City *Press* places the membership of the A. O. U. W. at 1,000,000. Not quite so much as that, brother, about 100,000 will fill the bill. However, judging by the manner in which the people are sending in their applications, it will not be long before even that vast figure will be reached.

Fraternal Insurance vs. National Insurance.

The popularity and universal success attained by the fraternal and beneficiary organizations in the United States is one of the marked features of this progressive age. The subject of protection to the widow and orphan, when the protective arm of the husband and father has been palsied by death or otherwise, has engaged the attention of the philantrophist and statesman of this and other countries.

That government that gives the best protection to its citizens is the best nation. By parity of reasoning that society that provides the surest safeguards to the weak and unprotected is the best organization. The A. O. U. W. has a record which is a part of the history of this country; its benefactions are as broad as our mighty rivers, and as bright as the clear rivulets that trickle down our mountain sides. In carrying out the beneficent purposes of our Order we are receiving the heartfelt gratitude of the bereaved widow, unprotected orphan and plaudits of all good men. While we are cementing the good men and true in one common purpose for the improvement and elevation of ourselves and families we, as an Order, are contributing to the stability and welfare of our common country.

These principles are attracting the attention of statesmen of the enlightened nations of the earth. Bismarck has brought forward a great national scheme to give every German citizen an individual insurance and, as far as possible, the protection the Workmen give their members. It is proposed to make this compulsory, and that each citizen of the German Empire shall contribute his quota of assessment, and in return the State will guarantee support in old age, pensions for widows and a sure provision for minor children; and further, to treat every disabled laborer in the light of a crippled soldier, and provide for him accordingly. What we are doing voluntarily, and paying our own officers, the great German Chancellor proposes to make compulsory, the State assuming all the expense. Having the selection of our own members, excluding the profligate, thriftless and debased, we feel that the prestige of our experience and fraternal relations of this great brotherhood are a cheaper, safer and more desirable insurance and protection to us and our loved ones, than the national scheme of the German statesman.

Cheering Words.

We had the pleasure of meeting Bro. Isaac Barman of Hope Lodge, No. 1, Oregon, in Washington, No. 60, on March 16th. He gave cheering news from his jurisdiction, expressing the warmest regards for this noble Order. He reports six Lodges in Portland and another one forming. In the course of his grand speech he remarked that he knew the emblematical links of our chain, attached to our emblematical anchor, were stronger than the links of the chain on the *Great Eastern* steamship. I had my life insured in the insurance companies for $5,000, but after examination of their perquisites, etc., I dropped it. I would not drop my membership in the A. O. U. W. for $5,000. I love it and believe it is one of God's blessings on the human family. From the inmost recesses of my heart, I thank the friend and brother who urged me to join this grand army of noble men. I was initiated by a brother in the lowly walks of life, but who, as the Master Workman of his Lodge, held the exalted position of a benefactor to his race, and elevated me to the proud position of being a Master Workman. I find in this great brotherhood, a fraternal feeling and a whole cordiality that is above any organization I have the honor to belong to. Under the fostering care of our kind brethren of California, we are marching to the front and soon expect to take our stand as a separate jurisdiction among our sister organizations of Workmen in these United States. Bro. Barman invited Bro. Workmen to visit the Lodges in Oregon, assuring them the same royal welcome that had been given him whilst visiting in this city. It was a well timed, appropriate and sensible speech, and at the close our brother received the warmest congratulations.

A VERY fine life-size picture of Wm. H. Barnes, G. M. W., has been presented to Valley Lodge by Bro. N. Michelsen, artist and portrait painter, 1229 Mission street.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

THERE have been issued 13,275 beneficiary certificates.

THE General Fund of the Grand Lodge is not sufficient to meet our bills. Lodges will therefore please remit for the April bills promptly.

IN all cases of rejection, whether by physician or ballot, the Medical Examiner's report should be at once forwarded to this office, to be kept on file.

BY an error in printing the assessment list last month, Bros. McBride and Bishop appear as having died in 1880. It should have been 1881. The error was not discovered till most of the notices had been sent out.

THE amendments made to our Constitution at the late session of the Grand Lodge, have not yet been returned from the Supreme Master Workman, and until they are, of course, the new edition of the Constitution cannot be printed. Hence the delay.

NOTWITHSTANDING the fact that several other beneficial orders than the A. O. U. W. have been introduced into this State, and all are prosperous, we are still forging ahead at the old rate. Increased care is also being exercised, as is evidenced by a more than usually long list of rejections for the month of March. The new law requiring the applications to be passed upon before conferring the M. W. degree is bearing excellent fruit. It keeps out bad risks and is no hindrance to the admission of that which is good. It is doubtful if the system can be improved.

I AM gratified that the Lodges in Nevada have determined to organize a Grand Lodge. Now, if they only get the right men for Grand Master, Grand Recorder and Grand Receiver, they will go ahead swimmingly. In ninety-nine cases out of a hundred, whether in a Grand or subordinate Lodge, good officers make the Lodge a success and poor ones don't. Let the places seek the men, and not the men the places. If our Nevada brethren adopt and adhere to this rule, they need have nothing to fear.

Sister Morris's Standing.

EDITORS WATCHMAN:—As it seems to be impossible to get the exact status of Sister Julia Morris, that was in Silver Spray Lodge, No. 3, D. of. H., I wish to state that she is only a private member and at no time was she W. S. of H. In justice to the officers of that Lodge I ask this correction. Yours fraternally, T. H. MACDONALD, S. F., March 31st.

BRO. W. W. HANSCOM, P. M. W., and a member of the Finance Committee, has just returned from Portland, Oregon—visiting Hope and Unity Lodges in Portland. He was received in the most cordial manner by the brethren, and reports great interest taken in our Order in Oregon. He had the pleasure of meeting Bro. Price, formerly of Oakland, and Past Grand Master Workman Bro. Case, of Oregon. Our usually reserved brother was quite enthusiastic in his favorable comments on the brethren of our sister jurisdiction.

A MUSICAL and literary entertainment for the benefit of Miss Sallie Hosmer will take place at Dashaway hall, Wednesday evening, April 20th. This talented young elocutionist has gratuitously volunteered her services upon several occasions in assisting at Lodge celebrations. The price of tickets has been fixed at 50 cents.

HARMONY, No. 9, will celebrate its semi-annual meeting by a literary and social entertainment at Ixora hall on Wednesday evening, Apr. 20, 1881. Judging this one by the former ones given by this Lodge, we may expect a very enjoyable time.

WE met Bro. A. J. Baker from Turlock, Stanislaus county, in Burns Lodge on April 7th. He reports his Lodge in a healthy condition, and gradually growing in membership.

BRO. WM. C. FLINT, ex D. D. G. M. W., will make an extended tour to San Diego. He expects to be gone about three months.

Our Order.

A. G. Booth, P. M. W. of Myrtle, No. 42, delivered the following address at the third quarterly entertainment given by Memorial Lodge, 174.

Mr. President, Brother Workmen, Ladies and Gentlemen:—King Solomon has said that there is nothing new under the sun, and it is true. Matter, thought, words may change and assume a different aspect or form of expression; that aspect and form may be new and original to us, but it is not new to the world, to each and every one of the millions of human beings that have preceded us. Whether we look into the world of matter or the productions of the intellect we find this fact confronting us that nothing is lost or destroyed. No particle of matter is or can be destroyed. Nothing in this earth ever has been lost or destroyed; there is no such thing as destruction of matter; a particle of gold, a piece of iron may be beaten, broken, divided into minute particles, to the very dust, and scattered to the four winds of heaven, but it all exists. Animal matter, when the breath of life has departed, returns by the slow process of decay to the component parts that formed it, to the liquids, to the gases, dust to dust. The coal that we burn is not destroyed, the gas is heated red hot, that gives the flames, the color to the blaze, the gases pass away and mingle with the winds, the ashes to be scattered broadcast. The tinting of the autumn leaves is but a slow process of combustion, nothing is lost. The diamond thrown into the fiery furnace is changed to gas; place it in a piece of iron completely covered and subject it to heat, then search for it and you find, not the diamond you placed there, but iron turned to steel; it is not lost, 'tis changed its form; and so, I say, in the world of matter nothing is destroyed, nothing ever has been or can be destroyed, but changed to its component parts, or in new form or compounds. And in the world of thought, of intellectual research, new ideas may be advanced, new forms of expression may be molded, new grouping together of words, new to us, but can we say that they are new, that no one of the millions that have lived before us has ever conceived the idea, or used the form of expression that we use? There is nothing new under the sun.

I was invited to deliver an address before this Lodge tonight, and the ideas that I have before expressed flashed across my mind when I thought of the matter, what I could say that has not already been told you, and by those far abler than I. Upon an occasion of this kind, the only truly appropriate subject is the Order, under whose auspices the entertainment is given, its objects, aims and purposes.

The Ancient Order of United Workmen, ancient only in principles, was started in Pennsylvania in 1868. It is purely an American organization. There is none of the tinsel or glitter of the ancient mysteries surrounding its birth, none of the dust of antiquity or mold of buried ages necessary to entitle it to veneration and respect; it stands upon its own merits as an American organization, and, though started in 1868, it was not able to pay the $2,000 benefit until 1873; from that time, however, we can trace the history of our Order with pride. Never, I think, has there been such a growth of an Order known; with one Supreme Lodge, with Grand Lodges in many of the States, with Subordinate Lodges throughout the length and breadth of our country, with an army of about 100,000 members, this young and comparatively new Order stands forth, strong and erect in its manhood, challenging the admiration of all. Since this Order was first started, nearly $5,000,000 have been paid to the widows, friends or heirs of deceased members, and here in our own State of California, though introduced but about five and a half years ago, over $295,000 have been paid to gladden the hearts of the sorrowing ones, and the pecuniary interest now involved is over $22,500,000; and this vast amount is being carried by our brothers in this State at a small cost, carried for the widows and orphans and friends, to protect them from the pangs of hunger, or the shafts of destitution and want. We are a secret society, though we have but little secret; our objects, our ends and our aims we freely publish to the world; the duties we owe to each other as members of our fraternity we openly avow; the only secrets that we have are those which form our bond of union, and constitute the grand central column of our superstructure. Carlyle tells us that "Bees will not work except in darkness; thought will not work except in silence, neither will virtue work except in secrecy." If our deeds were evil, and our brotherhood yielded bitter fruits, and like the deadly upas tree, spread pestilence and death around, then it never would have shown such a remarkable growth, and a success so great that, so far as I know, it is without a parallel in the history of fraternal organizations. My friends, our Order is deeply rooted in the hearts of man, it is blest by the prayers of the widow and nourished by the tears of the orphan. The very foundation of our Order is laid in charity, hope and protection. We are taught, and we practice what we teach, charity. We are taught to be true friends to each other, not fair weather friends, but friends in adversity, sickness and death, friends when most needed. We seek to aid the injured brother to better his condition at all times, to elevate his character, and to inspire him with noble aspirations. When sick, we watch with him, we give him aid and comfort, and should the grim messenger of death claim our brother, we perform the last sad rites at his grave, and fondly cherish his memory after the cold sod has covered his lifeless form; and after we have performed our duties to our brother, and naught remains for us to do, that can benefit him, then the one great object of this Order becomes manifest, namely, to care for the widow and orphans; and though we know, and feel that money cannot compensate for the loss of a loving husband and a kind and affectionate father, yet our Order pays to the widow and children, or to those our brother may have designated, a sum sufficient to protect them from want and suffering, to educate the orphans, to make them comfortable. This is the great object of our Order, this its principal feature, and it is this that gives it its life, vigor, and animation; here is the secret of the success and prosperity that has everywhere attended it.

In olden time there were built cities of refuge, where the unfortunate could flee and be safe from harm and danger; so within the hallowed circle of our brotherhood, within the walls of our Lodge rooms can the unfortunate and the suffering find a refuge from want and distress.

Many comparisons have been made between life insurance companies and societies like ours, and bitter indeed has been the warfare waged between them, but the result of such comparisons and contests has always been favorable to a system, that by assessments raises the fund to pay the benefit. There you get protection for your families at net cost. Each member of the Order is personally interested in the matter; he sees that proper guards and checks are placed around the treasury, and the amount required raised by assessment. Yes; this is the cheapest and the surest way to provide for your families when you are gone, and it seems to me that the man who would prefer a life insurance company to a society like ours must be either stupidly ignorant of the work being done by this and kindred societies, or else blinded by prejudice.

Oliver Cromwell when a boy heard a voice in the dead of night telling him that he should be "not King, but the first man in England." Friend, husband, father, listen to the still small voice in the dead of night, that tells you that death shall come, you know not when, and that to your wife and children you are dearer, you are more, to them than the first man in England. Listen then to that small voice that tells you to make provision for them in this, one of the cheapest, safest and surest ways to protect those you love from suffering or want when the lamp of your life shall have flickered and finally gone out, to be lighted no more on this side of eternity.

We know the ring of the true metal; it has no uncertain sound. We know the tree by its fruit, and a society or an organization is to be judged by the good it accomplishes. Has our organization accomplished that which is good? Has our tree borne good fruit? Aye, ponder with me; consider with me these facts and figures; behold this monument on which is enscribed, as in letters of gold, upon the one side "Charity," upon another "Hope," the third "Protection;" and upon the remaining side 2500 deaths, $5,000,000paid for charity's sake, $5,000,000 for the protection of the widows and orphans and friends of our dead brothers; $298,000 paid in this State alone to protect, comfort and bless the friend and the widow and to educate and care for the orphan. A monument more enduring than brass or marble; a monument erected in the hearts of those who have plucked the luscious fruits of our noble Order, who have received its comforts and blessings and who pray for its success and prosperity.

Its past is of record—a glorious, brilliant record. We of to-day are writing its present history. Let us who are within its glorious circle, who see and feel and know its virtues and its worth, be true to the great and immortal principles upon which our noble structure stands. These principles—Charity, Hope and Protection—are grand, glorious, humanizing, and as lasting as time itself. The practice of these principles benefits us while we live, and comforts us in death. They

"Teach us to feel another's woe,
To hide the faults we see."

They teach us to do for others as we would have others do for us, and to my mind there is no truer test of friendship, no better criterion by which to judge the motives and impulse of the heart, and sincerity of our acts, than by the Golden Rule. By living true to our Order, by keeping in mind our precepts and principles, by doing our duty and our whole duty, like men stamped with God's image, by doing to others as we would have others do to us, then shall we, when we have been called to cross the stream, be prepared exultingly to say:

"Untainted by the guilty bribe,
Unhurt amid the harping tribe,
No widow's moan to force my tears,
No orphan's cry to wound my ear,
My honor and my conscience clear,—
Thus may I calmly meet my end,
Thus to the grave in peace descend."

Grand Recorder's Statement for March.

We condense from Grand Recorder Pratt's Financial Statement for March the following leading figures:

WARRANTS ISSUED.

No. 167, Postage, H. G. Pratt, G. Rdr.	$ 53.70
167, Expense, H. G. Pratt, G. Rdr, Contingent.	10.90
167, Supplies, H. G. Pratt, G. Rdr.	1.35
168, Contingent, C. H. Haile, G. Rvr.	25.00
169-70, Salary, H. G. Pratt, G. Rdr.	291.66
173, Expense, Wm. H. Jordan	8.85
174, Expense, Chas. G. Reed	20.00
176, Expense, D. Farquharson	50.00
179, Supplies, Supreme Lodge	33.00
184, Contingent, Wm. H. Barnes, G. M.	100.00
Total amount warrants issued, G. F	$ 594.46

DISBURSEMENTS.

Balance in hands of G. Rvr., Mar. 1, 1881, Benef. Fund	$ 1,334.00

PRESENTATION.—Bro. Chas. E. Baker, who has been Financier of Myrtle, No. 42, for six successive terms, was the recipient of a very fine testimonial from his brother Workmen. His present was no less than a heavy gold watch chain, from which was pending a solid gold charm, on one side of which was the anchor and shield, with the letters A. O. U. W., and on the opposite side was engraved, "Presented to Chas. E. Baker by the members of Myrtle, No. 42, A. O. U. W., March, 1881." The presentation speech was made in a very happy manner by Bro. Barry, P. M. W. Our genial brother was taken completely by surprise, and in a vein of fraternal expressions responded. What added additional interest to this occasion, the presentation was made on the 27th of March, the night of their literary entertainment, when the hall was completely filled with brother Workmen's wives, daughters, families and friends.

WE are pained to learn that Bro. Hanscom will shortly leave on an extended visit to Tombstone, Arizona. We commend him to our brethren of Arizona as one of the bright and live Workmen of our city, and are sorry to lose his services as a member of our Grand Lodge.

VALLEY, No. 30, initiated 14 candidates on the 6th inst., and received a large number of applications.

Light on the Grand Lodge Question.

EDITORS WATCHMAN:—A Grand Lodge or no Grand Lodge is the query that Bro. I. C. C. W., of Alpha Lodge, No. 1, wishes to have elucidated, as they are somewhat in the dark upon this all important question to them at least. A Grand Lodge is somewhat of the nature of a man that wishes to own a house to pay no more *rent;* but the house might be of such a nature as to be a very burdensome luxury to enjoy. A Grand Lodge for the institution of the A. O. U. W. is precisely of this nature. If the man be wise, he will build with an eye to future contingencies. The first of all to know is: Are you sure of the permanency of your State as a desirable residence for your members? Second, is the present membership of the Lodges of that nature and material that has within itself the capacity and energy to fully carry out the responsible duties of a Grand Lodge? If these two premises are in your favor, then the sooner you form a Grand Lodge the better for your membership and the State. Make your Grand Lodge, to hold only biennial sessions, your subordinate Lodge officers, to hold office for one year; never send more than *one* member to represent your Lodge to legislate, and pay him from your Lodge funds a *per diem* and mileage. Let all Past Masters be eligible to hold office in the Grand Lodge (and the Supreme Lodge). Legislate as little as possible: have simply a supervisory efficiency over your subordinate Lodges, for the existing laws of the A. O. U. W. are almost perfect for the object in view, and you will find that the Almighty Dollar will cut but a very small figure in your present perplexity, whether Nevada shall have a Grand Lodge or no Grand Lodge.

Fraternally yours, in C. H. and P.,
AR-GUS-I.

[J. W. Kinsley, D. S. M. W. for Nevada, has received a letter from Victory, No. 10, stating that the Lodge has voted in favor of a Grand Lodge. As it was only necessary for this Lodge to give its consent, it making the tenth to join in the petition, the necessary papers have been forwarded to the S. M. W., and Nevada will soon have a Grand Lodge. Now let the brethren be wise in their action. Let officers be selected who will take pride in their position, and be willing to do solid work for the good of the Order. Ornamental figure-heads are not wanted when a jurisdiction has decided to have a Grand Lodge. Let personal fitness be the recommendation for the new officers of the Grand Lodge, and not that they are "good" fellows.—EDS. WATCHMAN.]

THE Los Angeles *Daily Commercial* of March 10th is a splendid number. It is of value to those who feel inclined to settle in this part of the State, as it shows the resources of the country to good advantage. It is illustrated with maps and public buildings, together with the residences of private citizens. It also has life sketches of the leading men of the county, among whom we notice our friend Dr. Lindley, who has been instrumental in introducing the A. O. U. W. in southern California.

AS SHOWING the true fraternal feeling in our Order our esteemed Bro. John McDonald, of Burns Lodge, on a recent visit to Los Gatos for his health, was overwhelmed with kindness on the part of the brethren at that place. The M. W., J. W. Miller, together with other brethren made the visit of Bro. McDonald very pleasant and agreeable. We fail to record the gratitude that our brother expressed for the warm hearts in the little A. O. U. W. Lodge at Los Gatos.

BRO. G. W. LOVIE of Half Moon Bay dropped into our office this week. He reports everything well in his section.

SAUSAL LODGE, No. 47, is in a flourishing condition, and receiving numerous additions to its membership.

THE total amount contributed to the Upchurch fund in this State to March 1st was $909.70.

SUPREME RECORDER SACKETT reports the total membership of the Order in January at 92,807.

Kid Gloves a Specialty.

The President's Dog.

Our young friends will be pleased to hear about the dog who has adopted the President of the United States as a master. The Eastern newspapers say that a little yellow dog, which followed Garfield's carriage in the inaugural procession, has a history which may as well be told, as the dog bids fair to become a historical character. About a year ago the same dog followed General Garfield from where he got off a street car to his house, corner of Thirteenth and I streets. The General noticing the dog, threw him a piece of meat and forgot the occurrence until he met the same dog on the same corner the next day. Following him home again he was rewarded by another piece of meat. Finally the dog made General Garfield's house a kind of a temporary headquarters.

When General Garfield went to Chicago as a delegate to the convention that nominated him, the dog followed him to the depot. Before the news reached here of the nomination of General Garfield, the dog set up a joyful barking that was almost unbearable. "Something has happened," said one of the ladies in the house, "and here is a telegraph messenger." The message contained the information of the nomination. When Gen. Garfield returned to Washington, some weeks after his nomination, the story was told him, and he said he would take the dog to Ohio with him; but when the time for starting arrived, the dog could not be found, the animal being of a roving nature. Gen. Garfield never saw the dog since until Thursday, when, riding out with a friend, there he was. Calling him by his name, "Bob," the dog recognized the voice and appeared to be happy. As the general arrived at the Riggs house, the dog again disappeared. He saw nothing of him until Friday, as the procession was moving from the White House. The dog followed the carrage all the way to the capitol.

CEMENTING LABELS TO METALS.—For attaching labels to tin and other bright metallic surfaces, first rub the surface with a mixture of muriatic acid and alcohol; then apply the label with a very thin coating of the paste, and it will adhere most as well as on glass.—*Amateurs' Handbook.*

SIR H. BESSEMER ON HIS IMPROVEMENTS.—Sir Henry Bessemer was presented with the freedom of the Cutlers' Company on Wednesday, Mar. 16th, and was subsequently entertained at a banquet, in recognition of his services to the cause of technical education, which the company is endeavoring to promote. The Master, in proposing "the health of Sir Henry Bessemer," said that gentleman had done that for the prosperity of his country which would continue to be fruitful of good in future generations. In proof of the manner in which the influence of his work in this country spread beyond our shores he mentioned that he had recently received an application from Ohio for copies of the lecture which had been delivered in that hall. Sir Henry Bessemer, in acknowledging the toast, said with regard to the educational movements which had been so long commenced by the Cutlers' Co., if he could further their efforts in that direction he would be pleased to do so. That the Master should have received a note from across the Atlantic in reference to his lecture he was not surprised, because no country was more ready than America to take advantage of the improvements of the age. His invention had been most cordially taken up in that country, for which he had received a token of American regard. There had, however, been a specialty in the mode of recognizing his services there which was well worthy of the people. They had no crosses, orders, honors, or titles to bestow, but they had done him the great honor of naming a rising city in Illinois after his name.

PRESERVATION OF THE COLORS OF DRIED PLANTS.—According to M. Storbzl, the slow immersion of the fresh plant in a boiling solution of one part of salicylic acid in 600 parts of alcohol, and then shaking off superfluous moisture, previous to pressing in the usual way between blotting paper, will more nearly preserve the natural color than any other method.

Volcanoes in the Moon.

M. Faye, according to the *Chronique Industrielle*, recently delivered a lecture at the Sorbonne, in which he criticised the prevalent belief that volcanoes exist on the moon, and offered a theory of his own to account for the objects that have been taken as craters due to volcanic action. Water, he said, is the sole cause of volcanic eruptions. Now, on the moon there is no atmosphere; this is a fact recognized by every one, and it is absolutely confirmed by observation of occultations. Since there is no atmosphere there, of course there can be no water, for the latter would instantly evaporate under such conditions, even did it exist. So, since there is no water in the moon, it follows that there can be no volcanic action and consequently no volcanoes. But there are circular cavities on the moon, nevertheless. What are they then, and how have they been formed? To account for these, M. Faye asked his auditors to imagine a river frozen over from shore to shore. Such being the case, the tides will exert a pressure on the under surface of the ice, and if a hole exist in the latter the water will quickly issue up through it and congeal around its edges. And so each successive outflow will freeze over its predecessors until the successive layers form a marginal ring of some hight around the aperture. From this we may get an idea of the alleged lunar volcanoes, which are diametrically opposite to those that exist on earth. The craters of our terrestrial volcanoes, that of Vesuvius particularly, are at the top of high mountains; the craters of the so-called lunar volcanoes are, on the contrary, in the center of low hills. The bottom of terrestrial volcanoes is greatly elevated above the mean level of the surrounding land; that of the alleged lunar ones is deep down beneath the surrounding ground. Terrestrial volcanoes are conical mountains thousands of feet in hight, having at their summit a crater some hundreds of feet in depth, while the circular cavities on the moon are wells several thousands of feet deep and surrounded by a sort of curb some hundreds of feet in hight. The circular hollow called *Copernicus*, for instance, is 11,000 ft. deep, while its marginal hill is only about 2,600 ft. in hight. These circular cavities, then, are veritable wells, and they were formed, according to M. Faye, as follows:

At the epoch in which the moon, covered with a thin solid layer, took less than a month to accomplish its revolution around the earth, tides were created on its surface by the latter. The incandescent and liquid mass, covered by a thin coating that might be well comparad to an egg shell, was attracted by our planet, and thereby caused to dash up against this solid layer. Now, if we suppose that small orifices were accidentally created in various parts of the still thin crust, the waves formed by the tide would cause some of the molten mass to issue through these apertures, while the surrounding crust would everywhere else resist it. This liquid would flow over the edges of these well holes, and being unprotected against the cold of space would at once solidify. And, as we have just seen in the case of the frozen-over river, at every tide the margin would increase in hight by the superposition of new outflows. Finally a moment would come in which the bottom itself would solidify. But this being situated at a great depth, and being protected against external influences, would remain for a short time in a pasty condition. If at such a moment a new flux should take place, the middle of the pasty bottom would be thrust up, and in solidifying would remain considerably elevated in comparison with the surrounding portions of the bottom. Thus may be explained the existence of the peaks which are observed in a large number of these lunar cavities.

Such is an outline of M. Faye's new theory. "If," says the author, "I am asked by what considerations I am led to make known the results of my observations and researches, I answer that I am seeking, first, to banish from science a gross error by proving that these lunar cavities are not volcanoes, for no explosion can take place where there is no explosive material. Then, again, from a geological point of view, I have wished to study in the formation of the moon those phases of the past which may give us an idea of the phases to come. Although the geology of the moon differs completely from that of the earth, this very opposite nature is a valuable element of discussion. It will serve to banish vain theories, and to put in a clearer light the phenomena of which the earth has been the theater."

RAILROAD BUILDING IN THE UNITED STATES. With one single exception, there were more miles of railroad built last year than heretofore in the history of the Union. Fifty years ago (1830) there were but 23 miles of railroad in the United States. Ten years later (1840) the lines had extended to 2,818 miles. At the end of the next decade (1850) there were 9,021 miles; and, according to the reports for 1860, the railroads of the country had reached 30,635 miles. And within the next 10 years, which embraces the period of the civil war, the mileage was nearly doubled. Ere the mutterings of the war had died away the recuperative power, enterprise and genius of the American people were revealed as never before, in establishing and extending the lines of travel and commerce, so that in 1871, the mileage of new road completed amounted to the enormous amount of 7,670 miles. During last year 5,206 miles of track were laid down.

Chico Lodge, 58.

EDITORS WATCHMAN:—Our Lodge, Chico, No. 58, A. O. U. W., is progressing nicely, applications coming in at every meeting. The attendance is good, and our monthly entertainments excellent. As is well known by all Lodges north of Sacramento, we are going to have a grand picnic on Saturday, the 30th day of April, and preparations are being made for the accommodation of our guests. It is to be held in the "Bidwell Grove," one of the most beautiful spots in California. The cars run close by it, and water is in abundance. The Executive Committee have invited Gov. Geo. C. Perkins, Clay W. Taylor, P. G. M. W.; W. H. Barnes, G. M. W.; and Hon. Creed Haymond to be with us on that day, and it is to be hoped that they will be in attendance. They have also invited 17 Lodges, including the Sacramento Lodges, and it is expected to be one of the grandest gatherings of the A. O. U. W. ever held in California. The President of the day will be Past Master J. F. Watkins, who is one of the charter members of our Lodge. Bro. Watkins is a good selection, and will do all in his power to add to the enjoyment of those present, as he is a true Workman in every respect. Mr. A. B. Collins is again to be Marshal of the day. As will be remembered he did so well last year that he received the same appointment again this year. Now, Mr. Editor, if you can take a trip for a few days in this section, do so, and be in attendance at our picnic. I remain yours in C. H. and P.—A. J. B.

Lakeport, 34.

The *Bee-Democrat* says: Lakeport Lodge, No. 34, A. O. U. W., will celebrate the anniversary of its organization on the 21st of May by a grand basket picnic, to be held near Lakeport, at some suitable grove to be determined on in the future. We learn that either the grove on the Carley place or that opposite the residence of R. O. Smith will probably be selected. A public table will be spread, and everybody, male and female, friendly to the Order, are cordially invited to be present, and all friends who can conveniently do so are requested to bring baskets of provisions. Distinguished speakers from abroad are expected to be present, and a jolly time is anticipated. The Executive Committee is composed of H. A. Oliver, P. M. Daly, J. Banks, R. W. Crump, Ennis Combs and Frank Childs. Committee of Arrangements, Alex. Young and D. T. Taylor, of Upper Lake, J. C. W. Ingram, J. F. Rice and T. Deming of Scotts Valley, Alfred Harris of Guinoc, J. H. Moore of Lower Lake, Wm. Moore and Joseph Johns of Lakeport, Jas. Rippey and Z. Welty of Big Valley.

Golden Star, 144.

This Lodge, located at Volcano, Amador county, will give a grand ball on the evening of April 29th. The Committee of Arrangements, consisting of O. Tam, G. Reinharf and Geo. A. Parker, are now making all the necessary preparations, and are determined to do all in their power to make this an enjoyable occasion, as no doubt it will be. This Lodge of Workmen is wide awake, and has an eye to business. It has commenced the erection of a substantial hall, 24x36, which, when completed, will have cost about $1,000.

Georgetown, 121.

EDITORS WATCHMAN:—Georgetown Lodge was instituted August 11th, 1879, with 11 charter members. We now number 33, and have not lost a member from any cause since our first organization. We have not increased our membership during the past six months, for the reason that our examining physician has removed to Placerville, and there is not at present any one qualified living here. We hope soon to have a medical examiner with us, when I expect a large increase in our membership.—LEWIS BRYANT, M. W. of Georgetown Lodge, No. 121.

Yosemite, 171.

The first Lodge of the A. O. U. W. organized in Fresno county was Yosemite, 171, on April 28, 1880. Since then a second Lodge has been organized at Centerville and a third is soon to be formed at Selma. Yosemite Lodge has more than doubled its membership and at the close of its first year finds itself on a firm footing. The 28th inst. will be celebrated by the Lodge and invited brethren, by a public entertainment, consisting of music by a select choir and an oration by W. H. Barnes of San Francisco, the Grand Master of the State of California. Everybody is invited to attend.

San Francisco Lodge Locals.

Bernal, 19.

The brethren of Bernal, No. 19, are moving along in their usual steady and conservative manner. They now have 101 members, and are receiving into their Lodge a closely selected class of men, in keeping with their present membership. The meeting of April 4th was one of those interesting and pleasant affairs so often held by this Lodge of Workmen. The M. W., Bro. Souther, is well up in the work, and gives it in an impressive and dignified manner. There is a vein of cordiality and feeling of friendship exhibited in this Lodge that makes a visitor feel at ease and at home at once. On this evening, after the conferring of the M. W. degree on one and a really enjoyable time at recess, the Entertainment Committee, Bro. Lamont chairman, presented the following programme: Essay by Bro. Sanchez, P. M. W., on the benefits of well written novels or works of fiction; an interesting story by Bro. Souther, M. W.; short speech and reading by Bro. Powell, P. M. W; closing with a feeling and fraternal speech from Bro. Lamont.

Burns, 68.

This Lodge had a very interesting meeting on March 31st. There was quite a delegation from Olympic and other Lodges present. After the visiting brothers were admitted into the Lodge-room, a recess was held and personal introduction of members took place. The genial manners of the brothers of Burns soon made the visiting brothers feel at home, and whetted the appetite for the usual monthly entertainment given by the Lodge. It was opened by a song from Bro. Thompson; reading, Bro. Doane, P. M. W.; comic song and encore, Bro. Pohlman, Recorder. Bro. Mayhew, D. D. G. M., then made a short address that was full of many good thoughts, and well received; recitation, Bro. Montague, who entertained his audience in a very interesting and pleasing manner, and for an encore imitated one of the great characters in Shakspeare; scotch song, Bro. Bell, followed by Bro. Curtis in a short address; comic song, Bro. Pohlman, which created great amusement. Bro. Cummins, of Olympic, was then called, and in response recited a very entertaining piece, followed by Bro. Dixon, P. M. W. of Olympic, in short but appropriate remarks. Wm. H. Barnes, G. M. W., being present made some humorous and interesting remarks. Among the many things he said was this: "In the short time I have been in office I have signed 600 certificates and written 250 letters. Visitations and fraternal calls I encourage; they are in a measure the life of the Order. Our Order is prosperous beyond expectation, and we are making Workmen at the rate of 4,000 per year. Brethren, is it not a grand scheme we have devised to meet here and have these true enjoyments, improve ourselves and give protection to our families?" Bro. F. W. Rossback, M. W. of Olympic, being called, invited the brethren of Burns to call on 127, and they would receive a royal welcome. The visiting brothers then departed, all testifying to the enjoyable evening spent.

Fidelity, 136.

On Wednesday evening, March 30th, we dropped in to see what was going on in this Lodge, and found a large attendance. This is always the case with 136. The brothers turn out in force, and make their meetings pleasant and enjoyable to all. It being the 5th Wednesday of the month, no degrees were conferred, but the time spent in literary and musical exercises, much to the satisfaction of all present. Bro. H. C. Seib was the first to favor the company with a piano solo. Then came a quartette by Bros. McGill, Mitchell, Landon and Follansbee, after which came in rapid succession, a recitation by Bro. Smith, D. D. G. M., a song by Bro. Barton, song by Bro. Mitchell, recitation by Bro. Sayers, song by Bro. McFarlane, recitation by Bro. Titcomb, song by Bro. Landon. As each performer received an encore the programme was quite a lengthy one and rendered in a manner not only to be enjoyed, but to be proud of. These "off nights" are called by the members "free and easys." They are certainly *free* from all formality and restraint, and it is *easy* to understand from them the secret of the success of this Lodge. It is because the members attend the meetings and try to make the work interesting and agreeable to all alike, instead of leaving all to be done by a few, who find it impossible to keep up the interest with a small attendance, and so soon tire of doing all the work themselves.

Memorial, 174.

The brethren of Memorial, at the end of each quarter, give an entertainment. Their last third quarterly meeting was held in Fraternity hall, Shiels' building, which was crowded to its utmost capacity with a fine, enthusiastic audience of ladies and gentlemen. The whole programme was carried out in that splendid manner for which this Lodge is noted. Each of the lady performers was the recipient of a handsome bouquet, the sweet odors from which gave one the idea that he was in the midst of some tropical scene with flowers on every side. The programme was commenced with opening remarks by J. H. Gyselaar. They were brief but pointed, and in that happy and witty style characteristic of the brother. Then came a piano duet, "Romantique," by Miss Lena and C. S. Hoffman, which was played in the usual good style of these artists. A vocal solo, "Oh, Loving Heart, Trust On," by C. A. Howland, was given in a fine baritone voice, and well sung. "Satan's Address to the Sun," by H. Schaffner, was a good recitation and well delivered. A vocal duet, "Love Shall Guide Thee," by Misses Eva and Marietta Jacobs, received a well deserved and enthusiastic encore, reflecting credit on their teacher. Then came the address of the evening, by A. G. Booth, P. M. W. of No. 42. The subject was "Our Order." It was a masterpiece, many new ideas being set forth. It was well delivered, and at its conclusion the hall resounded with applause. A vocal solo, "First Kiss," by Miss Lena Hoffman, was very sweetly sung, the good taste, expression and execution being very noticeable. The "Kiss" was so sweet that an encore was demanded, which was gracefully responded to. Instrumental trio, "Amaryllis," by J. M. Rademaker, son and daughter, was well rendered. Vocal solo, "I Fear No Foe," by H. B. Pasmore, showed a very powerful and effective bass voice with good control. Recitation, "The Dying Soldier," by G. W. McPherson, was well delivered. Then came the finish, the closing ode of the Order, sung by the whole audience standing. The whole was under the direction of Chas. S. Hoffman, P. M. W. The audience then departed to their homes, all looking well pleased. Truly, the brethren of Memorial know how to carry out an entertainment of this kind. Their third quarterly will surely be long held in pleasant remembrance by the audience.

Myrtle, 42.

The quarterly entertainment of Myrtle, No. 42, was held in Pythian Castle, Saturday evening, March 26th, 1881. As this was a family affair, admitting wives daughters, children and friends, the hall was not large enough for the many friends of No. 42, who desired to be present. The following programme was extremely well rendered: Opening address, John McIver, M. W., who in a succinct and distinct manner gave a brief history of the Order, its objects and aims; piano solo, Prof. Schorcht—a very able performance; song, Master Andrew Bogart, who acquitted himself with great credit; comic recitation, Mr. Wm. Myers, who was frequently and heartily applauded, and for an encore sang a Chinese song; reading, Oscar T. Shuck, P. M. W.; piano solo, Master Sewall Bogart; duett, Mrs. J. H. Crocker and Bro. Baker, the veteran Receiver. Their effort pleased the audience so well that they received a hearty encore. Recitation, Master Fred. Head; reading, from "Mark Twain," Jas. H. Baird, P. M. W.; violin solo with piano accompaniment, Master Milton and Miss Estella Fleishman—a very pleasing effort; recitation (comic), Bro. H. F. Morris, who always carries his audience with him, and on this occasion received a deserved and hearty encore; song, Bro. Baker; piano solo, Prof. C. S. Hoffman, P. M. W.—a fine, artistic effort; recitation (comic), which caused much merriment, and so pleased the audience that he received a double encore. It was a very pleasing and successful entertainment to those that could enjoy it; but as the hall was overcrowded, and a large number were unable to gain admission, we suggest that our brethren enlarge their hall on similar occasions in the future.

Magnolia to Friendship.

On March the 24th, a goodly number of the brethren of Magnolia, 41, paid a fraternal visit to Friendship, 179. The M. W. degree was conferred on five candidates in a most creditable manner by Bro. Hart, M. W., ably assisted by the several officers of his Lodge. There were a number of visiting brethren present from different Lodges of the city and county, so that the Lodge-room was completely filled. After the usual routine of business and a very pleasant recess, Bro. Hart made a farewell speech that bespoke the true man and sincere Workmen, followed by J. Meredith Davies, P. M. W., in one of his grand speeches befitting the occasion. Caleb Brind, D. D. G. M. W., made a short speech full of congratulations and good advice, followed by a large number of visiting brethren in remarks that were appropriate to the occasion and well received. It was a very interesting and pleasant meeting and will be long remembered by those present.

Noe Valley, 185.

The last monthly entertainment and social given by the brethren of this young Lodge was of more than ordinary interest. Their hall was full, and there seemed to be a home-like feeling and satisfaction prevailing throughout the evening. The following programme was given: Opening address, "Aims and Objects of our Socials," A. D. Jordan, which was full of good thoughts and well received; piano solo, "Grasshopper Waltz," Mrs. Dr. McDermott; a very fine performance; duett, Misses Jennie and Minnie Axford, Mrs. McDermott playing the accompaniment, receiving deserved and hearty applause; comic song and encore, in character, Master Walter Axford and Miss Minnie Madson; recitation, Miss Maggie Carman; duett, Miss Sarah Welborn and Miss Maggie Carman; quartette, Juvenile Noe Valley choir, Masters Axford, Madson, Danenfelzer and Lawton, which created great amusement; recitation, Miss Eliza Dudley; song and four encores, Bro. James Booth; recitation, Mr. E. Watson; song and encore, Mr. Orin Bailey; recitation, Mr. H. F. Wynne; reading, Miss Matilda Danenfelzer; recitation, Miss Myrtle Herman; accordeon solo, Master Joe Madson; recitation, Miss Elith Moses; reading J. D. Thompson, M. W.; recitation, Miss Rosette Danenfelzer; dialogue, Bros. D. V. and A. V. Thompson. The literary and musical programme was finished with a slight-of-hand performance by Mr. George Bradford. This fine, varied and elaborate entertainment was brought to a close by all joining in a social and spirited dance. The interest shown by all in our Order in Noe Valley is commendable, and to Bro. Lawton, P. M. W., Chairman of Exercises, we extend congratulations.

Sts. John, 73.

Pursuant to announcement, Wm. H. Barnes, G. M. W., paid a visit to the brethren of Sts. John Lodge, on March 31st. Quite a large number of the brethren assembled on this evening, to welcome the Grand Master. It being an "off night," there was no "work" done, all devoting themselves to the social features of the Order. After the usual Lodge business as far as "Good of the Order" had been finished, the Grand Master was introduced, and stated the object of his official visits. He said he desired to become acquainted with the members of the different Lodges, so as to strengthen each and all in the good work. He then gave the unwritten work of the Order in that splendid elocutionary manner for which he is noted. A new meaning seemed to attach to this part, as in his easy, graceful style the words came flowing from his lips. He then stated the aims and objects of the Order, calling attention to the rapid increase which is now taking place, and urged upon all to fulfill their obligations by attendance at the meetings, as by that means the fraternal principles will be kept green in the memory. At the conclusion of the Grand Master's address a recess was had, and the brethren were personally introduced to him. After a general interchange of civilities, the literary and musical programme was announced, commencing by the Grand Master singing "Where is my Boy To-night?" The rendition of this proved so highly satisfactory that an encore was demanded, when he gave that popular pathetic song, "Poor Old Joe." Wm. B. Marshutz, the Recorder of Sts. John, gave a recitation with good dramatic effect. The "Larboard Watch" was then sung by Bros. Barnes and Swift, in a manner that made one think he was on the briny, instead of the peaceful quiet of the Lodge room. "Toby Tosspot" was given by Bro. Jephson. "Toby" received good treatment from the brother. Then came one of those mirth-provoking things that would make an anchorite laugh; but when it is fired at the head of a Workman, the effect is simply immense. It was entitled the "Hotel Prospectus," and was given by Bro. Prather. A piece, entitled "Sketch of a Wife," by Bro. Ewing, was exceedingly well rendered. The programme was closed with an original reading on "Charity," by Edward De Courcy, which contained sentiments worthy of consideration. The Grand Master then took his departure, afterwards calling upon Burns Lodge, a report of which is presented elsewhere.

Valley's Grand Ball.

One of the grandest and most successful entertainments ever given in this city was held under the auspices of Valley, No. 30, A. O. U. W., at Union hall, April 8, 1881. The main entrance was newly canvassed from the sidewalk to the hall, while on each side was a row of evergreens, and at the head of the stairs beneath festooned flags set out in gas jets was the word WELCOME. Union hall was more completely and beautifully decorated by Bro. McKay, P. M. W., of Piper & Co., than on any other occasion or celebration. There were two canopies of streamers, one running from the center of the gallery, the other from the side to the chandelier. Pendent banners, blue, white and silvered draperies, with glass balls, were hung profusely all around the room. There were over 100 trophies of fine flags, together with a shield and the name of every State in the Union hung around the gallery. Hanging baskets with living ferns and bell baskets, some with the sweet-singing canary, were to be seen in every part of the room, while in the center was a fountain of cologne water emitting its odor all around. Over the entrance to the hall was the American flag and the coat of arms of our State, while on one side was the picture of Washington and our State motto. The stage in front was filled with large boxes of evergreens and exotic plants, across which was suspended in large silver letters VALLEY, No. 30, A. O. U. W., 3D ANNIVERSARY, beneath which, surrounded by burning gas jets, was the emblem of our Order, standing out in bright colors. Our noted decorator had spent nearly a week in fitting this hall for the occasion, and really outdid himself. As indicated in our last issue we scented what proved to be a grand dress party. Of the many rich dresses and wardrobes worn by the ladies our space would not be sufficient to describe; suffice it to say they were the best and of every variety. At 9 o'clock sharp the grand march commenced, and as youth and beauty commingled with manhood and the middle aged, filling this large hall completely, it was a very pleasing sight, and gave us a feeling of pride as to the hold this great organization has on the people of San Francisco. There were over 2,000 persons present, the hall and galleries being filled to the outer walls. Ballenberg's band of 15 pieces discoursed sweet music to the happy dancers, interspersing the late popular music, "Billee Taylor" and "Olivette." Every one seemed to enjoy themselves in a large measure, and from the commencement to the close all was done in decency and in order. Many expressions and congratulations as to the success of this party were indulged in, and it was frequently impressed on our minds during the evening by the *stalwarts* that Valley "gave this party." The supper was a splendid one, given by the celebrated caterer, Chas. F. Seaburg. The banquet room had a capacity for 300 at one sitting. At 12 o'clock, as many as could were escorted to the very attractive and highly ornamented supper table, where this happy company indulged in a feast equal to the event. Not a word of dissatisfaction or unfavorable comment was heard during the whole evening, and to the casual observer, it almost seemed as if this grand party regulated itself. Behind the scene could be seen the master hands who guided and directed the exercises. A programme of 22 dances was happily brought to a close at near daybreak. For future reference as a guide and in commemoration of this auspicious anniversary, we herewith give programme of dances and the

several committees: March; 1. Lancers; 2. Waltz; 3. Quadrille; 4. Schottische; 5. Lancers; 6. Polka; 7. Virginia Reel; 8. Waltz; 9. Quadrille; 10. Raquette; 11. Lancers; 12. Schottische; 13. Quadrille (Basket); 14. Waltz; 15. Lancers; 16. Raquette; 17. Virginia Reel; 18. Waltz; 19. Quadrille; 20. Schottische; 21. Lancers; 22. Medley; Good Night. Committee of Arrangements—Daniel McLeod, W. E. Lutz, T. H. Macdonald, W. B. Lyon, E. H. Black, W. H. Buchanan, Wm. Patterson, Jos. Giusti, Geo. A. Case. Reception Committee—Robt. Haight, E. W. Goggin, H. S. Dearborn, J. F. Nounan, N. Dodge, C. H. Evans, F. Filmore, Geo. C. Smart, Alex. Badlam, J. C. Green, P. Crowley, Robt. Howe. Floor Manager—Frank A. Reynolds. Floor Committee—C. T. Pidwell, E. W. Blaney, Jno. Thompson, E. Hacquette, E. F. Moore, A. A. Burton, W. E. Wood, Robt. L. Cockrill.

Resolutions of Respect.

HALL OF MAGNOLIA LODGE, No. 41, A. O. U. W.,
San Francisco, Cal., Mar. 21, 1881.

[IN MEMORIAM.]

To the Master Workman, Officers and Members of Magnolia Lodge, No. 41, A. O. U. W.—SIRS AND BROTHERS: Your committee, appointed to draft resolutions of respect to the memory of our deceased brother, HUGH MCLEAY, respectfully submit the following:

WHEREAS, It has pleased Almighty God to remove from our midst our late brother, HUGH MCLEAY; and, whereas, it is but just and proper that this Lodge pay a fitting tribute of respect to his memory; therefore, be it

Resolved, That while we bow with humble submission to the will of the Supreme Master Workman, we none the less mourn the loss of our departed brother

Resolved, That in the death of Bro. McLeay this Lodge mourns the loss of a worthy member, his family an affectionate husband and the community an honorable and useful citizen.

Resolved, That this Lodge tender to his bereaved family its sincere and heartfelt sympathy in their deep affliction.

Resolved, That the charter of this Lodge be draped in mourning for 30 days.

Resolved, That these resolutions be spread upon the records of this Lodge; that the Recorder be instructed to transmit a copy thereof to the family of our deceased brother; and that the PACIFIC STATES WATCHMAN be furnished with a copy for publication.

CALEB BRIND,
G. GOLDSMITH,
JOHN RAFFERTY. } Com.

DEPARTURE.—Our genial brother, David Hart, M. W. of Friendship Lodge, 179, owing to business engagements, has tendered his resignation as Master Workman of his Lodge. The brethren of this Lodge have lost an efficient and able officer, and the Lodges of San Francisco a welcome visitor, as our brother expects to make San Diego his future home. By his extraordinary efforts he has placed his Lodge on a safe and sure footing, and leaves his brethren with their deep regrets. His resignation coming so unexpectedly at their last meeting, they testified their appreciation and respect by making up a purse of $25 to present a souvenir to Bro. Hart. We commend him to our brethren of San Diego, and can assure them they will find in Bro. Hart a right royal Workman, and one that is perfect in the secret work.

WILL our brother of the *National Bulletin* when he writes of the Upchurch fund and says "it does not increase at a rate that is gratifying to the friends of the noble old man or creditable to the Order," use the proviso that California is not included in the category. This State has contributed nearly $1,000 (and we hope soon to see the figure reached), and if other jurisdictions had followed this example there would be no cause of complaint.

KEYSTONE has reduced its monthly dues to 50 cents per month. Moved into Broadway hall, west side, between 11th and 12th Sts., Oakland, from 1st of April. Work was done in the first degree on Tuesday evening, the 5th. Lately Keystone has been retrenching expenses and increasing its interest in the way of literary exercises.

AMONG the deaths in the Supreme Lodge jurisdiction to be settled for in March, we note that of Bro. George Pappenberger, of Victoria Lodge, No. 19, B. C., who died on the 28th day of December, 1880, of apoplexy. He joined the Order, November 15, 1879, and was 45 years old.

THE total beneficiary money received by the various Grand Lodges and subordinate Lodges under the immediate jurisdiction of the Supreme Lodge, for the month of January, was $102,455.35; beneficiary disbursed, $97,733.50.

E. M. R.—We met Bro. E. M. Reading at Los Angeles last month, and learned from him and others that the Workmen's Guarantee Fund was receiving a numerous increase of membership in that progressive A. O. U. W. county.

GRAND RECORDER WHITAKER, of Iowa, reports 50 new beneficiary certificates issued in February and 13 to old members for new direction in payment.

A NEW Lodge will soon be instituted at Yuma, Arizona, several gentlemen having signified their attention of joining the Order.

THE PACKING INDUSTRY.—The business of pork packing on this coast is assuming large proportions. From a small beginning in 1860, the trade now ranks as one of the leading industries of this State, comparing favorably with those great stock centers, Chicago and Cincinnati. One of the largest houses engaged in the trade is the San Francisco Packing and Provision Co., 513 to 521 Washington street. This was originally a corporation, composed of some of our well-known and leading mercantile firms, the whole being under the management of Mr. W. K. Deitrick. After a time, during which the corporation prospered, this gentleman sold out to Mr. H. Rossbach, who had been since boyhood engaged in the packing business. Upon his death, his son, Bro. F. W. Rossbach, Master Workman of Olympic, 127, succeeded him, and the prosperity which had heretofore attended the house continued. We learn that his sales last year amounted to over half a million dollars. There is a bright future before this young man, he being only 25 years of age. Such industries as this should be encouraged, for the saving both to the people and to farmers is very great.

SAN FRANCISCO PLATING WORKS.—Bro. E. G. Denniston, one of the pioneers in this line of business, has now the largest establishment on this coast. He does all kinds of mining plating for saving gold and silver, as also nickel and copper. His office is covered with diplomas and medals, having received first premium at Mechanics' Institute for the last 12 years. The magnitude of his business may be inferred from the fact that Bro. Denniston has just finished plating a copper cauldron that cost $6,000. A large amount of household goods, etc., are replated at his establishment and at very reasonable prices.

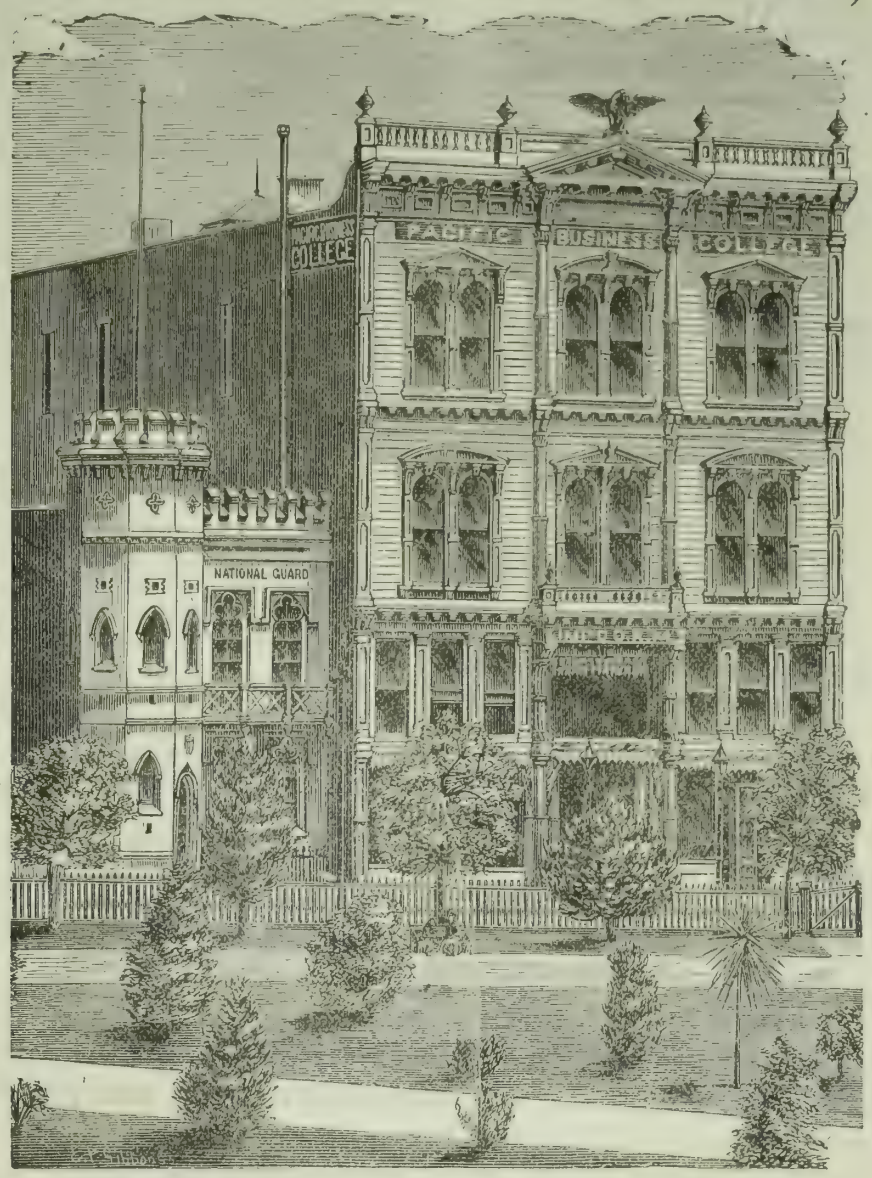
ASBESTOS is coming into wide use as a packing for steam engines and covering for boilers and steam pipes. It is one of the best natural non-conductors of heat, and as such is widely used. As showing the saving in freight it may be stated that 100 square ft. of this covering costs only 65 cents, while 100 square ft. of cement, weighing 2,000 lbs., will cost from $6 to $10. The agent for this material on this coast is Bro. B. S. Hill, 317 Mission St., and he is meeting with good success. The well-known house of Prescott, Scott & Co., testifies to the excellence of this material.

THE well known and extensive exotic gardens, with their immense array of greenhouses and magnificent stock of plants, formerly owned by T. A. Miller & Co., have been purchased by J. Pouyal, of 1029 Sutter street. These gardens have a wide reputation for the choice selection of plants and flowers grown therein. The new proprietor is well known as a florist of ability, and the gardens will no doubt thrive under his management.

FINE PORTRAIT PAINTING.—In this day of fine art we refer to the studio of Bro. F. C. Baxter, 136 Post St. An examination of crayon portraits, life size, as also in oil, water and India ink, in his art gallery will well repay a visit. Our genial brother does a large amount of work in enlarging from photos and negatives for our leading citizens and we can recommend this as a very reliable a well as reasonable in price to procure work in his line.

THE *Pioneer* says that the Degree of Honor, A. O. U. W., will be one of the social societies of San Jose. The membership is increasing rapidly. The members intend having a good time every meeting. At the next meeting it will be musical and literary night. Workmen take your wives, daughters and sisters and mothers and join.

BYRON JACKSON, of Fidelity, 136, is one of our largest dealers in agricultural machinery. His agricultural machine works and foundry, Sixth and Bluxome streets, San Francisco, is worthy a visit. He makes a specialty of harvesting machines and also of pattern work, machinery and light castings. He has long been known as one of our most wide-awake business men.



EXPERIENCE WITH IMPERIAL EGG FOOD.—A J. Lineback, of Calistoga, writes: I have used a six lb. box of imperial egg food. I have about 250 hens, and when I began to feed it they were looking badly, and their combs were pale. Now their combs are a bright red, the fowls look hearty and healthy and have commenced to lay. I think it is an excellent preparation.

A NEW and popular piece of instrumental music by Prof. Carlos Troyer, entitled, "Salutation Festive Polka," has been laid on our table. Musical critics pronounce it a gem. J. B. O'Connor & Co., 15 Dupont street, are the publishers. It has a beautiful title page, and is sold at 50 cents.

BRO. P. LYNCH is manufacturing large quantities of brick at his yard at Ross Landing, in Marin county. He is making a first class article, and selling at very reasonable rates at his office, Pacific street wharf.

TO SUIT THE TIMES.—M. Deutsch, 322 and 324 Bush street, offers the finest living at reduced rates. His motto is "first-class table and low prices."

PURE COUNTRY MILK.

TOOTH TRANSPLANTING.—It often happens that a front tooth is broken off even with the gum, while the rest of the teeth remain good. This root may be removed and its place supplied with a sound, healthy tooth, previously removed for that purpose, and made to grow and perform all the functions of a natural tooth. A number of operations of this kind have been successfully performed by Dr. C. B. Stoddard, of Austin, Texas. As a rule, the teeth are selected from the mouths of healthy negroes, and the price paid from $3 to $10. Some of the most fastidious ladies in the State have had this operation performed, and are justly proud of the fact.

ELECTRIC TIDES.—Mr. Alexander Adams, of the English Postoffice Telegraph Department, reports that he has observed the existence of electric tides in telegraph circuits. By long-continued observations he has determined distinct variations of strength in those earth currents which are invariably present on all telegraphic wires, following the different diurnal positions of the moon with respect to the earth. He read a paper on the subject at a recent meeting of the Society of Telegraph Engineers.

THERE are 121 mines listed at the New York Boards. The February sales were 3,782,000 shares, including 2,340,000 shares of Colorado claims.

LONGSIGHTEDNESS.—The explanation of longsightedness (or farsightedness), which commonly occurs in old people, is a very simple one. The eye becomes flattened by a diminution of its fluids, or some structural change takes place in the crystalline lens by which its convergent power is diminished. The images of objects near the eye, therefore, are indistinct, because the rays of light proceeding from them are slightly divergent, and the converging power of the cystalline lens is inadequate to focus them upon the retina, but tend to focus the rays behind it. This defect is remedied by the use of convex glasses, which make up for the weakened convergent power of the eyes. With such aids, the rays from objects near at hand are rendered parallel or slightly convergent before entering the eye, thus enabling a distinct image to be formed upon the retina.

STEAM ENGINE RUNNING.—In a recent number of the *Engineer* (London) it was asserted that "no steam engine has yet been made which will run continuously and quite steadily for long periods of time at 600 revolutions per minute." In reply, a correspondent writes to the same paper that an engine invented by a Mr. Brotherhood, of London, and which has been in use for some time for working Mr. Brush's and other kinds of dynamo-electric machines, is found to work at a higher speed even than 600 revolutions very satisfactorily.

HUDSON RIVER TUNNEL.—According to the *Railway News* the Hudson River tunnel is advancing satisfactorily toward the New York shore at the rate of five ft. a day. Two hundred men are employed digging out the dirt and putting in the iron and brick work. The tunnel is finished as they go along, and the work is much safer than under the old plan, which resulted so disastrously. A small tunnel, about six ft. in diameter, is run ahead of the larger tunnel, which follows and incloses it; warning is thus given of the nature of the soil. The work is now in the south tunnel, which is now completed 290 ft. from the shaft, and will soon be out as far as the north tunnel, which has been cleaned out, but not extended, since the accident. Both tunnels will then be carried along together. A caisson is in course of construction for beginning the work on the New York side.

LEGHORN HATS are whitened (otherwise than with the fumes of sulphur) as follows: Immerse in a strong aqueous solution of sulphite of soda or bleaching powder (chloride of lime), and then in dilute sulphuric acid (acid 1, water 5). The bleaching powder treatment requires much subsequent washing, or the use of an antichlore dip, hyposulphite of soda dissolved in 20 parts of water.

EARL BEACONSFIELD is seriously ill.

SMOKER'S CATARRH.—Habitual smokers are notoriously liable to colds in the head, and bronchitis and other congestive affections of the air-passages. On this subject Dr. J. F. Rumbold says: "The congestion occasioned by the action of tobacco on the mucous membrane of the superior portion of the respiratory tract resembles, in many respects, the congestion resulting from the effects of a cold, and, like the effects of a cold, some of its effects are transitory and some are permanent. The local effect of tobacco on the mucous membrane of the nose, throat and ears is as predisposing to catarrhal diseases as inefficient and insufficient clothing in the case of females. The local effect of tobacco on the mucous membrane of the superior portion of the respiratory tract causes a more permanent relaxation and congestion than any known agent. As tobacco depresses the system while it is producing its pleasurable sensation, and as it prepares the mucous membrane—by causing a more permanent relaxation and congestion than any known agent—to take on catarrhal inflammation from even slight exposure to cold, it should require no farther evidence to show that its use ought to be discontinued by every catarrhal patient.—*British Medical Journal.*

THE Plumas *National* says: There is about five ft. of hard snow in the high mountains, insuring the miners a good long water season.

Insurance.

THE
NEW ENGLAND MUTUAL
Life Insurance Company,
OF BOSTON,
All Policies in this Company are Governed by the Massachusetts Non-Forfeiture Law.
The only Company on this Coast Governed by this Law.
This Company was incorporated A. D., 1835, and has accumulated Assets of
$15,000,000.
THIS COMPANY HAS PAID OVER
$150,000 on this Coast
for Policies that had Lapsed from a Few Days to nearly Five Years.

MONEY IN CHICKENS AND EGGS.

—The— Eclipse Self Regulating Incubators are now in actual use in most parts of this State, and giving general satisfaction. They are a success, and being such are invaluable to all who attempt to raise chickens; are easy to manage, and cost merely a trifle to keep in operation, and will do much better work than can be done with hens, with a small portion of the labor and risk.

☞ The "ECLIPSE" is the only entirely self-regulating incubator known; is the only one that will bear investigating, so it is the only safe one to purchase. Send stamp for Circular of California Testimonials (not Eastern.)

The Camping Season.

The camping season in this State is at hand. Throughout the length and breadth of California parties are preparing for their annual pilgrimages into the canyons and valleys, away from the haunts of man. They seek to find here that rest and recreation which cannot be attained in the busy marts of trade. Away from the mad rush which attends all business in this State, from the constant toil and pressing demands of their callings, many of our people find in their communion with nature a renewal of their strength, a reinvigoration both of body and mind.

California offers special advantages for camp life. The rains will have generally ceased about the 1st of May, and for the six months thereafter everything has become so dry that no danger need ensue from sleeping out in the open air. Besides one has a variety of climates to choose from. Those who like a temperature rugged and bracing will find it along the coast. By going a distance in the interior, the ocean winds are shorn of their moisture, the middle of the day being very warm, but the mornings and evenings are truly delightful. But it is higher up in the mountains that we find the best climate. Here the atmosphere is pure and just suited to please the strong and bring comfort to invalids.

To one who has traveled over this State and noted the topography of the country, it is evident that truly is California a camper's paradise. The roads are generally well graded and easy of access. We will take first as an illustration the two largest valleys of the State—the Sacramento and San Joaquin. They are so easy in grade that one can travel 500 or 600 miles in one direction over roads as level as the floor. Contiguous to them are a number of smaller valleys that afford many a delightful spot to pitch a camper's tent. The soil is dotted with great park-like groves of live and white oaks and sycamores, with beautiful wild flowers growing profusely upon hillside and plain. Striking some of these valleys at their mouth, and ascending to their sources in the mountains, we come to rippling streams of water, shown in the engraving, flowing through tangled masses of trees and shrubs. They afford a good retreat to those who seek to place as good a distance as possible between them and the outside world; and when they return again to mingle with the people it will be with quickened blood and vigorous impulse.

Those who delight to pass their time with rod and gun will find that camp life will afford them the full measure of their wants in this respect. The mountain streams are alive with the speckeled beauties that nip so charingly at the treacherous bait. Hares of wonderful swiftness of foot and delicious eating abound on every side. Then the gentle dove furnishes a dish fit for a king. If you wish to try your gun on larger game, the coyote, beaver, wild cat, lynx, California lion and silver-gray fox will test the shooting abilities to the utmost. But it is the quail and deer that whets the appetite of the camper. He would consider his expedition barren in its results if he did not add these trophies of the chase to the walls of his tent. If he should desire to have a bear skin, let him ascend higher up in the mountains, and bruin will give him a tussle.

There are some rules which experience has shown it would be well for those who contemplate a camping expedition would be wise in following. In making up the party only those of congenial tastes should be admitted to it. One bore or one selfish person will destroy all the enjoyment. Let one of the company be selected as leader, and his orders should be obeyed implicitly. Take nothing with you but what is absolutely necessary. You are going away for rest and pleasure, and the movements should be as free as possible. A person need have little fear of reptiles, as they are found only in the roughest spots and are rarely dangerous if let alone. Do not let the restrictions of fashion hinder your seeking enjoyment, but do anything rational according to your own judgment. By entering into the spirit of the occasion you will come back a new person both in body and mind.

CAMPING OUT—A PICTURE OF OUTDOOR CALIFORNIA LIFE.

Electioneering.

It is with pain we have noticed in some instances that candidates for office in our subordinate Lodges have indulged in the reprehensible practice of soliciting votes and support for themselves. Such cases are rare, but should *never* be tolerated. There should be at least one organization on the face of the earth in which the office will seek the man, and not the man the office, and if this be not so in the A. O. U. W., the fault shall not lie at our door. We have seen by sad experience, otherwheres, that in far too many cases, he who ardently seeks office, seeks for that reason above all others which should debar him from it, and if not for that, yet because of some other motive that should not be encouraged. The Grand Lodge I. O. O. F. of Kentucky did itself much honor by ruling one as illigible who solicited votes for himself. Cannot our Grand Lodge some time rise to a like noble position.

INVESTIGATING COMMITTEE.—A brother prominent in our Order suggests, that to make our examinations more thorough, the committee should, after investigating the candidate, meet and confer together before making their report. Our columns are always open for the discussion of anything appertaining to or for the good of our Order.

ON FILE.—We are compelled to leave over some very interesting articles for want of space.

Home Miscellany.

Whittier's New Poem.

[The Prelude to "The King's Missive and Other Poems."]

"I spread a scanty board too late;
The old-time guests for whom I wait
Come few and slow, methinks, to-day.
Ah! who could hear my messages
Across the dim unsounded seas,
On which so many have sailed away!

"Come, then, old friends, who linger yet,
And let us meet, as we have met,
Once more beneath this low sunshine;
And grateful for the good we've known,
The riddles solved, the ills outgrown,
Shake hands upon the border line.

"The favor, asked too oft before,
From your indulgent ears, once more
I crave, and, if belated lays
To slower, feebler, measures move,
The silent sympathy of love
To me is dearer now than praise.

"And ye, O younger friends, for whom
My hearth and heart keep open room,
Come smiling through the shadows long,
Be with me while the sun goes down,
And with your cheerful voices drown,
The minor of my even-song.

"For equal through the day and night,
The wise Eternal oversight
And love and power and righteous will
Remain; the law of destiny
The best of each and all must be,
And life its promise shall fulfill."

Kit.

It was a gala day on the avenue. All the fast horses in town were out showing their paces; and the merry sleigh-riders shouted with mirth and enjoyment as they raced neck-and-neck, five teams deep, and when they came to a deadlock it was still more fun. At one juncture, however, there were shouts that did not sound mirthful, a wild plunge among the thoroughbreds, and some policemen ran out from the sidewalk and talked in authoritative tones, but the crowd was so dense no one could see what was going on among the noisy drivers and their plunging horses.

"It's only a couple of boys," said the beautiful Felicia Hautton, settling back among the luxurious white robes; "two of those horrid newsboys. They ought not to be allowed on the avenue at all. They're always getting under foot and frightening the horses—such good time as we were making too—how disagreeable."

"Anybody killed?" asked one fine gentleman of another as they passed.

"Naw, two boys mixed up, that's all; one started to cross the street and fell, and tether got run over trying to save him, stweet Awabs, you knaw, can spware a few—ta, ta."

"Got under the feet of a highflyer and spoiled his time," said another in a disgusted tone.

Then the avenue was cleared and the tide of enjoyment went on, and no more Arabs were so foolish as to sacrifice themselves by obstructing the triumphs of the fashionable throng.

At sundown of that same day two poorly dressed boys applied for admission at the doors of Harper's hospital, and inquired for one of their number, who had been brought thither that same afternoon. They were permitted to see him for a few moments, and on tiptoe they entered the long, clean ward and sought out the narrow bed on which he lay. When they had awkwardly greeted him, they sat down upon the edge of the cot, and were much embarrassed with the strangeness of the scene, and painfully conscious of their own hands and feet; they were also rather shocked at their comrade's clean face; it looked so unnaturally white, with a dab of red on either cheek. Their eyes roved stealthily about over the other sick beds and their occupants.

"Say, old feller," began the biggest of the two boys, addressing his sick comrade, "ain't you puttin' on a heap of stile?"

"Where's Kit?" asked the sick boy, fretfully; "why ain't he a-long of you?"

The two visitors looked at each other, and their faces grew downcast and troubled; they dug the toes of their boots into the clean floor at the bedside and shuffled uneasily, while both coughed violently in concert; then the big boy blurted out:

"Kit went on an errant, and he told me to tell you he would be up tomorrer sure. He sez, sez he, tell Jim it's all rite."

"You ain't gassin, be you? Kit didn't git hurt nor nothin'?"

"He couldn't go errants ef he waz hurt, could he?" asked the other doggedly; "an' here," improvising a lie for the occasion, "he sent yer this."

The sick and injured boy smiled as he took the big orange in his feverish hands and turned it over.

"I knew Kit wasn't the boy to forgit me—here, you fels, take a bite; it's many an orange and stick of candy and bit of pie we've divided atween us afore this. Poor little Kit! He knowed as how I liked 'em. Here, you take a squeeze," as he handed it back.

But the boys wouldn't touch it, and the sick patient put it under his pillow. Then he said, in a strange, quavering voice:

"I want you fels to look after Kit, and don't you forget it; when I gets well I'll pay back every cent; but it'll be a long time, for I'm all mashed in. He's a little fel and needs lookin' arter. Now, boys, don't go back on me, will you?"

"You needn't worry about Kit," said the spokesman of the two, looking away and digging violently at the floor. "He's all rite."

"Lord, I am tired," said the sick boy. "If it wasn't for Kit I'd as leve died as get well; but I promised mother as how I'd allus take care of the little chap, and I've done it; and he wasn't cut up nor bruised nor nuthin' when they pulled him out'n from under the hoss's hoofs?"

"Wasn't cut up nor bruised nor nuthin'," echoed the visitor with his back to the bed.

"Good! Jest you look arter him till I get outer this and I'll work my fingers off for ye. Lord, how tired I am."

He drifted away to sleep and the two boys left without waking him, but before they went one of them slipped a little leather bag of marbles in his hand and the other put a few pennies wrapped in a dirty piece of newspaper close by, where he would see them on waking.

"He'll think Kit sent 'em," said one, as they softly retreated; "they were in Kit's pocket when the policeman found him—to think he doesn't know."

That night when the hospital doctor went his rounds he found the new boy wide awake, but very still. To the familiar eye of the physician his symptoms were clearly defined.

"Well, my boy," he said, kindly, "what can I do for you?"

The boy's face lightened up. "I want to see Kit—send for Kit."

"Yes, yes," answered the doctor, hastily; "but you must wait until morning."

"I don't—think—I—can—sir. I guess I'm—booked—for—t'other—place. It would be all right—ef it wasn't for Kit. But I promised mother I'd take care of him, and what'll he do without me? I can't leave Kit!"

The death dew was on his forehead. He beat his hands helplessly on the white spread, while his pale lips continued to murmur, "I can't leave Kit!"

The physician sat down by him. It is against the rules of a hospital to hold much converse with the dying, or even to notify those who are in extremes of the approach of death; but this was a child—the doctor assumed the responsibility.

"My boy, if you knew that you could not get well, would you feel very sorry?"

"Not for myself; only for Kit."

"But if I told you that Kit was well taken care of; that a rich and kind father had sent for him, and given him a beautiful home—"

"Now you're gassin'," said the dying boy with his old fervor. "Dad ain't that sort; besides, he broke mother's heart, and Kit wouldn't speak to him ef he cum back."

"No earthly father, dear boy, but a heavenly one; the priest has told you of him, and the home he gives his children. He it is who has sent for Kit."

The sick boy made up his parched lips to whistle. "W-h-e-w," he said, brokenly, "Kit's dead—killed arter all, when I tried so hard to save him!"

"He was dead when they took him up," said the doctor, "and not a bruise, nor a broken limb—the shock killed him, and he is safe now with his Master—don't you believe that?"

But the boy did not heed him; his lips moved faintly, and the doctor, bending down, heard him say again, "Kit's dead!" Then there was a long silence, and before he left the doctor turned the white sheet over the tranquil face, and Kit and his brother were together again.—*N. Y. Graphic.*

Friendship has its duties. You owe your friend sympathy in his sorrows and in his joys. You owe him confidence and the information about yourself which confidence implies. Yet that information is to be given with a certain reserve, so that you do not seem to force your affairs upon him, or to make him responsible for you. Of crises in which he could not aid you, or would be pained by his inability, it is often wise to say nothing. There is a fine subtle instinct which guides in such matters. However near your friend brings you to him, you are to respect his individuality. Information that is purely personal you must wait for. If he does not volunteer it, be satisfied that he has his reasons. Do not seek—above all, do not claim—it as a right of your friendship. Be generous, not exacting.

The President's Mother.—The happiest person in the country on the 4th of March, 1881, undoubtedly was the venerable mother of James A. Garfield; and she had the highest right to be. Left a widow with her small children, who, with herself, were quite dependent upon her own exertions for support, she kept her little flock together, and demonstrated, as have many other women also, "what a woman can do." And now her boy is President of the United States of America. All honor to the good mother! Remarkable men almost never have remarkable sons, but a boy that amounts to something "uncommon" almost invariably has been blessed with a superior mother. So far as the human race goes, the mother is the prime factor in excellence.—*Rural New Yorker.*

Estimate actions not by their overt results merely, but by the real though latent power that is implied in them, and the most brilliant deeds of outward heroism will sometimes fall far short of those quiet victories over self to which the Omniscient eye alone is witness.

What this country needs is an invention to convince flies that a bald head is not a skating-rink.

An Entertaining Game.

"Between the dark and the daylight,
When the night is beginning to lower,
Comes a pause in the day's occupation
That is known as the children's hour."

Have any of the readers of the *Californian* ever been importuned, day after day, by certain small but urgently solicitous members of the family for "stories?" And have these "grown-up" people ever been at a loss to satisfy their little petitioners?

The gray-haired poet of Cambridge knew how to satisfy his "blue-eyed banditti;" and everybody remembers the beautiful eulogy one great story teller of England paid to another when he said, "Lucky is he who has such a charming gift of nature as this, which brings all the children in the world trooping to him and being fond of him."

Unfortunately, but few of us possess, even in a very small degree, the marvelous gift of Mr. Dickens; and yet I doubt if the person lives who cannot secure the ready attention and devotion of children. I am not speaking now of prodigies or precocious geniuses, but of ordinary boys and girls just waking up to think about this wonderful world they have come into, and about which their chief sentiment is an insatiable curiosity. In many homes, when evening comes, and dinner has been served, and the little children gathered around the fire-place for their hour before bed-time, how often the question arises, "What shall we do to amuse them?" Into a ready limbo have gone the school-books "till to-morrow," toys delight not, the noisy games of out-door life are tabooed in the drawing-room and library, and if Papa sits down to enjoy his fragrant cigar and the evening paper, and Mamma occupies herself with the latest magazine or a bit of Kensington embroidery, what is to become of the restless little boys and girls to whom this pleasant post-prandial hour by right belongs?

No one can spend an hour in the society of a moderately intelligent child without remarking how extraordinary a peculiarity of his mind is a craving after information. I have two small nephews who have just completed their first decade, and have arrived at that interesting age of inquiry when it seems as if their ravenous youthful maws would never be supplied with aliment in the shape of tales and stories which delight the heart of boyhood. This love of the marvelous and exciting is like a child's craving for sweetmeats, and it is a taste which cannot be ignored.

I have been experimenting latterly in the art of entertaining children, and my simple efforts have been crowned with so much success as to make it seem almost selfish to keep to myself such an easy, efficacious remedy for the *ennui* of children.

I cannot claim for this amusement any novelty of design. The game—if one may call it such—in different ways is already played on many a winter's evening. There are few limitations to its scope or opportunities. Our *modus operandi* is this: The children and I (and any of the others who may be enticed into our group) gather around the library table, our only implement of warfare being a box of alphabet letters, with which is commonly played the game called "Logomachy."

Each player draws at random a letter, and, thinking of a character conspicuous either in history, art or literature, *whose name begins with that letter*, selects from another box enough letters to spell the name thus chosen, and, having arranged the word upon the table, his right-hand neighbor is called upon to describe briefly the character selected.

For example: Last evening we agreed to limit ourselves to the names of poets and authors, and the first letter drawn was "H." *Homer* was the result of a few moment's thought upon the part of one of the small boys, and it fell to my lot, sitting next to him, to tell, in the old "once-upon-a-time" fashion, about the Greek poet's life, and incidentally to introduce some of the pretty stories about Hector and his dazzling helmet, the frightened Andromache and the fair Helen, until the time was up and it was my turn to draw a letter.

By chance, I selected the first letter of the alphabet, and I gave my right-hand neighbor an easy subject to talk about, by placing *Andersen* upon the board. What boy or girl does not know all about dear old Hans Christian, and the stories of the Vikings, the Beetle, the Goblin, and the Huckster.

The dictionary of authors had to supply the dates, but we had a dainty bit of biography from a boy's standpoint, which was not to the disadvantage of the Danish lover of children. The letter "I" was chosen next, and soon *Irving* graced the table, while picturesque views of "Sunnyside" and the Hudson, and the charming story of Rip Van Winkle delighted the children.

Before the hour had passed we had a goodly number of names before us of the great writers of different countries and ages. It seemed almost anachronistic to see Homer and Browning jostling each other, and to let the funny music of the "Pied Piper of Hamelin" follow so closely upon the wail of Helen of Troy. It was quite a leap in time from *Una and the Red Cross Knight* to *Little Nell* and *Oliver Twist*, but it was not difficult to make the children discriminate between the early and the later English authors. Thus we supplemented the outlines of our authors' lives with bits of their permanent works, names of their fictitious characters, and bright little fragments from their poems or stories as they came to our memories.

One evening we confined ourselves to Shaksperian characters, and every name on the table represented some one of the great dramatist's characters. Imagine what a charming evening we had with the love making of Bassanio and Portia in the picturesque villa at Belmont, with avaricious old Shylock all ready with his glittering scales and sharpened knife to weigh the pound of flesh. How pleasantly we escaped from the tears and entreaties of poor little Prince Arthur to laughter over the irresistibly fat and funny old Falstaff, the mock play and the seven men in buckram. Gouty old Capulet and witty Mercutio, the brave and gallant Hotspur, and the melancholy Prince of Denmark were not more interesting to the children than poor old King Lear, bareheaded in the howling storm, or the remorseful Lady of Inverness with her little blood-stained hand.

So we have taken up historical characters, and names of cities, mythological personages, and names of artists and inventors, until we may hope these children are now fairly afloat upon the enchanted ocean of literature which henceforth to them may never have a boundary.

In this and similar pleasant ways the bright fancies of the nursery may be turned into a love for all that is best and purest in art and literature, and these childish impressions of scenes and characters gained in hours of amusement may outlast many pursued in the study and strife of later life.—*Katherine Conger in the Californian.*

How much or how little the institution of marriage may mean! Looked at simply in its visible form, it is only a ceremony uniting two persons in legal and moral bonds, who afterwards form one family, instead of parts of two. But what are its invisible truths, its higher realities, its poetry? Does it not suggest holy affection, pure delight, rich possibilities of mutual aid, improvement and sympathy? Does it not hint at family life, with its responsibilities and duties, its self-sacrifice, its trials, its rewards, the inspiration it gives to energy, the sweets it confers on labor, the consolations it has in store for sickness or sorrow, the honor it bestows on old age? What though these may never be wholly realized? They are no less the great truths of marriage, to which some may be forever blind, and some may convert from beautiful conceptions to happy realities.

Mrs. Hayes' Portrait.—The opening words of President Garfield in accepting for the White House the portrait of Mrs. Hayes were not telegraphed, but are reported in the Washington papers as follows: "The very appropriate gift to the Executive mansion which you have brought—the portrait of its late mistress—I gladly accept. It shall take its place beside the portraits of the other noble women who have graced this house. Nothing I can say will be equal to my high appreciation of the character of the lady whose picture is now added to the treasures of this place. She is the noble friend of all good people. Her portrait will take, and I hope will always hold, an honored place in this house."

A Philanthrophist.—Speaking of her past, Mrs. Thompson, the philanthrophist says: "I was a poor girl myself, born and raised in Vermont. I had a sensible mother, thank God! who taught me, in fact, rang into my ears day and night almost, that 'handsome is that handsome does,' and I have tried never to forget it. It was my good fortune to meet Mr. Thompson, and we were married. It is now some 12 years since his death, and I have always felt that I could in no way so well show my reverence for his character and name as by using the means he so generously intrusted to me to alleviate the sufferings of humanity."

Music in Disease.—Dr. Oscar Jennings, a physician of standing in Paris, writes to the London *Lancet*, that in the treatment of mental disease he has constantly used music, which calms and soothes the mind, and declares it to be too precious an agent to be neglected. This is both scriptural and poetical indorsement. Saul of Tarsus was cheered by music, and the poet recognizes it as the soother of the savage breast, while Shakespeare denounces "he who has no music in his soul is fit for stratagem and spoils."

Cultivate cheerfulness, if only for personal profit. You will do and bear every duty and burden better by being cheerful. It will be your consoler in solitude, your passport and recommendation in society. You will be more sought after, more trusted and esteemed, for your steady cheerfulness. The bad and vicious may be boisterously gay and vulgarly humorous, but seldom or never truly cheerful. Genuine cheerfulness is an almost certain index of a happy mind and a pure good heart.

A healthy body is good; but a soul in right health—it is the thing, says Carlyle, beyond all others to be prayed for, the blessedest thing this earth receives of heaven. Without artificial medicament of philosophy, or tight-lacing of creeds—always very questionable—the healthy soul discerns what is good and retains it; discerns what is bad, and spontaneously casts it off.

Not only does all life have its poetry, but in that very poetry may be found the best, the fullest and the sweetest parts of life. He will discover it who is himself true and brave, faithful and patient, earnest and loving; and of such a one it may be truly said, "His life is a poem."

For our Boys and Girls.

Our Puzzle Box.

Cross-Word Enigma.

In cow and calf;
In whole and half;
In feel and hear;
In sage and seer;
In happy days;
In parts and plays;
In false and mean;
In thrifty bean;
In brook and lake;
In noisy wake;
These letters a boy bring to mind;
'Tis on Columbia's Coast, I find.

MELANCTHON.

Concealed Fishes.

1. Isaac Hubbard is a farmer.
2. My uncle Jasper chides me severely.
3. Many joys terminate in sorrow.
4. Has Almond been a good boy?
5. You must urge only the good.

CEPHA.

Letter Changes.

1. Change the initial of a newly married lady and obtain hauteur.
2. Change the central of pertaining to the feet and obtain criminal.
3. Change the final of a combustion and obtain solid; again, and obtain evergreens
4. Change both the initial and final of a spire and obtain a spur.

JENNIE.

Word-Square.

1. A city.
2. A person easily led.
3. A Hebrew measure.
4. Not far removed.

DICK N. S.

Curtailments.

1. Curtail a flower and leave a raised floor.
2. Curtail frequently and leave a preposition.
3. Curtail to survey and leave to contend.
4. Curtail a beverage and leave to gain
5. Curtail a kind of cloth and leave a rule.

REVERSALS.—1. Lee, eel. 2. Time, emit. 3. Par, rap.

FRACTION PUZZLE.—Apricot.

Topsy's Prisoner.

Carl's grandpapa lived in the country, in a one-story white house almost hidden by tall elm trees. Out in the yard in front of the house was one very tall tree, and the roots grew in curious forms so as to make a great arm chair. Carl and his mamma, when they went to grandpapa's for their long visit in the summer, used to sit out in the elm chair and watch the birds and squirrels as they flitted and scrambled, and sung and chattered, among the leafy branches over their heads. One squirrel seemed quite tame and would come down close to their heads and chirp and twitter and act as if he wanted to talk.

Sometimes Bose, the dog, would sit on the ground under the tree and watch him for hours, and as the squirrel would come down almost within reach and then run up again, the poor old dog would get so excited he would hop around and bark and be almost crazy. Grandpa had a cat, too, as well as a dog. Her name was Topsy. She was a great fat black pussy with a few white spots on her. One day as Carl and his mamma sat in the porch they saw Topsy coming with something in her mouth. Mamma said "Keep still Carl, and let us see what Topsy has."

So Carl sat quite still and they both watched Topsy. When she came up they saw it was the tame squirrel, and Carl wanted mamma to get him away from pussy and let him go again. But mamma was afraid if she tried to get him puss would run off and eat him up. So she told Carl they would wait a little and see what would be done.

Puss saw mamma and Carl, and wanted to show off what a smart cat she was, so she laid the squirrel down on the grass and walked away as if she did not care what became of him. He lay very still for a moment, and then began to creep slowly and softly toward the big elm tree. Topsy saw him moving and turned round slowly and went back to him, picked him up in her mouth, tossed him up in the air, cuffed him a little with her paw, and laid him down again, and again walked off looking very careless. This time the squirrel crept softly, softly, a little nearer to the big elm tree, and again Topsy came back to him and played with him and cuffed him and laid him down again. By this time the squirrel had crept so near to the tree that his little heart gave one great bound, and he jumped to his feet, and before Topsy had time to get half way back to him, he had scampered to the elm chair and from there right up the tree, away up, up, among the topmost branches, and chippered away, glad enough at having escaped from the horrible cat. Topsy ran to the foot of the tree, and gave one jump up against the side of it, but she was too fat to get up any further, and looking rather silly, she slowly walked off toward the kitchen door, while Carl clapped his hands for joy at the escape of his favorite squirrel.—*New York Tribune, Jr.*

LITTLE Lottie to her friend: "I have so many cares. Yesterday a little baby sister arrived, and papa is on a journey. It was but a piece of luck that mamma was at home to take care of it."

Humorous.

Chips.

THERE is one farm in California that is half the size of Rhode Island. But it can't raise baked clams.

OLD lady to modest curate: "Lor, sir, I do like to hear you preach extrumpery. Your language is that won'erful fluid!"

ALL the signers of the Declaration of Independence signed their names with quill pens except one—he signed his Witherspoon.

AFTER supper at a ball—He: "Without joking, Elsie, I do adore you. When I look at you there is such a commotion in my breast!" She: "And mine too, Henri; it must be the lobster salad."

AN impatient boy, while waiting for the grist at the mill, said to the miller, "I could eat the meal as fast as your mill grinds it." "How long could you do so?" asked the miller. "'Till I starved to death," retorted the boy.

"IS IT law you're talking about? Look, now, when I was a saudger I shot 20 men for the Queen, and she gave me a pinshun; but if I was only to shoot one stray fellow for myself, bedad, I'd be tried for murder. There's law for yez."

"DO you want to kill the child?" exclaimed a gentleman as he saw a boy tip the baby out of its carriage on the walk. "No, not quite," replied the boy; "but if I can get him to bawl loud enough, mother will take care of him while I go and wade in the ditch with Johnny Becare."

A GALVESTON darkey rushed into a doctor's office, and breathlessly exclaimed: "Come on, doctor, right off. Dar is somebody in my house who is in an awful fix—laid up in bed agronin' and agronin'." "Who is it?" "It's me. You see, boss, I didn't hab nobody to send, so I come myself."

A VERMONT man in a sleeping car was accosted by his neighbor opposite, who was also putting on his shoes, with the inquiry, "My friend, are you a rich man?" The Vermonter looked astonished, but answered the pleasant-faced, tired-looking gentleman with a "Yes, I'm tolerably rich." A pause occurred, and then came another question—"How rich are you?" He answered, "About $700,000 or $800,000. Why?" "Well," said the old man, "if I were as rich as you say you are, and snored as loud as I know you do, I would hire a whole sleeping car every time I traveled."

Household Hints.

ORANGE PIE OR PUDDING.—One pound of butter, one pound of sugar beaten to a cream, one glass of brandy, wine, or rosewater, ten eggs beaten to a high froth; have two oranges and boil the rind until it is tender; change the water two or three times while it is boiling, then beat it in a mortar and squeeze the juice in, together with the rind of one lemon grated and the juice of the same; mix all well together with the other ingredients, and bake in a puff paste without an upper crust; half this quantity is sufficient for two ordinary sized pies.

PEACH MERINGUE.—Drain off the syrup from a can of peaches, and put them into a pudding dish. Beat the whites of four eggs to a stiff froth, add five tablespoonfuls of powdered sugar, lay it over the peaches, and brown in the oven. Make a soft custard with the yolks of the eggs, a quart of milk and one small teacup of sugar. Flavor, and when cold, serve as a sauce for the peaches. Or the custard may, when cold, be poured over the peaches, the frosting upon that, and the whole set in the oven to brown.

BAKED HAM.—Make a thick paste of flour (not boiled) and cover the ham with it, bone and all; put in a pan on a spider or two muffin rings, or anything that will keep it an inch from the bottom, and bake in a hot oven. If a small ham, 15 minutes for each pound; if large, 20 minutes. The oven should not be hot when put in. The paste forms a hard crust around the ham and the skin comes off with it.

A NICE RICE PUDDING.—Boil a cup of rice in a quart of milk until it is nearly done; sweeten it and add a little salt. When cool stir in the beaten yolks of three eggs, flavor to taste, and bake slowly about half an hour. Beat the whites of the eggs to a stiff froth, and add three heaping tablespoonfuls of powdered sugar. Spread the frosting on top, and set it for a moment in the oven to brown.

PEA SOUP WITH CELERY.—Boil split peas till they are in a thorough mash; melt a little finely chopped suet well in a pan, and frizzle in it a finely chopped onion; mix this with the peas, add more warm water to make soup, pepper, salt and powdered sage, and let it simmer well for 20 minutes.

COCOANUT CAKE.—Beat the whites of four eggs to a stiff froth, add one cup of sugar, one-half cup of butter, the same of sweet milk, the same of corn starch, one of flour, two teaspoonfuls of baking powder, and three tablespoonfuls of dessicated cocoanut.

RYE AND POTATO BREAD.—A French recipe: Five pounds of rye or wheaten flour, and the same weight of potatoes boiled, and well kneaded, with leaven, etc., is now largely used to make loaves.

Health Column.

What Air Shall We Breathe at Night?

Many years ago Florence Nightingale assaulted the popular superstition against breathing night air with the unanswerable question, "What other air can you breathe at night?" Dr. Oswald in a late number of the *Popular Science Monthly*, enters upon the assault against this superstition, which survives every attack, upon no other ascertainable ground than that the less reason there is for a superstition the harder it is to kill it.

"Before we can hope," he says, "to get rid of the consumption with any chance of success, we have to get rid of the *night air superstition*. It is probably the most prolific single cause of impaired health, even among the civilized nations of our enlightened age, though its absurdity rivals the grossest delusions of the witchcraft era. The subjection of holy reason to hearsays could hardly go further.

"'Beware of the night-wind; be sure and close your windows after dark!' In other words, beware of God's free air; be sure and infect your lungs with the stagnant, azotized and offensive atmosphere of your bed-room. In other words, beware of the rock spring; stick to sewerage. Is night-air injurious? Is there a single tenable pretext for such an idea? Since the day of creation that air has been breathed with impunity by millions of different animals—tender, delicate creatures, some of them—fawns, lambs and young birds. The moist night air of the tropical forests is breathed with impunity by our next relatives, the anthropoid apes—the same apes that soon perish with consumption in the close though generally well-warmed atmosphere of our northern menageries. Thousands of soldiers, hunters and lumbermen sleep every night in tents and open sheds without the least injurious consequences, men in the last stage of consumption have recovered by adopting a semi-savage mode of life, and camping out doors in all but the stormiest nights. Is it the draught you fear, or the contrast of temperature? Blacksmiths and railroad conductors seem to thrive under such influences. Draught? Have you never seen boys skating in the teeth of a snow storm at the rate of fifteen miles an hour? 'They counteract the effect of the cold air by vigorous exercise.' Is there no other way of keeping warm? Does the north wind damage the fine lady sitting motionless in her sleigh, or the pilot and helmsman of a storm tossed vessel? It cannot be the *inclemency* of the open air, for, even in sweltering summer nights, the sweet south wind, blessed by all creatures that draw the breath of life, brings no relief to the victim of aerophobia. There is no doubt that families who have freed themselves from the curse of that superstition can live out and out healthier in the heart of a great city than its slaves on the airiest highland of the southern Apennines."

Is there not, the reader perhaps asks, danger in the malarious air of the Roman campagna or the Charleston meadows? Yes! There are regions where the air is poisonous. But the only way to escape the poison is not to live in such a region. You might as well allow sewer gas in your bath-room and expect to escape the poison by keeping the chamber door closed, as to live in a malarious swamp and escape the malaria by trying to live in an air-tight house. Any fresh air is better than any stale air.—*Ex.*

HONEY can be used in lieu of sugar for almost all kinds of domestic use. It has no superior in the canning and preserving of fruits, making strawberry shortcake, etc. Many persons claim that honey disagrees with them—makes them sick. This is a mistaken idea, and is owing to those persons having eaten honey mixed with the poison of the bee, bee bread, larvæ, bees, etc., as the old-fashioned strained honey used to be. But the honey of to-day, such as is produced by intelligent bee-keepers, and bearing their own label, is pure nectar, free from all deleterious substances, and is by far the purest and most healthful sweet known. As an article for the table, both tasteful and ornamental, what can be superior to comb honey? This is now procured mostly in small frames, and is removed from the hives as soon as it is sealed, thus preserving its delicate whiteness. But for use in the cuisine, extracted honey is superior, as it is free from wax, being thrown from the comb by centrifugal force.—*Food and Health.*

PETROLEUM IN BRONCHITIS.—In a communication to the *Gazette des Hospieaux*, Dr. Moube gives his experience of petroleum capsules in simple and chronic bronchitis. This balsamic had been brought before the Therapeutical society by Dr. Blache, a year ago, at the suggestion of a Paris chemist, who named it Gabian oil, in order to prevent public prejudice. Each capsule contains twenty-five centigrams of pure petroleum, the ordinary oil not being used, as it has to be distilled in contact with sulphuric acid to render it fit for lighting purposes. It is stated that at the Hospital Beaujon, where these capsules have been freely ordered for chronic bronchitis, a rapid diminution of the secretion and of fits of coughing has been observed; and in tuberculosis, also, the medicine has given encouraging results.

THE symptoms of diphtheria in a catarrhal form are a slight fever, accompanied by dryness in the throat, with slight pain in swallowing; glands of throat swollen; mucous membrane red; small grayish-white or whitish-yellow spots; frequent nausea and vomiting.

Worth Knowing.

JUTE FOR BRUSSELS CARPETING.—A patent has been taken out in France by M. L'Heureux, which rests upon the jute in the manufacture of so-called Wilton or Brussels carpeting, which hitherto has been made from wool. The application of jute for this purpose is facilitated by the preparation of a portion of jute yarn into what is called the "Camel," and by the varying proportions of the number of the yarn made use of for the web and the main warp. The jute yarn is fermented for about 10 or 12 hours in a solution formed of 50 quarts of water and one lb. of alum, these proportions to be used for working about 90 lb. weight of thread. After the jute has thus been cleared of the oil it may have gathered during its progress through the various processes of the spinning mill, that is to say, after it has been disinfected, it is dyed if required in the ordinary way; the jute is then sized with the following preparation, one lb. of starch dissolved in 90 quarts of water; the same weight of jute is submitted to the weight of sizing above-named. The warp is prepared and dried in the customary manner. The weaving is carried out on looms, such as are used in weaving velvet, and therefore it does not require special observations. Carpets made in this way can be produced at a reasonable price. —*Fils et Tissus.*

CLEANING IVORY AND MARBLE.—The *English Mechanic* gives the following recipes: Polished marble or alabaster, when soiled, may be cleaned with a weak lye of potash and soft soap. Muriatic acid is the best thing for removing iron stains; it should be applied with a rag, but if used too freely or too strong, will make the surface rough. The following is the best recipe for removing ordinary stains from ivory or marble: Dust-lime is mixed with the strongest soap-lye pretty thick, and instantly, with a painter's brush, laid on the whole of the marble. In two months' time wash it off perfectly clean, then have ready a fine, thick lather of soap (soft) boiled in soft water; dip a brush in it, and scour the marble, not with powder, as in common cleaning. This will, by very good rubbing, give a beautiful polish. Clear off the soap and finish with a smooth hard brush till the end be effected.

PORCELAIN STOVES.—Russian immigrants have domesticated in Minnesota the brick-lined porcelain stove which everyone who has been in Germany associates with his residence there, and remembers kindly for the even and healthful heat which it diffuses, if not for its cheerful aspect. Since these stoves are air-tight, and hence economize fuel, their introduction in regions where coal and wood are scarce is a matter of importance. It has been found that prairie hay serves to produce a comfortable heat when burned in these stoves, and machinery for compressing it has been put on the market. No doubt the patriotic American who has been taught to crave the quick, fierce heat of sheet iron, will laugh at an apparatus which requires an hour to do its work, but half a loaf is better than no bread and an hour's delay is better than to freeze to death.

POISONED BY A PENCIL.—Mr. Samuel Clarke, of Vasselboro, Me., has been in the habit of carrying a copying pencil in his coat-pocket. One day Mr. Clarke went to Augusta, and while in the city he purchased some troches for a cold, which he put loose in the pocket where they were constantly coming in contact with the lead. While returning to Vasselboro on the cars, he felt a tickling in his throat, and to allay the irritation partook of several troches. His tongue at once began to swell and turn black, and by the time he arrived at home he was deadly sick. A physician was summoned, who promptly administered antidotes for the poison. It is said that a piece of the lead of one of these pencils, half the size of a pea, will cause the death of a robust man.

SAW DUST FOR CAR WHEELS.—The *Lumberman* says: We have been shown a model of a car wheel consisting of an iron rim of seven inches outward diameter one-half inch thick, fitted with a well-proportioned hub, the space between the hub and rim filled with pine saw dust, pressed in so solidly that we are ready to believe the assertion that resting the iron beams upon bearings, a pressure equal to 23 tons applied to the hub failed to develop any signs of weakness.

THE EFFECTS OF GREEN WRISTLETS.—The Bridgeport (Conn.) *Standard* says that a gentleman in that city has discovered, after suffering for weeks from what the doctors called an eruption, that the trouble was caused by wearing a pair of green woolen wristlets. He visited several physicians before the cause of his trouble was known. The dye-stuff was analyzed and found to contain poison enough to kill several persons if taken internally.

PHOTOGRAPHING MUSIC.—An English paper tells of a gentleman, who, on being asked to sing, produced from his pocket a little case which contained his music, photographed down to the size of note paper. He had duplicate copies of the song, and handed one to the accompanist, singing from the other himself. The expedient saved all the bother of bringing a roll of music, unfolding it, collecting it again, and so forth.

Fraternal.

Masonic.

MISSOURI has established fraternal relations with the Grand Lodge of Egypt.

THE Grand Lodge of Ohio permits its subordinate Lodges to expel Masons for non-payment of dues.

WE see it stated that Benedict Arnold was initiated in Hiram Lodge, No. 1, New Haven, Conn., April 10, 1765.

THE Masonic library at Salt Lake, Utah, is a popular institution. It was opened to the public in 1877, and during 10 months of last year circulated 8,723 volumes.

MARCUS RICHARDSON, of Bangor, Maine, is the oldest living Free Mason in the United States. He is 100 years old, and has been a member of the Order nearly 78 years.

THE Grand Council of High Priesthood met in this city on Wednesday, April 13th, and conferred the Order of High Priesthood on over 30 of the elected High Priests of this jurisdiction.

THE Yorktown centennial will be celebrated on October 19, 1881. The corner-stone of the monument to be erected will be laid with appropriate Masonic ceremonies by the Grand Master of Grand Lodge of Virginia, assisted by the Grand officers, and in the presence of the Grand Masters of the 13 original States. The President of the United States will be present and deliver an address. Congress has appropriated $20,000 to be used in furthering the celebration.

A HOME COMPLIMENT.—The recent appointment of N. W. Spaulding, of Oakland, as U. S. Assistant Treasurer, vice Wm. Sherman, will give general satisfaction to the people of California. Few of our citizens are more widely known and respected. When he took an active interest in the politics of Oakland, he was repeatedly elected Mayor, and was a vigilant and conscientious official. As a member of the Council, his name will always be associated with some of the most important local measures. He was the father of the present complete system of Oakland's street improvements, and by its adoption, that city has saved millions of dollars. In any capacity in which he has ever served he has won the admiration and esteem of those who knew him best, and thousands will be glad to learn that he has now received one of the most prominent Federal appointments on the Pacific coast.—*Alameda Encinal.*

Mr. Spaulding is well known as a leading Mason, and he has recently been elected for the seventh time as Master of Oakland Lodge. It is mostly to his energetic efforts that the Masonic fraternity of Oakland are indebted for their magnificent temple. It is also gratifying to good citizens, without party distinction, to see such responsible positions fall into the hands of well-known and worthy citizens.

THE Grand Commandery of Knights Templar held its 23d annual conclave at the Masonic Temple in this city, commencing Friday, April 15th. The following officers were elected for the ensuing year: R. E. Grand Commander, Edward Richards Hedges, of Stockton; R. E. Deputy Grand Commander, Charles Fayette Lott, of Oroville; E. Grand Generalissimo, William Monroe Petrie, of Sacramento; E. Grand Captain-General, Edwin Aldrich Rodgers, of Sonora; E. Grand Prelate, Osgood Church Wheeler, of Oakland; E. Grand Senior Warden, Rollin C. Gaskill, of Oakland; E. Grand Junior Warden, John R. Lockwood, of Susanville; E. Grand Treasurer, James M. McDonald, of San Francisco; E. Grand Recorder, Thomas H. Caswell, of San Francisco. A lengthy and elaborate address was delivered by the retiring Grand Commander, Bruce B. Lee, and the reports of the various officers were read.

THE Grand Chapter of Royal Arch Masons of the State of California held its 27th annual convocation at the Masonic Temple, in this city, April 12th. A two days' session was held. A full representation was present from the city and interior chapters, and a large amount of important business was transacted. The following Grand officers were elected for the ensuing year: Grand High Priest, Henry Sayre Orme, of Los Angeles; Deputy Grand High Priest, William Munro Petrie, of Sacramento; Grand King, Leonidas E. Pratt, of San Francisco; Grand Scribe, Jonathan Doane Hines, of San Buenaventura; Grand Treasurer, Hiram Throop Graves, of San Francisco; Grand Secretary, Thomas Hubbard Caswell, of San Francisco; Grand Chaplain, John Riggs Crandall, of Auburn; Grand Lecturer, Thomas Hubbard Caswell, of San Francisco; Grand Captain of the Host, Edward Coleman, of Grass Valley; Grand Royal Arch Captain, Benjamin Franklin Tuttle, of Petaluma; Grand Organist, Samuel David Mayer, of San Francisco; Grand Guard, Ira Colburn Root, of San Francisco.

I. O. O. F.

IOWA has 376 Lodges, and 19,161 members.

SAN JOSE celebrated the 62d anniversary in good style. Delegations from Watsonville were present.

THE WATCHMAN returns thanks for a complimentary ticket to the 62d anniversary celebration held at Shell Mound Park.

THE 29th annual session of the R. W. Grand Lodge, I. O. O. F. of this State, will convene in San Francisco, May 10th, at 9 o'clock A. M.

A NUMBER of the San Francisco Lodges celebrated the 62nd anniversary of Odd Fellowship, by a picnic at Shell Mound park, near Berkeley,

NEWS from all over this State and throughout the country is to the effect that the 62d anniversary was celebrated in a becoming manner.

APOLLO and Unity Lodges and Oriental Encampment of this city, celebrated the 62nd anniversary by going in carriages, etc., to Black Hawk grove, near San Mateo.

FRIENDSHIP LODGE, Middletown, Lake Co., celebrated the 62d anniversary of the Order in grand and creditable manner. Delegations were present from many of the Lodges in the county.

THE Odd Fellows of Santa Barbara celebrated the 62d anniversary with great eclat. C. F. McGlashan delivered the oration. The festivities were closed by a grand ball in the evening.

LOS ANGELES Odd Fellows celebrated their 26th anniversary on Tuesday, April 26th, by a basket picnic at Arroyo Seco Grove and a social party in the evening of the same day at Odd Fellows' hall.

THERE are about 33 Odd Fellow Mutual Insurance Companies in existence in this country. Up to 1880, says an exchange, these societies have paid families of deceased members the handsome total of $2,258,038.80.—*O. F. Herald.*

THAT there is a reforming power in Odd Fellowship no man will deny, who understands thoroughly its teachings. Every brother may not be made better, but certainly the large majority feel its ennobling influence, while no man was ever made worse by the study of its principles and the practice of its precepts. This is the unequivocal testimony of its membership. *Concord Statesman.*

Knights of Pythias.

PYTHIANISM dates its birth from February 19, 1864. At present there are 35 Grand Lodges, 1,500 subordinates, and about 90,000 members.

A REPORT on the last Grand Lodge session, humorously written, was recently read before one of the local Lodges. Fun flew fast and furious through metered verse, and the foibles of the Knights were alluded to in a racy manner.

MARYLAND has 87 working Lodges, in good condition, with an aggregate membership of 6,230. The benefits of every description paid out during the year amounted to $24,772.53, of which $15,587.86 were for sick benefits exclusively.

THE Knights of Pythias will hold their 13th anniversary picnic at Belmont Park, on Monday, May 9th. Adult tickets for the round trip will be 75 cents. Trains will leave the railroad depot, corner of Fourth and Townsend streets, at 8:20, and a special train at 10:30. There is no doubt, judging from the past, that this will be a very enjoyable affair.

THE second anniversary of the foundation of Bayard Lodge, No. 53, was celebrated at Platt's hall on Saturday evening, April 23d, by the members giving a grand ball. This is a French Lodge, the work being done in that language. The hall was profusely decorated with bunting, banners and evergreens, and the floor was covered with white canvas. Every effort was made by the different committees to make this one of the finest balls of the season. The dance music was well rendered and included several selections from the latest comic operas, which had the effect of keeping the large number who were present until a programme of 24 dances had been gone through with.

American Legion of Honor.

THERE are 12 Councils of the A. L. of H. in this city and 40 in the State.

THE Order has a membership of about 25,000 distributed through 550 Councils.

THE Supreme Commander is authorized to offer a prize of $200 to any companion who makes a ritual that will be substituted for the one now in use, or adopted by the Supreme Council at its next session.

D. S. VAN SLYKE instituted Acacia Council at Salinas city on the 15th, with twenty gentlemen and four ladies, and installed the following officers: Geo. W. Peckham, C.; Mrs. Jerome Porter, V. C.; J. N. Besse, P. C.; C. J. Cox, Sec'y; Mrs. A. A. Libbey, O.

WISTINA COUNCIL was instituted at Hollister on the 13th inst., and the following officers installed: M. Pomeroy, C.; A. Eaton, V. C.; S. F. Conor, Sec'y; John Kerns, Col.; A. P. Boyd, Treas.; E. G. Campton, Med. Ex.; F. O. Nash, Alternate.

AARON NOBLE instituted Ruby Council at Gilroy on the 21st, with 27 charter members, and installed as officers: D. M. Pyle, C.; H. W. Briggs, V. C.; L. Loupe, Sec'y; Mrs. Mary Bean, Col.; J. A. Baxter, Treas.; Dr. B. Bryant, Med. Ex.; J. F. Freeman, P. C.; J. W. Thomasson, Chaplain; J. R. Paine, W.; M. E. Hunter, O.; W. J. Alexander, G.; H. Reeves, A. Reihl, O. F. Hanson, Trustees.

GOLDEN STAR COUNCIL was instituted April 24th by Deputy Supreme Commander, C. S. Haley, assisted by Deputy Supreme Commander, Lee O. Rodgers, acting as Supreme Guide: The following offiers were elected: Peter Abrahamson, C.; A. J. Prager, V. C.; Samuel Patek, O.; Louis Ehrleck, P. C.; Jacob Jackson, Chaplain; Joseph Blumberg, G.; Charles Groslicht, Sec'y; L. J. Levingston, Col.; Michael Isaacs, Treas.; Pincus Harris, W.; John Levy, S.; Abraham Franklin, Julius Stamper, Morris Zacharias, Trustees; Moses Rockman, M. D., Med. Ex. At the close of the installation the Committee on Banquet conducted the Council to a dining-room on Geary street, where a superb collation was in waiting.

A COUNCIL of the A. L. of H. was instituted at Hamilton hall, corner Geary and Steiner streets, on Friday evening, April 22d, by Deputy Commander, Lee O. Rodgers, assisted by Dr. J. S. Coleman and Dr. C. S. Haley, with 33 charter members. The name of the new Council is the Golden West. The following officers were elected for the current term: Commander, J. K. Wilson: Vice-Commander, W. M. McMillan; Orator, E. J. Chandler; Past Commander, W. H. Davis; Secretary, J. J. Frank; Collector, Horace Wilson; Treasurer, B. W. L. Nicoll; Chaplain, F. P. Hennessey; Guide, John McDermott; Warden, L. E. Normand; Sentry, J. W. Short. Trustees—John Martens, W. L. Chalmers and H. G. Seiberst. Medical Examiner, N. B. Coleman, M. D.

NEW COUNCILS IN FRESNO COUNTY.—We have unpublished items of the progress of the Order in this progressive county. Deputy R. H. Allen, lately of Chico and member of No. 55, instituted Madera Council, No. —, April 2d. Following are the charter members: Emma G. Allen, P. C.; Emory W. Chapman, C.; Edwin Moore, V. C.; Huldah Moore, Sec.; L. Orrin Sharp, C.; Fannie M. Chapman, T.; D. F. Edwards, G.; Frances W. Sharp. Meetings will be held every other Wednesday evening, commencing April 20th. Several applications have already been received. This is the first Council organized in the county. Madera is a fresh and vigorous growing town. It is the terminus of the Big Tree stage route to Yosemite, the shortest and best from railroad communication. It has good agricultural surroundings and other substantial resources for support and future growth. The Council has the advantage of being first in the field of fraternal societies here. A movement is on foot for organizing another Council at the county seat, Fresno City, with a prospect of 20 or more charter members. The successful colony settlements near Fresno are stimulating the development of the county. Fresno City has doubled its population within a comparatively short period. The WATCHMAN is promised locals from this section in the future.

LAW I Sec. 7, reads as follows: "Whenever an assessment is called for, the Collector shall certify to the Treasurer the amount due the Supreme Treasury on account of the Benefit Fund, by the terms of the call of the Supreme Secretary. The Treasurer of the subordinate Council shall thereupon immediately forward to the Supreme Treasurer the amount so certified by the Collector, and at once notify in writing the Secretary of the Council of the amount so forwarded, the date it was sent, and the method by which it was transmitted. The Secretary of the subordinate Council shall thereupon immediately notify the Supreme Secretary of the amount forwarded, the date it was sent, and the method by which it was transmitted, and report the facts to the Council at the next stated meeting." If any of the subordinate officers fail to discharge this important duty promptly, they thereby violate one of the most sacred laws of the Order, and not only subject themselves to charges under Art X, Sec. 2 of the subordinate Council constitution, but also render their Council liable to suspension. No one should think that because 40 days is fixed as the limit, at the end of which time the Council will be suspended if the assessment is unpaid, that the money, notices, etc., are not due earlier. The money is due and payable immediately on receipt of notice. The 40 days is given to make sure that distant Councils will have time to receive notice and remit.—*Journal.*

Order of Chosen Friends.

MEMBERS of Councils, be sure that your name is spelled right so there will be no mistake in your certificate.

FROM the Executive Committee doings, reported in the *Banner*, we take the following: Communications from California regarding a Grand Council in that State, both pro and con, were read, and it was ordered that the Supreme Councilor, upon proper petition, provided they have attained the requisite number of members, should proceed to an organization.

A COMMUNICATION was received from San Francisco requesting the Supreme Council to prohibit the organization of any more Councils in that city without the consent of two-thirds of the Councils, which was placed on file for the Committee on Laws and Supervision at the next session of the Supreme Body. [The local paper—*Our Chosen Friend*—heavily scores the writer of the above communication.]

A RESOLUTION was passed that all supplies should be procured from the Supreme or Grand Councils, and that if any Grand or Subordinate Council refuse to comply with the same they would be liable to suspension. It was also ordered that all full sets of supplies should emanate from the Supreme Council, and that a Grand Council had no right to purchase any portion thereof. It was further decided that Grand and Subordinate Councils must, in all cases, in binding their constitution and laws with the constitution and laws of the Supreme Council, have upon the outside of the cover the name of the Supreme officers, and such other matter as now appears thereon, and if the Grand or Subordinate Council desire the list of their officers printed on the cover, they should be on the inside pages, and that the same must come through the Supreme Council.

AN official petition for membership, bearing the seal of the Supreme Council, was adopted, and no other form or style is to be used. An official notice to members of assessments for use by Subordinate Councils, which has been copyrighted, was adopted. These notices will give each member the date and number of death, number of assessment, date that it was levied and when it becomes due, name and number of Council, and everything required to make it complete. It is also the intention to print upon the back of these notices the condition of the Supreme Treasury and other important information. These are to be furnished by the Supreme Council, but only as they are needed, they being sent at the same time that the notice issued by the Supreme Recorder is forwarded. This is not done for profit, but that the Councils may properly inform their members of an assessment. The price will be no higher than at present, and it is thought that this can be reduced somewhat. This order will go into effect upon the call for Assessment No. 6, the *Banner* company at the same time being notified that they will no longer sell, or offer for sale, any supplies reserved by the Supreme Council.

I. O. G. T.

SONOMA COUNTY is said to be the stronghold of the temperance organizations in the State. The Lodge at Guerneville is one of the strongest of 26.

BOULDER CREEK, Santa Cruz county, is quite a temperance community. Dr. Merrick recently organized a Lodge there with 65 charter members, and several more have been since added.

WHAT is the matter with San Juan, San Benito county? We see it stated that Rev. M. D. Merrick, G. L., visited that place and made no converts. The local paper says that the recent death of two gentlemen from the effects of a too plentiful use of cold water, has had the effect of making the San Juan tipplers more confirmed in their allegiance to the cause of King Alcohol.

MERRILL LODGE, I. O. G. T., has sent out the following circular: "Intemperance is an acknowledged and growing evil; an evil so wide-spread and overpowering that it can only be successfully combated by organized, powerful and persistent effort. Merrill Lodge has for many years in this community wrestled with this mighty evil with an heroic earnestness worthy of success. There are now living hundreds who have been made better citizens through its missionary influence, many have been reclaimed to home and usefulness, many have been saved from falling, and many more have been blessed, by its pure and elevating power. Those who have been long laboring in this organization, feel constantly the need of more help. They see the youth of our city surrounded by an almost resistless temptation and danger. We see them swept away even from Christian and moral homes, carried to disgrace and ruin, because of inadequate efforts put forth to save. Merrill Lodge feels that while it has the sympathy of the better class of the community, active co-operation would be much more effective. Should all the friends of temperance in Los Angeles become members of a live working Temperance organization, the effect for good in reforming the inebriate, and in forming correct habits and principles among the young, could hardly be estimated. We need the pure and highly cultured; we need those who are gifted in conversation to instruct and lead; we need the parents' guiding presence; we need those who will esteem it an honor to be instrumental in assisting to raise up fallen humanity, as well as to save the young, the pure and the virtuous from ever falling into the snares of the tempter. We need the hall for which we have worked and hoped so long, cheerful, happy reading rooms, always open for tempted youth, temperance lunch rooms, with wholesome food at a nominal price, drinking fountains in different parts of the city. These and more are possible if you will only give us your full and earnest support and co-operation. Will you come and join us?"

U. O. A. D.

THE centennial anniversary of the United Ancient Order of Druids will be held at Covenant hall, B'nai B'rith building, on Friday evening, May 6, 1881. We acknowledge, with thanks, an invitation to be present.

SOME years ago I visited the Druidic relic, the Logan stone, called Men-Ambre, or Men-Amber in Cornwall, which was overturned and injured by the fanatical soldiers of Cromwell. What I wish to remark here is brief: I discredit the idea that *ambre* in this case means ambrosial or immortal, like *Petræ Ambrosiæ*—the living or immortal stones or rocks. I believe *Ambre* simply means *of or belonging* to the hill or mountain. Not far off, five or six miles, is CARN BRE, which is *Heap* (of stones) *on the hill*, supposed to be Druidical. Ambre is for *an-bre*, the hill. The people of the plain for a great distance attended on Sundays at Menambre in olden times.—*J. D.*

THE Poet Laureate is an old institution in England. It was first established in the following manner: In the year 1176, Prince Rhys ab Gruffydh held a great Eistedhvod or Congress of Bards with extraordinary magnificence and pomp, in the castle of Cardigan, where bards and musicians were admitted to graduation. Great was the fame of this Congress throughout Britain and Ireland. The Prince Rhys ab Gruffydh was at that time on terms of peace with the English King, Henry II., and when he was on a diplomatic visit to the said king at Oxford, where the Parliament was in session, the king asked him to give a description of that splendid Congress of Bards held at Cardigan. The prince complied, and the king's admiration was so excited that he determined to have something of the same nature, if possible, within his own country. He could not establish a session of Bards for he had no Bards; therefore he at once created an Order, to wit, that of Poet Laureate, and furnished the poet's salary of 100 shillings from the Privy Purse of the Crown.
